INTRODUCTION

However brief it is desirable to make the introduction to a volume already large, some preliminary explanations are absolutely required.

In the first place, those who use the Gazetteer ought to be told what they may expect to find in it. As regards the contents of the Gazetteer, the chief thing aimed at has been to make the selection of names entered in alphabetical order as complete as possible for the purposes of those who are most likely to consult it, and to localise the places entered by the method most likely to facilitate their being found or placed on the map.

With respect to the selection of names, the British Isles have, of course, been more liberally dealt with than any other parts of the world. All parishes with the exception of town parishes distinguished by saints and other ecclesiastical names (like Allhallows) have been inserted; so also have all places with a railway station, and all places with a post-office, not being town sub-offices and branch offices; in Scotland also all villages separately entered in the census, and in Ireland all townlands with a population above 250, and all electoral divisions not entered under some other heading. Under parishes in England are included all those areas still known locally in the north of England as townships, but now no longer distinguishable from parishes by definition, and not distinguished in the census returns. Ecclesiastical parishes (formerly known as ecclesiastical districts) are all entered where they differ wholly or partly in name from the civil parishes with which they most nearly correspond; but to save space such parishes are entered, wherever possible, under the same heading as the civil parish. This rule is followed in Scotland as well as in England and Wales; and here it may be as well to state that, in accordance with the practice of the last census report, the same designations are used for Scotch as for English civil and ecclesiastical parishes, instead of the designations *quoad omnia* and *quoad sacra* parishes more familiar in that part of the kingdom.

Outside of the British Isles the criterion of selection most convenient to follow is that of population, wherever census returns, or more or less complete official or non-official estimates, are available for this purpose. But this criterion is not quite satisfactory, inasmuch as it does not always allow of our distinguishing the more important aggregations of population in small towns and villages. Even in England the census returns do not give the village population apart from that of the parish. In Spain and the Spanish possessions the only populations obtainable for small areas are those of the communes, often of considerable extent, and containing only small villages scattered over their area. Where there is the means of distinguishing between village and communal population, the lower limit of population adopted as the criterion of insertion for the more densely peopled parts of western Europe is 2000. For the more densely peopled parts of Asia for which we have census or other population figures (India, Japan, &c.), the limit adopted is 5000. It was considered that in densely peopled countries where smaller places happened to be mentioned, it is not unlikely that wherever mentioned they would be stated to be near some larger place; but in the sparsely peopled parts of the world, such as Siberia, no such presupposition can be made, and hence it was necessary to come below that limit in order to make the selection of names sufficiently comprehensive. The reasons for inserting small places are much stronger in the case of the British colonies and those parts of the United States which have been most recently settled; and in these parts of the world a great multitude of places utterly insignificant in respect of population (in a great many cases even below 100), but nevertheless not unlikely to be referred to by those interested in them through the emigration of friends or in other ways, have been included.

Even in those parts of the world where the criterion of population could be adopted, it has been taken as an absolute criterion only for inclusion, not for exclusion. A large number of places below the population limit have been entered on account of their geographical situation, historical interest, mineral resources, and for other reasons.

The articles on countries and the larger divisions of the globe generally are mostly by specialists, and are of sufficient length to allow of interesting information being given as to their features and resources. To allow space for this, without unduly increasing the bulk of the work, the articles on the minor subdivisions have been kept as short as possible, by confining the information contained in them to characteristics that are strictly local (such as the occurrence of minerals), and the omission of what is covered by the general articles on the countries or regions to which these subdivisions belong. In many cases merely the position of the minor subdivisions is indicated: but where this information is important, as in the case of the 'counties' of the British colonies and the United States, which are so often named in accounts of the resources of these parts of the world, it is never omitted. But as this is the sole purpose of making such entries, the entry is always made in the most concise manner possible. For the most part the position of a county, province, circle, district, and the like, is indicated

merely by mentioning the parallel of latitude and meridian of longitude that cross them or pass nearest to them, and in many cases the mention of one or other, or both of these, is replaced by the mention of some physical feature (such as an important river or a coast-line), or some important political boundary. Where a town, village, or settlement that gives name to a county, province, &c., is mentioned, it has been thought sufficient to refer to the division by an initial under the town or whatever it may be. Where the area and population of a division are to be found in a table elsewhere, a reference to the table is added.

Under seaports, information has always been given, where procurable, as to the accommodation afforded by the harbour—depth of water available, facilities of access, facilities for loading and unloading, and the like. This information has usually been taken from Lloyd's list, as published in the last issue of the *Warships of the World;* but occasionally consular reports or local correspondents have supplied the means of giving later information.

Pains have been taken to supply information as to the healthiness of towns and districts, especially in the warmer parts of the world. In the absence of other information on this head, particulars as to the mean temperature (in nearly every case that of the months of January and July, or the coldest and hottest months, whichever they may be, as well as the mean for the year) and the mean rainfall are given for thousands of places all over the world.

Populations have always been inserted from the latest available censuses, or official or non-official estimates for such parts of the world as are without censuses; but here attention must be drawn to one or two peculiarities in the present work. Populations are seldom given to the exact unit, according to the authority from which they are taken. Generally only the nearest 1000 is given, or, in the case of towns and villages below 5000, the 1000 next above the figure ascertained as the result of the last census. For this there are two reasons, each of which seems to me in itself decisive. In the case of the smaller towns it is desired, in any future edition issued subsequently to later censuses, to avoid the necessity for making such trivial alterations as from a population of 2346 to 2420, so as to devote the labour and expense that would be required for such useless changes to keeping the work thoroughly up to date in matters of real importance. In speaking of such changes as useless, I am quite aware that there are purposes for which it is necessary to have the exact census population even of small places, but these are not purposes served by an alphabetical arrangement, which is the idea of a gazetteer. The second reason for using round numbers is, that exact figures are more apt to be confusing than instructive, and it is for this reason alone that round numbers are given for the population of large towns. For small towns, villages, parishes, &c., the exact rules followed are these. For places in the British Isles, the nearest 500 above the census figure is given for all places above 1000, the sign $<$ being used to indicate that the population is below the figure indicated. For places below 1000, the nearest multiple of 250 above the census figure is given. For places in most parts of the world outside the British Isles, the nearest 1000 above the census figure is given for all places below 5000, unless they are below 2000; but <2000 may mean any population from 1 to 1999. In the British colonies and the United States, however, a distinction is made between places above and below 1500 but less than 2000, the former being entered as <2000, the latter as <1500.

With the statistical portion of the work in general special pains have been taken, more particularly with the view of making the statistical information supplied suitable to a permanent work of reference rather than to a year-book. In former times much information of a year-book character might reasonably enough be looked for in a gazetteer; but now, when so many cheap and excellent year-books, official and non-official, are issued, it is time to recognise that year-book statistics are thoroughly out of place in a gazetteer, which is bought perhaps once in a lifetime. Much labour has, therefore, been expended in compiling tables furnishing data that it may be interesting to compare with year-book returns twenty years or more hence, and in other ways to facilitate comparisons of statistical returns. In the tables of countries and some of the great divisions of countries, figures are frequently given in thousands (000 omitted) so as to allow of the introduction of more columns for comparison of different dates. To allow of the direct comparison of the rates of increase of population between different censuses, or in different countries with various census intervals, the rate of increase (or decrease) of population per cent. per annum has been calculated more extensively than in any other work with which I am acquainted. Where these rates are not copied from official returns (as they have been in a few cases), they are all calculated by the formula, $100\left(\sqrt[n]{\frac{a'}{a}}-1\right)$ for rate of increase, $100\left(\sqrt{\frac{a}{a'}}-1\right)$ for rate of decrease, where n = the number of years between the two censuses, a' the population at the end, and a the population at the beginning of the period. Except in the case of the Russian articles contributors are not responsible for tables of area and population. Statistics are generally avoided in the articles on countries in the body of the book, except where they are useful to indicate growth or decay within certain periods; but various statistics are given in a form to facilitate comparison on pp. 3–5 in the Appendix. On p. 6 of the Appendix is a table giving the estimated population of various countries for each year, from 1891 to 1901, on the assumption of the same rate of increase as obtained between the last two censuses, or the last two at a decennial interval, being continued down to 1901. This table may prove of interest or utility in two ways. First, when a new census is taken it will serve to show at a glance whether the population has been increasing at a quicker or slower rate since the last census than previously; and second, for any calculations per head of population it will furnish

population figures that are almost certain to be nearer the truth than the last census returns. On pp. 7–12 of the Appendix, the agricultural statistics of the counties of the British Isles have been exhibited in such a form as, first, to facilitate direct comparison between the different counties, irrespective of differences in area; and secondly, to allow of a comparison between the two years in the second half of the 19th century in which the area under wheat has been greatest, and that in which so far it has been least.

Before leaving the subject of statistics, it may be well to explain, for the benefit of those who are given to add up, the discrepancies that will be found in many of the tables between the totals and the sum of the individual items as entered in the columns above. These discrepancies arise from two causes. First, when populations or other numbers are given in thousands, 1 is of course added to the thousands when the hundreds are 5 or above 5. In some cases the hundreds thus added may be exactly balanced by the hundreds omitted below 5, and in such cases there will be no discrepancy. But in other cases a discrepancy is unavoidable; *e.g.*:—

Full figures.	The same in thousands.
234,689	235
482,728	483
717,417	717

A similar result is often brought about where conversions are made from foreign measures, as from kilomètres or square kilomètres into miles or square miles, the totals as well as the individual items being obtained (as is right) by conversion. Thus if the hundreds in the example above represented decimals of a mile or a square mile, the same discrepancy in the total would be the result.

In the spelling of foreign names the rules for the most part adhered to are those of the Royal Geographical Society, of which the following are the most important:—

'1. No change is made in the orthography of foreign names in countries which use Roman letters; thus Spanish, Portuguese, Dutch, &c., names will be spelt as by the respective nations.

'2. Neither is change made in the spelling of such names in languages which are not written in Roman character as have become by long usage familiar to English readers: thus Calcutta, Cutch, Celebes, Mecca, &c., will be retained in their present form.

'3. The true sound of the word as locally pronounced will be taken as the basis of the spelling.

'4. An approximation, however, to the sound is alone aimed at. . . .

'5. *The broad features of the system* are:—

(*a*) That vowels are pronounced as in Italian, and consonants as in English.

(*b*) Every letter is pronounced, and no redundant letters are introduced. . . .

'6. Indian names are accepted as spelt in Hunter's *Gazetteer of India*, 1881.

'7. In the case of native names in countries under the dominion of other European Powers in whose maps, charts, &c., the spelling is given according to the system adopted by that Power, such orthography should be as a rule disregarded, and the names spelt according to the British system, in order that the proper pronunciation may be approximately known. Exceptions should be in cases where the spelling has become by custom fixed, and occasionally it may be desirable to give both forms. . . .'

In this Gazetteer, where pronunciation is indicated by the re-spelling of a name with a small or 'lower case' initial in parentheses after the name which forms the heading, the names are re-spelt according to the same rules as are followed in the spelling of foreign names phonetically spelt. Accordingly those who use the Gazetteer will be good enough to remember that where, for example, kĕnz is given as indicating the pronunciation of Keynes in Ashton Keynes, that means that the name rhymes with 'rains,' not with 'means.'

The following list gives the peculiarities of pronunciation of the scheme of the Royal Geographical Society, along with certain additional signs (in brackets) that have been adopted in this Gazetteer, those which have been adopted only in names re-spelt to indicate pronunciation being distinguished by asterisks. Letters not included in this list have the same sounds as in English.

Letters.	Pronunciation and Remarks.	Letters.	Pronunciation and Remarks.
a	*ah*, *a* as in *father*.	ei	the sound of the two Italian vowels, but is frequently slurred over, when it is scarcely to be distinguished from *ei* in the English *eight* or *ey* in the English *they*.
e	*eh*, *a* as in *fate*.		
(*ĕ	like *e* in *get*.)		
i	English *e*; *i* as in *ravine*.		
(*ĭ	like *i* in *pin*.)	ch	always as in *church*.
o	*o* as in *mote*.	(*dh	like *th* in *this*.)
(*ŏ	like *o* in *not*.)	g	always hard, as in *give*.
(ö	like French *eu*.)	kh	the Oriental guttural, as in *khan*.
u	long *u* as in *flute*.	gh	is another guttural, as in the Turkish *Dagh*.
(*ŭ	like *u* in *but*.)	th	stands both for its sound in *thing* (*the only sound for which it is used in this Gazetteer when names are re-spelt to indicate pronunciation), and as in *this*.
(ü	like French *u*.)		
ai	as in *aisle*, or English *i* in *ice*.		
au	*ow* as in *how*.		
aw	when followed by a consonant or at the end of a word, as in *law*.	y	is always a consonant, as in *yard*.
		zh	the French *j*, or as *s* in *treasure*.

It should be added that in names phonetically spelt, *c* and *q* are never used, *c* being always replaced by *s* or *k*, *q* always by *k*; and that where *ph* is used it never has (except in Greek names) the sound of *f*, but always of the two letters *p* and *h* separately. In this Gazetteer the mark ¯ over a letter, as in ē, is sometimes used to indicate length, and to prevent the sound from being confounded with that indicated by the mark ˘.

In the spelling of Hunter's *Gazetteer of India*, the accented vowels have the same sounds as the unmarked vowels in the scheme of the Royal Geographical Society, the unaccented vowels mostly the same sounds as those indicated in the list above by the mark ˘ above the letter, but the unmarked *a* is sounded like *a* in *rural* (or like *u* in *but*).

The tonic accent or accent of stress is indicated in the Gazetteer by an acute accent following the syllable to which it belongs.

Russian and Greek names, though belonging to languages that do not use the Roman alphabet, are in this work spelt by systems of transliteration, the same letters in the original always being represented by the same letters or combinations in the transcription. In Russian this indicates nearly the correct pronunciation, but in Greek it is not so. In Greek, moreover, the transliteration is not quite strict, two letters being used for the Greek *υ*. Where not combined with any other vowel this letter is represented by *y*, but where it is so combined, by *u*. *Ph* is used for the Greek *φ*, *v* for *β*.

In accordance with what seems to be implied in the first rule of the Royal Geographical Society, all the diacritic marks used in French, German, Scandinavian, Spanish, Portuguese, Hungarian, Roumanian, and the Slavonic languages using the Roman alphabet (including also those Slavonic languages which, like the Servian and Bulgarian, use the Cyrillic alphabet, but have a recognised mode of conversion into the Roman), are employed in this Gazetteer. The value of the French and German diacritically marked letters may be presumed to be familiar. The following is a list of the other letters with diacritic marks, along with their equivalents mostly in the scheme used for phonetic spelling:—ã, õ (in the Portuguese combinations ão, õe) indicate that the sounds of the letters are accompanied by the sound of the French semi-nasal heard in *on*), ą, ę (in Polish) = ang and eng respectively; á in Hungarian = a (the Hungarian a being sounded like ŏ); â, ê, î (in Roumanian frequently interchanged and all sounded alike, nearly) = ŭ; ć = ty (the sound heard at the beginning of *tulip*), č = ch; ê, ę, î (see above, under â, a); ĭ (final in Roumanian), not sounded; ł (Polish) a hard doubled l; ń and ń = ny (French gne); ř = rzh; š = sh; ś, a softened s; ţ = ts; ŭ (final in Roumanian), scarcely sounded; ź (in Polish ż) = zh; ź, a softened z. Some of the sounds indicated by diacritically marked letters must, however, be heard from the lips of those who are acquainted with them. The following combinations may also be noted: cs in Hungarian = ch; cz in some Slavonic languages = ch; esci in Roumanian = eshti; gy in Hungarian = dy (nearly j); rz in Polish = rzh, almost zh (but prze, przi = pshe, pshi); sz in Hungarian = s (s sounding like sh), in Polish = sh; szcz in Polish similar to shch; zs in Hungarian = zh.

Many phonetically spelt names are met with in English in spellings originally French or German, and hence it will be of use to give here the equivalents according to the spelling of this Gazetteer for French and German letters and combinations which differ from those of the Gazetteer.

French.	German.	In Gazetteer.
...	ch	kh
ch	sch	sh
dj	dsch	j
eu	ö	ö
i or y	j	y
ou (before a consonant or final)	u	u
ou (before a vowel, frequently)	...	w
...	s (frequently)	z
tch	tsch	ch
u	ü	ü
...	u (before a vowel, frequently)	w
v	w	v
ts	z	ts

If those who consult the Gazetteer will attend to the facts just mentioned, and will bear in mind the frequency with which S and I., and n and u, are confounded in printing from MS., they will more readily find in the Gazetteer a considerable number of names which they may meet with under other spellings than are there entered.

All names are entered in strict alphabetical order, except those consisting of two or more words entered in an inverted order, the inversion being indicated by a comma. Where there are simple names identical with the name coming first in such inverted compound names, the inverted names come immediately after the simple names. Hence the order would be:—

Jefferson.
Jefferson, South.
Jefferson City.

The following are the parts of names that are usually transposed in the alphabetical arrangement: Great, Much, Little, High, Low, Nether, Upper, Long, New, Old, North, South, East, West (except where the second part of the name is significant, like Town, Market, Street, Heath, &c.), Rio, Lago, Punta; La, Le, Les, Los, where they belong to a language still spoken where the names occur, otherwise they are inserted in the natural order. Old World names that have been transferred to the New World or colonies elsewhere, with the prefix New, East, West, &c., are entered in their natural order; *e.g.*, New York. Many double names of English parishes are frequently written indifferently with the parts of the name in either order, as Winterbourne Earls, or Earls Winterbourne. These if not found under the one letter will be found under the other.

When there are numerous entries of the same name, the name of the country to which they belong determines the alphabetical order; and when there are more than one in the same country, the name of the chief division to which they belong next determines the order. The convenience of this arrangement will be apparent on referring to such entries as Franklin, Washington, Norton, Sutton, or Neustadt.

In the body of articles cross references are frequently indicated simply by brackets and Clarendon type thus [**Alexandria**]. Such references are frequent after general observations on climate, to entries at which illustrative details (as to temperature, rainfall, or both) will be found. Where a cross-reference is given from a form of a name which is a mere variation in spelling (such as Dubhooce. See Dabhoi), the form from which the reference is given will not always be found under the entry to which reference is made.

With the exception of the articles belonging to the Russian Empire, both in Europe and Asia, all of which, whether long or short, are by Prince P. Kropotkin, the more important contributions to the Gazetteer are signed by the initials of the contributors, a list of whom is given below. Among these I cannot sufficiently express my thanks to Mr. Bealby, formerly on the staff of the *Encyclopædia Britannica*, and afterwards of *Chambers's Encyclopædia*, for the painstaking, valuable, and cordial assistance he has rendered in the preparation for press of large portions of the MS., and in proof-reading from the middle of M to the end of the alphabet. I have to thank Mr. I. P. A. Renwick, M.A., LL.B., of the *Statesman's Year-Book*, and Mr. E. Heawood, for similar assistance, though on a less extensive scale; Mr. W. J. Turner, for assistance in the preparation of the MS. from H to K; and Miss E. J. Hastings, for assistance in the revision of the MS. of part of S and the beginning of T. Dr. Robert Brown, F.R.G.S., F.L.S., author of *The Countries and Peoples of the World*, &c., &c., joint author with Sir Lambert Playfair of the *Bibliography of Morocco*, published by the Royal Geographical Society, has kindly contributed several articles and revised the proofs of others on parts of the world with which he is well acquainted. The statistical appendix was mainly compiled by Mr. J. A. P. Mackenzie, librarian to the Royal Statistical Society. I am much indebted also to Dr. C. H. Leete of New York for his kindness in revising all the proofs of the articles on the states and more important geographical features of the United States in addition to those which he has himself written. My thanks are also due to Miss E. G. Winter, Miss M. A. Leach, and Miss M. Ransome, and other assistants who have worked under my immediate direction.

LIST OF CONTRIBUTORS OF INITIALLED ARTICLES.

R. E. A. . . .	R. E. Anderson, M.A.
E. A.	Edward Archer, Recco-Ligure.
J. B. R. . . .	J. Batalha-Reis, Consul for Portugal, Newcastle-on-Tyne, formerly Regius Professor of Natural Sciences, afterwards also special Professor of the Nosology of Plants at the Agronomical Institute, Lisbon.
J. T. B. . . .	J. T. Bealby, B.A. (Cantab.).
H. N. D. . . .	H. N. Dickson, F.R.S.E.
E. J. H. . . .	Miss E. J. Hastings.
C. H. L. . . .	Dr. C. H. Leete, A.M. (Yale), New York.
H. G. S. . . .	Dr. H. G. Schlichter.
W. S.	William Scudamore, M.A. (Cantab.), New York.
W. J. T. . . .	William John Turner.

I have also to express my cordial thanks to a host of local revisers, who, at the request of the publishers, have read and, where necessary, corrected and supplemented articles on the towns and districts in which they reside. Thousands of articles, long and short, belonging to the British Isles and English-speaking America have thus been sent out for revision; and, while of course it need hardly be mentioned that these local revisers are in no way responsible for any errors that may remain in the articles, it is a pleasure to me to acknowledge the appropriate way in which the articles have generally been corrected, and hints given for extension. Many of the most interesting particulars in the articles are due to the local correspondents. Among other things, it is to them chiefly that I am indebted for information as to the local pronunciation of peculiarly pronounced English names. I must not omit to take this opportunity of expressing my thanks to Mr. J. W. Bartram, of Messrs. Longmans' establishment, who has had charge of the correspondence in connection with the local revision, for the numerous notes on various points of interest with which he has himself furnished me.

It is not possible to enumerate all who have assisted in the work of revision; but it may be mentioned that among those to whom the articles have been sent in the United Kingdom are County Clerks, Clerks of the Peace, Town Clerks, Clerks to Unions and Medical Officers, and Clerks to Petty Sessions Courts; Rectors and Vicars of Parishes; Librarians; Head Masters of Grammar Schools, National Schools, Board Schools, Technical Schools, and Scotch Public Schools; Postmasters; Organising Secretaries of Technical Instruction; Committees for County Councils; H.M. Inspectors of Schools; the Engineers to the Thames Conservancy and the Severn Commission.

In America the slips, besides being sent to such authorities as Dr. C. H. Leete, Col. C. L. Norton, and R. G. Thwaites, Esq., have been sent broadcast to the librarians of state and public libraries, of university and school libraries, of the libraries of literary, historical, and other societies; to booksellers; to clergymen; to college professors; to teachers of normal, public, and private schools; to town officers; to prominent and well-informed citizens; and, failing these, to the local postmasters.

The following list contains the names of those local correspondents to whom the publishers are chiefly indebted for the revision of articles:—

Wm. Heaver, Esq., 29 Grover Street, West, Norwich.
The Rev. W. Morgan Jones, Diocesan Directory, Bangor.
Dr. Stewart, Deeside Hydropathic Establishment, Heathcot, Aberdeen.
Mr. A. Stenhouse, Glasgow.
Mr. H. Walker, Leeds.
Mr. J. R. Tutin, Hull.
Mr. R. S. Shearer, Stirling.
Mr. E. T. Page, Bridgwater.
Messrs. Baily & Wood, Cirencester.
Messrs. Lyne & Son, Grantham.
Mr. J. E. Cornish, Manchester.
Messrs. Stephen & Pollock, Ayr.
Mr. T. Dargan, Belfast.
Mr. W. H. Barrett, Chichester.
Mr. J. R. Braithwaite, Wakefield.
Mr. R. I. Drake, Eton.
Messrs. Gardner & Co., Goole.
Mr. A. Gardner, Paisley.
Mr. W. Lewis, Cardiff.
Mr. W. R. Massie, Barnsley.
Mr. W. Eardley, Crewe.
Messrs. Riley Bros., Loughborough.
Mr. J. Stordy (Thurnam & Sons), Carlisle.
Mr. J. Thin, Edinburgh.
Mr. E. A. Walford, Banbury.
Messrs. Walford & Sons, Buckingham.
Miss Langley, Reading.
Mr. W. North, Tewkesbury.
Mr. Linnell (Messrs. Cornish Bros.), Birmingham.
Mr. F. Hockliffe, Bedford.
Mr. F. Hinde, Wolverhampton.
Mr. T. Mark, Kidderminster.
Messrs. Wood & Son, Perth.
Wm. George's Sons, Bristol.
Mr. H. Ling, Dorchester.
Messrs. Brear & Co., Bradford.
Mr. W. Masland, Tiverton.
Mr. R. F. Houlston, Chippenham.
Messrs. Read & Barrett, Ipswich.
Messrs. Adnitt & Naunton, Shrewsbury.
Messrs. Warren & Sons, Winchester.
Mr. J. Montgomery, Londonderry.
Mr. F. T. Groom, Bury St. Edmunds.
Mr. R. Bowes (Messrs. Macmillan & Bowes), Cambridge.
Messrs. Warnock & Co., Newry.
Messrs. Andrews & Co., Durham.
Mr. H. S. Eland, Exeter.
Mr. T. Butcher, Brecon.
Messrs. Thew & Son, King's Lynn.
Messrs. Slatter & Rose, Oxford.
Mr. E. Fox, Stratford-on-Avon.
Mr. W. F. Westcott, Plymouth.
Mr. J. Wardleworth, Accrington.
Mr. M. Braithwaite, Bishop Auckland.
Mr. J. Burton, Louth.
Mr. T. Morgan, Cork.
Mr. Samuel Andrew, Oldham.
Mr. W. E. Clegg, Oldham.
Messrs. Bemrose & Son, Derby.
Messrs. Brown & Co., Salisbury.
Messrs. Macneur & Bryden, Helensburgh, N.B.
Mr. W. Kidd, Dundee.
Mr. H. Gill (Messrs. Gill & Son), Dublin.
Mr. H. Grey, Alnwick.
Messrs. Henderson & Son, St. Andrews, N.B.
Messrs. Ledger & Son, Limerick.
Messrs. Griffin & Co., Portsea.
Messrs. Davies & Son, Gloucester.
Mr. W. D. Dobson, Harrogate.
Mr. J. Teal, Halifax.
Mr. Hobbs, Blandford.
Mr. H. M. Gilbert, Southampton.
Messrs. Claye & Son, Stockport.
Mr. E. W. Coates, Huddersfield.
Mr. W. J. Smith, Brighton.
Mr. J. Loder, Woodbridge.
Mr. J. B. Clark, Penzance and Tavistock.
Messrs. Phillips & Son, Newtown, Montgomery.
Messrs. Mylrea & Allen, Douglas, Isle of Man.
Mr. W. J. Knight, Ventnor.
Mr. J. Hawthorn, Uppingham.
Messrs. Mawson, Swan & Morgan, Newcastle-on-Tyne.
Mr. J. C. Perfect, Burton-on-Trent.
Mr. E. C. Bird, Tring.
Mr. R. Pelton, Tunbridge Wells.
Mr. W. Blair, Free Press Office, Tonbridge.
Mr. A. Iredale, Torquay.
Miss Taylor, Totnes.
Mr. E. Bamford, Ashborne.
Mr. A. King, Thrapston.
Mr. Z. Wright, Thirsk.
Messrs. Tingle & Co., Stockton-on-Tees.
Mr. J. E. Arnett, Tenby.
Mr. A. Boardman, Bishop's Stortford.
Messrs. Little, Brown & Co., Boston, U.S.A.
Messrs. Dingwall & Wilson, Boston, Lincolnshire
Messrs. L. & M. Merridew, Boulogne-sur-Mer.
The Misses Liddell, Bodmin.
Mr. S. Price, Ware.
Mr. J. Sampson, York.

GAZETTEER OF THE WORLD

Aa, aach, ach, ach, å, á, different forms of a Teutonic root, meaning 'flowing water,' met with in river names in Central and Northern Europe and in Iceland.

Aa, the name of many rivs. in Europe, among which are:— **1.** In N. France, enters the Strait of Dover below Gravelines, becomes navigable at St. Omer, and communicates by canal with Dunkirk. **2, 3.** In Holland, N. Brabant; the one joins the Dommel at Bois-le-duc, the other joins the Beerse, a trib. of Dommel, a little above Bois-le-duc. **4.** In Holland, Groningen, rises in the Bourtanger Moor, enters the Dollart on the frontier of Holland and Germany. **5, 6.** Two tribs. of the Ems; one with mouth at Greven (upper Ems), the other with mouth at Elbergen. **7.** In Switzd., Unterwalden, traverses L. Sarnen, and enters L. of Lucerne near Alpnach. **8, 9.** In Russia; the one (Treider-Aa) flows by Volmar into the Gulf of Riga, 13 m. NNE. Riga, the other (Courland-Aa) past Mitau, and sends one arm (Bolder-Aa) into the Düna, the other into the Gulf of Riga NW. of Riga.

Aach, tn., Ger., gd.-duchy of Baden, 19 m. NW. by W. Constance. P. <2000.

Aachen, Prussia. See **Aix-la-Chapelle.**

Aafjord, comm., Norway, prov. N. Trondhjem, on the W. ct., 40 m. N. Trondhjem. P. <2006.

Aakirkeby, tn., Denmark, in the SW. of Bornholm, 3 m. from the coast. P. <2000.

Aalborg, seapt. and industrial tn., Denmark, in the NE. of Jutland, prov. on the S. side of the Liim Fjord, across which there is a rly. bridge here, 35 m. SW. Frederikshavn, with shipbuilding yards and the royal residence of Aalborgshus; greatest depth of harb. 14–15 ft. P. 19,500.

Aalen, tn., Ger., kgd. Würtemberg, 30 m. N. by E. Ulm, 13 m. E. by N. Gmünd, with iron-mines. P. 7000.

Aalesund, tn., Norway, prov. N. Bergenhus, on a small isl. on the W. ct., 68 m. SW. by W. Kristiansund, with important cod-fisheries. Mean temp., yr. 44.1° F., Feb. 34.8°, July 56.3°; rainfall (18 yrs.), 39.29 in. P. 8400.

Aalia Paakai, salt lake, Sandwich Is., near Honolulu, within 1 m. of the sea-coast. See *Nature*, xlv. p. 29.

Aalsmeer, tn., Netherland, N. Holland, 9 m. SW. Amsterdam, on E. edge of Harlemmer Meer. P. <5000.

Aalten, vil., Holland, prov. Gelderland, 24 m. SW. by S. Enschede. P. 6800.

Aamot, tn., Norway, on the Glommen, 87 m. N. by E. Christiania, with textile manufactures. P. <2000.

Aar, or **Aare,** riv., Switzd., rises in the Upper and Lower Aar glaciers in the SE. of cant. Bern, traverses Haslethal, where it forms the Handeck Fall, traverses also Lakes Brienz and Thun, is diverted by a canal into L. Bienne, from which it issues by the Zihl Canal, enters the Rhine opposite Waldshut; navigable from Thun; below Thun passes Bern, Solothurn, and Aarau; length 175 m., area of basin 6800 sq. m.

Aarad, a group of oases in the S. of Tunis, on the G. of Cabes.

Aarau, tn., Switzd., cap. Aargau, on r. bk. Aar; has various manufactures, among which those of scientific instruments are noted. P. 6800.

Aarberg, tn., Switzd., cant. and 11 m. NW. Bern, on the R. Aar, at the junc. of the Aar Canal. P. <2000.

Aarburg, tn., Switzd., cant. Aargau, 2½ m. S. Olten, on the r. bk. of the Aar. P. <2000.

Aardenburg, tn., Holland, prov. Zeeland, 13 m. SSW. Flushing. P. <2000.

Aargau, *Ger.; Fr.* **Argovie,** cant., Switzd., skirted by the Rhine on the N., and traversed by the Aar and its tribs., Reuss and Limmat. The surface is varied. The highest summits (none above 3000 feet in height) belong to the Jura, in the NW. In the S. and E. are some of the last spurs of the Alps. The soil is well cultivated. There are about 5000 acres of vineyards. The chief mineral is salt, produced at Rheinfelden and elsewhere. Among the mineral springs are those of Schinznach. Manufactures include cottons, ribbons, cutlery (see **Aarau**), machinery, &c. The constitution is democratic. The legislative body is a Great Council, elected by the people, and this body elects the executive council and the supreme court of justice. Cap. Aarau. Area 542 sq. m. P. (1888) 193,580. See **Switzerland,** table.

Aar-glacier in the E. of the Bernese Alps, divided into Upper, Lower, Lauter (clear), and Finster (dark) Aar-glacier.

Aarhus, or **Aarhuus,** seapt., Denmark, on the E. ct. of Jutland, prov. 22 m. S. by E. Randers, with the finest harb. on the penin. formed by the mouth of the Mölla-Aa; depth at low water 19 ft., at high water 21 ft. P. 33,300.

Aari an der Veen, tn., Netherlands, S. Holland, 10 m. E. by S. Leiden. P. 3000.

Aarmühle, or **Ramell,** suburb of Interlaken, Switzd.

Aaroe, small isl. off E. ct. of Schleswig, 55° 15′ N.

Aarwangen, vil., Switzd., cant. Bern, 11 m. E. by N. Solothurn. P. <2000.

Aarziehlebad, Switzd., cold sulphur spring near Bern.

Aas, fortified tn., Norway, Akershus, with excellent harb. at mouth of Lindal, 9 m. S. Christiania. P. <2000.

Aasgaardstrand, vil., Norway, prov. Jarlsberg and Laurvik, on the W. side of Christiania Fjord, 4 m. NNE. Tönsberg. P. <2000.

Aasleagh, place, Ire., SW. co. Mayo, bar. Murrisk, 14 m. S. by W. Westport, P.O.

Aasnäs, tn., Norway, prov. Hedemarken, on the Glommen, 68 m. NE. Christiania. P. <5000.

A'asy, Nahr El. See **Orontes.**

Áb, Persian and Sanskrit, 'water,' Murgh-ab, Doáb. In Central Asia it often appears in the form *au.* The same root is no doubt found in the Slavonic *ap* (Angerap), and *awa* or *ava* (Zwittawa), and in the Celtic *aw* (Loch Awe), *ow* (Owenrea), *avon* or (Welsh) *afon* (Gaelic *abhain*).

Ababdeh, Abab, or **Habab,** tribe scattered over the region between the Nile and the Red Sea, Upper Nubia, the main body of the tribe inhabiting the plateau of Nakfa, between the Red Sea and the R. Anseba, between 17° and 18° N. They are Mohammedans; most of them speak Arabic, but a few in the S. a language allied to the Amharic of Abyssinia.

A-Babu'a, African tribe, S. of Welle R., about 23°–26° E.

Abacaxis, riv., Brazil, joins r. bk. Amazon about midway between the Madeira and Tapajos.

Abaco, or **Lucaya,** Great and Little, two isls., Bahamas, the larger with lighthouse in 25° 51′ N., 77° 11′ W.

Abad, a Sanskrit and Persian suffix, 'a dwelling,' 'town.'

Abadeh, tn., Persia, prov. Irak Ajemi, 105 m. SSE. Ispahan.

Abadi, a member of the Ababdeh.

Abadín', tn., Spain, prov. Lugo, dist. Mondoñedo. P. <5000.

Abai, seapt., SW. Borneo, 6° 21′ N., with harbour admitting vessels drawing 13 feet.

Abai (Abyssinian, 'father of waters'), riv. See **Bahr-el-Azrek.**

Abaite, riv., Brazil, joining San Francisco on l. bk. about 18° S.

Abakan, riv., Siberia, joining l. bk. Yenisei, above Minusinsk, about 53½° N.

Abakansk, vil., at the mouth of the Abakan; has coal-mines and iron-works. P. 1000.

Abalak, vil., Siberia, on Irtish near Tobolsk, place of pilgrimage.

Abancay, tn., Peru, Apurimac, on river of same name, in a dist. growing excellent sugar-cane, 35 m. W. by S. Cuzco. P. 3000.

Abando, comm., Spain, prov. Vizcaya, dist. Bilbao. P. <5000.

A-Bángba, African tribe, N. of Welle R., about 3° N., 28½° E.

Abanilla, tn., Spain, prov. and 15 m. NNE. Murcia. P. 5600.

Abano, comm., Italy, Padua, 5 m. SE. tn. of Padua, with hot sulphur springs. P. 3500.

Abanto y Ciérvana, comm., Spain, prov. Vizcaya, dist. Valmaseda. P. 7000.

Abaran, tn., Spain, prov. and 20 m. NW. by N. Murcia P. <4000.

Abars, indep. tribe, India, Assam, in N. of Lakhimpur dist.

Abasa, or **Abasia.** See **Abkhasia.**

Abasswen, vil., E. Africa, Somaliland, 50 m. SW. Zeila.

Abas-Tuman, mineral waters, Caucasus, govt. and 103 m. W. Tiflis, dist. Akhaltsykh. Alt. 4413 ft. New high level astronomical observatory.

Abauj, co., Hungary, crossed by 48½° N., 21′ E.; largely covered with spurs of the Carpathians surrounding the broad valley of the Hernad. Has mines of gold, silver, iron, copper. Chief tn., Kaschau. See **Hungary.**

Abazai, fort and vil. on the NW. frontier of India, Pesháwar dist.

Abb, fortified tn. of Arabia, Yemen, about 100 m. S. Sana.

Abbadia, seapt., Brazil, prov. and 130 m. NE. Bahia.

Abbadia San Salvatore, comm., Italy, Tuscany, Siena, 18 m. S. Montepulciano. P. <4000.

Abbaretz, vil., France, dep. Loire Inférieure, 24 m. N. Nantes. P. (comm.) <3000.

Abbas, Lat., 'abbot,' a common element in place names, Eng., in many of which *Abbots,* or *Abbotts,* is found as an alternative.

Abbas, or **Abbots Worthy,** vil., Eng., Hampshire, Andover div., on the Itchin, 2½ m. NE. by N. Winchester, 2½ m. W. Itchin Abbas stn. P. 1000.

Abbas and Temple Combe. See **Temple Combe.**

Abbasabad, tn., Persia, on the Caspian Sea, 70 m. NE. by E. Kazvin.

Abbasiyeh, vil., Egypt, 3 m. NE. Cairo.

Abbazia, watering-place, Austria, Istria, on the W. side of the Gulf of Fiume, 9 m. W. by S. Fiume. P. <2000.

Abbenhall. See **Abinghall.**

Abbenrode, vil., Prussia, Saxony, on the Oker, 19 m. W. Halberstadt. P. <2000.

Abbeokuta. See **Abeokuta.**

Abberley, par., Eng., Worcestershire, Bewdley div., 7½ m. SW. Kidderminster, P.O. P. <750.

Abberton, par., Eng., Essex, Colchester div., 4 m. S. by W. Colchester, 3 m. WSW. Wyvenhoe stn., P.O. P. <500.

Abberton, par., Eng., Worcestershire, Evesham div., 7 m. NNW. Evesham, 4½ m. N. Fladbury stn. P. <250.

Abberwick, par., Eng., Northumberland, Berwick-upon-Tweed div., 3½ m. W. Alnwick. P. <250.

Abba Yared, mt., Abyssinia, in the N. of Tigre. Alt. 15,015 ft. (*ö.* Rüppell).

Abbaye = Eng. 'Abbey,' the name, or part of the name, of many places in France and French Switzd.

L'Abbaye, vil., Switzd., Vaud, on Lake de Joux, 17 m. NW. by W. Lausanne; near it remarkable caves with stalactites. P. <2000.

Abbess Roding. See **Abbots Roothing.**

Abbeville, tn., France, Somme, on both banks of R. Somme, 26 m. NW. by W. Amiens, cap. arr.; accessible by vessels of about 150 tons; manufactures fine woollens, velvets, hosiery, carpets, &c. In the 9th cent. a dependency of the Abbot of St. Ricquier, hence known as *Abbatis Villa,* from which name the present form is derived. P. 18,100.

Abbeville, tn., U.S., S. Carolina, cap. of A. co., 77 m. W. by N. Columbia. The co. is on the W. frontier. P. (of tn.) <2000.

Abbey, par., Eng. See **Dercham West.**

Abbey, par., Ire., Clare. See **Corcomroe.**

Abbey, place, Ire., SE. co. Galway, bar. Leitrim, 10 m. SE. Loughrea, P.O. P. <250.

Abbey, tn., Ire., Tipperary, bar. Iffa and Offa East, 2 m. W. Clonmel. P. <250.

Abbey, par., Scot., NE. Renfrewshire, including part of Paisley, all Johnstone, and several neighbouring vils.; 15,924 ac. P. 42,887.

Abbey, stn., Wales, Glamorganshire. See **Neath.**

Abbey Craig, rocky hill, Scot., co. and 1½ m. NE. of Stirling, crowned by the Wallace Monument.

Abbeycwmhir, or **Gollan and Cefn Pawl,** par., Wales, Radnorshire, 12½ m. NW. by N. New Radnor, 5 m. NW. by N. Penybont stn.; par. 11,345 ac. P. <500.

Abbeydale, eccles. par., Eng., Derbyshire, in ancient pars. Dronfield and Norton. P. <1000.

Abbeydore, par., Eng., Herefordshire, Ross div., on the Golden Valley Rly., 10 m. SW. by W. Hereford, P.O.; par. 5503 ac. P. <500.

Abbeydorney, Montanagay, or **Montnagee,** tn., Ire., NW. co. Kerry, bar. Clanmaurice, 5 m. N. Tralee, on the Waterford and Limerick Rly., P.O. P. <250.

Abbeyfeale, par. and tn., Ire., SW. co. Limerick, bar. Glenquin, 12 m. SE. by E. Listowel, on the Waterford and Limerick Rly., PMT.O. Par. 18,149 ac., P. <5000; vil. P. 1000.

Abbey Foregate, stn., Eng., Salop, on the L. & NW. R., in a northern suburb of Shrewsbury.

Abbeygormacan, par., Ire., Galway, bar. Longford; 11,756 ac. P. 1000.

Abbey Green, Scot. See **Lesmahagow.**

Abbey Head, cape, Scot., on the S. ct. of Kirkcudbrightshire, in 30° 58′ W.

Abbey Hill, stn., on the N. B. R., Edinburgh, Scot.

Aberdeen, royal, mun., and parl. burgh, Scot., cap. of co. of same name. The royal burgh stands on the l. bk. of the Dee at its entrance into the North Sea; the mun. and parl. burghs, which nearly coincide, include all the district between the rivs. Don and Dee (and thus embrace the town of **Old A.,** which is situated near the former river, and which, despite the name, is not positively known to be the older of the two), and also a rapidly extending part on the S. side of the Dee. The parl. burgh is made up of a N. and S. div., each of which sends one member to Parliament. The city on the Dee is a handsome town, mostly built of a fine grey granite obtained from quarries in the vicinity. It is the seat of Marischal College (founded in 1593 by George Keith, fifth Earl Marischal), one of the two colleges of Aberdeen University (see below), of a Grammar School dating from about 1262, and a school known as Gordon's College, founded in 1730 by the bequest of a merchant named Robert Gordon. The City Cross is a structure originally erected in 1686, but on a different site from that which it now occupies. The manufs. include woollens, linens, cottons, carpets, chemicals, machinery and hardware, tobacco and snuff, paper, whiskey, ale, leather, cordage; and there are shipbuilding yards, numerous granite-polishing works, and meat-preserving establishments. There is also a very extensive fish trade, and an excellent fish market. The harbour has been greatly improved by works executed at various dates. The principal dock is the Victoria Dock, constructed between 1840 and 1848. It provides 33½ acres of water-space and 2000 yards of quayage. The total area of the wet docks is 37 acres, and the depth of water on the sill at high-water springs is 26 ft. There is also a graving-dock, 524 ft. by 50 ft., with a depth of 20 ft. on the sill. To the S. of the harb. entrance stands **Girdleness Lighthouse,** which has a revolving light 185 ft. above mean tide. The exports include manufactured articles, animals and animal produce, including butter, eggs, and fish, and preserved meats, the last largely used for supplying ships sailing from Glasgow, Liverpool, and London. See **Appendix,** p. 13. **Old A.,** which is now municipally incorporated with Aberdeen, is the seat of a cathedral church founded in the 14th cent., and of King's College, founded in 1494. The latter was united in 1860 by the Universities Act (Scotland) of 1858 with Marischal College to form the University of Aberdeen, which now has 22 professors and a Principal. The classes of arts and divinity are held at King's College, those of law

and medicine and natural philosophy at Marischal College. By a grant of £40,000 from the Government, and by £40,000 of local subscriptions, a great work of enlargement and reconstruction is about to be carried out at Marischal College, to afford room for the increasing number of students, and probably soon to give accommodation there to all the University classes. Birthplace of Barbour, author of 'The Brus' (14th century); J. Gibbs, architect of the Radcliffe Library, Oxford, d. 1754; Cruden, author of the Concordance, d. 1770; John Gregory, physician, d. 1773; his son James, physician, d. 1821; John Phillip, R.A., d. 1867; John Hill Burton, historian, d. 1881; Sir John Steel, sculptor, b. 1801. Alt. 66 ft. Mean temp. (20 yrs., 1861–80), yr. 46.4° F., Jan. 37.3°, July 57.7°. P., mun. burgh (1891) 121,905; parl. burgh (1801) 27,000; (1851) 72,000; (1881) 105,000; (1891) 110,162.

Aberdeen, tn., U.S., Washington, Chehalis co., 50 m. W. by N. Olympia. P.<2000.

Aberdeenshire, a co. in the E. of Scotland, bounded by the North Sea both in the E. and N. Nearly half the surface is made up of uninteresting lowlands less than 500 feet in height, but there are some fine valleys, and the ground rises in the SW. to some of the grandest mountain scenery in Scotland [**Ben Macdhui, Cairntoul, Lochnagar**]. The principal rivers beginning in the NW. are the Deveron (with trib. Bogie), Ugie, Ythan, Don, and Dee. Geologically the surface is composed mainly of archæan and metamorphic rocks with large patches of granite. Much of the granite is of fine quality, and forms an important export of the county. [See **Aberdeen, Kemnay, Rubislaw, Peterhead.**] Serpentine occurs in Leslie par., and is worked into ornamental articles. Mineral springs at Peterhead and Pannanich. The soil is mainly poor, though much of it has been greatly improved by cultivation. There are large areas of moorland and moss, and the surface of the mountains consists for the most part either of bare rock or soil so thin as to be unfit even for hill pasture. The mountains up to 1500 feet are in many places clothed with natural wood, in which the Scotch pine is generally conspicuous. The principal crops are rotation grasses (including clover), oats, barley, turnips, and potatoes. Among live stock the cattle are most noted for quality. Sheep are chiefly bred on the mountains, but fattened on the lowlands and middle regions. [See **Appendix,** pp. 10–12.] The coasts abound in herrings and other food-fishes, and the towns of Aberdeen, Peterhead, and Fraserburgh are great fishing centres. Pearls (from the *Unio margaritifera*) are obtained in the Ythan. The principal manufactures are all mentioned under Aberdeen town, but are not confined to that town. The rlys. are the Caledonian, Great North of Scotland, and North British. The principal towns are Aberdeen, Peterhead, Huntly, Fraserburgh, Inverurie, and Turriff. Aberdeen, Inverurie, and Kintore are royal burghs. Balmoral and Abergeldie castles are within the co. For parl. representation the co. is divided into an E. and W. div. (electors in E. div. 11,803, in W. div. 10,827). The territory now forming Aberdeenshire was anciently inhabited by the Caledonian *Texali*. It afterwards formed the greater part of the earldoms of Buchan and Mar. Among the more notable events in the history of the co. are the defeat of Comyn by Bruce at Barra Hill, in the par. of Bourtie, in 1308; and that of Donald of the Isles by the Earl of Mar in 1411, at Harlaw. See Al. Smith, *New History of Aberdeenshire* (2 vols., 1875). Area, 251,451 ac. P. 281,332. See **Scotland,** table.

Abruzzi e Molise, a territorial division of Central Italy, comprising the provinces of Aquila, Teramo, Chieti, and Campobasso. The first three form the Abruzzi (in the 7th century *Aprutium*), embracing some of the wildest and loftiest parts of the Apennines,

including Gran Sasso d'Italia and La Majella [**Apennines, D.**], the prov. of Aquila comprising the tablelands traversed by parallel ridges to the W. of the main chain of the Apennines and hence formerly known as Abruzzo Citeriore ('hither A., so called with reference to Rome), the two others sloping down from the Apennines to the Adriatic, and hence formerly known as Abruzzo Ulteriore ('further A.'), Primo (Teramo), and Secondo (Chieti). Campobasso is the former Neapolitan prov. of Molise. The mt. slopes of the A. are clothed with dense forests, sheltering in their less accessible portions numbers of bears, wolves, and boars, and the principal agricultural wealth of the region consists in cattle. The Molise, which extends W. to the Montagna del Matese, is rich in cereals, wines, and fruits. The principal mineral product is asphalt in the N. of prov. Chieti, at Manopello, San Valentino, &c. In ancient times the Samnites, Marsi, and other tribes inhabited this region. See **Italy.**

Abyssinia, or **Habesh,** an extensive country in the E. of Africa. It is impossible to assign it any precise limits, but it may be said to lie between about 8° and 16° N., and 35½° and 41° E. Within these limits we include the semi-independent provinces of Tigre in the N. and Shoa in the S., as well as the central province of Amhara, but not the provinces in the S., which have been subjugated by the tributary kings of Shoa and Gojam on their own account. [See **Shoa, Gojam,** and **Gallas.**] The country within the limits indicated is mainly a wedge-shaped portion of the plateau of E. Africa, and embraces the loftiest portions of that plateau. The **surface** falls steeply on the E. to the arid plains, which extend from the fortieth meridian to the Red Sea. The height of the eastern edge above sea-level is from 7000 to 9000 ft. or more. The western edge, though well marked, is lower, and is cut into by the deep valleys of the Takazze and the Bahr-el-Azrek, the rivers which flow from these highlands to the Nile valley. The valley of the Takazze is a gorge of about 2000 ft. or more in depth, which in the part that runs from E. to W. forms the southern boundary of Tigre. That of the Bahr-el-Azrek forms part of the boundary between Amhara and Shoa in the S. Groups of mountains, or relatively narrow tablelands of great height, rise above the general surface of the plateau. The **highest elevations** are in the Samen, or Simen, Mts., which lie to the S. and W. of different parts of the course of the Takazze (Ras Dashan and other summits, upwards of 15,000 ft. in height). The mountains of Gojam occupy the SE of Amhara, their base being skirted by the upper part of the Bahr-el-Azrek. The large lake of Tsana, or Tana, from which this river issues, occupies the lower parts of the plateau of Amhara. The differences in elevation divide the country into three regions as regards climate and production. These are known as the Kwolla, the Woina or Waina Dega, and the Dega, in ascending order. The **Kwolla** consists of the lowlands that skirt the plateau and the lower slopes up to the height of about 5000 ft., where a tropical climate prevails answering to the latitude. In this region the principal grain crop is durrah, and among the other crops are cotton, sugar-cane, dates, bananas, coffee, indigo. The **Woina Dega** consists of the middle region from about 5000 to 9000 ft. This region, the richest of all, contains the most important towns of the country. The characteristic vegetation is similar to that of southern Europe. Wheat, some of it of excellent quality, is grown; but the favourite and most generally cultivated bread-plant is tef (*Eragrostis Abyssinica,* Linn.), from the best kinds of which a fine white flour, making very good bread, is made. The banana is represented by a species of the same genus, *Musa Ensete,* Gm., the fruit of which is also used in making a kind of bread. Oranges, citrons, apricots, and the vine all thrive, and the olive in some places forms regular forests. Excellent pastures support all the domestic herbivorous animals of Europe. The **Dega** embraces all the higher elevations of the country. Barley is the principal grain crop. The vegetation in general is scanty, but the pastures nourish a fine breed of horses and abundance of game. A long-woolled sheep is found here. The highest elevations almost reach the lower limit of perpetual snow. The **rainfall** throughout Abyssinia is almost confined to the summer months, being due to the indraught of air from the Indian Ocean when the land-surface N. of the Equator is most strongly heated. The winds and rains have thus the character of monsoons. During this season the rivers become torrents. Geologically, Abyssinia is remarkable for its great extent of old lava-flows. The **minerals** include deposits of sulphur, rock-salt, gold and silver, and ores of antimony and iron. Economically, the most important of these is rock-salt, small slabs of which form the principal money of the country, except in the N. It is chiefly obtained from lakes on the E. slopes of the plateau. The **inhabitants** of the plateau are physically of a type similar to the European. The skin is generally darker than that of people of European race, but in the higher ranks of society is almost white, especially in the case of the women. At lower levels the negro admixture becomes more and more marked. There are two different **languages** spoken by the higher classes; one in Tigre, and the other, the Amharic, in the rest of Abyssinia. In the former the basis *ges* or *ghez* is Semitic, but the latter is of a different stock, though it has many Semitic roots. Quite different from both of these is a language spoken by the lower classes in a large part of the country. This language is known as the Agao, and

seems to be that of the aboriginal element of the population. In **religion** the Abyssinians are Coptic Christians [**Egypt**], but their religion is of a very corrupt form. There are besides many Mohammedans and Jews. The **manufacturing industries** of the country (the making of cotton and woollen cloths, the working of metals, leather, &c.) are mainly in the hands of the latter. External **commerce** is very limited. Caravans start every year for the Red Sea coast, proceeding generally through Tigre (by Adua) to Massaua, taking gums, ivory, myrrh, coffee, wax, honey, ostrich feathers, gold, musk, hides, &c., in exchange for manufactured articles. The salt slabs above mentioned circulate nearly as far N. as Adua (about 14° N.), but to the N. of that the only money freely accepted is Maria Theresia dollars (*q.v.*). The chief towns are Samara (in the dist. Debra Tabor), the present capital, and Gondar in Amhara, Adua in Tigre, and Ankobar and Antoto in Shoa. The chief event in the recent **history** has been the invasion of the country by a British force in 1868, to liberate a few British subjects and foreign missionaries who were held captive by the king. In 1889 A. ceded to Italy certain territory in the NE. Previously, however, the kingdom had been extended by conquests of the king himself, or his vassals in Shoa and Gojam, over Harrar and the southern Galla States. The total area of the kingdom, including all these conquests, is estimated at about 193,000 sq. m., the pop. at about 4½ millions; the area, exclusive of Harrar and the Galla States, about 100,000 sq. m., and the pop. under 4 millions.

Aconbury, par. and vil., Eng., Herefordshire, Ross div., 4 m. S. Hereford. P.<250.

Aconcagua. 1. Prov., Chile, between about 31° 33′ and 32° 50′ S., divided into deps., Petorca in the N., Ligua in the SW., Putaendo in the E., San Felipe in the middle and E., Los Andes in the S. **2.** Volc., which gives name to prov. A., though situated in the Argentine prov. of Mendoza, lat. 32° 35′ S., 70° W.; alt. 22,860 ft. (Güssfeldt, *tr.*). **3.** A riv., flowing W. from the slopes of the volc. through the prov. A. into the Pacific, sometimes called in its lower course Rio de Quillota.

Aconquija, Sierra de, range of mts., Argentine Rep., on the W. frontier of prov. Tucuman; highest peak, **Nevado de A.,** 15,250 ft.

Açores Is. See **Azores.**

Acoyapo, or **San Sebastian,** tn., Central America, Nicaragua, 15 m. E. by S. Managua. P.<5000.

Acoz, vil., Belgium, Hainaut, 5 m. SE. Charleroi. P.<2000.

Acqua, Ital., 'water.'

Acquanegra, tn., Italy, prov. and 18 m. W. Mantua. P. 4000.

Acquapendente, tn., Italy, prov. Rome, 25 m. NNW. Viterbo. Alt. 1380 ft. P. 6000.

Acquate, vil., Italy, Como, 1 m. NE. Lecco, with iron-mines. P. 2000.

Acquaviva, tn., Italy, Apulia, prov. and 16 m. S. Bari.

Acqui, tn., Italy, Piedmont, on the Bormida, prov. and 18 m. SSW. Alessandria, an ancient town, with remains of a Roman aqueduct; long celebrated for its mineral (sulphurous) springs. Here the French defeated the Austrians and Piedmontese in 1794. P. 11,000.

Acre, St. Jean d'Acre, *Turkish* **Akka,** in the O. T. *Accho,* in the N. T. *Ptolemais,* a fortified city and seapt., Syria, on a promontory N. of C. Carmel. The modern fortifications are outside the older ones, which can still be traced, though with many breaches made in sieges of the town. The fortress is noted for its numerous sieges. In 1191 it was taken by the Crusaders under Richard Cœur de Lion and Philip Augustus, in 1291 by the Saracens. In 1799 it successfully resisted the attacks of Napoleon; in 1832 it was taken by Ibrahim Pasha, adopted son of the viceroy of Egypt, and it remained in his hands till 1840, when it was taken by the combined fleets of England, Austria, and Turkey. The name of St. Jean d'Acre is due to the fact that during the 100 years it was in the hands of the Crusaders it was the headquarters of the military orders of knights, among whom the Hospitallers assumed the title of knights of St. Jean d'Acre. P. 7000.

Acre, Castle, par., Eng., Norfolk, NW. div., 13 m. ESE. King's Lynn. P.<1500

Adel, tribe, E. Africa. See **Adal.**

Adelaide, city, cap. of S. Australia, 6 m. E. of St. Vincent Gulf, on which stands **Port Adelaide,** the shipping port of the city, 508 m. by rail from Melbourne, 1085 m. from Sydney, 1808 from Brisbane. The town is pleasantly situated on a large plain, bounded on the E. and S. by the Mount Lofty range of mountains, which rise at the distance of from 4 to 8 miles from the city. It is remarkable for its regularity even among Australian cities, being built in the form of a square, and originally laid out in allotments of one acre each. The riv. Torrens, which was formerly a sluggish unattractive stream, but has been converted by means of a dam into a fine sheet of water, divides the city into two portions, called N. Adelaide and S. Adelaide, the latter of which is the business half of the city. All round the town are park lands, half a mile in width. A. is the seat of a university, and of a Protestant and Roman Catholic cathedral, and has fine botanic gardens with a museum of economic botany. Distance in nautical miles from London or Liverpool to Port Adelaide by Suez Canal direct, 10,800; by Cape of Good Hope, 11,950; by P. and O. route, 11,500; by Orient route, 11,330. The voyage from London by steamer through the Suez Canal has been accomplished within four weeks. The city was founded in 1837 by Col. Light, and named after the queen of William IV. Lat. of observatory 34° 55′ 34″ S., long. 138° 35′ 6″ E. Mean temp., yr. 62.7° F., Jan. 74.6°, July 51.0°; rainfall (26 yrs.), 20.25 in. P., city proper (1861) 23,000; (1891) 37,800; including suburbs (1891) 133,000.

Adelsö, isl., Sweden, in L. Mälar.

Ademuz, tn., Spain, on the Guadalaviar, prov. and 65 m. NW. Valencia. P.<4000.

Aden, a Brit. possession, under the govt. of the Indian presidency of Bombay, situated on the S. ct. of Arabia, about 105 m. E. of the Strait of Babelmandeb; 4610 nautical m. from London. The territory consists of the penin. of A. proper (in Arabic, Jebel Sham Sham), connected with the mainland by a narrow isthmus, the penin. of Little Aden or Jebel Ihsan to the W., and a small tract on the mainland beyond the isthmus. Between the two penins. lies Aden harb., known as Aden West Bay, or Aden Back Bay, a sheet of water opening to the S., about 8 m. long by 4 broad, with a depth inside of from 3 to 4 fathoms. Large vessels lie off Steamer Point outside the harb., on the W. side of the penin. of A. proper. This penin. contains the bulk of the inhabitants of the possession. It consists of a huge crater walled round by precipices, the highest peak of which is 1775 ft. above the sea-level. It is a natural fortress, which additional fortifications have rendered almost impregnable. The town of A., or A. Camp, is situated within the crater facing the E., but the favourite residence of Europeans is at Steamer Point, which is rather cooler than the crater. The remainder of the inhabitants are at Shaikh Othman, an oasis and old Arab village on the mainland, 8 m. from A. Camp. The mortality among Europeans is not excessive. A. ranks indeed as a rather healthy station for troops, but prolonged residence impairs the faculties and undermines the health of Europeans. The dearth of rain makes A. proper a desert. Provisions, firewood, fodder, and even some of the water used in the settlement, have to be imported from the surrounding country. More than a quarter of a mill on of camels enter A. yearly with produce from all parts of Yemen. Water is also obtained, however, from wells within the valleys of the crater, by condensation from sea-water, and (for washing) by means of an aqueduct led from Shaikh Othman. The counterbalancing advantages of A., in its strength and favourable situation for commerce, have nevertheless made it an important seat of trade at many periods of history. It is identified with the Eden of Ezekiel xxvii. 23; it was an entrepôt of commerce between the ancient Roman Empire and the East; under various rulers it was the seat of a flourishing commerce in the early centuries of Mohammedanism. In 1538 it was taken by the Turks; at a later date it passed into the hands of native Arab chiefs; and in 1839 it was acquired by the British, under whom its trade has developed immensely. In recent years that trade has been specially promoted by the town being made a free port in 1850, and by the opening of the Suez Canal in 1869. A. is now the great seat of the commerce between Arabia and Africa, and of rapidly growing importance as an entrepôt and a place of transhipment of European and Asiatic commerce. The average value of imports and exports combined is upwards of £2,000,000. Arab tribes, occupying together a territory of about 140 m. in length by 40 m. in width, are under British protection. The chief of these are the *Abdali* in Lahej (*q.v.*), the *Fadhli*, and the *Akrabi*. Area of British territory proper, about 13 sq. m. Mean temp. (4½ yrs., 1880–84), yr. 81.2° F., Jan. 75.2°, July 84.9°. The rainfall of the year varies from ½ in. to 8½ in., with an irregular average of about 3 in. P. (1891) 42,000; including Perim and cantonment, 44,000.

Adiganga. See **Hugli R.**

Adige, anct. *Athesis*, in German **Etsch** (A. being the Italian form), a river which rises in Austria, on the Reschenscheideck, near the W. frontier of Tyrol, flows S. then W. through the Vintschgau, takes a more or less southerly course at Meran, passes Trent and Roveredo, enters Italian territory at Borghetto, passes Verona, and enters the Adriatic S. of Chioggia. It receives on the l. bk. the Eisack below Bozen, and the Avisio. It is navigable from a little below the confluence of the Eisack, but with some difficulty, owing to the velocity of the current. Length, 234 m.; area of basin, 5365 sq. m. See **Adigetto.**

Adigetto, a navigable channel, partly canalised, connecting the Adige at a point near Badia with the Po near its mouth; said to have been formed by an earthquake about the end of the ninth century.

Adigrat, Adigherat, Addi Garaht, or **Ategerat,** tn., Abyssinia, Tigre, cap. of Agame prov., 90 m. S. Massaua, at the top of the terraces which descend to the E., surrounded on other sides by lofty mountains. Alt. 8585 ft. (Markham, *b.p.* and *an.*), according to others about 8200 ft. P. 2000.

Adinkerke, vil., Belgium, prov. W. Flanders, 10 m. E. by N. Dunkirk. P. <3000.

Adirnas-chai. See **Adranos-chai.**

Adirondack Mountains, a group belonging to the Appalachian system, U.S., extending from the NE. towards the centre of the State of New York; highest peak, Mount Marcy, Essex co. (5334, 5403 ft., Adirondack Survey; 5379 ft., Guyot). They are mainly composed of Archæan crystalline rocks. The scenery is noted for its beauty, wildness, and grandeur. Fish abound in the lakes and streams, and game is still met with. Fine forests cover the slopes, the most valuable timber product being white pine. Rich iron ore occurs in the E. See **Chateaugay.**

Adrianople, in Turkish **Edirne,** an important tn., Turkey, surrounded by forts, cap. of vilayet Edirne, on the l. bk. of the Maritsa, which here becomes navigable, and both banks of the Tunja, which here unites with the Maritsa. It is probably the most populous town in European Turkey after Constantinople, and is a great seat of trade and manufactures (various textiles, perfumery, &c.). The surrounding district is the principal centre of raw silk production in European Turkey. The ancient *Hadrianopolis* took its name from the Emperor Hadrian, by whom it was founded (early in the second century A.D.), on the site of the more ancient *Orestia*. From 1366 to 1453 (the capture of Constantinople) it was the cap. of the Ottoman Empire. The Eski Serai, the old palace of the sultans, now decayed, stands on the r. bk. of the Tunja. P. 60,000.

Adriatic Sea, that part of the Mediterranean which lies between Italy and the Balkan Penin., including the Gulfs of Venice, Trieste, and Quarnero in the N., that of Manfredonia in the W., and communicating with the Ionian Sea by the Strait of Otranto. The name Gulf of Venice is sometimes applied to the whole sea. The depth is in most places under 100 fathoms, and the whole of the N. part between the mouths of the Po and the opposite part of the coast of Istria, together with a strip on the E. coast of Italy, is under 20 fathoms. A portion of more than 100 fathoms in depth occurs in the middle of the sea, but the greatest depths are in the S., where the deepest sounding yet made is one of 869 fathoms, about midway between Bari and Durazzo. On the Dalmatian side beautiful channels, affording a secure retreat from storms, are formed by the islands that border the coast. During summer the navigation is safe, the prevailing wind being then favourable for leaving the sea, but in winter the SE. winds cause much destruction. As to saltness and tides, see **Mediterranean;** as to name, see **Adria.** Length from lat. of C. di Leuca, 500 m.; greatest width, 130 m.; area about 60,000 sq. m.

Affreville, vil., Algeria, 60 m. SW. by W. Algiers.

Affric, lake and riv., Scot., in NW. of Inverness-shire. The lake lies 14 m. NW. Fort Augustus, at the height of 744 ft. above sea-level. The river passes through Lochs Affric and Benevian, and joins l. bk. Glass.

Afghanistan, an inland country of Asia, bounded on the W. by Persia, on the N. by Russia and Bokharan territory, on the E. by Eastern or Chinese Turkistan and India, with the territory of some independent mountain tribes between the NW. of India and the Hindu Kush [**Kafiristan, Chitral**], on the S. by Baluchistan and the British assigned dists. round Quetta. The W. frontier was long in dispute between Persia and A., but in 1872 was settled by an award of Sir Frederick Goldsmid, who had been appointed by the two powers concerned to determine the matter. In the N. this boundary is formed by a portion of the Heri-Rud, where that river flows from S. to N., and S. of that it generally keeps near the meridian of 61° E., except in the neighbourhood of the Sistan swamp, where it advances to the Helmand R. in 62° E. The NW. boundary with Russia was mostly laid down in 1885–86 by a joint Russian and English Commission, and was finally settled by a direct agreement between the governments of Great Britain and Russia in July 1887. It begins in the W. at the Zulfikar P. in 35° 35′ N., east of the Heri-Rud, assigns to Russia the well-watered dist. of Badghiz between the Heri-Rud and the Murgh-ab, and passes thence NE. between Maruchak and Penjdeh to a point on the Amu, in about 65° 46′ E., and about 30 m. below Khoja Saleh. Above this point the Oxus forms the boundary with Bokhara to about 71° E. [**Badakhshan**]; and in the NE. A. claims a large section of that part of the Pamirs containing the two chief headwaters of the Oxus, the Panj, and the Murgh-ab [**Pamirs**]. The boundary with India runs mostly E. of the Suláiman Mts. The greater part of the **surface** is highly mountainous, and even the plains are mostly above 4000 ft. in height, large areas being upwards of 7000 ft. The parts below that elevation are a considerable tract in the SW. and W., including the lower part of the val. of the Heri-Rud (Herat about 3000 ft.) and the tracts in the N. west of 71° E., the lower parts of which, adjoining the Oxus, are even below 1000 ft. The principal **mountain ranges** are the Hindu Kush, the Koh-i-baba (the continuation of the former range trending SW. from the Bamian P.), the Siah Koh and Safed Koh, respectively S. and N. of the Heri-Rud val., and the Suláiman Mts. in the E. The principal **rivers** are the Helmand with its trib. the Arghand-ab, the Heri-Rud, Murgh-ab, the Amu or Oxus, and three tribs. of the Indus—the Kabul, traversing the Khaibar P.; the Kuram, through the Kuram P.; and the Gomul, traversing the Gomul P. The **climate** is, as regards temperature, as varied as the surface. At the higher elevations the range of temperature is very wide. At Ghazní, 7300 ft., the thermometer sinks in winter to 10° or 15° below zero, Fahr., while in summer, even at Kabul, 5800 ft., it may rise to 100°. At the lower elevations an agreeable temperature prevails for the greater part of the year. The **rainfall** in winter is slight, and in summer rain seldom falls at all. Agriculture is therefore dependent on irrigation, which in the western dists. is often effected by means of *karezes,* or channels dug into the sides of mountains composed of highly porous rocks. In most parts of the country two harvests are reaped, one in spring and one in autumn. The **crops** of the spring harvest are wheat, barley, and lentils; those of the autumn harvest, rice, millets (especially the spiked millet or bájra of India, *Pennisetum typhoideum*), maize, beans, tobacco, beet, turnips, &c. Sugar-cane and madder, melons, grapes, and apples are also important products. In the **natural vegetation** of the country, umbelliferous plants, some of gigantic size, are highly characteristic, and some of them yield valuable gum-resins, known in commerce as gum ammoniacum, gum galbanum, asafœtida, &c. Leguminous plants also abound; among these numerous astragali, including the species that yields the gum tragacanth of commerce. The domestic animals include camels (mostly the single-humped species), horses, cattle, two varieties of the fat-

tailed sheep, goats, &c. **Minerals** are said to be abundant, but few are wrought. Iron ore, lead, antimony, and sulphur are all produced more or less; small quantities of gold are also obtained in certain streams; silver was formerly worked; copper ore exists, but is not known to be worked; coal is said to be found in more than one place in the E.; nitre abounds over all the SW. **Industrial products** are unimportant. Silks are made from material of native production. Wool is both woven and felted for domestic use; and sheepskins with the wool on are made into pelisses by treating the skin with pomegranate rind and other materials, so as to give it great softness and suppleness. These are now exported in considerable number to the Punjab. Practically there are no navigable rivers in A., and the only road for wheeled carriages is one from Peshâwar to Kabul, made during the British occupation of the latter town in 1879–80. Goods are carried on domestic animals, chiefly camels, to a large extent through craggy defiles and stony vals., across high mountain passes, and waste plains. The chief exports are wool, horses, silk, fruit (including much dried fruit from Kandahar), madder, and asafœtida, silks and woollens, skins, and a few other manufactured articles. The principal imports are cotton, woollen, and silk goods (all largely British), coarse country cloths, sugar, tea, indigo, drugs, &c., from India; silk, arms, turquoises, horses, carpets, &c., from Persia; silk and silk fabrics, gold and silver wire (Russian), horses, &c., from Bokhara. There is also a transit trade in Bokharan goods to India. The **people** of A. may be divided into Afghan and non-Afghan tribes. The four great Afghan clans are the *Duranis*, in the SW., mainly between Herat and Kandahar; the *Ghilsais*, on the high plateau in the E., between Kandahar and the Kabul R.; the *Yusufzais*, a very turbulent tribe in the NE., extending into Brit. India (Peshâwar); the *Kakars*, among the spurs of the Suláiman Mts. in the SE. All the Afghans proper are Sunnite Mohammedans. Their language is an Aryan dialect known as Pushtu, or Pukhtu. Among the non-Afghan elements of the population are the *Tajiks*, who speak a dialect of Persian, and are found all over the country, zealous Sunnites; the *Kizilbáshis*, or 'Red Heads,' Persianised Turks, Shiite Mohammedans in religion; the *Hazareh*, a people with a Mongol type of features, but speaking a Persian dialect, mostly nomadic, inhabiting the mountainous country W. and SW. of the Hindu-Kush, Shiites; *Aimaks*, nomads living W. of the Hazareh, Sunnites. *Usbeg Turks* appear to be the ruling race in the NE., the region embracing Balkh, Kunduz, Badakshan, &c. (Afghan Turkistan). The **government** is nominally monarchical, but both in peace and war the *sardárs*, or military chiefs, act much according to their own liking, and it is only by their mutual jealousies that the sovereign (Amir) can retain some control over them. Many small tribes are practically independent. The whole empire of A. has seldom been under one rule. Kábul (the present cap.), Herat, and Kandahar have each in turn been held by native rulers, or Tatar, Persian, or Indian invaders, and occasionally native rulers have extended the empire beyond its present limits. The relations of A. to Brit. India have more than once been disastrous to the British. In 1842 a British-Indian army was wholly destroyed on the march from Kábul to the Khaibar P. In 1879 the British resident and his escort stationed at Kábul, in accordance with a treaty concluded at Gandamak in the same year, placing the foreign relations of A. under British influence, were massacred. The massacre was subsequently avenged; the Amir under whom it happened deposed, and a new Amir set up in his place, but no new resident was sent to Kabul. Length of A. from the W. of the Herat Valley to the frontier of Brit. India, 600 m.; to the NE. of Afghan Turkistan, 800 m.; breadth from N. to S., 520 m. Area, including territory claimed in the Pamirs, and up to the Indian frontier in the E., about 260,000 sq. m., excluding Pamir and eastern territory beyond the frontier of Brit. India proper, but now practically under British control, about 210,000 sq. m. P. about 4,000,000.

See Major H. G. Raverty, *Notes on A. and part of Balúchistan*, London, 1881; *Proc. R. G. S.*, 1885, pp. 39, &c., 160, &c., 273, &c. (on N. frontier and neighbouring regions); H. W. Bellew, *An Inquiry into the Ethnography of A.*, Woking, 1891. The best map is that of Col. Thuillier, 4 sheets, Calcutta, 1889 (1 : 1,520,640). The greater part of A. is included in Curzon's map of Persia, in which the data of the previously mentioned map are utilised. See also refs. under **Hindu-Kush** and **Suláiman Mts.**

Africa, the name applied since the time of the Romans to the continent lying to the S. of the Mediterranean; by the ancient Greeks called Λιβύη. Its **coast-line** is remarkable for its uniformity. Its principal gulfs, G. of Guinea in the W., those of Cabes and Sidra in the N., are wide-mouthed. Minor indentations are comparatively few. The **superficial features** contrast markedly with those of all other continents. Africa has no wide plains near the coast, but consists principally of plateaux, varying from about 2000 to 9000 ft. in height, surmounted in many places by mountain peaks or chains, and generally sinking pretty rapidly to the coast, where the strips of lowland are comparatively narrow. The principal mountain ranges are those of the Atlas, which run parallel to the western half of the Mediterranean, and the Drakensberg or Quathlamba Mts., in the SE. The principal series of plateaux extends from N. to S. towards the E. side of the continent, and is broken only by the valley of the Zambezi. Within a few degrees of the equator these plateaux are surmounted by several old volcanic cones rising above the snow-line. The highest are Kilimanjaro (nearly 20,000 ft.), and Kenia (about 18,500 ft.), both S. of the equator, near the eastern border of the elevated region; the next in height, Ruwenzori, just N. of the equator, about seven degrees to the W. of Mount Kenia. On these plateaux lie also a number of great fresh-water **lakes,** Victoria Nyanza, Tanganyika, Bangweolo, Nyassa. In the E. this series of plateaux is traversed longitudinally from about 6° N. to at least 6° S. by a well-marked relative depression bounded by steep escarpments, and containing a series of lakes with no outlet, Ls. Rudolf, Baringo, Naivasha, and others. The **principal rivers** are the Nile, Niger, Congo, and Zambezi. All except the Nile belong wholly to the tropical portion of the continent. They are all great navigable streams, but all of them have their navigation interrupted in their lower course by falls and cataracts. In the Nile, however, these are high enough up to allow of nearly 800 m. of unimpeded navigation from the mouth. The **rainfall** over a great part of A. is very scanty. A. lies in latitudes where the atmosphere is always able to retain large quantities of vapour uncondensed, and, consisting mainly of plateaux with bordering mountains, its interior is in most parts reached only by winds that have been deprived of the greater part of their moisture. Hence the only regions with abundant rainfall are the western part of the equatorial area and narrow strips on the S. and SE. coasts. Three regions of exceptional drought occur, the Sahara in the N., the eastern horn (Somali-land, &c.), and the Kalahari in the S. To the S. of the Sahara is a large region of inland drainage connected with L. Chad, to the N. of the Kalahari a similar region connected with L. Ngami. Except in the moister parts of the equatorial regions, where dense liana-bound forests occur, the prevailing **vegetation,** where there is any vegetation at all, consists of treeless, or nearly treeless, grassy steppes. Euphorbias and, in the S., heaths are characteristic. In the desert thorny shrubs and scattered tufts of coarse grass form the principal vegetation. Among palms the most characteristic are the date in N., the deleb and doum further S. Among **animals** the quadrupeds that most abound are herbivora—antelopes, giraffes, zebras, quaggas, &c. The single-humped camel is found solely as a domesticated animal. A. possesses a peculiar species of elephant, whose tusks furnish most of the ivory of commerce. Monkeys and apes (chimpanzee and gorilla), rhinoceroses, hippopotamuses, and crocodiles are all likewise abundant, besides lions, hyænas, and other beasts of prey. Among large birds must be mentioned the ostrich, and among small birds the sunbirds, which answer to the humming-birds of tropical America. The animals just mentioned are specially characteristic of the part of the continent S. of the tropic of Cancer, that part forming, along with Madagascar, the Ethiopian Region in the great zoogeographical divisions of Wallace. The northern portion of the continent is referred to the Mediterranean subregion of the Palæarctic Region [**Europe**]. In some respects the most important member of the African insect-world is the tsetse-fly (*q.v.*), whose bite is fatal to some of the more important domestic animals. The **inhabitants** of the N. and NE. of Africa, including the Abyssinians (a Semitic people), Egyptians, and Berbers, as well as the Asiatic settlers, the Arabs and Jews, are all markedly different from those of the S. and the SW., among whom the negro features are more or less prominent [**Bantu**]. The Jews are settled in considerable numbers in the Atlas States, and the Arabs are more widely diffused, being settled in large numbers in the N. and E., and having the command of the trade (largely a slave-trade) of a great part of E. and Central Africa. The Mohammedan religion has been introduced by the Arabs into all N. Africa, E. Africa as far as the Zanzibar coast, and into the Sudan States between the Nile and the Niger basin; and in Central Africa Mohammedanism is constantly gaining ground. Ancient Christian sects survive in Abyssinia and Egypt (in the latter country called Copts). The rest of Africa is heathen, except where there are European settlers (chiefly English and

Dutch colonists in the S). Misgovernment, internal wars, and the practice of slavery keep down the density of the pop. almost everywhere in the interior. See **Continents,** and also, besides the names of the principal countries, **Sahara, Sudan; Senegambia, Niger Basin, Guinea (Upper and Lower), Bissagos, Sierra Leone, Gold Coast, Slave Coast, French Congo Terr., Congo Free State, Damara Land, Brit. E.** and **Brit. S. Africa, German E.** and **German W. Africa, Portuguese E.** and **Portuguese W. Africa, Eritrea.**

Agosta, Sicily. See **Augusta.**

Agotime, a dist. in the interior of Togo Land, German W. Africa.

Agoulinitza, fishing-tn., Greece, prov. Messenia, 45 m. SSW. Patras, 8 m. W. of the site of the ancient Olympia. P. <3000.

Agout, riv., France, deps. Hérault and Tarn, flows WNW. into the Tarn, 110 m. long, partly navigable, but not actually used for navigation.

Agra, city, British India, NW. provs., cap. of dist. A., on the r. bk. of the Jumna R., at a bend where that river turns sharply to the E., 110 m. SE. by S. Delhi. It is well built, and possesses a fort, with walls 1½ m. in circumference and 70 feet high, but without the strength necessary to withstand modern artillery. It contains within the fort the palace of Sháh Jahán, and outside of the fort the Táj Mahál, the mausoleum in white marble and red sandstone erected by Sháh Jahán in memory of his wife, the finest existing specimen of Mohammedan architecture. For miles around are the remains of palaces and tombs, with the mausoleum of Akbar at Sikandra, 5 m. N.; and the Jamá Masjid ('great mosque'), erected by the same emperor in memory of his daughter. It has a British garrison. It has many manufactures, its most noted specialty being inlaid mosaic work, for which it has been famous for centuries. Though off the main line of the E. Indian Rly., it is now an important rly. centre, and heavy traffic is also carried on by the Jumna and the A. Canal. The Emperor Bábar died at the older Agra, on the l. bk. of the Jumna, in 1530. His grandson Akbar built the fort on the r. bk. in 1566, and afterwards made the town his cap., and it remained the cap. of the Mughal Empire for about 100 years. It was taken by the British under Lord Lake from the Maráthás Oct. 1803. Alt. 555 ft. Mean temp. (10 yrs), yr. 79° F., Jan. 60°, June 95°; mean rainfall, yr. 26 in.; June–Sept. 23.7 in. See H. G. Keene's *Handbook to Agra.* P. including cantonment (1881) 160,200; (1891) 168,700.

Agra, riv., Spain, rises in the Pyrenees near Roncesvalles, and flows S. past Pamplona to the Aragon, which it joins a few miles above its confluence with the Ebro.

Agra Canal, an irrigation and navigation canal, Brit. India, led by the Jumna 10 m. below Delhi, and re-entering that river about 20 m. below Agra, with branches to the cities of Muttra and Agra.

Agrahan Bay, W. ct. of Caspian Sea, from which it is separated by the Uch penin.; receives one of the mouths of Terek R.

Agram, Slav. name **Zagrab,** tn., Hungary, cap. of Croatia-Slavonia, 73 m. E. by S. Laibach. See of a bishop, with a S. Slavonic Academy; in the neighbourhood the copper works of Rude, and the warm baths of Stubitza. Alt. 535 ft. Mean temp., yr. 51.5° F., Jan. 31.3°, July 71.7°; rainfall (20 yrs.) 35.28 in. P. 25,000.

Agram Pass. See **Hindu Kush.**

Agraphi, vil., Greece, in the NW. of Corfu I. P. <2000.

Agri, riv., Italy, in the E. It rises in the Apennines, in the W. of Basilicata, and flows ESE. and E. to the Gulf of Taranto, which it enters in the W. in about 40° 13′ N.

Agrimia, cape, Turkey in Europe. See **Paxi, Cape.**

Ahlsdorf, vil,, Prussian Saxony, mountain-circle Mansfeld, dist. Eisleben. P. <3000.

Ahmadábád, or **Ahmedabad,** a walled tn. of Brit. India, chief city of **A. dist.** [**Bombay**], 310 m. N. Bombay, and about 50 m. N. of the head of the Gulf of Cambay, on the l. bk. of the Sábarmati R., the headquarters of the Gujarát Jains. In the 16th and 17th centuries a city of great splendour, with a population estimated at 900,000; now noted for its numerous architectural remains (mosques, tombs, mausoleums, &c.), as well as for its manufactures, the most important of which are relics of industries once pursued on a much greater scale. They include all those connected with the production of gold-brocaded silks, pottery, paper, tin, and electro-plating; and now also spinning and weaving by steam. Military cantonment 3½ m. to the N. The present city was founded on the site of the more ancient Ashával by Ahmad Shah (1413-43), taken by the British from the Maráthás in 1818. The heat is severe from February to June; and the rainfall being light, the climate is hot and close in the rainy season. October is the least healthy month. Mean temperature, 82° F.; maximum, within doors 110°, minimum, 52°; mean rainfall, 37 inches. Alt. 170 ft. P. (1872) 117,000; (1891) 145,000; including cantonment, 148,400. See Hope and Fergusson, *Architecture of Ahmadábád,* Lond. 1866.

Ahmadnagar, or **Achmednuggur,** tn., Brit. India, cap. A. dist. [**Bombay**], 126 m. E. Bombay, on the plain of the Sina, and on the rly. connecting the NE. and SE. lines of the Great Indian Penin. Rly.; with manufactures of carpets, copper and brass pots, &c.; now well supplied with water by aqueducts. The city is surrounded by an earthen wall, and there is a fort half a mile to the E. The principal diseases in the dist. are fever and small-pox. City founded by Ahmad Nizám Sháh in 1494, finally occupied by the British in 1817. Mean rainfall, 26 inches. Alt. 2140 ft. P. including cantonments (1881) 37,500; (1891) 41,700.

Ahmadpur, or **Ahmedpur,** tn., India, state of and 36 m. WSW. Baháwalpur, a few miles from the l. bk. of the Indus. P. 9800.

Ahnapee, city, U.S., Wisconsin, Kewanee co., on L. Michigan, 25 m. E. by N. of the head of Green Bay. P. <1500.

Ahogill, par. and vil., Ire., W. co. Antrim, bars. Upper and Lower Toome, and Upper Antrim, 11 m. NW. by N. Antrim, PM.O.; 12,184 ac. P. 7300; vil. P. <1000.

Ahorcados ('isle of the hanged'), islet, extreme S. of Iviza, with lighthouse visible 16 m.

Ahr, small riv., Prussia, Rhine Prov., flows ENE. into the Rhine, between Cologne and Coblenz; not navigable.

Ahraura, tn., Brit. India, NW. Provs., dist. Mirzápur, 20 m. S. Benares. P. 11,600.

Ahrweiler, tn., Ger., Prussia, Rhine Prov., on R. Ahr, 14 m. S. Bonn, cap. of circle, with deposits of iron ore. The neighbourhood produces noted wines. In the circle of A. are the springs producing Apollinaris water. P. 4000.

Ain, pl. *Aiyun,* Arabic 'spring.'

Ain, in the middle ages called *Danus, Idanus,* or *Indus,* riv., France, rises in the Jura Mts. near Nozeroy, passes Poncin and Pont d'Ain, and joins the Rhone on the right 18 m. above Lyons; chief affluent, the Bienne on the left; total length 120 m., used for floating timber from the Jura; navigable down stream from Port de la Saisse, 80 m. up, but not navigable up stream.

Ain, dep., France, bounded W. by the Saône, on the S. and mostly also on the E. by the Rhone; divided into 5 arrs., Bourg, Nantua, Trévoux, Belley, and Gex; cap. Bourg. The riv. A. divides the dep. into two sections with distinct physical features, the W. consisting of plains and low undulating land, the E. traversed by chains of the Jura, containing in the NE. of the dep. the highest summits of these mountains, the Crêt de la Neige (5650 ft.), and the Reculet (5640 ft.). The N. part of the lowland region corresponds to the old dist. of Bresse, the S. portion to the Dombes, a region remarkable for its numerous small lakes resting upon a substratum of clay, artificially formed in the ninth and tenth centuries. These lakes afford considerable fishing, and every two years each of them is drained and cultivated. The insalubrity arising from the presence of so much stagnant water has, however, led on more than one occasion to the passing of laws for the entire drainage of the dist. About two-thirds of the former marshy area has now been reclaimed, and the insalubrity almost entirely overcome. The mountainous dist. in the E. comprises the old dist. of Bugey, including the Val Romey (*Vallis romana,* 'Roman valley'), the valley of the Séran, a small river flowing S. into the Rhone, and the bailiwick of Gex in the NE. of the canton. Agriculture forms the principal industry; cheese-making is largely carried on in the Jura. Mining and quarrying are carried on to some extent in the mountainous regions, the principal minerals being the iron ores and lithographic stones of Villebois and the asphalte of Seyssel. Area 2249 sq. m. P. (1891) 356,907. See **France,** table.

Aisne, riv., France, flows N. then W. into the Oise, l. bk., near Compiègne, after passing Vouziers, Rethel, and Soissons; length, 280 m.; used for floating timber from Mouron, 175 m.; navigable from Château-Porcien, 75 m.; frequented from Neufchâtel about 15 m. below Château-Porcien; with lateral canal from Vouziers to Condé (above Soissons). The Canal des Ardennes (62 m. long), beginning at Condé, below which the riv. is canalised, connects the A. with the Meuse. The lateral canal of the A. is connected with that of the Marne at Condé-sur-Marne by a canal 36 m. long.

Aisne, a dep. of France touching the middle of the Belgium frontier in the NE.; divided into 5 arrs., Château-Thierry, Soissons, Laon, Vervins, and St. Quentin; cap. Laon. It is for the most part a large undulating plain belonging almost entirely to the basin of the Seine, though a small part on the N. contains the head-waters of the Somme, Escaut, and Sambre. The principal rivers of the Seine basin are the Oise, Ourcq, a trib. of the Marne, and the Marne itself. These rivers, together with canals, afford a considerable amount of navigation. Woods occupy about one-seventh of the surface, and this extent of forest, along with the very large number of small lakes, renders the climate somewhat humid and cold. Cereals form the principal crops, but potatoes, flax, hemp, and oil-seeds are also largely cultivated. The principal manufacturing industry is that of cotton and other textiles at St. Quentin; the plate-glass of St. Gobain has been noted since the time of Colbert, its founder (1665). The dep. has been formed out of various old dists. In the N. the Vermandois, including the Thiérache, in the middle Laonnais and Soissonnais, and in the S. portions of Valois, Tardenois, and the Brie Pouilleuse or Champenoise. Area 2868 sq. m. P. (1891) 545,493. See **France,** table.

Aisthorpe, par., Eng., Lincolnshire, W. Lindsey or Gainsborough div., 6 m. N. by W. Lincoln, 5 m. NE. by N. Saxilby stn. P.<250; eccles. par. (**A. with West Thorpe**) P.<250.

Ait, Ida, or *Idan,* Berber, 'tribe.'

Ait, or **Eid,** harbour in E. Africa, on the Red Sea, N. of Strait of Bab-el-mandeb, 13° 55′ N.

Ait-Abbes, a once powerful Kabyle (Berber) tribe in Algeria, in the W. of prov. Constantine, who held command of the Biban or Iron Gates [**Biban**].

Aivei, riv., New Guinea, entering the Gulf of Papua in about 145° 12′ E.

Aix. See *Aigues.*

Aix, tn., France, dep. Bouches-du-Rhône, arr. Aix, 17 m. N. by E. Marseilles, the ancient *Aquæ Sextiæ,* the earliest Roman settlement in France. It has a hot saline spring, temp. 69°–98° F.,

numerous manufactures, an academy connected with the University of France, a library of more than 100,000 vols., and numerous antiquities; birthplace of the navigator D'Entrecasteaux (18th century). Alt. 670 ft. P. 24,700.

Aix d'Angillon, Les, vil., France, dep. Cher, 12 m. NE. Bourges. P. <2000.

Aix-en-Othe, small tn., France, dep. Aube, arr. and 17 m. WSW. Troyes. P. <3000.

Aixe-sur-Vienne, small tn., France, dep. Haute-Vienne, on the Vienne, 7 m. WSW. Limoges. P. <3000.

Aix, Ile d', small isl., France, in Atlantic Ocean, 5 m. from W. ct., dep. Charente Inférieure, in 46° 2′ N. In the roadstead of Aix, Napoleon I. gave himself up to the English on board the *Bellerophon* in 1815.

Aix-la-Chapelle (the French name, and the name most familiar in England; in German, **Aachen**; the ancient *Civitas Aquensis*), a city of Rhenish Prussia, cap. govt. Aachen, 40 m. WSW. Cologne. It has a cathedral founded 796, a town-hall on the site of the palace of Charlemagne, who is believed to have been born here (742); celebrated mineral baths, temp. 111° to 143° Fahr. Situated between two small but productive coalfields, the Worm basin on the N. and the Inde basin on the S., it now carries on various manufacturing industries on a large scale, the principal being those connected with iron and steel (needles a specialty) and textile industries, above all that in wool. Treaties of peace were concluded here—(1) in 1688, between France and Spain, by which France secured possession of Flanders; (2) in 1748, which terminated the war of succession in Austria. A European congress was held here in 1818, which resulted in the withdrawal of the allied troops from France. Alt. 581 ft.; mean temp., yr. 50.2° F., Jan. 36.3°, July 65.7°. P. in 1815, when the town came into the possession of Prussia, about 30,000; (1871) 74,000; (1890) 101,800; (comm.) 103,500.

Aix-les-Bains, tn., France, dep. Savoie, arr. and 8 m. N. Chambéry, on the Lac du Bourget, with noted hot springs, the *Aquæ Gratianæ* of the Romans, now much frequented. It is proposed to construct a rly. up Mont Revard (5145 ft.), which adjoins on the E. and commands magnificent views, including Mont Blanc. Alt. 700 ft. P. <4000.

Ajaccio, fortified tn. and seapt., cap. of Corsica, on the W. ct., on the N. side of the **Gulf of A.,** with sardine fisheries and trade in coral and the products of the isls.; birthplace of Napoleon I. (1769). Mean temp., yr. 62° F., Jan. 51°, Aug. 77.2°. P. 17,200.

Ajaigarh, native state and fort, Central India, 105 m. WSW. Allahábád. Alt. of fort, 1744 ft.; estimated area of state, 802 sq. m. P. 80,000.

Ajalon, place named in O. T. See **Yâlo.**

Ajampur, tn., India, Mysore, 102 m. NE. by E. Mangalore.

Ajan, a name formerly applied to the E. ct. of Africa from Cape Guardafui to the Zanzibar coast.

Ajanta, vil. and ravine, India, Haidarábád, 50 m. NE. by N. Aurangábád, noted for its Buddhist cave-temples and monasteries hewn out of the solid rock, belonging to the period from about 200 B.C to 600 A.D.

Ajello, comm., Italy, Calabrie, prov. Cosenza, 27 m. NW. by W. Catanzaro. P. 3000.

Ajemor, a plain, Africa, in the W. of the Sahara, between the Muydir and Tademait plateaus, crossed by 27° N. 4° E.

Ajer, or **Adzer,** tribe, Sahara. See **Azjer.**

Ajeta, comm., Italy, Calabrie, prov. Cosenza, 48 m. S. Potenza. P. 3000.

Aji-chai, riv., in the NW. of Persia, flows W. into Lake Urumia, passing close to, and N. of, Tabriz.

Ajlân, vil., Palestine, *Eglon* in the O. T., 31° 34′ N., 34° 43′ E., 16 m. E. by N. Ghuzzeh (ancient Gaza).

Ajmere, city, Brit. India, cap. Ajmere-Merwárá, 78 m. WSW. Jaipur, situated on the lower slopes of Táragarh hill, which rises to the height of 2855 ft. above sea-level, 1300–1400 ft. above the plain lying at its base between ridges of the Aráwalli hills, and is crowned by a strong fortress commanding every part of the city. Among its more noteworthy buildings are the Daulat Bágh, or Garden of Splendour, now the residence of the Chief-Commissioner of A.-Merwára; and a fine Mohammedan mosque, originally a Jain temple, on the Táragarh hill. On the S. of the city is the Dargah, the burial-place of a saint of the 13th century, a place sacred both to Mohammedans and Hindus. The city has two institutions for the higher education—A. College, affiliated to Calcutta University, and Mayo College, for the education of the sons of Rájput nobles. Alt. 1611 ft.; mean temp., yr. 74° F., Jan. 58°, May 89°; rainfall, yr. 22.5 in., June–Sept. 20.1 in., July–Aug. 14.2 in. P. (1881) 49,000; (1891) 69,000.

Ajmere-Merwárá, an isolated Brit. Indian prov. occupying the crest of the water-parting of Rájputána, traversed by the Aráwalli hills, with an area equal to rather more than 2½ times that of the English co. of Durham. It is not naturally fertile, but has been made productive by the construction of numerous tanks made by damming up the small streams in the head of their gorges. Lead, copper, and iron abound in the Táragarh hill [**Ajmere**], and lead mines were worked till 1846. Ajmere proper was ceded in 1818 to the British, who two years later conquered the dist. of Merwárá, which lies to the S. and forms somewhat less than a fourth of the whole prov. Before this conquest, Merwárá was inhabited only by savage predatory hill tribes (Mers = 'hillmen'), but under British rule it has been made peaceful and productive through the construction of tanks similar to those of Ajmere. The climate is said to be healthy, but fever is endemic in Ajmere city, and epidemics of cholera are frequent. Ophthalmia and guinea-worm are also common. See **Rájputána** and **India.**

Ajneriganj, vil., Brit. India, Assam, dist. and 33 m. NW. by W. Sylhet.

Ajnod, vil., Central India, 18 m. NNW. Indore.

Ajodhya, an ancient tn., Brit. India, Oudh, dist. Faizábád, on the r. bk. of the Gogra, 77 m. E. Lucknow, adjacent to the tn. of Faizábád; at a remote period one of the largest and most magnificent of Indian cities, the glories of which are recounted in the Rámáyana [**Oudh**]. Of this only ruins survive. The modern town is a small place, but is the scene of the great annual fair of Rámnámi, which is attended by about 500,000 people. P. 12,000.

Ajos, vil., Paraguay, 73 m. E. Asuncion. P. <2000.

Ajurnoca, tn., Brazil, Minas Geraes, 100 m. NE. Rio de Janeiro. P. 17,000.

Ak, Turkish, 'white.'

Akabah ('steep slope,' Egli), **Gulf of,** the north-eastern arm of the Red Sea, Arabia. See *Jour. R. G. S.*, 1879, p. 1; map, ab. 1:1,000,000.

Akabah-i-Holwan ('the defile of Holwan'), a pass often called 'the Gates of Zagros,' to the NW. of Kirind, in the W. of Persia, prov. Ardilan, on the road from Bagdad to Kirmanshah. Alt. 4630 ft.

Akalbi, tn., Africa, in the oasis of Tuat, Sahara, in 26° 24′ N., 1° 35′ E.

Akkrum, comm., Holland, prov. Friesland, 10 m. S. Leeuwarden. P. <2000.

Akma-dagh. See **Alma-dagh.**

Ak Mechet, small seapt., Russia, Crimea, govt. Taurida, on the W. ct., 78 m. NW. by N. Sevastopol. Open roadstead, 28 ft. deep.

Akmolinsk, prov., Russian Central Asia, a little larger than Germany, in the general governorship of the Kirghiz Steppes, has Turgai in the W., Tobolsk in the N., Semipalatinsk in the E., Semiryechensk and Syrdariinsk in the S. Divided into five dists., the chief tns. of which are: Akmolinsk, Atbasar, Kokchetav, Omsk, the cap. of prov., and Petropavlovsk. Its northern part is a high steppe, covered with numerous brackish and fresh-water lakes, watered by the upper tribs. of the Ishim, and chiefly occupied by nomadic Kirghizes, only a line of Cossack settlements (formerly the 'Siberian Frontier Line') running along its N. frontier. The 500 to 600 ft. high spurs of the Tarbagatai Mts., rich in gold, silver, copper, iron, and coal, fill its middle portion, separating the tribs. of the Irtysh from the steppe rivs. flowing S., to be lost in sands before having reached the Syrdaria. The valleys between these spurs being very fertile, well watered, and interspersed with forest groves, are now the seat of vils. of Russian, and partly Kirghiz, agriculturists. A dry, stony desert (Bek pak dala, or Famine Steppe) spreads in the S. toward the Chu riv. and L. Balkhash. Climate excessive; very cold winter, severe snowstorms in spring, and burning hot winds in summer, destroying all grass vegetation. Agriculture on increase, both among Russians and partly Kirghizes. Wheat, rye, and oats raised; culture of tobacco; extensive cattle breeding, chiefly in the N. (597,000 horses, 300,000 cattle, 1,200,000 sheep, 84,000 camels); mining of recent origin (about 280 lbs. gold, and 12,000 tons of coal every year); large quantities of salt obtained from lakes; the transport of Central Asian goods from Khiva to Petropavlovsk, and of Russian goods from Petropavlovsk to Turkestan, is a considerable source of income; active trade in tallow, hides, wool, and sheepskins exported; animated fairs (yearly return of 30 fairs, £850,000), the chief of which at Petropavlovsk and Akmolinsk. Area, 211,566 sq. m. P. (1890) 500,180, out of whom 349,300 nomads, almost entirely Kirghizes.

Akmolinsk, or **Akmoly,** Russian Central Asia, cap. of prov. A., 287 m. SW. of Omsk (503 m. by high road from Ishim), on Ishim R. Active trade, large fair. Alt. 1004 ft.; mean temp., yr. 34.6°, Jan. 1.5°, 69.8°; mean rainfall (9 yrs.), yr. 9.1 in.; June–Oct. 6.5 in. P. (1891) 5500.

Akola, tn., Brit. India, Berár, cap. dist. Akola, on a trib. of Purna R., 53 m. WSW. Amráoti. Alt. 930 ft.; mean temp., yr. 78° F., Dec. 66°, May 93°; rainfall, yr. 30.2 in., June–Oct. 27.7 in. P. 21,500.

Akot, tn., Brit. India, Berár, dist. and 30 m. N. Akola. P. 16,000; Hindus, 12,100; Moham. 3800.

Akyáb, tn. and seapt., Burma, cap. of A. dist. and of Arakan div., at the mouth of the Kuladan R., in 20° 7′ N. It has a good harb., protected from the SW. monsoon. The dist. has a malarious climate, with a very heavy rainfall. See **Burma.** Alt. 20 ft.; mean temp., yr. 79° F., Jan. 69°, May 84° ; rainfall, yr. 195.7 in., May to Oct. 188·8 in., June–July 102.6 in. P. of tn. (1881) 34,000 ; (1891) 38,000.

Akyad el Ghatowire, vil., Egypt, 25 m. WNW. Ismailia.

Al, or *El,* Arabic definite article.

Ala, Turkish, 'variegated,' as in Ala-tau, a name applied to several mt. ranges in which the snow is seen in patches (Egli).

Ala, tn., Africa, Bornu, to the S. of L. Chad, in about 12° 13′ N. (Overweg).

Ala, tn., Austria, Tyrol, 23 m. SSW. Trent, on the l. bk. of the Adige. P. <5000.

Ala-archa, Russian Central Asia. See **Pishpek.**

Alabama, riv., U.S., in the state of A., formed by the confl. of the Coosa and Tallapoosa a little above Montgomery ; winds tortuously W. and SW. till it unites with the Tombigbee to form the Mobile R. (50 m. long), which flows S. into the head of Mobile B. Just above its confl. with the Tombigbee it gives off the Tensaw arm or bayou, which also flows S. into Mobile B. It is 312 m. long, navigable for vessels of 6 ft. to Claiborne (60 m. above the confl. with the Tombigbee), and for smaller vessels to its head. Its volume is, however, very variable.

Alabama, one of the U.S., to the E. of Mississippi and N. of Florida, with a coast-line of 60 m. on the Gulf of Mexico between these two states ; cap. Montgomery (since 1847) ; other chief tns., Mobile (the only seapt.), Birmingham, Anniston, Selma, Huntsville, Florence, Pratt Mine, Gadsden, Bessemer. The **surface** is highest in the NE., where the last ranges of the Appalachian system enter the state. To the S. these are followed by extensive plains, which in the extreme S., in some places for 60 m. inland, are little above sea-level. Montgomery is only 160 ft. above the sea ; Birmingham, just to the S. of the Appalachians, about 600 ft. ; Fort Payne, in an Appalachian val. in the NE., nearly 900 ft. The chief rivers besides those named under A. Riv. are the Tennessee, which traverses the N. of the state from E. to W., the Black Warrior, and the Chattahoochee. The **climate** towards the S. is sub-tropical ; malaria prevails along the Gulf coast and the rivers, and all the low-lying tracts are subject to intermittent and congestive fevers. [**Montgomery, Mobile.**] The state is divided into **four regions** : the cereal region in the N. producing grains as well as cotton and fruits ; the mineral region, including all the mountainous and hilly tracts in the NE. ; the cotton or cane-brake region, or black belt, extending from about 33° to 31° 40′, in which negroes predominate, and large quantities of cotton are grown in very rich soil ; and the timber region, in which low sandy plains are covered with forests of yellow- and pitch-pine, yielding turpentine and rosin as well as lumber. Cotton is the staple agricultural product of the state ; among others of importance are maize, oats, tobacco, hay, and rice. Since the civil war of 1861–5 the agricultural production of A. is declined, in consequence partly of exhaustion of the soil, partly of the indolence of the freed negroes. The **mineral region** of the state, of which Birmingham is the centre, is that which is now being most rapidly developed. It includes 5500 sq. m. of rich coal-measures (the principal coalfields being the Warrior, Cahaba, and Coosa), along with vast deposits of easily accessible iron ore and limestone. The Red Mountain vein of iron ore extends for more than 100 m. across the state, with a width of half a mile, and includes throughout a stratum of red hematite 2–8 ft. thick. Brown hematites also abound in Bibb, Shelby, Jefferson, and other cos. In 1870 no regular coal-mining was carried on in the state, but twenty years later A. produced upwards of 3,000,000 tons, and within the same period it had risen to be the third state in the production of pig iron. Among other minerals are beautiful white as well as coloured marble (near Talladega), various other stones, besides gold, graphite, lead, and copper, which, however, are of little or no economic importance. **Manufactures** have grown with the coal and iron production. The chief are ironworks of various kinds ; next in importance, cotton. **Education** is backward. The number of illiterates is very large. There is a state university at Tuscaloosa. A. was first visited by Europeans under the Spanish cavalier De Soto in 1540. The present site of Mobile was occupied in 1711 by the French, who ceded A., with the rest of their possessions E. of the Mississippi, to the English in 1763. After the constitution of the U.S. it belonged first to Georgia, then to Mississippi, till it was admitted as a state in 1819. For various statistics see **United States,** table.

Alabara, ct. vil., W. Africa, on the Bight of Benin, 18 m. E. Lagos, in 3° 4′ E.

Alampur, tn., India, on the S. frontier of Haidarábád, on R. Kistna, 95 m. ENE. Bellary.

Alan, or **Camel,** riv., Eng. See **Camel.**

Aland, riv., Ger., in the Prussian prov. of Magdeburg, flows N. then NW. into the Elbe, l. bk., at Schnackenburg in the extreme E. of prov. Hanover ; navigable from Seehausen.

Åland Is., a group of numerous small isls., nearly 300 in number, many of them mere rocks and skerries, in the mouth of the Gulf of Bothnia, belonging to Finland. The chief isl., **Å.,** formerly contained the fortress of Bomarsund.

Alanje, vil., Colombia, Panama, 144 m. W. Panama.

Ala'otra, or **Alautra,** lake, Madagascar, in about 17° 9′–35′ S., 48° 40′–49° 4′ E., 37 m. long, formerly larger ; drained NE. into the Indian Ocean.

Alapakam, vil., Brit. India, Madras, dist. South Arcot, near the E. ct., 8 m. SSW. Cuddalore.

Alaply, tn., Asia Minor, on the N. ct., 115 m. NW. Angora, 7 m. S. by W. Eregli.

Alapur, tn., Brit. India, NW. Provs., dist. Budáun, 31 m. SSW. Bareilly. P. 6000.

Alapayevsk, iron and copper works, Russia, govt. Perm, on the Neiva, 80 m. NNE. Ekaterinburg. P. (1890) 8400.

Alara, tn., Asiatic Turkey, 95 m. SSW. Konia.

Alas, strait, Eastern Archipelago. See **Allas.**

Alashan, the southern part of the desert of Gobi, Mongolia, inhabited by the Olüts.

Alashehr, the ancient *Philadelphia*, tn., in the W. of Asia Minor, 74 m. E. Smyrna, with which it is connected by rail; seat of a Greek archbishop; a place held sacred by the Turks, with whom it is a favourite place of burial. Alt. 950 ft. P. 22,000.

Alaska, a territory of the U.S., forming the north-western portion of the continent of N. America, extending inland to 141° W., as far S. as the point where that meridian touches the summit of the ct. mts., and thence to the summit line of these mts., but at a distance of not more than 30 m. from ct. to the point where a line beginning at 54° 30′ N., and ascending Portland Channel, touches the mts. It was acquired by the U.S. from Russia by purchase in 1867. The Coast Range of N. America extends through the southern portion of Alaska and the penin. of Alaska, and is continued in the Aleutian Is., which also belong to the territory. It contains some of the highest summits of the chain (Mount St. Elias, Mount Fairweather, Mount Crillon), several of which are volcs. There are also some detached peaks further inland, including the still active Mount Wrangel, at the distance of 120 m. from the ct. Large glaciers (Muir, Guyot, &c.) descend at different places to the ct. The chief riv. is the Yukon, rising in the Rocky Mountains of the British possessions, and flowing in a westerly course through the centre of the territory to its delta, on the ct. of Bering Sea. The territory may be divided into three distinct dists., differing in climate, agricultural capacity, and physical character:—(1.) The northern or Yukon dist., between the riv. and the Arctic Ocean, with rolling or rocky hills and broad marshy plains, without roads, except an occasional trail, with a soil always frozen at a depth of 3 or 4 ft., and with an excessive climate. Summer temperature (at Fort Yukon) 59°, winter 23° Fahr. (2.) The Aleutian or middle dist., comprising the Aleutian isls., with a generally warmer and moist climate; the average of the snow-line is 3510 ft. above the sea, the interior covered with forests, though in the Aleutian isls. there is no wood larger than a shrub, whilst grasses are luxuriant. The average temperature of this dist. is from 36° to 40° Fahr. (3.) The Sitkan dist., from the southern boundary of the territory to the Alaskan penin., is rugged and mountainous, and covered with forest. The fisheries of Alaska extend over the banks from the ice limit in Bering Sea southward. Codfish are most abundant and valuable, besides which are the halibut, herring, and mullet. The herring fishery is carried on principally at Killisnoo, on the small isl. of Kenesaw, and for the sake of the oil and manure furnished by the fish. The fresh waters of Alaska abound in salmon, white fish, turbot, and pike. More than 3,000,000 salmon have been taken in one year at Karluk, where the largest salmon cannery in the world is situated. The pursuit of the whale, seal, and walrus is another source of revenue. The fur trade is the most important business of the territory, and has been fully developed. Among the more important fur-bearing animals are the sea-otter, now greatly reduced in numbers; the fur seal, which appears on all the isls. of the coast from June to October, but chiefly on the Pribylov group; the fox, martin, mink, beaver, otter, musk-rat, and bear (both black and brown), in the interior lands. The productive mineral deposits are those of gold, silver, and lignite. There are now several quartz-crushing gold-mines, the principal being the Treadwell Mine on Douglas I., and gold is obtained in the form of dust in the Yukon region. The production of silver is insignificant. Lignite is worked at Herendeen B., on the N. side of the Alaskan penin., and on the Shumagin Is., to the S. of that penin. Copper, cinnabar, and galena are known to exist, but have not yet been worked with success. Ice is largely exported to San Francisco. Forests cover the ct. regions as far west as Kadiak I., and about one-fourth of the interior is estimated to bear forests where not higher than 1000 ft. above sea-level; but the valuable forest trees (yellow cedar, pine, and hemlock) are found only in scattered clumps amidst vast areas of stunted Sitka spruce. Exportation of forest products is at present forbidden by the govt. Cap. Sitka, on Baranoff I. Area, 577,390 sq. m. P. (1890) 31,795, of whom 23,274 were Indians, 2287 Mongolians (chiefly Chinese, engaged for the summer as labourers in the salmon-canning establishments, &c.). See Elliot, *An Arctic Province*, London, 1886; Allen, *Report of an Expedition in the Territory of Alaska*, Washington, 1887; *Proc. R. G. S.*, 1887, p. 269, with map (about 1 : 2,950,000) of the S. coast from Kadiak Island to Sitka; *U.S. Census Bulletin*, No. 39 (1891).

Alassio, fishing-tn., Italy, Liguria, prov. Genoa, 24 m. NE. by E. San Remo. P. <5000.

Alata, tn., Asiatic Turkey, on the S. ct., 57 m. SW. by W. Adana.

Alatau, several chains of mts. in Central Asia and Siberia. **1. Trans-Ili A.** (*Zailiiskiy A.*), between L. Issyk-kul and the val. of Ili R., 180 m. long, 8000 to 12,000 ft. high, snow-clad; highest peak, Talgarnyn, 14,000 ft. Consists of two parallel chains, of which the southern has the name of *Kungei A.* **2. Terskei A.,** on the S. shore of same lake, joins the Muz-art group of peaks in the E., 200 m. long, 11,000 to 18,000 ft. high (chief peak Alexandrovskiy). **3. Dzungarian A.** or **Semiryechenskiy A.,** on the border of high plateau in SE. of Lake Balkhash, nearly 270 m. long, alt. 11,000 to 13,000 ft., snow-clad, few passes. **4. Kuznetskiy A.,** a complicated Alpine region on the frontier between Tomsk and Yeniseisk, 400 m. long, 100 m. wide, joins Sayan in S., 6000 to 7000 ft. high; gold-bearing.

Alatoz, comm., Spain, prov. and 20 m. ENE. Albacete. P. <2000.

Alba de Tormes, tn., Spain, prov. Salamanca, 14 m. SE. Salamanca; scene of a victory of the French over the Spaniards, November 26, 1809. P. <3000.

Albáida, tn., Spain, prov. Valencia, 45 m. S. by W. Valencia. P. <4000.

Albäk, bay, Denmark, on the E. ct., in the N. of Jutland.

Albani, or **Laziali, Monti,** a group of volcanic mountains, Italy, 13–20 m. SE. Rome. In ancient times their highest summit was crowned by the temple of Jupiter Latialis or Latiaris. Alt. 2535 ft.

Albania, a region in the W. of European Turkey, having no fixed limits, but inhabited by a people usually called Albanians, but called by themselves **Shkipetars,** or **Skipetars** (their land Shkiperia), and by the Turks **Arnauts.** Their land extends from Montenegro in the N. to the Gulf of Arta in the S., and from the Adriatic eastwards to the Shar Dagh and the mts. running S. from that range, and thus embraces the Turkish vilayets of Skodra (Scutari) and Yania (Yanina), with portions of those of Kossovo and Monastir. It is mainly occupied by mts. and high plains. The principal rivs. are the Boyana and Drin in the N., Shkumbi, Semeni, and Viosa in the middle, and the Artino in the S.; the principal lakes, Scutari, Okhrida, and Yanina. The Albanian is an Aryan language of the Thraco-Hellenic family, and is divided into two chief dialects: the Gegh, spoken by the people to the N. of the Shkumbi, and the Tosk, to the S. of that riv. The Albanians are partly Mohammedan, partly Christian, the Gegh Christians adhering to the Latin rite, the Tosk Christians to the Greek rite. They are not confined to A., but are found also in many parts of Greece, and also in Lower Italy, Sicily, Montenegro, Bulgaria, Slavonia, and Dalmatia. Their total number is estimated at <2,000,000.

Alba'no, comm., Italy, prov. and 15 m. SE. by S. Rome, on the SW. side of **Lake A.,** a small crater lake, 970 ft. above sea-level. The Pope's villa of Castel Gandolfo is among those which surround this lake. The duct which the Romans pierced through the solid rock to drain off the surplus waters of the lake during the siege of Veii (396 B.C.) is still to be seen. P. <7000.

Albano, tn., Italy, Venetia, prov. and 5 m. SW. by W. Padua. P. <5000.

Albano di Lucania, tn., Italy, Basilicata, prov. and 12½ m. E. by S. Potenza. P. <3000.

Albany, riv., Canada, forming part of the NW. frontier of Ontario, issues from L. St. Joseph, and flows E. then NE. into James B.; length, 400–500 m.; navigable up to Martin's Fall,

in about 86½° W.; receives from the S. the **Kenogami,** in about 84° 40′ W., which is navigable about 70 m. up.

Albany, dist. in the E. of Cape Colony, bounded N. and E. by the Great Fish R., cap. Grahamstown.

Albany, co., Queensland, crossed in the middle by 22° S. and in the W. by 146° E.

Albany, tn., U.S., Georgia, Dougherty co., on r. bk. of Flint R., 86 m. N. by E. Tallahassee, Fla. P. <5000.

Albany, co., U.S., New York, in the E., bounded on the E. by the Hudson R., and partly on the N. by the Mohawk R.

Albany, city, U.S., cap. (since 1797) of New York State, also cap. of A. co., on r. bk. of Hudson R., 142 m. from its mouth, and at the E. end of the Erie Canal, 4 m. SW. by S. Troy. It has a state museum of natural history, state library, and the Dudley observatory. It is a port of survey in the customs dist. of New York, has manufactures of stoves, and other articles in iron, &c. A fort called Fort Nassau (after 1623 Fort Orange) was founded here by the Dutch in 1614. Near the fort a settlement grew up, which was known as Beaverwyck till 1664, when it came into the hands of the English, who named it A. after the Duke of York and Albany, afterwards James II. In 1673 it came again into the hands of the Dutch, who during this second occupation named it Willemstadt. Alt. 16–30 ft. (R. R.). Mean temp., yr. 48.3° F., Jan. 23.6°, July 72.8°; rainfall (36 yrs.), 40.16 in. P. (1810) 11,000; (1850) 51,000; (1880) 91,000; (1890) 94,923.

Albany, tn., U.S., Missouri, Gentry co., 45 m. NE. by N. St. Joseph. P. <1500.

Albany, city, U.S., Oregon, Linn co., on Willamette R., 62 m. SSW. Portland. Alt. 600 ft.; mean rainfall (7 yrs.), 46.81 in. P. <4000.

Albany, vil., U.S., Texas, Schackelford co., 148 m. W. Dallas. Alt. 1401 ft. (R. R.). P. <1500.

Albany, vil., U.S., Wisconsin, Green co., on Sugar R., 80 m. W. by S. Milwaukee. P. <1500.

Albany, municip., W. Australia, Plantagenet co., on the fine harb. formed by King George Sound, 245 m. SE. by S. Perth, with which it is connected by a railway 362 m. long. It is the principal calling port for mail steamers in the colony. Mean temp. (6 yrs.), yr. 58.6° F., Feb. 66.1°, July 52.6°; rainfall (2 yrs.), 35.55 in. P. <3000.

Albersweiler, comm., Bavaria, Palatinate, 20 m. WSW. Spires. P. <3000.

Albert, co., Canada, New Brunswick, at the head of the B. of Fundy, crossed in the N. by 46° N.

Albert, dist., Cape Colony, on the N. frontier, crossed by 26° E., cap. Burghersdorp.

Albert, France, dep. Landes. See **Labrit.**

Albert, tn., France, dep. Somme, arr. Peronne, on the Ancre, 18 m. ENE. Amiens. P. 5900.

Albert, the former name of a large region in the NW. of New South Wales beyond the Darling, now divided up into cos.

Albert, riv., Queensland, flows NNE. into the Gulf of Carpentaria, a little to the west of 140° E.

Albert, co., S. Australia, bounded on the N. and W. by the Murray, and crossed by 140° E.

Albert (Nyanza), or **Mwutan Nzige,** lake, Central Africa, Nile basin, in about 1° 10′–2° 20′ N., 30½°–31½° E., about 110 m. long by 20–26 m. wide, receives at its head the Semliki R., at its NE. end the (Somerset) Nile, which issues from it again in the extreme N. as the White Nile. Alt. 2400 ft.

Alberta, one of the North-West Territories of Canada, bounded on the S. by the U.S., on the W. by the Rocky Mts., on the N. by the '18th correction line,' which is near 55° N., and on the E. by Saskatchewan and Assiniboia; with an area at least one-ninth larger than that of Great Britain; cap. Calgary. Its surface rises from an elevation of about 2000–2200 ft. in the E. to about 3500 ft. at the base of the Rocky Mts. Its chief rivs., all remarkable for their clear cold water, and rich in trout, are the Smoky R., flowing N.; the Athabaska, NE.; the N. Saskatchewan, Battle, Red Deer, Bow, Belly, and Milk, flowing E. or SE. The southern portion of the territory is mainly rolling prairie land, with isolated plateaux ('ridges') 100–200 ft. above the general surface. The principal vegetation is short buffalo grass, and trees are confined to the vals. In the E. the prairie extends to about 52½° N., and this is succeeded to the N. by a transitional region, between the Battle R. and the N. Saskatchewan, in which the short buffalo grass is replaced by grasses of a better quality interspersed with poplar forests. This has been called the 'fertile belt.' The NW. is a forest region with a more broken surface, and the same character belongs to the Beaver Hills to the S. of the N. Saskatchewan. The climate is healthy. In winter its severity is frequently mitigated by the 'chinook' (*föhn*) winds, which blow from the SW. across the Rockies. Mean temperature, winter months (January, February, March) at Fort M'Leod in the S., 21° Fahr.; summer months (July, August, September) 62.2° Fahr.; at Calgary (at the base of the Rockies, 3389 ft.), winter 12.2° Fahr., summer 58.3° Fahr.; at Edmonton, in the N., winter 11.3° Fahr., summer 55.2° Fahr. Average rainfall at Edmonton, 9½ in., snowfall 33½ in. A. is specially adapted for cattle-ranching and dairy-farming, but wheat and other grains thrive. There are enormous fields of coal and lignite. Coal is mined at Lethbridge and anthracite at Banff and Canmore, at the base of the Rockies. Petroleum is known to be present, and iron, gold, silver, galena, and copper are among the other minerals. There are hot sulphur springs at Banff, which is included in the Rocky Mts. National Park of the Dominion. [**North-West Territories.**] P. (1891) 26,123.

Geol. and Nat. Hist. Survey of Canada, Report of Prog., 1882–84 (*Dawson on the Bow and Belly Rivers*), Montreal, 1885; and vol. ii., E., 1887 (*Tyrrell on North Alberta*).

Albert, lake, U.S., Oregon, Lake co.; no outlet.

Alele, or **Wickham,** riv., New Guinea, entering the Gulf of Papua in about 145° 14′ E.

Alemeth, place named in O. T. See **Almit.**

Alemquer, tn., Portugal, dist. and 25 m. NNE. Lisbon. P.<5000.

Alemtejo ('beyond the Tagus'), prov., Portugal, divided into the three dists. of Portalegre, Evora, and Beja; cap. Evora. It stretches along the Spanish frontier from the Tagus S. to Algarve, and has about 30 m. of coast between Algarve and Estremadura. Except in the E., where branches of the mts. of Spanish Estremadura and (in the S.) of the Sierra Morena extend into the prov., the surface is level or hilly. In the W. these lower tracts are mostly covered with cistus heaths and cattle pastures, and are generally treeless, in places marshy, and have only a small cultivated area; but the E. has fine fruitful valleys, with considerable stretches of forest (especially chestnuts and cork-oaks) on the mountain slopes. The principal products are grain (above all, wheat), oil, fruit, chestnuts, and cork. Horses and mules are reared on a large scale round Evora, sheep in the NE. The only mineral of importance is copper pyrites, beds of which (continuations of those of Spain) are worked in the SE. at São Domingo. Communications are very defective. It has no navigable river. A rly. runs S. to Beja, and then branches to the E. and SW. Till lately the bay of Lisbon was the only harb. with which it was connected by rail. Neither its own ct., nor that of Estremadura S. of Setubal, has any good harb. These defects, along with the nature of the surface, accounts for its being the most sparsely peopled prov. in Portugal. It was, however, much more populous in the time of the Moors. See **Portugal,** table.

Alen, a small riv., Eng., Cornwall, flows SSW. to the Camel.

Alençon, cap. dep. Orne, France, on the S. border of the dep., on the Sarthe, 30 m. N. by W. Le Mans; with manufactures of lace called *point d'A.*, established by Colbert in 1676, but now greatly declined; noted also for its cut pebbles, called 'A. diamonds.' It was held by the English from 1415 to 1449. Alt. 475 ft.; mean temp., yr. 50.9° F., Jan. 37.9°, July 65.7°. P. 15,700.

Alepe, India. See **Alleppi.**

Aleppo, or **Haleb-es-Shabba,** the ancient *Beræa,* which is probably the same as *Chalybon,* a city of Asiatic Turkey, cap. vilayet, in the N. of Syria, and one of the chief centres of trade in the Ottoman Empire, on the Koeik (ancient *Chalus*), 70 m. E. the Mediterranean, in 36° 11′ N., 37° 10′ E.; inhabited by Turks, Armenians, Greeks, Jews, Maronites, Syrians, and a few Europeans. About four-fifths of the inhabitants are Mohammedans, the remainder mainly Christians of the Greek Church. The city rose to importance on the destruction of Palmyra, and became the great emporium of trade between Europe and the East. The Italian form of the name A. dates from the time when Italians commanded the trade with the East. Many Venetian families still survive from this period and carry on Venetian industries. Manufactures silks, cottons, gold and silver thread stuffs. Trade is chiefly in the hands of the Christians. Large caravans arrive from Bagdad, Diarbekir, Mosul, Kurdistan, and Armenia. The trade with Europe is carried on principally by Alexandretta (Scanderoon). Its trade reached its highest development towards the close of the 15th cy., just before the discovery of the sea-way to India. In recent times it has suffered somewhat by the opening of the Suez Canal. The tn. is healthy, but a curious skin disease, manifesting itself by the appearance, generally in the face, of a spot which undergoes various changes, and ultimately leaves a permanent mark, is very prevalent. The same disease is met with in Bagdad and in several Syrian towns. The city was conquered by the Saracens, 636 A.D. It was ravaged by Tamerlane in 1402, and it fell to the Turks in 1517. It was ruined by an earthquake in 1170, and again in 1822. On the latter occasion, when its population was estimated at 250,000–300,000, it is said to have lost two-thirds of its inhabitants. Alt. 1140 ft. Mean temp., Jan. 39.5° F., July 83.9°. P. 127,000; Moham. 97,000; Greeks, 8000; Armenians, 5500.

Aleppo, a vilayet, Asiatic Turkey, and one of the four sanjaks composing that vilayet. The vilayet is traversed by the upper Jihun, the middle portion of the Euphrates, and the lower part of the Orontes. The N. portion is mountainous, the remainder chiefly composed of plains upwards of 1000 feet high, on which cultivation everywhere depends on irrigation. The sanjak extends from the Mediterranean to the Euphrates, and is in large part a region of inland drainage. It contains numerous oases, the principal being Aleppo and Aintab. Agriculture very backward; no modern agricultural machines are in use, but the government has established a model farm near the city of A. Chief exports, butter, oil, cotton, and silk. See **Turkey.**

Aleshki, Genoese *Elice,* dist. tn., Russia, govt. Taurida, on the l. bk. of the Dnieper, cap. of Dnieprovsk dist., 7 m. SE. of Kherson; considerable trade. P. 10,000.

Alessandria, fortified tn., Italy, Piedmont, cap. prov. A., on the Tanaro, 47 m. ESE. Turin; founded in 1168 by the Lombard league to oppose the Emperor Frederick Barbarossa, and named in honour of Pope Alexander III. It is an important rly. centre and seat of trade with Genoa, Turin, and Milan. See **Marengo.** Alt. 318 ft.; mean rainfall (17 yrs.), 26.3 in. P. 60,000.

Alevkimos, Cape, Greece, Corfu I., E. ct., in 39° 28′ N.

Aleutian Is., a chain of treeless, grassy, and mostly mountainous isls., with numerous volcanic peaks, stretching about 1650 m. W. from the narrow penin. of Alaska, and belonging to the U.S. The principal isls. of the group are Unimak and Unalaska, the most westerly Attu. The climate is humid and stormy, but free from extremes, the temperature rarely falling below zero or rising above 75°. The inhabitants are mainly Aleuts, a people allied to the Eskimo. They live chiefly by fishing. They have been partly civilised under Russian rule, and are adherents of the Greek Church. Fur-traders visit the isls. for the capture of the seal, sea-otter, and Arctic fox. P. about 8000.

Ale Water, riv., Scot., flows NE. then E. through Selkirkshire and Roxburghshire till it joins the Teviot about 1 m. below Ancrum.

Alexandretta, Turkish **Iskenderun,** corrupted into **Scanderoon,** seapt., Asiatic Turkey, on the E. side of the Gulf of A., in the angle between Asia Minor and Syria. It has an excellent anchorage, but, lying at the N. end of a low marshy plain, is unhealthy, so that the consuls and other Europeans reside at Beilan, among the hills to the S., on the route leading across the mts. to Aleppo, of which A. is the port. Average value of exports (wheat, native manufactures, wool, &c.), about £1,000,000; of imports (Manchester goods, &c.), about £1,500,000. P. 6900; Moham. 3300; Christians, 3550 (Cuinet).

Alexandria, Turkish **Iskenderieh,** the principal seapt. of Egypt, 113 m. NW. Cairo, built on a narrow isthmus between the Mediterranean and L. Mariut, partly on a small artificial penin. which runs out to sea between the old harb. on the SW. and the new harb. on the NE., and unites to the mainland the ancient isl. of Pharos, now the NW. side of the old harb, surmounted at its extremity by a lighthouse, with a light visible for 18½ m.; connected by rail with all the chief tns. of Egypt, and by the Mahmudiye Canal (10 ft. deep) with the Rosetta arm of the Nile, which lies to the E. It is fortified, is the stn. of the Egyptian fleet, and has a palace of the pasha, naval arsenal, military and naval hospitals, and a custom-house. The old harb., which is the principal one, has a depth at low water of from 15 to 28 ft; quays nearly 2 m. long. At present it does not admit vessels of the largest size, and is so difficult of entrance that it cannot be entered at night; but the entrance is being made wider and safer, so that it can be entered at all times, and being deepened to 30 ft. The port has also a floating dock 463 ft. long, 79 ft. wide, and 20 ft. deep. Nine-tenths of the foreign commerce of Egypt is carried on by this port [**Egypt**], which has direct telegraphic communication with Port Said, Suez, Beirut, Cyprus, Crete, Malta, Bona, and Gibraltar. Of the ancient city, the cisterns, catacombs, and Pompey's Pillar are the principal remains. A. was built or enlarged by Alexander the Great, 332 B.C. Under the Ptolemies it was the cap. of Egypt, and the most important commercial city in the world; the chief centre of Greek science and literature, with a population probably exceeding 500,000. The famous libraries established by the Ptolemies in the museum and Serapeion suffered on several occasions through wars and local uprisings. The latter was the last great stronghold of heathen learning, and after its capture by the Christians, towards the close of the 4th century, became one of the chief seats of Christian theology and learning till the capture of the city in 640 or 641 A.D. by Amru, general of Khalif Omer, who is said to have destroyed what was left of the library. A. lost its importance on the discovery of the route by the Cape of Good Hope, and recovered it only in 1819, under Mehemet Ali. On March 21, 1801, the French were defeated by the British under Sir Ralph Abercrombie, who was mortally wounded in the battle of Alexandria. Shortest sea route from London direct 3110 nautical m., by Brindisi 3465 m. Mean temp., yr. 69° F., Jan. 58°, Aug. 78.9°; rainfall (15 yrs.), 8.6 in. P. 210,000.

Algarve (Arabic, 'the west'), the southernmost prov. of Portugal, made up of the single dist. of Faro; cap. Faro. It is in large part mountainous or hilly (Serra de Monchique in the W., Serra de Malhão in the E.), especially on its N. frontier, where it borders on Alemtejo, but the ct. and the picturesque well-watered tract of Barrocal in the extreme SW. of Portugal (to the S. and SW. of the Serra de Monchique) are fertile, carefully cultivated, and populous. The principal agricultural products are southern fruits (figs, almonds, oranges, and carobs), which are exported. The S. ct. has numerous good but small harbs. (Sagres, Faro, Olhão), and here the fisheries are of great importance, the inhabitants of this coast being regarded as the best fishermen and seamen of Portugal. Bay salt is also an important product. A. was once the name of an important Moorish caliphate, which at the time of its greatest glory extended to the Tagus both in Portugal and Spain. The shape of the face and the dark tint of the inhabitants still bear witness to Arab admixture. Area 1873 sq. m. P. (1878) 199,000.

Algäu, or **Algau,** a name sometimes applied in a wider sense to include the whole region of the Iller in the SW. of Bavaria, sometimes confined to the Bavarian dists. of Immenstadt and Sonthofen. See **Alps,** SUBDIVISIONS, **II. B. 4.**

Alger, co., U.S., Michigan, in the NW., on L. Superior, crossed by 86° and 87° W.

Algeria, L'Algérie, a territory of N. Africa, situated on the Mediterranean, between 30° and 37° N.; extending from 20° W. to 10° E.; length 550 m., breadth 200 m. It is now mainly under civil govt., though a small area in the S. belonging to the Sahara (where its limits are most defined) is still under military govt.; divided into the deps. of Algiers in the centre, Constantine in the E., and Oran in the W., which have area and population as follow:—

Departments.	Area in sq. miles.	P. (1872).	P. (1891).	Per sq. m.
Algiers (Alger) .	65,929	872,951	1,468,127	22
Oran . . .	49,616	513,492	942,066	21
Constantine . .	73,929	1,029,782	1,714,539	23
ALGERIA . .	184,474	2,416,225	4,124,732	22

Of this total, 3,637,000 were under civil, 488,000 under military administration. The territory is regarded as a detached part of France (under a civil governor-general), each dep. sending one senator and two deputies to the National Assembly. A. is traversed by the plateau of Barbary, bordered on the N. by the Little or Tell Atlas, the ranges of which are in many places close to the ct., on the S. by the Great or Sahara Atlas, both of which contain peaks above 7600 ft. in height (see **Atlas**). The plateau has an average width of about 100–130 m., and an elevation of 1800 to 2750 ft. The Tell is the region comprising the northern slopes of the Little Atlas and the plains at their base (the principal being that of Oran, the Metija, round Algiers, and that on the banks of the Shelif), and is the only region with a sufficient amount of rain to be cultivable without irrigation. The principal rivs. are the Shelif, the Wad Rummel or Wad el Kebir, and the Seybus, and in the Saharan region the Wad el Jedy. The principal permanent lakes are the Zaghes or Zahres, E. and W., two salt lakes in the dep. of Constantine. Temporary lakes, called shots or sebkhas, occasionally appear in depressions, which are mostly wholly or partly dry sandy or saline expanses. The most important of these is the Shot Melrhirh, in the E. of the Algerian Sahara, a large depression 102 ft. below sea-level, which always contains some sheets of water or marsh. Climate temperate and healthy on the N. slopes of the mts., but pestilential in the marshy plains. Heat often excessive under the influence of the sirocco or hot wind of the desert. From April to October the sky is serene; winter mild, and marked by abundant rains. [**Algiers, Aumale, Constantine, Tebessa, Sidi-bel-Abbes, Tlemsen.**] The Algerian Sahara consists of two distinct regions—the Lower Sahara, a vast depression of clay and sand, with a store of underground water, stretching on E. as far as frontier of Tunis; and the Upper Sahara, a rocky plateau, frequently high, extending on W. to the border of Morocco. Southward it is not, as was supposed, a sterile desert, but a vast archipelago of oases, each of which presents an animated group of towns and villages, surrounded by date-palms, olives, figs, &c. Throughout the Tell, potatoes, barley, wheat, millet (sorghum), legumes, and tobacco are cultivated. The vine thrives on the hill slopes from 1000 up to about 2600 ft., and wine is becoming every year a more important product. Almost the sole economic product of the plateau is alfa, but another fibre-plant, called diss (*Ampelodesmos tenax*), also promises to be of importance as a paper-making material. Among domestic animals the most important is the sheep. Among wild animals are the lion, panther, jackal, and antelope. The harvests are sometimes ravaged by locusts. Coral and sponge are fished on the coasts. The industry of the natives, which formerly consisted chiefly of weaving and the preparation of morocco leather, is, since the French domination, nearly confined to mining. The rising exports of the country are wine, sheep, and wool, and early potatoes; among others of importance are alfa, or esparto, under which name are included several grasses, especially *Stipa tenacissima* (the 'Hulfa' of the Arabs) and *Lygeum sparteum* (the esparto of the Spaniards), nearly all of which is exported to England. Grapes and other fruit, tobacco, olive-oil, salt, and 'Numidian' marbles. Various metallic ores are known to exist, but the only ones of economic importance are those of iron. Iron ores of excellent quality are worked both in the E. (at Ain Mokra, near Bona) and in the W. (at Benisaf, 50 m. W. of Oran). Civilisation is making rapid progress in the state under French rule. Roads have been made, telegraphic communications established, bridges built, colleges and schools instituted, and trees planted. A line of railway has been completed throughout nearly the whole

length of the country from the frontier of Tunis to the region W. of Oran, and several rlys. run S. into the interior for the conveyance of alfa, one of these running from Oran to the Great Atlas Mts. Irrigation works have been constructed, and for these great numbers of artesian wells have been sunk, especially in the neighbourhood of the Wad Rhirh, to the S. of the Shot Melrhirh. (For statistics, see **Appendix,** pp. 3–5.) The country, originally inhabited by the Numidians (Berbers), was afterwards under the power of the Romans and Vandals. In the 16th century it was invaded by Spain, but Barbarossa expelled the Spanish, and founded under the sovereignty of Turkey the state of Algiers, which became redoubtable on account of its corsairs, and compelled many of the European states to pay tribute for the protection of their merchant vessels. Repeated attempts were made by the different European powers to subdue this nest of pirates, without effect, until 1816, when the city of Algiers was bombarded by the British under Lord Exmouth, after which they continued comparatively quiet until 1827, when the French govt., to revenge an insult to their consul, resolved to send an expedition on a great scale to take possession of the country. This was accomplished in 1830.

Algiers (*Al-jezair,* 'the islands'; French, *Alger*), a city and seapt. of Africa, cap. of the French territory of Algeria, built in the form of an amphitheatre, on the W. side of a bay of same name, in the Mediterranean. Lat. of lighthouse, 36° 47′ 20″ N., long. 3° 4′ 32″ E. The city, situated on a slope facing the sea, and crowned by a citadel, is 2 m. in circumference, and strongly walled; since 1830 the French have greatly extended its defences and improved its port, and the streets have been widened. It has palaces, synagogues, mosques, good shops, bazaars, markets, hotels, libraries, museums, club-houses, and in the suburbs on both sides and on the slopes of the Buzarea (1350 ft.), the hill overlooking the town, crowds of villas amidst olive, orange, pomegranate, and fig-trees, palms, cactuses, and American aloes. Several forts and outworks protect it on the land side; by sea it has in front two rocky isls. (whence its name) connected with the mainland by a mole; this and another mole, both furnished with batteries, enclose the harb. It has extensive quays, two govt. dry-docks (one 455 by 86½ ft., with a depth of 30 ft. on the sill, the other 248 by 73½ ft. and 22½ ft. deep on the sill); regular steam communication with Marseilles, Toulon, and Cette in France, and most of the ports in Africa. Submarine cables connect it with Marseilles. Mean temp., yr. 64.3° F., Jan. 54°, Aug. 78.1°; rainfall (5 yrs.), 26.72 in. P. (1862) 58,000; (1886) 71,000; (1891) 81,800 (38,000 French).

Algiers, the former name of a vil., U.S., Louisiana, on r. bk. Mississippi, opposite New Orleans, with which it is now incorporated.

Algoa Bay, SE. ct. of Africa, Cape Colony, between Capes Recife and Padron, 425 m. E. Cape of Good Hope. The Baaken R. flows into the bay, and at its mouth (W. side) is Port Elizabeth. Fort Frederick is on a hill adjacent. Lat. of St. Croix isl., in the bay, 33° 47′ 6″ S., long. 25° 49′ 7″ E.

Algodor, riv., Spain, flows NE. then NW. to the Tagus, which it joins about 12 m. E. Toledo.

Algodonar, tn., Cuba, 220 m. SE. by E. Havana, 30 m. ESE. Trinidad.

Algoma, a large co., Canada, comprising the whole of W. Ontario, N. of Lakes Huron and Superior. It is well watered, and has numerous large and small lakes; the largest, L. Nepigon. It is ill adapted by its climate for agriculture, but is rich in minerals, including iron ores (near Sault St. Mary and near Port Arthur), silver (near Port Arthur), nickel, platinum, and copper (all near Sudbury). Area, 43,132 sq. m. P. (1871) 7000; (1881) 24,000; (1891) 41,856.

Algoma, vil., Canada, prov. Ontario, A. co., a few miles to the N. of the N. Channel of Lake Huron, on the Sault St. Mary line of the C. P. R., 539 m. by rail W. Montreal. P. <1500.

Algoma, vil., U.S., Idaho, Kootenai co., on the N. P. R., 124 m. N. by E. Lewiston. Alt. 2214 ft. (R. R.).

Algona, city, U.S., Iowa, Kossuth co., on Des Moines R., 110 m. NNW. Des Moines. P. <3000.

Algonkins, or **Algonquins,** a tribe of N. American Indians, formerly numerous, inhabiting the country on both sides of the St. Lawrence and to the N. and NW. of the great lakes, now mostly confined to the regions near L. Michigan and L. Superior and the Canadian NW.

Alguada (Portuguese name), a reef in the Bay of Bengal, opposite the mouth of the Bassein R., in 15° 42′ N., 94° 12′ E., with lighthouse visible 18 m.

Alhama (from the Arabic, 'warm waters'), tn., Spain, prov. and 25 m. WSW. Granada; with warm sulphur springs. Suffered greatly from an earthquake, Dec. 25, 1884. P. 8000.

Alhama, tn., Spain, Murcia, at the base of the Sierra de Espuña, 19 m. WSW. Murcia; with warm sulphur springs. P. 7000.

Alhama de Almeria, or **Alhama la Seca,** tn., prov. and 8 m. NNW. Almeria, with warm springs. P. <4000.

Alhambra, palace. See **Granada.**

Alhambra, settlement, U.S., Montana, Jefferson co., 40 m. NE. Butte City.

Alhamilla, Sierra. See **Aljamilla.**

Alhaurin de la Torre, tn., Spain, prov. Malaga, 3 m. E. by S. Alhaurin-el-Grande. P. <4000.

Alhaurin-el-Grande, tn., Spain, prov. and 14 m. WSW. Malaga. P. 8400.

Alhucemas, a rocky islet on the N. ct. of Morocco, in 3° 54′ W., one of the Spanish Presidios.

Ali, tn., Sicily, prov. and 14 m. SW. by S. Messina. P. 3000.

Alia, tn., Sicily, prov. and 30 m. SE. by S. Palermo. P. 5000.

Allahábád, called by the Hindus **Prayág** (A. being a Mussulman name meaning 'house of God'), tn., Brit. India, at the confl. of the Ganges and Jumna, 72 m. W. Benares, cap. dist. A. and seat of govt. of the NW. Provs. Its fort stands in the angle between the two rivs., where a stronghold has always stood, though the present fort and city were founded by Akbar only in 1575. Its commercial prosperity was originally due to the great navigable rivers on which it stands, but it is now also an important rly. centre. The East Indian Rly. here crosses the Jumna by a fine bridge, and there are two bridges of boats across the Ganges. The Muir Central College at A. (foundation stone laid 1874) is the principal educational establishment in the NW. Provs. Among other objects of interest is a subterranean temple, built over an 'undying' banyan tree, which is an object of religious reverence. The Magh Melá, a great religious fair attended by about 250,000 persons, is held in December and January on a plain near the fort. For the dist. see **North-West Provinces.** Alt. 307 ft.; mean temp., yr. 78° F., Jan. 61°, May 92°; rainfall, yr. 37.6 in., June–Sept. 32.8 in., July–Aug. 21.5. P. (1872) 105,926; (1891) including cantonment, 175,200.

Allier, dep., near the middle of France. Mainly formed out of the old prov. of Bourbonnais, traversed from S. to N. by the Cher and Allier, partly bordered on the E. by the Loire, divided into four arrs., Moulins, Gammat, La Palisse, Montluçon; cap. Moulins. The surface is mainly undulating, but partly wild and rugged in the SW.; soil for the most part poor, but there is a small but very fertile district in the S., a prolongation of the Limagne. Another fertile district lies to the W. of the Allier, and a third in the valley of the Cher below Montluçon. A large part of the NW. is occupied by desolate heaths (*brandes*) N. of Moulins. The forest area is large, especially in the N. Rye is the prevailing grain. Cattle-rearing is important, and sheep-rearing, on the heaths, still more so. Minerals abundant; six coal-fields, Commentry, Doyet, L'Aumance, the Valley of the Cher, Queune, and Bert. There are also mines of iron, manganese, antimony, copper, and lead, granite and marble quarries. The mineral waters of Bourbon-l'Archambault, Vichy, and Nerisse have long been celebrated. Several manufacturing industries flourish, especially those connected with metallurgy. The Allier and Loire are both navigable within the dep. The lateral canal of the Cher ascends to Montluçon, and the lateral canal of the Loire traverses the whole of the dep. in the E. Area, 2850 sq. m. P. (1891) 424,400. See **France,** table.

Allier, large riv. of central France, rises among the mts. of dep. Lozère, at the height of 4670 ft., flows N. through deps. Haute Loire, Puy de Dôme, A., and between deps. Cher and Nièvre, and joins the Loire (with a greater volume of water than that riv.) about 4 m. below Nevers, length 233 m., navigable from Fontanes near Brioude (145 m.), but too rapid and shallow to be of much use for commerce. It carries chiefly the coals of Brassac, timber, and wine. Discharge below the confl. of the Poule at low water 880 cubic ft. per second, in flood 21,200 cubic ft. per second.

Alligator, two rivs., East A. and South A., flowing into Van Diemen Gulf, N. Terr. of South Australia.

Alligator Pond Bay, Jamaica, on S. ct., in 77° 34′ W.

Alligator Swamp, a marsh, U.S., North Carolina, in the extreme E., in Tyrrell, Dare, and Hyde cos., in 35° 40′-58′ N.

Alligin, hamlet, Scot., Ross-shire, on the N. shore of Loch Torridon, 4½ m. W. by N. of the head of the loch.

Alligny-en-Morvand, tn., France, dep. Nièvre, 61 m. ENE. Nevers, arr. and 12 m. NE. Château-Chinon. P.<2000.

Almeria, prov., in the SE. of Spain, on the Mediterranean ct., formerly included in the kingdom of Granada. It has a varied surface, containing the Sierra de Gador, the eastern (lower) portion (about one-third) of the Sierra Nevada, besides lower ranges to the E., and between these the broad valleys of its four chief rivers, the Rio de Velez, R. Almanzora, Rio de A., and Rio de Adra. Rich in mineral veins and springs and in salt. Among its agricultural products are included sugar-cane, cotton, and cochineal. Several thousands of the inhabitants live in caves hollowed out in the soft rock of the hill-sides. The **Riv. A.** flows SE. from the N. slopes of the Sierra Nevada, and enters the Mediterranean a little to the E. of the town of A. Area 3302 sq. m. P. 339,383. See **Spain,** table, and **Granada.**

Almeria, the *Portus Magnus* of the Romans, a seapt. in the S. of Spain, prov. A. on the Gulf of A., 64 m. ESE. Granada; situated amidst sterile rocky hills, one of which, immediately overlooking the town, is crowned by a Moorish fort, which still serves as a citadel. Many of the streets still have a thoroughly Moorish aspect, though in recent years the town has been largely Europeanised. Commerce active; principal exports, grapes and other southern fruits. Its roadstead, formerly unsafe and in stormy weather almost inaccessible, has been converted into a good harbour by the construction of large breakwaters, and quays are being provided with accommodation for the largest vessels. Sulphur mines near (Balsas de Gador). A railway being made to iron-mines in the Sierra Aljamilla. P. (1887) 36,200.

Almes Cliff, crag, Eng., Yorkshire, W. Riding, 5 m. SW. Harrowgate, commanding an extensive view.

Alperton, hamlet, Eng., Middlesex, Harrow div., 3 m. SE. by S. Harrow, ½ m. S. Sudbury and Wembley stn., P.O.

Alpes, Basses, dep. in the SE. of France, one of the four formed out of the old Provence; divided into five arrs., Barcelonnette, Castellane, Digne, Forcalquier, and Sisteron; cap. Digne. It is entirely a mountainous region, the E. portion belonging to the crystalline Alps, with summits rising to upwards of 11,000 ft.; the W. portion to the limestone Alps. This latter portion is one of the most arid and desolate in France, and indeed in Europe; its valleys filled with tumbled rocks rent from the mountain-sides, the slopes of which have to a large extent been deprived of their soil and vegetation by torrential waters. This process has gone on for hundreds of years, leading to a steady depopulation of the valleys, and attempts at reafforestation meet with great difficulties. W. of the Durance, the principal riv. of the dep., a chain of the limestone Alps runs westwards under the name of the Montagne de Lure. The Durance partly bounds the dep. on the N. Its principal tribs., all on the l. bk., are the Ubaye in the N., leading up to the Col d'Argentière [**Alps**], the Bléonne, the Asse, and the Verdon, which partly separates B. A. from dep. Var. None of these rivers is navigable. The principal wealth of the higher parts of the dep. consists in its mountain pastures, to which every spring large numbers of sheep from the lower Rhone are led. Cattle, horses, mules, and asses are also reared. Cereals are grown in many places, and in the southern dists. olives and great quantities of almonds are produced, and the silkworm is reared. Mineral wealth is small, though lead, alum, a little coal, marble, and asphalt are produced. Area 2699 sq. m. P. (1891) 124,285. See **France,** table.

Alpes, Hautes, dep. in the SE. of France, adjoining the Italian frontier, formed almost entirely from the Dauphiné, but including a small part of the old Provence in the S.; divided into three arrs., Gap, Briançon, and Embrun; cap. Gap. In physical features it corresponds closely with Basses Alpes. Here also the mountain slopes of the limestone Alps have been devastated by torrents, but reafforestation is being slowly but successfully carried out. In the N., on the borders of dep. Isère, the granitic mass of Pelvoux rises to the height of 13,460 ft. out of the limestone Alps. At its northern base runs the road from Grenoble by the Col du Lautaret (6800 ft.) to Briançon and the Col de Genèvre. The principal river is the Durance, which partly separates it from Basses Alpes, and among its tribs. are the Buech, which flows from N. to S. in the W. of the dep., its valley being traversed by the railway from Grenoble to Sisteron; and the Guil, a small l. bk. trib. in the extreme E. which leads up to the Col de la Traversette [**Alps**]. About the middle of the dep. a line of valleys belonging to different river basins runs from N. to S., and is traversed by a road leading from Grenoble to Sisteron by Gap. From the N. part of this line of valleys the beautiful valley of Valgodemar leads E. to the southern base of Pelvoux, and on the E. side of a dividing ridge is continued by the Vallouise. The climate is generally healthy, except in some of the high valleys, where crétinism prevails. The dep. is the poorest in France in natural resources. Its principal wealth consists in its mountain pastures, in which fine merino sheep are reared. The only important metallic ore is argentiferous lead. Marble of all shades is abundant, and there is a considerable extent of anthracite near Briançon. The French language is everywhere understood, but various local patois, differing considerably from one another, are spoken in the different valleys. Area 2178 sq. m. P. (1891) 115,522. See **France,** table.

Alpes Maritimes, dep. in the extreme SE. of France, formed mainly from the prov. of Nice ceded by Italy in 1860, but containing also the arr. of Grasse, detached from dep. Var; divided into three arrs., Nice, Grasse, and Puget-Théniers; cap. Nice. The physical features are similar to those of Basses and Hautes Alpes. The limestone region in the SW. is specially remarkable for its magnificent scenery, its deep and dark defiles or *clus,* and its numerous swallow-holes, in which streams disappear to reappear in fine springs. Principal river the Var, with its tribs. the Tinée, flow S. to the l. bk., and Esteron, flowing E. to the r. bk. Its climate is noted for its mildness and general equability, except when the mistral prevails, a violent wind from the NNW., which brings great cold with remarkable suddenness. It blows chiefly in the W. of the dep. The mildness of the climate has caused several places on the ct. to become favourable health resorts, especially Cannes, Antibes, Nice, and Mentone. The dep. surrounds on the land side the principality of Monaco. Among the products are vines, mulberries, olives, oranges, and citrons. Flowers are cultivated on a large scale for the making of perfumes, which forms the principal industry of the dep. Silkworms and bees are reared, and oil and soap manufactured. Area 1444 sq. m. P. (1891) 258,571. See **France,** table.

Alport Moor, an upland tract, Eng., in the NE. of the High Peak div. of Derbyshire, about 5 m. ESE. Glossop.

Alpowa, vil., U.S., Washington, Garfield co., 57 m. ENE. Walla Walla. P. 30.

Alpraham, par., Eng., Cheshire, Eddisbury div., 8 m. WNW. Crewe, 1 m. WNW. Calveley stn., PMT.O. P. <500.

Alps (from Celtic, *alp*, 'high,' in a special sense 'a high summer pasture,' Egli), the great mt. system of Central Europe, enclosing the great plain of N. Italy on the N., W., and SW. In the SW. they are connected with the Apennines, the limit between the two systems being fixed here by some at one place by others at another. The lowest pass in this region is that of the Col dell' Altare (1600 ft.), which is often on that account taken as the limit. In the E. the true Alpine chains gradually merge in hills and mts., having no Alpine character in the W. of the Austrian dominions. The total length of the system is about 680 m.; the least width, between Mondovi and the Gulf of Genoa, about 30 m.; the greatest width, about the meridian of Verona, about 160 m.; the area covered by the system, about 80,000 sq. m. DIVISIONS.—Vertically the A. are divided into **Fore A.** (German, *Voralpen*), up to a height of about 5300 ft.; the middle region (German, *Mittelgebirge*), about 5300-9000 ft.; and the High A. (German, *Hochalpen*), from 9000 ft. upwards. The last region is almost entirely above the snow-line. By the brothers Von Schlagintweit the average height of the snow-line was determined to lie, in about 46⅔° N., at about 8900 ft. on S. slopes, 9200 ft. on N. slopes. In the higher valleys are *glaciers*, the longest of which, the Aletsch, descends to about 4400 ft. The Boden glacier (lower end of the Gorner) descends to about 5250 ft. The size and extent of glaciers fluctuate with the season, and to a greater extent in long periods of years. Within the last 300 years they have advanced, according to E. Richter, at periods separated by intervals of 20–45 years, on the average just 35 years. (See *Geschichte der Schwankungen der Alpengletscher*, in *Zeitschrift d. Deut. und oester. Alpenvereins*, 1891; but comp. F. A. Forel in *Jahrbuch d. Schweiz. Alpenclubs*, xxv. and xxvi.) With regard to *geological structure*, an important division of the A. into zones is made. The **Central Zone,** containing most of the highest peaks, is composed mainly of hard crystalline rocks (granite, gneiss, mica-schist, and clay-slate). The **Outer Zone,** or zone farthest from the Italian plain, and the **Inner Zone,** where it exists, are composed mainly of limestones and dolomites. The outer zone is found throughout the whole length of the system. A *longitudinal division* of the system by Mojsisovich has been based partly on this division into zones, partly on surface features. According to him, the A. form only two great divisions, the **Western A.** and the **Eastern A.,** the line of demarcation being formed by the valley of the Rhine from the L. of Constance, the valley of the Hinter Rhine, the Bernardino P., the Val Mesocco, the lower part of the valley of the Ticino, and the Lago Maggiore. In the Western A., according to this division, there is no inner zone, and in the outer zone limestones and dolomites are decidedly the most prevalent rocks. In the Eastern A. an inner (or southern) zone exists throughout, and in the outer (or northern) zone, sandstones and slates are largely intermixed with the limestones and dolomites. In another mode of longitudinal division only situation and surface features are regarded. Three great divisions are then recognised:—**I.** The **Western A.,** the part of the system stretching mainly from N. to S., between France and Italy, from Mont Blanc to the Col dell' Altare. **II.** The **Middle A.,** from the pass of the Great St. Bernard (E. of Mont Blanc) and the L. of Geneva, to a well-marked series of valleys, beginning in the S. with the valley of the Adige, and continued northwards by the Eisack valley, the Brenner Pass, the Wipp-thal joining the valley of the Inn at Innsbruck, and below that town the Inn valley. **III.** The **Eastern A.,** the remainder of the system. SUBDIVISIONS.—This threefold division is adopted in the following enumeration of the subdivisions:—**I.** The **Western Alps. A. Central Zone. 1.** The **Maritime A.,** from the Col dell' Altare to the valley of the Stura (Italy) and the valley of the Durance basin (France), communicating with the head of that valley; highest peak, the Punta Argentera (11,140 ft.) **2.** The **Cottian A.,** extending northwards to the Mont Cenis Pass and the valleys of the Dora Riparia (Italy) and Arc (France); with the Monte Viso (12,605 ft.), at the source of the Po, and the Roccia Melone (11,600 ft.) N. of the Dora Riparia. **3.** The **Graian A.,** stretching N. to the Col de la Seigne, S. of Mont Blanc; with La Levanna (11,870 ft.) on the Franco-Italian frontier, and Gran Paradiso (13,320 ft.) in Italy to the S. of Aosta. **4. Mont Blanc** (15,775 ft). **B. Outer Zone.** To the SW. and W. of these extending to the Rhone. In the midst of this zone rises the great **Massif d'Oisans,** to the W. of the Cottian A., with Mont Pelvoux (a mass of granite and gneiss), the highest peak of which belongs to the Barre des Écrins (13,460 ft.). Further N. are the A. of Savoy, which include the Chablais, extending to the L. of Geneva; highest peak, the Dent du Midi (10,690 ft.), on the l. bk. of the Rhone. **II. Middle Alps. A. Central Zone. 1. Pennine A.** From the Great St. Bernard Pass to the Simplon, the chain on the border of Switzd. and Italy, to the S. of that part of the Rhone valley in which the river flows most nearly from E. to W. In this chain, in the order from W. to E., are Mont Velan (12,070 ft.), the Grand Combin (14,160 ft.), Mont Blanc de Seilan (12,695 ft.), Tête Blanche (12,300 ft.), Dent d'Hérens (13,710 ft.), Grand Cornier (13,020 ft.), to the N. of the Dent d' Hérens; the Matterhorn, or Mont Cervin (14,775 ft), Breithorn (13,680 ft.), Monte Rosa, highest peak Dufourspitze (15,215 ft.), Strahlhorn (13,745 ft.), and to the N. of the last, between the Niklaus-thal and the Saas-thal, the Mischabelhörner, with the Dom (14,935 ft.), the Täschhorn (14,755 ft.), and the Allalin- (or Fee-) horn (13,230 ft.) and glacier. To the N. of Monte Rosa is the Gorner Glacier, separated by the Gorner Grat from the Findelen Glacier, both descending W. to the head of the Niklaus-thal. **2.** The **Lepontine A.,** from the Simplon to the Bernardino P., with the St. Gothard mass between the upper parts of the valleys of the Reuss and Ticino, highest peak the Piz Centrale (9850 ft.), and the Adula group, at the source of the Hinter-Rhine; highest peaks, the Rheinwaldhorn (11,045 ft.), and the Güferhorn (11,130 ft.). **3.** The **Rhaetian A.,** from the Bernardino P. and the Hinter-Rhine valley to the E. limit of the Middle A., and from the Klosterthal and the Stanzerthal (the valleys running E. and W. through Vorarlberg and the NW. of the Tirol in the N. to the valley of the Adda and its connection with the Etsch (Stelvio P.) in the S. To this group belong (*a*) the Rhætikon chain in the NW., with Scesaplana (9740 ft.); (*b*) the Silvretta group, to the N. of the Lower Engadine, with the large Silvretta glacier and the Piz Linard (11,205 ft.); (*c*) the Albula group, to the NW. of the Upper Engadine, with the Piz Kesch (11,210 ft.); and (*d*) the Bernina group, to the S. of the Upper Engadine, with the Piz Bernina (13,290 ft.), and to the N. the Morteratsch peak (12,315 ft.), not the next in height, but very conspicuous from the valley. **4.** The **Oetzthal** and **Stubai A.,** with the **Sarnthal A.** to the SE., all enclosed by the valleys between the Inn, Etsch (Adige), and Eisack, and those which connect the latter with the Inn; highest peak, the Wildspitze (12,365 ft.), in the Oetzthal group. **B. Outer Zone. 1.** The **Bernese A.,** from the Lake of Geneva to the head of the Aar valley, between the cants. of Bern and Valais, the highest peaks occurring in the Bernese Oberland and the eastern part of Valais, namely, to the E. of the Simmenthal and the valley of Sierre. To the W. of this limit the highest peaks are the Diableret (10,645 ft.) and the Wildhorn (10,720 ft.); to the E., in the order from W. to E., the Wildstrubel (10,710 ft.), the Balmhorn (12,170 ft.), the Tschingelhorn (11,745 ft.), the Aletschhorn (Valais, 13,770 ft.); to the N. of the Aletschhorn, in close succession on or near the Bern-Valais border, the Breithorn (12,410 ft.), the Jungfrau (13,670 ft.), the Mönch ('Monk,' 13,460 ft.), the Viescherhörner (Gross V.-horn, 13,280 ft.; Hinter-V., 13,185 ft.; Klein V., 12,810 ft.), Finsteraarhorn (14,020 ft.); and to the N. in Bern, the Eiger (13,040 ft.), Schreckhorn (13,380 ft.), and Lauteraarhorn (13,260 ft.). To the SW. of the Aletschhorn is the Upper (Ober), and to the SE. the Great Aletsch Glacier, about 12 m. long. **2. A. of the Four Forest Cantons,** between the Aar and the Reuss valleys; highest peaks all in the SE.; Titlis (10,625 ft.), and farther S. the Dammastock (11,915 ft.), and Galenstock (11,800 ft.). **3. A. of Glarus, Schwyz, and St. Gall,** with Tödi (11,885 ft.), in the extreme S. of Glarus, and the Mythenstock (6240 ft.) in Schwyz. **4.** The **Algäuer A.,** round the head of the Iller basin, followed to the E. by the **N. Tirolese A.,** with the Zugspitze (9710 ft.), near the head of the Loisach valley. **C. Inner, or S. Zone. 1.** The **Bergamese A.,** from the Lago Maggiore to Lake Como and the lower part of the Oglio valley, including a well-marked chain to the S. of the Valtellina, in which is Monte Redorta (9970 ft.). **2.** The **Ortler** and **Adamello** groups, and to the E. of these the **Tridentine A.,** extending eastwards to the valley of the Adige; Ortlerspitze (12,810 ft.), above the Stelvio P., to the S. Monte Adamello (11,655 ft.). **III.** The **Eastern A. A. Central Zone. 1.** The **Hohe Tauern,** including in the W. the Zillerthaler A., from the Brenner P. to the Arlscharte, the pass connecting the basins of the Salzach and Drave, in about 13° 20′ E.; with the Gross Venediger (12,045 ft.) on the SW. frontier of Salzburg, and the Gross Glockner (12,455 ft.), at the point of junction of Carinthia, Salzburg, and the Tirol. **2.** The **Styrian,** or **Noric A.,** including the Niedere Tauern. **B. Outer** or **N. Zone. 1. A. of the Salzkammergut,** between the Inn and the Enns. **2. A. of Upper and Lower Austria. C. Inner,** or **S. Zone. 1.** The **Dolomite A. of S. Tyrol and Venetia,** between the Adige and the Piave (including the Ampezzo A. in the NE.; with the Marmolate (11,460 ft.) on the Austro-Italian frontier between the Fassa-thal and the Val Agordo. **2.** The **Carnian,** and, to the S., the **Venetian A.,** between the upper waters of the Piave and Tagliamento, the former a chain to the S. of the

Gail-thal. **3.** The **Karawanken,** between the valleys of the Drave and Save. **4.** The **Julian A.,** to the S. of the Save, between the Tagliamento and the Laibach R. (r. bk. trib. of the Save); with Triglav or Terglou (9395 ft.).

PASSES AND RAILWAYS.—In the following enumeration all those crossed by carriage-roads are printed in thick type. **I. From Turin**:—(1) The **Col dell' Altare** (1600 ft.), by Mondovi to Savona; a rly. now follows nearly the same route as the road. (2) **Col di Tenda** (6260 ft.), by Cuneo to Ventimiglia. (3) **Col della Maddalena** (6545 ft.), **de Larche** (a place on the French side), or **d'Argentière** (the French name of a place on the Italian side), by Cuneo and the Stura valley to the Ubaye valley (Durance basin). (4) Col de Louget (8900 ft.); and (5) Col d'Agnello (9000 ft.), both by Saluzzo and the Varaita into higher parts of the Durance basin. (6) The Col de la Traversette (9675 ft.), by Saluzzo and the Po into the Durance basin N. of Monte Viso. (7) The **Col di Genevra,** or **de Genèvre** (6080 ft.), by the Dora Riparia, then SW. to the valley of the Durance; a pass also reached by Pinerolo, the valley of the Chisone, and the Col de Sestrières (6630 ft.). (8) Col des Échelles (5870 ft.), a little to the N. of the Col de Genèvre, much less used. (9) **Mont Cenis** (6835 ft.), by the Dora Riparia, and then from Susa NW. to the Arc valley (Isère basin), the pass most used at the time when the traffic was mainly diverted to the rly. through the Mont Cenis tunnel (opened in 1871, length 7.59 m., highest point 4380 ft.), about midway between this pass and the Col de Genèvre. (10) **Little St. Bernard** (7170 ft.), by the Dora Baltea and Aosta to the Isère valley, a little to the S. of Mont Blanc. (11) Great St. Bernard (8110 ft.), to the E. of Mont Blanc, by Aosta to Martigny in the Rhone valley. **II. From Grenoble**:—The **Col de Balme** (7220 ft.), NW. of Mont Blanc by Chamonix to Martigny. **III. From Milan**:—(1) The Matterjoch, St. Théodule P., or Col du Cervin (10,895 ft.), always covered with snow, connecting the Val Tournanche in Piedmont with Zermatt in the Niklaus-thal. (2) The Weisshorn (11,520 ft.), the highest glacier pass, connecting Macugnaga in the Val d'Anzasca with Zermatt. (3) The Mondelli P. (9320 ft.), connecting Macugnaga with the Saasthal. (4) The **Simplon P.** (6595 ft.), on the road leading NW. by the W. side of the Lago Maggiore by the R. Toce and the Val di Vedro to Brieg in the Rhone valley. Across this pass was laid (1800–1806), by order of Napoleon, the first well-made carriage road across the Alps, and a rly. tunnel by this route is now projected. (5) The **St. Gothard P.** (6935 ft.), on the road following the E. side of the Lago Maggiore and the Ticino to the upper Reuss valley and the Bay of Uri; now largely superseded by a rly. **tunnel,** the longest in the world (opened for traffic in 1882; length 9.28 m.; height of summit, 3785 ft.). (6) The **Lukmanier P.** (6290 ft.), on the road leading N. by the Ticino, then farther N., then NW. by the Breno, and finally into the head of the Mittel-Rhine valley. (7) The **Bernardino P.** (6765 ft.), by the Ticino and the Val Mesocco (ascending NNE.) to the valley of the Hinter-Rhine. (8) The **Splügen P.** (6945 ft.), on the road leading NE. to Lecco, then N. by the E. side of Lake Como to the valley of the Hinter-Rhine. (9) The Septimer P. (7580 ft.), on the same route as far as Chiavenna, then E. up the Val Bregaglia, thence N. into the Rhine valley by Oberhalbstein and the Albula valley. (10) The **Maloja P.** (5940 ft.), on the same route, then leading from the Val Bregaglia into the head of the Inn valley (the Engadine). The next five (10*a*)–(10*e*) all lead from the Engadine or Swiss portion of the Inn valley. (10*a*) The **Julier P.** (7500 ft.), then from the Upper Engadine into Oberhalbstein and the Rhine valley. (10*b*) The **Albula P.** (7585 ft.), NW. to the head of the Albula R. (10*c*) The **Flüela P.** (7835 ft.), N. into the Davos valley. (10*d*) The **Bernina P.** (7640 ft.), SE. through Poschiavo to the Adda valley. (10*e*) **Ofenberg P.** (7070 ft.), SE. into the valley of the upper Etsch at Glurns. The Inn valley may be followed to its mouth, but the shortest road to Augsburg and Munich leads by (10*f*) the **Fern P.** (4100 ft.), across the outer zone of the A. to the head of the valley of the Loisach. (11) The **Stelvio P.** (in German, **Stilfser Joch,** 9040 ft.), on the road from the N. end of Lake Como E. then NE. up the Valtellina (valley of the Adda), into the upper Etsch (Adige) valley. (12) **Tonale P.** (6145 ft.), on the road branching off eastwards from the upper part of the Valtellina, and proceeding by the Val Corteno and Val Camonica to the Val di Sole, and finally joining the valley of the Adige above Trent. **IV. From Venice** (Mantua, Verona) up the valley of the Adige to its head, thence by (1) the **Reschenscheideck** (4890 ft.) down to the Inn valley above the place where the road branches off to the Fern P. (see above, **III.** 10*f*), thence westwards up the Stanzerthal across (11*a*) the **Arlberg P.** into the Klosterthal and the Rhine valley; or up the Adige and its trib. the Eisack to its head, thence by (2) the **Brenner P.** (4470 ft.) to Innsbruck on the Inn at the mouth of the Wipp-thal. Thence the shortest way to Augsburg or Munich leads first a short way up the Inn valley, then NW. by (2*a*) the **Seefeld P.** (3860 ft.) across the outer zone of the A. to the sources of the Isar and Loisach. The Brenner and Arlberg passes are now superseded by rly. tunnels, the **Brenner tunnels,** 27 in number, the longest being a little more than half a mile long; opened in 1867; the **Arlberg tunnel,** 6.37 m. long, summit 4300 ft.; opened in September 1884. It may be noticed that to reach the Lake of Lucerne from Milan only one pass has to be crossed (St. Gothard), and that there is likewise only one pass crossed in reaching the Rhine valley by the Lukmanier, Bernardino, Splügen, or Septimer routes, only one also in reaching the valleys of the Inn and Adige, and that there are only two passes on the route from Milan to Augsburg and Munich (by the Inn valley and the Fern P.), and only two from Venice to Augsburg and Munich (by the Brenner and Seefeld passes) or the Rhine valley (by the Brenner and Arlberg passes). In the Eastern A., to which the remaining roads leading from Venice belong, at least three passes have to be crossed on any route crossing the whole system. (3) By the valley of the Piave and the **Ampezzo Road** there is easy communication with the Puster-thal, whence one may proceed westwards to the valley of the Adige, or eastwards by the Drave valley to Klagenfurt, the whole valley being now traversed by rly. From Klagenfurt one proceeds N. into the Mur valley by (3*a*) the **Neumarkt Saddle** (3300 ft.), following a route traversed for the most part by rivs. of the Drave basin, and now wholly by a rly. Proceeding still farther N., one may pass from near the source of the Mur across the Niedere Tauern range by (3*b*) the **Radstädter Tauern P.** (5700 ft.) into the head of the Enns valley, and lower down into the same valley by (3*c*) the **Schober P.** (2785 ft.), now also a rly. route; still lower, by (3*d*) the **Prebühel P.** (4025 ft.); or one may ascend the Mürz-thal northwards and cross into Lower Austria by (3*e*) the **Semmering P.** (3215 ft.) or **rly.** (2970 ft.). There are several easy communications between Venice and the Drave basin by riv. valleys of the Tagliamento basin, the easiest being that by the Fella valley, leading to (4) the **Saifnitz P.** (2625 ft.), also followed by a rly. **V. From Trieste,** up the Isonzo valley to the **Predil** or **Raibl P.** (3810 ft.), across the Julier A., communicating with the Drave basin. **VI. From Laibach,** the **Loibl P.** (4495 ft.), leading from the Save valley across the Karawanken into the valley of the Drave (Klagenfurt). **VII. From the head of the Rhone valley** (*a*) northwards by (1) the Grimsel P. (7195 ft.) into the Hasle-thal (upper Aar valley), and then farther N. from near a point above the head of the Lake of Brienz across (2) the **Brünig P.** (3275 ft.), leading to the valley of the Aa and the Lake of Lucerne; (*b*) ENE. (continuing the line of the Upper Rhone valley) across (1) the **Furka P.** (7990 ft.) into the upper Reuss valley, and (2) across the **Ober-Alp P.** (6730 ft.) into the valley of the Vorder-Rhine. See also above, **II.** and **III.** (1)–(4).

Alpstein, mt.-chain of the Alps, Switzd., cant. Appenzell; highest peak, Säntis (8215 ft.).

Alsace-Lorraine, *Ger.* **Elsass-Lothringen,** imperial terr. (*Reichsland*) in the SW. of Germany, bounded E. by the Rhine, which separates it from the grand-duchy of Baden, and on the W. and SW. by France, the W. frontier being formed by the water-parting of the Vosges (*q.v.*), from the Elsasser-Belchen in 47° 49′ N. to 48½° N., divided into the districts (*Bezirke*) of Upper Alsace (*Oberelsass,* corresponding nearly to the old French dep. of *Haut-Rhin*), Lower Alsace (*Unterelsass, Bas-Rhin*), and Lorraine (*Lothringen,* made up of parts of the former deps. of *Meurthe* and *Moselle*). These are subdivided into twenty-two circles. The Vosges Mts. occupy the whole of the W. of Alsace, the northern portions belonging partly to Lorraine. The extreme S. of Alsace is an undulating tract, but N. of Mülhausen the E. half belongs entirely to the plain of the middle Rhine [**Germany**]. Lorraine, the NW. part of the terr., is entirely undulating, without any prominent physical features. Nearly the whole terr. belongs to the Rhine basin, the principal tribs. of that river in Alsace being the Ill and Moder; in Lorraine, the Saar and Mosel (Moselle). Railway communication from the Alsatian plains westward is interrupted by the Vosges over a distance of 75 m. [**Vosges,** mts.]. The Marne and Rhine Canal crosses the Vosges towards the N.; the Rhone and Rhine Canal passes through the undulating country in the S. of the prov. The agricultural products are those of SW. Germany generally, those requiring a warm climate being more abundant in Alsace, where the vine occupies about 3 per cent. of the surface, than in Lorraine, where it occupies only about 1 per cent. Forests cover the greater part of the Vosges, but in the N. are confined to the

Lorraine side. In the plain of Alsace there is also a large forest to the N. of Hagenau in the N., and between the Rhine and the Ill in the SE. Altogether forests cover about 35 per cent. of the surface. The principal mineral product is iron ore, which occurs abundantly in jurassic oolites in the Diedenhofen circle in the NW. of Lorraine; and there also are the principal blast-furnaces of the terr. Coal is also produced, the Saar coalfield extending from the Rhine prov. across the Lorraine border; and there is a small detached coalfield at St. Pilt, in Alsace. Large salt deposits at Château Salins (Lorraine). Upper Alsace is the seat of some of the most important textile industries, especially cotton, in Ger.; centres, Mülhausen and Kolmar. Glass and porcelain manufactures are largely carried on in Lorraine, near the Vosges, and at no great distance from the Saar coalfield. German is the language of Alsace, with the exception of some small districts, and the boundary between the French and German languages runs from NW. to SE. nearly through the middle of Lorraine. The terr. of A.-L., which is under the direct administration of the empire, was acquired in 1871 from France. In early times Alsace was a part of the older German empire, and in the twelfth century was formed into the two counties of Upper and Lower Alsace, which had varying fortunes until in 1648 the greater part of Alsace was ceded by the Peace of Westphalia to France, which in 1681 seized Strassburg and the terrs. subject to that town. Area 5602 sq. m. P. (1890) 1,603,506. See **Germany,** table, and **Nordgau, Sundgau,** and **Lorraine.**

Alt, German, 'old.' For some places having this prefix, see under the second part of the name Alt.

Alt, riv., Transylvania and Roumania. See **Aluta.**

Alta, tn., S. America, Peru, dep. Lima, 8 m. from the W. ct., 120 m. SE. by S. Lima.

Altagracia, tn., Venezuela, Zulia, on the E. side of the entrance to the Gulf of Maracaibo.

Altai, extensive highlands of Siberia, covering an area three times as large as Switzerland (53,000 sq. m.), in SE. Tomsk and on the Chinese frontier, in 47°–52° N. lat. and 80°–90° E. long., join the Sayan highlands in NE., and separated from the Tarbargatai and Tian Shan Mts. by the broad depression of the upper Irtysh. The name of **Great A.,** or Altain Nauru, is also given to the border ridge (600 m. long) of NW. Mongolia, which faces the above depression, continued by that of the Urungu, and runs WNW. to ESE. from the A. proper to the desert of Gobi. The Kuznetskiy Alatau [**Alatau**] is also often reckoned as belonging to the A. system. The highest ridge of the A. is the Sailughem, a border ridge of the high plateau which runs SW. to NE. along the frontier of China. Its peaks are snow-clad, and the passes across it reach altitudes over 10,000 ft. It is accompanied on the NW. by the 7000 to 8200 ft. high tabular highlands of Ukek, Chuya, and Juvlu kul, as well as by a series of shorter, partly snow-clad chains (Korgon, Uibinsk, Kholzun, Azaluk, and Katunsk), of which the Katunskiye Byelki is the highest (Kuitun, 12,000 ft.; Byelukka, 11,000 ft.; Izhik tu, 10,200 ft.—all surrounded by mighty glaciers). They are intersected by deep valleys (Bukhtarma, 200 m. long; Uba, Ulba), the lower parts of which are covered with a rich vegetation, and offer great facilities for agriculture. Several picturesque Alpine lakes (Teletskoye, the largest) are met with in the highlands. The A. is built up of granite, porphyry, and crystalline slates, covered with Silurian, Devonian, and coal-bearing Jurassic deposits. Climate characterised by extremes of heat and cold [**Barnaul**]. Gold (3600 to 4300 lbs. in 1860–72, 2500 to 2900 lbs. since), silver (16,500 to to 23,750 lbs. yearly, 36,000 lbs. previously), copper (about 10,000 cwt.), coal (17,000 to 20,000 tons), lead (20,000 to 33,000 cwt.), some iron (3000 tons), and decorative stones are extracted. The population, which is increasing by immigration, is estimated at about 700,000 Russians and 45,000 indigenes (Altayans, Telenghites, Kalmucks, and Tartars, mostly Shamanists). Chief occupation, agriculture (3,000,000 acres under culture), cattle breeding, bee-culture (400,000 hives), mining, gathering of cedar-nuts (3000 to 10,000 cwts. yearly), and hunting. Active trade with Khobdo, in China, and NW. Mongolia, in cattle and furs. Most of the A. region, including the mining region of the Kuznetskiy Alatau (chief town Kuznetsk), covering an area of nearly 170,000 sq. m., forms, under the name of *Altai Mining District*, a domain of the Imperial family. Its chief town is Barnaul.

Altamaha Sound, a bay, U.S., Georgia, between Macintosh co. and Glynn co., 54 m. S. Savannah.

Alta Mira, tn., isl. of Hayti, repub. of Santo Domingo, 106 m. NW. by N. Santo Domingo.

Altamirano, settlement, Argentine Republic, Buenos Aires, 51 m. SSE. Buenos Aires.

Amatonga. See **Tonga Land.**

Amatrice, tn., Italy, Abruzzi e Molise, prov. Aquila, on riv. Tronto, 32 m. E. by N. Terni. Alt. 3130 ft. P. 7000.

Amay, comm., Belgium, prov. Liège, on the Meuse, 13 m. WSW. Liège, 3½ m. ENE. Huy. P. <5000.

Amazon, Marañon, or **Solimões,** the chief river of S. America, and the largest in the world, in regard to its volume and extent of basin. The name Rio de las Amazonas, was first applied by the Spanish expedition under Orellana, which descended the river in 1541, and the members of which thought they saw female warriors among the tribes on its banks. In S. America this name is applied only to the lower course of the river. The middle part of the river (above the mouth of the Rio Negro) is called the Rio dos Solimões (after a once numerous and powerful Indian tribe), and the name Marañon, originally applied (as early as 1499) to the estuary of the A., discovered by Pinzon, is now confined to what is usually regarded as the headstream of the A., and is called by the Indians the Tunguragua. This headstream, which rises in about 10¾° S., 76° 40′ W., is far from being the largest, but it is that which enables one in ascending to continue a westerly course furthest. The longest headstream is the Ucayali, the principal headstream of which, the Apurimac, originates about 15° 20′ S., 72° W. Both rivers have a course at first northward; the Marañon, near lat. 6° S., bends, and after receiving the Huallaga from the S., joins the Ucayali about 4° 30′ S., 73° 25′ W. Here the stream has depth sufficient for any class of ships. Thenceforth the Amazon flows generally E., through the Brazilian terr. to the Atlantic, which it enters nearly under the equator, and between 48° and 50° W. Its estuary widens until it is 180 m. across. Its length from the source of the Marañon is estimated at 3050 m.; and from the head of the Apurimac at 3415 m.; for great part of which (viz., from the ocean to Pongo de Manseriche, in 4° 29′ S., 77° 33′ W., where the Marañon issues from the Andes) it is navigable and uninterrupted by any rapid or cataract. At least twenty rivers, navigable to near their sources, pour their waters into it, besides numerous less important streams. Chief tributaries the Napo, Putumayo, Yapura, and Rio Negro from the N.; the Yavari, Jutai, Jurua, Coari, Purus, Madeira, Tapajos, and Xingu from the S. By the Casiquiare (*q.v.*), a branch of the Rio Negro, the Amazon has a direct and remarkable connection with the Orinoco. The Amazon and its tributaries afford an immense inland navigation, estimated at 50,000 m.; and the extent of its basin (excluding that of the Tocantins) has been computed at about 2,320,000 sq. m. Its depth is great; at Nauta, to which steamers of 1000 tons can ascend (2000 m. from the mouth), it is 7 fms.; at Tabatinga, 11; and on the average 27 fms. below Manaos. At Obidos the depth is 40 fms. The velocity is at the average rate of 3½ m. an hour below Tabatinga, and its waters remain distinguishable from those of the ocean 400 or 500 m. from its mouth. Tides ascend for more than 500 m. from the Atlantic, and near full moon occasion a formidable bore (locally called *pororoca*), when the water rushes into the channel, with waves of about 5, or very rarely 15 ft. in height. The tropical rains swell the river annually to 40 or 50 ft. above its ordinary level. The Marañon attains its greatest height in January, the Solimões in February, the Amazon in the middle of March. In the lower part of its course the Amazon abounds with islands, and in its estuary are the large islands Marajo and Caviana. A peculiar feature of the A. river is presented by the igarapes or paranamerins, natural channels running through the dark forest parallel to the main stream, and connecting the different tribs., making it possible to go in a canoe for at least 1000 m. above Santarem without once entering the main stream. The A. has no true delta, the islands at its mouth having to a large extent a rocky basis; but in the sea to the E. of the mouth extensive shallows have been caused by the deposition of river sediment. The main exit of the A. has not yet been surveyed, and no route is known up the river from that exit, so that Atlantic steamers ascending the river pass from the town of Para to the A. by a number of channels (*furos*), so narrow that the steamers almost graze the bushes on each side. The most important trade is in india-rubber, derived from forests on the banks of its tribs., in cacao, and in pirarucu, or the codfish of the A., which forms the principal food of the natives. See **Para** (R.).

Amazonas, a vast state in the W. of Brazil, bordering on Guiana, Venezuela, Colombia, Peru, and Bolivia, traversed by the Rio Negro, Yapura, Amazon, Jurua, Purus, and Madeira, the last of which partly separates it from the prov. of Matto Grosso; principal product india-rubber. See **Brazil.**

Amazonas, terr. in the SW. of Venezuela, the southern part of which belongs to the basin of the Amazon. See **Venezuela.**

Amb, an estate (*jágír*), consisting of mountainous terr. in the NW. of the Hazára dist., Punjab, India, the owner of which is also feudal superior of Tanáwal, between Hazára dist. and the Indus, and chief of the independent state of A., with village of A. on the r. bk. of the Indus.

Ambaca, Ambaka, or **Pamba,** tn., Portuguese W. Africa, 150 m. E. by S. Loanda, in 9° 14′ S., 15° E. Alt. 2340 ft.

Amendolara, tn., Italy, Calabria, prov. Cosenza, 49 m. SW. by S. Taranto. P. <2000.

Ameni, the largest of the Laccadive Is.

America, or the **New World,** the great division of the globe between the Atlantic and Pacific Oceans, along with the adjacent islands and Greenland. It was discovered by Norsemen about 1000 A.D., and various parts of the coast, to which they gave the names of Helluland or Stone-land, Markland or Wood-land, Vinland or Vine-land, and Hvitramannaland or White Men's Land, were settled by them, but they were driven out by the Skrölinger (Eskimo), and the knowledge then gained became only a Norse tradition. The continent was subsequently discovered and forgotten on other occasions (see *Jour. R. G. S.*, 1873, p. 156), and was finally made known to Europe by the voyage of Columbus, who landed on Watling I., Bahamas, on the 12th of October 1492. Its southern part was in large part explored in 1501–2 by the Florentine Amerigo Vespucci, and the continent was named after him by Waltzemüller or Waldseemüller (Hylacomylus) in his *Cosmographiæ Introductio* (1507). Long after that it continued to be known in the Pyrenean Penin. as the West Indies, the continent having been at first believed to be the eastern part of Asia. The Isthmus of Panama divides the continent into two great sub-divisions, North A. and South A. The name Central A. is applied in a political sense to the five republics of North A. to the S. of Mexico, and usually in a geographical sense to the region occupied by these republics, but it is also applied by some in the latter sense to the land extending from the Isthmus of Tehuantepec to that of Panama. The prevailing feature of the continent, in respect of which it contrasts in a marked manner with the Old World, consists in the fact that the great mountain ranges have a more or less southerly trend. Such ranges are nearly continuous on the W. side of the continent from N. to S., and stretch over a great length on the E. side also, both in North and South A., vast plains being interposed between. The only notable exception to this character is found in the highlands in the N. of South A. The original natives of A., known as American Indians, are believed to be all of one stock. They now form less than one-fourth of the entire population, and are most numerous in South A. The remaining inhabitants are mainly descendants of European immigrants, and of African negroes originally introduced as slaves, with a smaller admixture of Chinese and other immigrants. The entire population is comparatively small [**Continents**], and A. has no considerable extent of territory with a population comparable in density to Europe, China, or India in the Old World, even though there are large tracts fitted by nature for the maintenance of a dense population. The explanation of this contrast is to be found in the history of the continent. Compared with the Old World, A., before its discovery by Europeans at the close of the fifteenth century, was very poorly furnished with the cultivated plants and domestic animals that favour the growth of civilisation. A. had only one kind of cultivated grain, maize, to take the place of wheat, oats, rice, and other grains of the Old World; and it had no animal that could be used for the labours of the field, no animal except the reindeer of the far north yielding milk, and North A. had not even any beast of burden. Hence civilisation was little developed among the natives, and indeed only two important civilised nations existed before the advent of Europeans, one on the tableland of Mexico and the other on that of Peru.

America, Central, is the long and narrow region between 8° (Gulf of Darien) and 21° 30′ N., 77° and 94° W., connecting the continents of North and South A. In a more limited sense the term is applied to the following five Spanish-speaking republics, together with Brit. Honduras, between 7° and 18° 30′ N., 82° 30′ and 92° 30′ W. :—

States.	Area in sq. m.	Pop.	Capitals.
Guatemala . .	48,301	1,452,000	Guatemala.
Salvador . .	8,135	777,900	San Salvador.
Honduras . .	46,262	381,900	Tegucigalpa.
Nicaragua . .	47,857	282,800	Managua.
Brit. Honduras .	7,562	31,500	Belize.
Costa Rica . .	23,001	243,200	San Jose.
Total . .	181,118	3,169,300	

Geographically, the state of Panama is a part of Central A., but politically it belongs to the republic of Colombia. The greatest length from SE. to NW. is about 300 m.; breadth varying from 70 to 310 m. In the narrowest part to the S. (Costa Rica) mountains extend from sea to sea. In the broader part further N. mountains stretch almost continuously from NW. to SE., with a steep slope towards the Pacific, while on the E. a tableland, with a very varied surface, however, slopes gradually towards the Atlantic, beginning in the W. with an elevation of upwards of 2000 ft. Two well-marked features vary the surface in this northern portion. One is a series of valleys and lake-filled hollows stretching SE. from the Gulf of Fonseca to the W. of the Pacific slope of the mountains ending to the S. of the Gulf of Nicaragua. The other is a line of valleys stretching from sea to sea due N. from the Gulf of Fonseca, traversed in the S. by the river Goascoran, in the N. by the river Humuya. Here grassy savannahs interrupt the forests, otherwise continuous on the Atlantic slope. Throughout Central A. volcanoes are numerous and earthquakes frequent. Columbus discovered this region in 1502; in 1527 it was made a Spanish capt.-generalship, and it belonged to Spain until 1821, when Guatemala first declared its independence. The several states subsequently formed a confederation, which was dissolved in 1839. See also **South America, fauna.**

America, North. The **coast-line** of this continent is most varied in the northern half. The W. coast is for the most part steep. The long Gulf of California here forms a very conspicuous feature, but apart from that the coast S. of 48° N. is broken only here and there by small rocky bays and gulfs, which, however, in many cases form excellent natural harbours. The islands on the W. coast of British Columbia and Alaska guard an inner channel, with very sheltered navigation stretching through about 12° of latitude. On the E. side the estuary of the St. Lawrence, the mouth of the Hudson, Delaware Bay, and Chesapeake Bay, form important inlets in middle latitudes. South of Delaware Bay the E. and S. coasts are generally low, and in many places double. A series of natural levees, formed of alluvial sand by the mutual action of river-currents and sea-waves, run parallel to the mainland coast, from which they are separated by quiet lagoons and sounds. **Surface.**—A great plain stretches down the middle of the continent from the Arctic Ocean to the Gulf of Mexico, sloping gradually up to the Rocky Mountains in the W., and the Appalachian Mountains and other highlands in the E. In the S. of the United States this plain spreads eastwards to the Atlantic. Almost the entire area W. of the Rocky Mountains is at a high elevation, and so also is the greater part of the surface in the S. of the United States, the principal plains and lowlands in the latter area being in the penin. of Yucatan, and the E. of the penin. belonging to Honduras and Nicaragua. The highest mountains are volcanic peaks in the NW. of the continent (Mount Logan, about 19,500 ft.), and in Mexico (Popocatapetl and Orizaba, both about 18,000 ft. in height). There are two areas below sea-level, both in the S. of California—the Death Valley, 225 ft., and the San Felipe Sink, 300 ft. The **principal rivers** are the Mississippi and its tribs., and the St. Lawrence, belonging to the Atlantic basin, the Columbia and the Yukon belonging to the Pacific basin, and the Mackenzie and other rivers of the Arctic basin [**Canada**]. The great fresh-water **lakes** belonging to the basin of the St. Lawrence are without a parallel elsewhere. The largest of them is the largest body of fresh-water in the world, and there is no other chain of lakes to be compared with them in importance. [**Warren Lake.**] The following table furnishes the most important particulars regarding them :—

Name.	Water Surface. sq. m.	Drainage Area. sq. m.	Height above Sea-level. ft.	Greatest Depth. ft.	Discharge cubic ft. per sec.
L. Superior .	31,200	51,600	601.8	1008	86,000
L. Michigan .	22,450	37,700	581.3	870	
Huron and Georgian Bay	23,800	31,700	581.3	702	225,000
L. St. Clair .	410	3,400	...	...	...
L. Erie . .	9,960	22,700	572.9	210	265,000
L. Ontario .	7,240	21,600	246.6	738	300,000

To the N. and NW. are numerous lakes, large and small, often very irregular in outline, presenting a marked correspondence to the lakes of Finland. Of the larger of these lakes, however (Great Bear Lake, Great Slave Lake, Athabasca, Winnipeg), even the smallest greatly exceeds in size the largest of those of Finland. In accordance with the general correspondence between North A. and Eurasia, the **climate** of the W. of the former continent answers to that of western Europe, that of the E. to that of eastern Asia; but the climate of the E. of North A. is not so severe as that of eastern Asia, while, in consequence of the superior warming effect of the Gulf Stream Drift as compared with the Kuro Siwo Drift, the W. coast is not so mild as in corresponding latitudes of Europe. Hence the most populous (warm temperate) regions of the E. in A. are somewhat farther

N. than the corresponding regions of easterr Asia, those of the W. of North A. somewhat farther S. than the corresponding regions of Europe. Important differences in climate are due to the direction of the mountain chains. The Rocky Mountains, shutting off the moisture from the Pacific, cause a large part of the interior of the United States to be too dry for agriculture without irrigation, and the open plain between these mountains and the Appalachians allows even the most southerly points of the United States, as well as the E. coast of Mexico, to be swept from time to time by icy winds from the N., so that ice forms at the mouth of the Mississippi, in lat. 30° N.; and even in the extreme S. of Texas (lat. 26° N., about the same latitude as that of Patna, in Bengal), as much as nine degrees of frost has sometimes been experienced. [**Canada, United States, Mexico.**] As regards **fauna,** almost the whole of North A., exclusive of Central A. and the lowlands of Mexico, is referred by Wallace to the Nearctic zoogeographical region, the most abundant animals in which are in many cases closely allied to those of the Palæarctic region of Asia and Europe (the once abundant but now nearly extinct bison or 'buffalo' had a congener in the European bison of western Russia), but distinguished by the possession of three peculiar genera of moles, including the highly remarkable star-nosed mole; of the raccoons, a peculiar family of carnivora; of peculiar rodents, including pouched rats and the prairie-dog; and of the opossum, and a few other peculiar mammalian forms, and by the absence of hedgehogs, wild pigs, and dormice. Information as to the **vegetation** will be found in the articles on the principal countries, but a few general facts may be mentioned here. The northern limit of forests runs from about 69½° N. in the N. of Alaska SE. to about Fort Churchill on Hudson Bay, from about the middle of the E. side of Hudson Bay to the middle of the W. side of Ungava Bay, and then runs SE., leaving a strip of about 50 to 80 m. treeless on the coast of Labrador. There are large areas treeless, except along the river banks, or with no more than 20 per cent. of the surface occupied by trees, over a large part of the drier parts of the interior (the 'plains' and 'prairies'), the area of this character extending in Athabasca, in about 117°–118° W., nearly to the 60th parallel of latitude. But the absence of trees over a large part of this area is not due to the insufficiency of rain, but appears to be chiefly attributable to the prevalence of prairie fires, and forests are spreading in certain places as settlement advances. The prevailing forest-trees in the N. and W. are conifers, the forests of the western mountains being remarkable for their giant conifers (Douglas fir, sequoias, &c.). (See the ninth vol. of the *Census Report of the U.S. for* 1880, with the accompanying maps, and *Petermann's Mitteil.*, 1886, Plate 12.) Among the most noteworthy facts with regard to the constituents of the North American **flora** are the prevalence of Compositæ (asters, golden-rods, &c.) in the prairie flora; the prevalence in modern times of European invaders over a large part of the continent; and the close resemblance between the native temperate flora of the eastern parts of the continent, and that of the eastern parts of Asia, including Japan, a resemblance not found to exist between that flora and the flora of Europe on the western parts of the North American continent. This last fact was explained by Prof. Asa Gray as due to a flora originally flourishing in Arctic regions in a warm period being driven southwards by the oncoming of a colder climate, and the survival of similar forms in regions that correspond with one another in climate. See **Appendix,** p. 2, and the articles on the countries there enumerated.

America, South. The **coast-line** of this continent is almost as uniform as that of Africa, except in the southern part on the W. side, where, from the island of Chiloe southwards, there is a long chain of islands, backed by a coast broken by numerous fiords similar to the Alaskan and British Columbian coast in the W. of North A. The channel on the inner side of these islands is much used by ocean steamers on account of the shelter which the islands afford. The W. coast generally is rocky, like that of North A., but, except in the part just mentioned, presents hardly any inlets, however small, forming good natural harbours. Within the tropics the eastern coasts are generally low, and for hundreds of miles bordered by mangrove swamps. In certain places, especially in southern Brazil, there is a double coast-line similar to that described under North A. **Surface.** — The Andes Mountains stretch along the whole of the W. of the continent [**Andes**]. In the E. there is a region of tablelands and mountains, the highest ranges of which (Serra da Mantequeira, &c.) face the Brazilian coast S. of the Tropic of Capricorn. In the N. there is another highland region, with ranges having a more or less E. and W. trend in the S. of Venezuela and Guiana. Elsewhere the surface consists mainly of vast plains. The **principal rivers** are the Amazon, Parana, and Paraguay, Orinoco, Araguaya, and Tocantins, and the San Francisco. The **principal lakes** lie on the great elevated area of inland drainage in the Andes, and at the base of the Andes in Patagonia [**Andes, D., E., F.**]. The **climate** of South America is greatly affected by the chain of the Andes, the two sides of which present striking contrasts as regards rainfall and vegetation everywhere except in the extreme N. In the N. copious rains, with a rich tropical vegetation, occur on both sides. The contrast of climate begins about 4° S. Thence to about 30° S. the E. (trade) winds, which blow from the Atlantic for the greater part of the year, deluge the eastern slopes of the Andes with rain, and cover them with dense forests as high as trees can reach. Dense tropical forests (selvas) likewise occupy the valley of the Amazon to its mouth. South of the Amazon, however, the Brazilian coast-mountains deprive the Atlantic winds of much of their moisture, so that the tablelands and plains intervening between them and the Andes have only a scanty rainfall. On the W. of the Andes, between the latitudes mentioned, no rain whatever falls except high up on the mountain sides, and moisture appears on the low grounds only in the form of mist (*garua*). Vegetation is consequently scanty except beside the rivers, and for six or seven degrees north of 28° S. the strip of coast is a desolate wilderness. South of latitude 30° S., the contrast is opposite to that just described. There the prevailing winds are from the NW., and bring plenteous rains from equatorial seas to the western slopes of the Andes, and still farther S. to the lowlands at their base; while on the eastern side the plains (the treeless pampas of the Argentine Republic and the bleak steppes of Patagonia) get drier and drier as one goes southwards. In this southern part the western slopes of the Andes are as densely clothed with forests as the eastern slopes farther N. (See also **Andes,** *snowline.*) As regards its **fauna,** South A., including Central A. and the lowlands of Mexico, together with the West Indies, forms the neotropical zoogeographical region, characterised by the possession of prehensile tailed monkeys, marmosets, blood-sucking bats, coatimundis, peccaries, llamas, and alpacas, chinchillas, agoutis, capybaras, sloths, armadillos, and ant-eaters, and by the absence of sheep, oxen, and antelopes. Among its best-known vegetable forms may be mentioned the cinchona tree, the Brazilian rubber tree, manioc, castor-oil, and a great variety of cabinet woods. See **Appendix,** p. 2, and the articles in the countries there enumerated.

American Fork, tn., U.S., Utah, Utah co., 27 m. S. by E. Salt Lake City, on the N. of L. Utah. P.<1000.

American River, U.S., California, formed by two head-streams, the N. and S. Forks, flows through a gold-mining region SW. then W. into the Sacramento just below Sacramento City.

Amsterdam, vil., Brit. Guiana, on the l. bk. of the Demerara, in about 6° 6′ N.

Amsterdam, an important commercial city, cap. of the kingdom of the Netherlands, in the prov. of N. Holland, is built in the form of a crescent, on the S. side of the Y or IJ. The city is built on piles of wood, divided into two parts by the small river Amstel, from which it takes its name (Latinised from *Amstelodamum*), and intersected by numerous canals. A. has a branch of the government navy department, with extensive magazines and building-yards. Its docks are of great extent. Among its many scientific and literary establishments may be noted a university with over 1000 students, an observatory, botanic garden, zoological garden, a cabinet of natural history, royal museum (with paintings, prints, and historical collections). Amsterdam, still one of the most commercial places in Europe, attained its greatest prosperity after the closing of the Shelde by the Spaniards in 1648, when it monopolised nearly all the commerce of the Indies. Its trade decreased with the decline of the republic of Holland, by the opening of the Schelde, and the rivalry of Antwerp and Rotterdam. Till 1825 its only communication with the sea was through the Zuider Zee, and the largest vessels that could then reach the port were only of about 10 ft. draught. In that year the Helder Canal, with a depth of 26 ft., running to the N. end of the mainland was opened, and A. has since been brought into more direct communication with the ocean by the North Sea Canal (to IJmuiden, constructed in 1875–76). Since the opening of this canal its shipping has greatly increased. In 1871 the tonnage entered was 527,312, in 1891, 1,507,525. In 1892 its landward connections were greatly improved by the opening of the Merwede Canal (*q.v.*). See also **IJmuiden.** The bank of the Netherlands was established here in 1814. Its manufactures are numerous. There are several factories for the making of steam-engines and other machinery, and shipbuilding, cigar-making, distilling, beer-brewing, and sugar-refining are all important, but industrially the city is most noted for the cutting and polishing of diamonds, an employment chiefly in the hands of Jews. Mean temp. yr., 49° F., Jan. 36.4°, July 63.7°; rainfall, 26.3 in. P.(1869) 264,000, (1890) 418,500. See **Hague, The.**

Amsterdam, city, U.S., New York, Montgomery co., on the Mohawk R. and the Erie Canal, 30 m. WNW. Troy. P. (1870) 7700, (1890) 17,300.

Amsterdam, or **New Amsterdam,** isl. in the Indian Ocean, in 37° 48′ S., 75° 25′ E., to the N. of St. Paul; discovered by the Dutch navigator Van Vlaming in 1696; taken possession of, along with St. Paul, by France, in 1892; uninhabited.

Amsterdam, small isl., Java. See **Batavia.**

Amt, the name given in Denmark to the provs., in Norway to the subdivisions of the *stift* or diocese, and in Germany, in the compound forms *Amtsgericht*, *Amtshauptmannschaft*, and *Bezirksamt*, to certain minor administrative subdivisions.

Amu, riv., Africa. See **Volta.**

Amu, Oxus, or **Jihun,** a great river of central Asia, more than 1500 m. long, which rises on the Pamir table-lands and enters Lake Aral. It takes its origin from the junction, at Kala Vamar in Roshan, of two large rivers: the Ak-su, which rises in Lake Chatmak (13,850 ft.) in Vakhan, describes a wide curve towards the E. on the Pamir, and takes the names of Murghab and Bartang in Roshan; and the Panj, which is formed by the junction of the Vakhan-su with the Pamir river (rises in Aidin-kul, and flows through Zor-kul, or Lake Victoria), and flows SW. along the base of the Hindu-kush, towards Ishkashem, and thence northwards between the khanates of Badakshan and Shignan. From Kala Vamar, the A., after having described two sharp bends and pierced high chains, flows W. and SW., past Kala-i-khumb, towards its junction with the Kokcha, in 37° 10′ N., 41° 15′ E., where it issues from the highlands into the Aral-Caspian plains. Thence it flows W. past Kelif (795 ft.), receiving the Vaksh, the Kafirnagan, and the Surkhan from the right, and the Ak-serai or Kunduz from the left; and NW. past Kerki, Charjui, where it is crossed by the Transcaspian railway, Pitnyak, and Petro-Alexandrovsk, to enter Lake Aral after having divided below Nukus into several branches. Bokhara, Khiva, and Kunya Urghenj are situated within short distances from its banks; Kungrad is on the Taldyk branch of its delta. The A. is navigable to about 69° E. (956 m. from Lake Aral, 49 m. above its confluence with the Vaksh). Its width varies from 220 to 380 yards in its lower course, and from 380 to 650 yards below Kelif, occasionally attaining two miles. Wide spaces are inundated on its right bank in May and June. Below Kelif none of the former tributaries of the A. reaches the river, and its own water is largely drawn off by canals to irrigate the Charjui and especially the Khiva oasis. Many old beds of the A. intersect Khiva and the Turkoman terr. At a time when the level of the Caspian Sea stood much higher, and had large gulfs spreading E. as far as 57° E. long., the A. followed at the foot of the Kopet dagh, receiving the Tejen and the Murghab. Later on it took a more northerly direction (old bed Unguz); and in historical times it entered the Sary-kamysh depression (30 m. SW. of the recently desiccated Aibughir gulf of Lake Aral), which was at one time in permanent, and, later on, in periodical communication with the Caspian Sea.

Amu-dariinskiy Otdyel, a prov. of Russian Turkestan, on the right bank of the lower Amu, making part of the Syr-dariinsk prov., but placed under a separate military governor; bound by the Khanate of Khiva in the W., Lake Aral in the N., Syr-dariinsk in the E., and Bokhara in the S. Apart the Bukan-tau hills in the E., the delta of the Amu, and a narrow strip of land along the right bank of the Amu, it is covered by the sand deserts of South Kizyl-kum. The delta, which is formed by the Taldyk branch on the W., and the Kuzan-jerma, or Yany-su, on the E., and their secondary branches (the Kuvansh-jerma reaching Lake Aral no more) is covered with hard clay in its middle, and marshes and rushes elsewhere. The population consists of settled Uzbegs, Tajiks, liberated Persian slaves formerly kept by the Turkomans, and a few Russian settlers, and of nomad Karakalpaks, Kirghizes, and Turkomans. More than 4,000,000 acres are under culture. Divided into two districts, the chief towns of which are Fort Shurakhan, on the Amu, and Chimbai (P. 1610) in its delta. Area, 39,976 sq. m. P. (1885) 133,360.

Amulree, eccles. par., Scot., W. Perthshire, on the Bran, 8½ m. WSW. Dunkeld, P.O. P.<500.

Amur, a great riv. of Eastern Asia, which is formed at Ust-Stryelka (52° 20′ N. lat., 121° E. long.) by the confluence of the Shilka with the Arguñ. Total length, taking the Onon for its source, 2700 m.; area of basin, about 787,000 sq. m. On the first 337 m. of its course it flows past Albazin, Tolbuzina, and Kumara in a narrow valley deeply cut into the plateau, attaining a width of from 250 to 930 yards, and a depth of 7 to 20 ft., but is intersected by thirteen bars, covered by only 3 to 5 ft. of water during periods of droughts. Issuing from the plateau below Kumara, its valley widens on the next 263 m. above Blagovyeschensk, and patches of fertile plains are met with on its banks. On the next 260 m. below Blagovyeschensk the A., which flows past the Chinese town of Aigun, waters the fertile high plains (alt. about 1000 ft.) of its middle course which are stretching far NE. and SW. between the Ilkhuri-alin and the Dousse-alin, or Bureya (also Little Khingan) Mts. The stream divides into several branches, sometimes 5 m. apart, has an average depth of 45 ft., occasionally reduced to 5 ft. on a few bars, and receives from the left the Zeya, not much inferior to itself, and the Bureya. At Pashkova it enters a picturesque gorge 87 m. long, piercing the Little Khingan (width 580 to 700 yards, depth 30 to 50 ft.), and then issues into the lowlands, attaining in 47° 50′ N. lat. and 132° 20′ E. long., at its junction with the Sungari, the most southern part of its course. In the lowlands the A. widens still, dividing into several large branches which enclose large islands. During the summer rains, the water of the A., being swollen by that of the Zeya, and especially of the Sungari, whose volume of water is nearly equal to that of the A., rises considerably, and inundates both banks, so as to give origin to lakes 10 to 12 m. wide. From its junction with the Sungari the A. bends north-eastwards and continues in the same direction after having received from the S. the Usuri, the only line of overland communication between Russia and its settlements on the Pacific at Vladivostok. On the last 735 m. of its course the A. flows along the foot-hills of the Sikhota-alin Mts., having to its left extensive lowlands, interspersed with immense lakes and marshes. A line of settlements is maintained with difficulty on the right bank, the left bank being only inhabited by nomad indigenes. At Mariinsk the stream approaches the N. Pacific coast, from which it is separated by but a narrow and low ridge of hills, bends northwards and eastwards, and enters at Nikolaevsk (53° 8′ N. lat., 140° 43′ E. long.) its 40 m. long estuary, which has its mouth in the Strait of Lapeyrouse, or Tartar Strait, between the mainland and the island of Sakhalin. The A., which is open for navigation from the end of April to

the beginning of November, is the chief line for the intercourse between Russia and its dominions on the N. Pacific coast, but it did not realise the hopes which were expressed at its annexation to Russia in 1856–1859 as to its becoming a great line for external trade, the hilly and wild character of its banks, the consequent sparseness of population, and the difficulties of navigation in its estuary and the Tartar Strait being the chief obstacles. It is now navigated by 45 steamers, chiefly engaged in the transport of goods for the State.

Amur, prov. of Eastern Siberia, on the l. bk. of the Amur R., includes all its l. bk. tribs. as far as the Stanovoi waterparting; has Transbaikalia in the W., Yakutsk in the N., the Coast or Maritime Province in the E., and Manchuria, from which it is separated by the Amur R., in the S. and SW. Its northern part is occupied by the high plateau (3000 ft. over the sea), its border ridge, which is a continuation of the Great Khingan, and a belt of smaller chains running parallel to the border ridge. The fertile plains, 1000 to 1200 ft. high, of the lower Zeya and the Bureya occupy its middle, and are separated by the 5000 to 7000 ft. high Bureya Mts., or Little Khingan, from the lowlands which stretch between the latter and the Alpine tracts of Sikhota-alin. Climate continental [**Blagovyeshchensk**]. A rich flora, Manchurian in character, appears on the banks of the Amur as soon as it issues from the plateau. The population consists of Amur Cossacks, who are settled in villages 15 to 18 m. apart along the l. bk. of the Amur, and of immigrants from Russia, whose villages are scattered on the plains of the Zeya, Silinja, and Bureya, all settled since 1858, and of Manchus, who, though settled on what is now Russian terr. around Blagovyeshchensk, continue to remain under Chinese administration. Agriculture is carried on all over the terr., especially on the plains, the yearly crop attaining 700,000 cwt. of various corn. Hunting and fishing are notable sources of income. Rich gold-mines, yielding 10,000 lbs. of gold every year, in the Stanovoi highlands. Domestic trades (linen, felts, wooden goods) begin to develop among the peasants. Communications chiefly along the Amur and the Zeya, maintained in summer by steamers and in winter on the ice of the frozen river, the overland route along the Amur being mostly simple footpath for riding on horseback. Chief town Blagovyeshchensk. The terr. was annexed to Russia in 1858. Area, 172,848 sq. m. The total P. (34,860 in 1879) attained 87,705 in 1891 (17,935 Cossacks, 25,488 peasants, 20,242 urban, 14,000 Manchus and Chinese, 990 Koreans, 3000 nomad indigenes, and 6000 workers coming in summer to work in the gold-mines).

Ancona (from Greek ἀγκών, 'elbow,' a name due to the shape of the coast where the town stands), a maritime city of the kgd. of Italy, cap. prov. A., on the Adriatic, 43° 38′ N., 134 m. NE. Rome, 56 m. SE. Rimini. The city slopes to the sea between two hills, one crowned with a cathedral and the other with a citadel. The port, one of the best in Italy (harbour with two quays available for vessels drawing 22 ft.), is defended by several forts, and enclosed by two moles, on one of which is an arch erected to the Emperor Trajan, A.D. 112. On the new mole is the arch of Benedict XIV., and a lighthouse at its extremity. The chief industries are connected with flour and maccaroni. A. was founded by a colony of Greeks in 394 B.C., but was first provided with a good harbour by the Emperor Trajan. On Oct. 29, 1860, Ancona surrendered to the Piedmontese troops when the Marches (La Marca) of A. were united to the kingdom of Italy. Mean temp., yr. 59.3° F., Jan. 41.90°, July 78.8°; rainfall (17 yrs.), yr. 28.6 in. P. (1871) 45,700; (1881) 46,400.

Andahuaylas, tn., Peru, dep. Apurimac, cap. prov. A., 85 m. W. Cuzco.

Andalucia, in Anglicised form **Andalu'sia,** an ancient division of the S. of Spain, now divided into the following provinces, which are named from their chief towns: Almeria, Granada, Jaen, Malaga, Cadiz, Cordova, Huelva, and Sevilla. Physically it is divided into Upper and Lower A., Upper A. comprising the mountains and other highlands enclosing the valley of the Guadalquivir, in the N. the southern slopes and ranges of the Sierra Morena, in the E. the sparsely-peopled esparto-clad tablelands at the head of that river-basin, in the S. the Sierra Nevada and the coast-ranges and mountain-groups extending from the Atlantic all along the S. coast; Lower A. consisting of the valley of the Guadalquivir, mainly composed of the southern portions of provs. Cordoba and Sevilla and the SE. of Huelva. Upper A. includes the most southerly and warmest valleys in Spain, where sugar-cane, cotton, and other subtropical products are added to the other products of Spain. To it belongs the district of **Las Alpujarras** (provs. Granada and Almeria), a complicated region of high and romantic well-watered valleys, many of them filled with the most luxuriant vegetation, lying between the Sierra Nevada on the N. and the coast-ranges of Sierra Contraviesa and Sierra de Gador on the S. Upper A. is also rich in iron, silver, and lead (provs. Jaen and Malaga). Lower A. is for the most part fertile, except in the tracts bordering the lower Jenil ('the Bætic steppe'), the *marismas*, or salt-marshes traversed by the lower Guadalquivir, and the *Arenas gordas*, the region of sand-dunes on the coast between the Guadalquivir and the Rio Tinto. A. generally is celebrated for its breed of horses, and sheep, which yield fine wool. Manufactures, formerly important, have greatly declined. Alans, Visigoths, and Vandals settled in A. early in the fifth century. The so-called Moors (Arabs) held A., or part of it, from 711 to 1492, their power and splendour reaching their climax under the Ommayades in the caliphate of Cordoba. This caliphate was overthrown in 1031, and was followed by the sultanate of Seville and the kingdom of Jaen, afterwards by the kingdom of Granada, the last Moorish dominion in Spain. For area and pop., see **Spain.**

Andaman Islands, a group of isls. in the Bay of Bengal, between 10½° and 13¾° N., 160 m. to the SW. of Cape Negrais, now placed (along with the Nicobar Is.) under a chief-commissioner in direct correspondence with the supreme government of India. They are volcanic and hilly, rising in one place to an alt. of 2400 ft. There are three main isls., North, Middle, and South A.—lying close together, stretching from N. to S., and separated only by narrow channels, the northern of which is not navigable. These islands possess two magnificent natural harbours, one called Port Blair, on the E. side of South **A.,** the other Port Cornwallis, on the same side of North A. The island known as Little A. lies about 35 m. to the S. of the main group, from which it is separated by Duncan Passage. The islands appear to be a complete epitome of tropical luxuriance and beauty. Dense forests, overshadowing and carrying a rich vegetation of other kinds, cover the surface, except where one small clearing has been made. The natives are a small black race (the men averaging somewhat less than 5 feet), utterly uncivilised, but pleasant among themselves, and now in the larger group friendly also to strangers. They go naked, and do not practise agriculture, but live on anything they can gather or kill by land or sea. They are wonderfully expert in the use of the bow and arrow. They appear to be dying out. The natives of Little A. were till quite recently invariably hostile to strangers who visited or were driven by shipwreck on their shores, but at last the attempts to gain their confidence and goodwill have met with some success. The first settlement was formed at Port Blair in 1789 by Lieut. Blair, but was transferred to Port Cornwallis in 1792. This settlement was abandoned in 1796 on account of its extreme unhealthiness. Since 1858 the Indian government has had a penal settlement at Port Blair, and there about 12,000 convicts are employed in reclaiming land, which is planted with vegetables for the use of the settlement, as well as tea, Liberian coffee, cacao, arrow-root, and other plants. Many thousands of coco-nut palms (rarely seen wild) have been planted. Of the natural products of the islands, the most valuable is padúk, a fine timber which takes on a polish like mahogany. Mean temp. (Port Blair, 12 yrs.) yr. 80° F.; rainfall, yr. 116.7 in., May–Dec. 111.7 in., May–Sept. 85.1 in. Area about 2500 sq. m. P. (Port Blair) in 1891, 15,700. See monograph on the A. islanders by E. H. Man in *Jour. Anthrop. Soc.*, vols. xii. and xiv., and *Scot. Geog. Mag.*, 1889, p. 57.

Andes (Span. *Cordillera de los Andes*), the great mountain system of South America, extending from Cape Horn to the Isthmus of Panama over 65° of lat., or 4500 m., with a breadth of from 40 to 400 m., and a mean height of 11,800 ft. above the sea, covering, with its mountains, plateaus, and declivities, nearly a sixth part of the continent. The A. comprise a series of chains, which extend in a nearly continuous line close to, or within a short distance of, the Pacific Ocean. They are composed partly of granite, gneiss, mica, and clay slate, but chiefly of greenstone, porphyry, and basalt, with limestone, red sandstone, and conglomerate. Salt and gypsum are also found, and seams of coal at a great elevation. Gold, silver, copper, mercury, lead, tin, and iron are abundant, and among gems the topaz and amethyst. Volcanoes are numerous in the Chilean Andes; and the mountains of Ecuador consist almost altogether of volcanic summits, two of which, Cotopaxi and Sangai, are described as in a state of constant activity. No portion of the globe is subject to such frequent and destructive earthquakes as the countries within the range of the A., and those lying between them and the Pacific Ocean. The cities and towns of Bogotá, Riobamba, Callao, Arica, Copiapo, Valparaiso, and Concepcion, have all at different times been devastated by their agency. The potato is cultivated in the A. at an elevation of 9800 to 13,000 ft. Within the tropics wheat grows luxuriantly in certain places at a height of 10,000 ft., and oats ripen in the vicinity of Lake Titicaca, at an elevation of more than 12,600 ft. The highest town in the A. is Cerro de Pasco (14,100 ft.), but there are silver-mining camps at the height of about 16,000 ft. or more. Owing to differences in the amount of rainfall [**America, South**], as well as the enormous range of latitude, the elevation of the **snow-line** varies greatly. Within the tropics the height at which snow is constantly present in certain situations varies from about 15,000 to 17,000 ft. In the Argentine-Chilean A. the snow-line between 32° and 33° S. is placed by Güssfeldt at about 4200 metres (about 13,800 ft.), on the slopes of Maipo in 34° 10′ S. at about 4000 metres (13,100 ft.). The most noteworthy fact with regard to the snow-line of the A. is the great fall in its elevation between 32° and 35° S., in consequence of the great increase in the amount of the precipitation from N. to S. between these parallels. The lower limit of glaciers falls correspondingly. In 46° 30′ S., a latitude corresponding to that of La Rochelle in France in the northern hemisphere, a glacier descends to the water's edge. For convenience of description the A. may be divided into six great sections, taking their names from the countries or regions to which they mainly belong: **A. The Colombian and Venezuelan A.**, including the whole of the system to the N. of the high plateau or mountain-knot in the S. of Colombia, called the Paramo de las Papas, on which stands the volcano of Pasto (13,985 ft., R. and S.), and from which the rivers Cauca and Magdalena flow northwards to the Caribbean Sea, the Caqueta and Içа eastwards to the Amazon. From this knot the A. diverge more or less northwards in three main chains or subordinate systems, separated by the valleys of the Cauca and the Magdalena. I. *The Western Chain.*—In this the highest peak is the Cerro Munchique (9880 ft.), in about 2° 32′ N., and the most important pass that on the route from Cali to the B. of Choco in about 3° 40′ N. II. *The Middle Chain*, with the volcano of Tolima (about 18,300 ft.), in about 4° 45′ N., the pass of Quindiu (about 11,500 ft.), immediately to the S. of Tolima, and the Nevado de Huila (about 18,700 ft.), another volcano, in about 3° N. III. *The Eastern Chain*, or rather system, for it breaks up in the NE. into several parallel chains, the northeasternmost of which are continued under the name of the Maritime A. [**Venezuela**] eastwards along the coast of the Caribbean Sea. The highest peaks in III. are Pic Concha (about 15,400 ft.) and the Pan de Azucar (about 15,200), both in the Venezuelan state of Los A., to the S. of the Gulf of Maracaybo in about 71° W., and the Nevado de Suma Paz (about 15,800 ft., the same as Mont Blanc), in about 4° N. to the S. of Bogotá. **B. The A. of Ecuador,** stretching from the Paramo de las Papas to the Paramo de Loja in the S. of Ecuador. In this section the A. do not form well-marked chains, but are broken up into a number of basins at the height of about 7000 to 10,000 ft., with lofty peaks on different sides of them, but without any well-marked parallelism in the arrangement of these peaks. The following are the chief peaks in this section, with their heights, according to Whymper (Wh.), by mercurial barometer, Reiss and Stübel (R. and S.), as given by Whymper or Wolff (W.), as given in *Proc. R. G. S.*, 1892, pp. 125–30:—

North of Quito.

Cotacachi, 0° 24′ N., 78° 12′ W., 16,301 ft. (Wh.).
Imbabura, 15,033 ft. (R. and S.), 15,020 ft. (W.).
Cayambe, 0° 4′ N., 77° 49′ W., 19,186 ft. (Wh.), 19,450 ft. (W.).
Majanda, 0° 9′ N., 78° 6′ W., 14,088 ft. (R. and S.).
Sara-urcu, 0° 4′ S., 77° 44′ W., 15,502 ft. (Wh.).
Pichincha, 0° 8′ S., 78° 28′ W., 15,918 ft. (Wh.), 15,804 ft. (W.).

South of Quito.

Atacatzo, 0° 20′ S., 78° 30′ W., 14,892 ft. (R. and S.).
Antisana, 0° 27′ S., 77° 59′ W., 19,335 ft. (Wh.[1]), 18,885 ft. (W.).
Sincholagua, 16,365 ft. (R. and S.).
Illiniza, 0° 40 S., 78° 36′ W., 17,405 ft. (R. and S.), 17,380 ft. (W.).
Cotopaxi volcano, 0° 43′ S., 78° 18′ W., 19,613 ft. (Wh.), 19,480 ft. (W.).
Tunguragua, 16,690 ft. (Wh.), 16,690 ft. (W.).
Chimborazo, 1° 30′ S., 78° 47′ W., 20,498[2] ft. (Wh.).
Carihuairazo, 1° 25′ S., 78° 43′ W., 16,515 ft. (Wh.).
Altar, 1° 42′ S., 78° 24′ W., 17,730 ft. (R. and S.).
Sangai volcano, 2° S., 78° 40′ W., 17,465 ft. (R. and S.).

Whymper has given the name of the Pacific Range of Ecuador to a range with peaks of 13,000–14,000 or probably nearly 15,000 ft., trending N. and S. to the W. of the A. of Ecuador, but, according to him, completely separated from them by the valley of the Chimbo (just W. of 79° W.) **C. Peruvian A.**—This name may be applied to the section extending from the S. of Ecuador to the gorge traversed by the Mollendo-Arequipa-Puno Rly. in the SW., and the knot or cross-ridge of Raya or Vilcanota (about 14½° S.) in the SE. In this section the A. widen out and in most places form three chains, the western chain being traversed by short coast rivers, or giving rise to such on their western slopes, while in the E. the prevailing feature is longitudinal valleys drained by rivers belonging to the Amazon basin (Urubamba, Apurimac, Pachitea, Mantaro, &c.). In this section the peak of Huascan in about 9° S. in the Western Cordillera attains the height of about 22,000 ft. The principal passes are San Mateo or La Piedra Parada (about 15,750 ft.), on the road from Lima to Oroya, in about 11° 45′ S., and the Alto de Toledo (about 15,600 ft.), in 16° 2′ S. on the road from Arequipa to Puno. The highest point on the Arequipa-Puno Rly. is about 15,000 ft. Another railway is being made across the western chain from Lima to Oroya, and a tunnel has already been pierced for this railway (the Galera tunnel, at the height of 15,660 ft.). **D. The Bolivian A.**—This name may be applied to that part of the system in which the most notable feature is a lofty area of inland drainage enclosed by two well-marked chains extending from the cross-ridge of Raya or Vilcanota in the N. to the Despoplado in the SW. of Bolivia, the E. of Chile (Antofagasta), and the NW. of the Argentine Republic. The passes of Los Puquios, in 27° 10′ S., and San Francisco (about 15,000 ft.), further E., in about 26° 40′ S., 68° 20′ W., on the route from Copiapó to Antofagasta, may be taken as the southern limit. This area of inland drainage includes the large fresh-water lake of Titicaca (12,640 ft.), and the large salt or brackish lake of Aullagas (about 12,000 ft.). The eastern chain enclosing this area is connected in its northern portion with a tableland or elevated mountainous area running far out to the E., and cut up by deep valleys belonging to the basins of the Madeira and Pilcomayo. The Misti volcano (about 20,000 ft.) is situated immediately to the S. of the Arequipa-Puno gorge, to the W. of the western chain enclosing the area of inland drainage. In this chain are Sajama (about 21,000 ft.), just N. of 18° S.; Licancaur (about 19,500 ft.), in 22° 50′ S., at the angle formed by two sides of the Chilean prov. of Antofagasta in the SW. of Bolivia; Llullaillaco (about 20,250 ft.), at the angle of the Chilean provs. Antofagasta and Atacama, in about 24° 45′ S., 68° 15′ W., and Doña Inez (about 18,250 ft.), in 26½° S. To the NW. of Sajama, in 17° 40′ S., is the Tacora Pass (10,600 ft.), on the route from Tacna to Oruro. In the eastern chain, within an interval of less than one degree of lat. to the E. and SE. of L. Titicaca, are the peaks of Sorata or Illampu (about 21,500 ft.), Huaina Potosi (about 20,200 ft.), and Illimani (about 21,000 ft.); and in about 25° S. on the Argentine-Chilean frontier stands the Nevado de Cachi (about 21,300 ft.[3]). The pass called Abra de la Cortadera (about 13,000 ft.), in about 22° 20′ S., 65° 10′ W., leads N. from Jujuy in Argentina to that part of Bolivia which belongs to the basin of the Pilcomayo. The rly. from Antofagasta to Oruro crosses the western chain of this section of the Andes in about 21° 45′ S., at the height of upwards of 12,000 ft. **E. The Chilean-Argentine A.**—Under this name we include only that part of the system which lies to the N. of the Chilean Is., and S. of the great area of inland drainage. This section contains the highest peak of the whole system, Aconcagua, and numerous other lofty peaks as well as important passes. Aconcagua stands in 32° 39′ S., 70° 0′ W., and attains the height of 22,860 ft. (*fr.*, G.[4]). In this section two parallel chains can generally be made out, the Argentine-Chilean frontier following the western, but the eastern chain is not everywhere well-marked. At the S. end of this section lie L. Llanquihue on the W. side and L. Nahuel-huapi

[1] The highest point actually reached by Whymper was determined by him at 17,623 ft.
[2] Mean deduced from different readings on January 4 and July 3.
[3] Moussy in Latzina (*Geografia de la Republica Argentina*, Buenos Aires, 1888).
[4] Güssfeldt (*Reise in den Andes von Chile und Argentinien*, Berlin, 1888).

on the E. side, at the base of the mountains. None of the passes across this section is capable of being used by wheeled vehicles, but three railways across the mountains are in progress or projected, one from Mendoza to Valparaiso across the Uspallata Pass [**Uspallata**], another leading to the Chilean seaport of Concepcion, and crossing the mountains to the S. of 37° N., and the third by way of Lake Nahuel-huapi. *Peaks and Passes N. of Aconcagua.*—(1.) *Peaks:* Cerro del Cobre (about 18,300 ft.), in 28½° S.; Cerro del Mercedario (22,300 ft.), in 32° S. (2.) *Passes.* For a detailed account of the passes in this section, as far as 35° S., see Brackebusch (cited below as Br.) in the *Zeitschrift der Gesellschaft für Erdkunde zu Berlin*, 1892, pp. 249–348 (with map, 1 : 3,000,000). Among the principal passes may be mentioned Pircas Negras, in 27° 58′ S., 69° 20′ W. (13,580 ft., Moussy in Br.), or Come Caballos ('horse-eater,' that is, 'killer'), in 28° 5′ S., 69° 31′ W. (14,100 ft., Br.), in the western chain, succeeded by Barrancas Blancas, 28° 4′ S., 69° 12′ W. (14,630 ft., Moussy in Br.), and the Estanzuelo Pass, in 28° 5′ S., 68° 43′ W. (13,600 ft., Br.), all on the route from Copiapó to Tinogasta, and thence to Rioja or Catamarca; the Paso de las Tórtolas, in 29° 49′ S., 70° 10′ W. (14,750 ft.), in the W. chain, followed by the Paso de Colanguil, in 29° 51′ S., 69° 49′ W. (15,400 ft.), or the Paso de Conconta, in 29° 53′ S., 69° 52′ W. (14,750 ft.), in the E. chain on the route from Coquimbo to San Juan by Rodeo; the Hurtádo Pass or Paso de Doña Rosa, in 30° 33′ S., 70° 30′ W. (about 14,400 ft.), in the W. chain, and then that of Tocota or Coquimbito, in 30° 40′ S., 69° 55′ W. (only used when there is little snow on the summit; alt. not known), or the Paso de la Ollita, in 30° 57′ S., 69° 59′ W. (summit about 12,450 ft., but with constant ups and downs, in which 11,300 ft. is four times exceeded in other places), in the E. chain on the more direct route south-eastwards from Coquimbo to San Juan; Los Patos or Boquete de Valle Hermoso (11,700 ft., *mb.* G.[1]), in 32° 21′ S., on the route from San Felipe to San Juan. *Peaks and Passes S. of Aconcagua.*—(1.) *Peaks:* Tupungato (22,000 ft.[2]), in 33° 20′ S.; Maipo volcano (17,765 ft., *bp.*, G.[1]; 17,665 ft., tr. G.[1]), in 34° 10′ S.; Tronador (8500–10,000 ft.), in 41° 10′ S. (2.) *Passes:* **Uspallata** (Cumbre Iglesia, 'church summit,' often known simply as La Cumbre, 'the summit,' 12,330 ft., G.[1]), in 32° 50′ S., 70° 4′ W., on the route from Valparaiso to Mendoza by Los Andes and San Felipe (valley of the Rio Aconcagua) and the valley of the Rio de Mendoza; Portillo de los Piuquenes (13,775 ft.[2]), in 33° 37′ S., on another route from Santiago to Mendoza; Maipo Pass (11,390 ft. G.[1]), in the western chain at the S. foot of the Maipo volcano, and Atravieso de la Cruz de Piedra (12,400 ft., G.[1]), in the eastern chain, both in 34° 14′ S., on the Rio Maipo-San Carlos route; Atravieso de la Leña (13,480 ft., G.[1]), in the western chain, in 34° 28′ S.; Cajon Ancho Pass (11,970 ft., G.[1]), and La Iglesia (11,285 ft., G.[1]), on the Roncagua-San Rafael route, by the Rio Cachapual and the Rio Diamante valleys; Planchon (8200 ft.), in 35° 11′ S., connecting Curico in Chile with the Rio Colorado valley in Argentina; Pichachen (6530 ft.), in 37½° S., connecting the Chilean seaport of Concepcion by the basin of the Biobio with the valley of the Neuquen; Copalhue, in 37° 50′ S., connecting the valleys of the Biobio and Agrio; Nahuel-huapi or Boquete de Pedro Rosales (2750 ft.[3]), in 41° 20′ S., connecting Llanquihue with the valley of the Rio Limay. The large lake of Nahuel-huapi lies at the base of this section of the A. on its E. side near the S. end. **F. Patagonian A.,** including the whole system from the S. of section **E.** to its termination in Tierra del Fuego. In this section the main chain is single, but there are numerous isolated peaks to the W. of the main chain either on the mainland or coast islands. At the base of this section of the A., on the E. side, lie the large lakes of Fontana (45° S.), and the connected series of San Martin, Viedma, and Argentino, between about 47° and 50½° S. In about 43½° S. the Corcovado, flowing W. into the Pacific, makes a breach through the system, and in 52¼° S. a winding inlet from the Pacific passes right across the chain, terminating in Last Hope Inlet, on the plains to the E. of which the Gallegos (Atlantic basin) takes its rise. The principal summits are the volcano of Corcovado (about 7400 ft.), an isolated mountain rising from the Pacific coast in 43° 10′ S.; Yanteles (6725 ft.), in 43° 28′ S.; Chalten (about 7100 ft.), in 49° 10′ S.; Stokes (about 6400 ft.), in 50½° S.; and Sarmiento (about 6800 ft.) and Darwin (about 6900 ft.), on Tierra del Fuego.

Anglesey, part of eccles. par., Eng., Hampshire. See **Alverstoke.**

Anglesey, or **Anglesea** ('isle of the Angles'), an island and co. of North Wales, forming the most NW. part of the principality, separated from the mainland by Menai Strait, and connected by the Menai bridges. Surface little diversified (highest point, Holyhead Hill, 703 ft.), most of the land unenclosed. As to crops and live-stock, see **Appendix,** pp. 7–9. Geologically, it is mainly composed of archæan and metamorphic rocks, but has in the E. patches of carboniferous, including the coal-measures, but no productive coal-mines. Its mineral products are lead, copper, and zinc ores, all produced near Amlwch. The copper-mines, discovered in 1768, were, until 1800, the most productive in the kingdom. Anglesey is divided into six hundreds (which are also deaneries), and consists of 78 parishes, all in the diocese of Bangor and circuit of North Wales, and contains one municipal and four parliamentary boroughs. Chief towns—Beaumaris, the capital, Amlwch, and Holyhead. It sends one member to the House of Commons for the county. Anglesey is the *Mona* of Tacitus, and has numerous Druidic remains. It is traversed by the North Wales line of the L. & NW. R. to Holyhead, which is carried over Menai Strait by the Britannia tubular bridge, and by the Anglesey Central, which runs from Caerwen to Almwch. 175,836 ac. Parl. co. P. (1891) 50,100. Angola, the general name for the Portuguese possessions in Lower Guinea, W. Africa, the main portion bounded N. by the Congo Free State, E. by the Congo Free State and the sphere of British influence, S. by the sphere of German influence. It includes also the detached tract of Cabinda to the N. of the Congo on the coast between the French Congo Terr. and the terr. of the

Congo Free State. By the agreement of 1891, the boundary with the Congo Free State is formed by the Congo R. as far up as a point near Nokki, in about 5° 52′ S., then by a parallel of lat. eastwards from that point to the Kwango, by the parallel of 8° S. between the Kwango and Kwilu, and by that of 7° S. between the Kwilu and Kassai, then by that river upwards to the neighbourhood of L. Dilolo, and afterwards mainly by the water-parting between the Zambezi and Congo to the meridian of 24° E. The boundary with the German sphere of influence on the S., as determined by treaty in 1886, is formed by the lower course of the Kunene to the falls on that river in about 17° 20′ S., 14° 20′ E., from this point by a parallel of lat. to the Kubango, by that watercourse to Andara in about 17° 26′ S., 21° 20′ E., and thence by a straight line to the Katima Falls on the Zambezi. By the treaty with Great Britain in 1891, the boundary with the British sphere of influence is formed by the Zambezi from the Katima Falls northwards to the Barotse country, the whole of which is assigned to the British sphere. The whole terr. is divided into five districts —Congo (which includes the detached area N. of the Congo and the area S. of the Congo to about 7° 40′ S.), Loanda, Ambriz, Benguela, and Mossamedes, and the capital is Loanda, or São Paulo de Loanda. The interior of the older parts of the terr. W. of the Congo basin is very mountainous, the ground gradually rising on the whole from the coast inwards, in places to altitudes above 8000 ft. There are vast tracts in the interior at an average elevation of 5000 ft., and with an almost European climate. The low-lying coast strip begins to assume an arid character about 50 m. S. of the Congo, and the width of the arid tract increases from about 5 m. at Ambriz (in 7° 40′ S.) to about 70 m. at Mossamedes (in about 15° 15′ S.). The principal rivers in the order from N. to S. are the Loge, Bengo, Kwanza (Coanza), the finest of all, navigable for more than 200 m. up; the Kuyo, Katumbela, and Kunene. The interior contains a good deal of forest-land. The oil-palm does not reach further S. than 10° S. Coffee grows wild on nearly all the hilly districts, and is the chief export of Ambriz. Cotton is grown largely in the S., and especially in the district of Mossamedes, and sugar in all the low-lying tracts. Indiarubber, from the *Landolphia florida*, is an important export. The domestic animals of Europe are reared. Among wild animals the elephant is no longer abundant, except far in the interior and on the S. border. The ostrich extends northwards to about 12° S. Railways to the interior from each of the three chief ports, Loanda, Benguela, and Mossamedes, are projected, and that from Loanda has already been opened to a distance of more than 100 m. Area estimated at 517,160 sq. m., P. at 2,400,000.

Angola, tn., U.S., Indiana, Steuben co., 13 m. SW. of NE. corner of state. P. <2000.

Annam, or **Anam,** a French protectorate in the E. of Indo-China, formerly an independent empire, which included also Lower Cochin-China in the S. and Tongking in the N. It consists of a strip of land from about 30 to 50 m. in width, stretching from the S. China Sea to the mts. bounding the basin of the Mekong on the E., between about 11° and 20° N., and is divided into the following eleven provs. in the order from N. to S.:—Tanh-hoa, with cap. of the same name; Nge-an, cap. Binh or Vinh; Kwang-binh, cap. Dong-hoï or Dong-heui; Kwang-tri, with cap. of same name; Kwang-duk, the cap. of which is Hué, the cap. of the dominion; Kwang-nam, with cap. of same name; Kwang-ngai, with cap. of same name; Binh-dinh, cap. Kwi-nhon or Quin-nhon; Fu-yen, Kanh-hoa, and Binh-thuan, all three with caps. of same name as prov. The two first mentioned or northernmost provs. are similar in character to the adjoining parts of Tongking, being traversed by rivers (Tanh-hoa by the Song-ma, and Nge-an by the Song-ka), which form in the lowlands densely peopled, rice-growing deltas, seamed by an intricate network of navigable river-mouths, the two main rivers themselves being also connected by a navigable channel. These two provs. are separated from the others to the S. by a ridge, the Deo-ngan, about 3400 ft. high, running out from the mts. in the W. to the sea, and terminating in the promontory of Vung Shwa, a little to the S. of 18° N. The provs. S. of this ridge differ in character from those to the N. The rivers are all short mountain-streams, rolling down immense quantities of sand, which have formed along the coast long lines of sand-dunes, separated for the most part from the mainland by narrow and shallow malarious lagoons, the outlets of which are all obstructed by bars. The rivers themselves are mostly not navigable, even by small gunboats, for more than a few miles above their mouths. These provs. are consequently much less densely peopled than those to the N. The higher tracts are similar throughout, the foot-hills extending over a width of 15 to 30 m., mostly forest-clad, and very sparsely peopled, the slaty, schistose, or granitic mts., in some places clothed with forests, in some places bare, but with an equally scanty population. The **climate,** like that of Indo-China generally, is governed by the prevalence of monsoon-winds, giving rise to a rainy and a dry season. In middle A. the rainy season lasts from September to April, the heaviest rains falling before December; the dry season from April to September [**Hué**]. The transition from the dry to the rainy season is usually very unhealthy for Europeans. Dysentery is the most prevalent and fatal disease. The great bulk of the people live by agriculture. Rice is the principal product only in the northernmost provs.; elsewhere millets and other cereals, pine-apples, areca-nuts, yams, sweet-potatoes, cinnamon, sugar-cane, oil-seeds, mulberries, tea, and a number of other products are grown. The coffee shrub was introduced into the hill-tracts by Portuguese missionaries two hundred years ago, and flourishes admirably, now growing wild in many places, but is not cultivated to any great extent. Among **minerals,** gold and silver mines are or have been worked, and there are considerable deposits of iron ore and coal. Iron ore occurs in the mountainous tract of the prov. of Nge-an, and in a district claimed also by Siam on the W. side of the water-parting of the Mekong in the prov. of Binh-dinh, where rich deposits of magnetic iron ore are worked by the Sedan tribe. Coal occurs among the foot-hills of Nge-an prov., and about 40 m. up a navigable influent of the Bay of Turan. The latter deposit is now worked by Europeans. The total value of the external **commerce** of A., imports and exports combined, is under £500,000, and is almost entirely carried on with China (including Hong-Kong) and Japan. The principal imports are rice, opium, and cottons; the principal exports, cinnamon and raw silk. The monetary unit of A. is a string of copper coins consisting of 600 sapeks. The Mexican dollar and the tael also circulate. The unit of length is the *tuok* (18.6 to 19.2 in.), the unit of weight the *picul,* varying in different provs. from about 137 to 139 lbs. The **people** are mainly of Mongolic stock, speaking an isolating language like the Chinese. The Annamese proper are confined to the coast-plains and the lowlands. Some of the towns contain also considerable numbers of Chinese. The inhabitants of the hill-tracts and mts., known collectively as Mois, differ considerably in physical appearance from the lowlanders, being generally taller and of lighter complexion. **Government.**—The intervention of France in A. arose out of a dynastic war in A. before the close of the eighteenth century. In 1790 the Emperor Gia-long was victorious over a usurper with the aid of the French, who stipulated that they should receive in recompense a settlement in A. For the purpose of enforcing the fulfilment of this promise, various expeditions were sent out in 1858 to 1861, and in 1862 the three provs. of Cochin-China north of the Mekong delta were ceded to France. In 1867 the three provs. S. of that delta were also occupied by the same power. In 1874 a treaty was concluded by which the Emperor of A. engaged to regulate all the foreign relations of the state only in agreement with France. Subsequently French expeditions, sent to put down the piratical 'black-flags,' led to the renewal of war with A., at the conclusion of which, in June 1884, the treaty now regulating the relations of France and A. was concluded. According to this the French protectorate extends over the whole of A., including Tongking, but the Emperor of A. retains the internal administration over the whole terr., from the N. limit of French Cochin-China to the S. frontier of the Tongking prov. of Ninh-binh. France, however, has the control of the customs and public works. The ports of Kwi-nhon, Turan, and Xuan-day were opened to foreign trade, and that of Thuan-an, on the coast in front of Hué, was ceded to France. Hué is the residence of the French resident-general

for A. and Tongking. Area roughly estimated at about 46,000 sq. m., including the terr. acquired by France from Siam in 1893, 100,000 sq. m. P. probably about 5,000,000. See also **Indo-China.**

Antan'anarī"vo ('at the town of a thousand'), cap., Madagascar, situated near the middle of the island, on a rock crowning a small plain belonging to the plateau of Imerina. Mean rainfall (10 yrs., 1881–90), yr. 53.1 in., Nov.–March 45.7 in. P. 80–90,000. *Proc. R. G. S.*, 1892, pp. 744, 750.

Antarctic Regions, the regions S. of the Antarctic Circle in 66½° S. Compared with the Arctic Regions they are remarkable for the uniformity of their low temperatures. To the S. of 62° S. the mean temperature of both sea and air is at or below the freezing-point of fresh water even in summer. Still nearer the south pole, ice barriers have stopped the advance of explorers at a lat. about 5° lower than that attained in the Arctic Regions. The highest lat. ever reached in southern seas was 78° 10′ S., the lat. at which the progress of Sir James Ross was arrested in 1842, after he had sailed along an icy barrier about 300 m. in length, and from 150 to 200 ft. in height. He had previously sighted land, the coast of which he traced from the parallel of 72°. To this land, the most extensive that has been seen in the A. R., he gave the name of **Victoria Land,** and on it he observed in the course of his voyage an active volcano, **Mount Erebus,** nearly 13,000 ft. in height. Elsewhere land has hitherto been seen only on or near the Antarctic Circle (Graham's Land, to the S. of Tierra del Fuego. Alexander Land further to the SW., Enderby I. in 50° E., and Wilkes Land, known in isolated capes and segments at many places between about 100° and 160° E.). The icebergs of the A. R. are remarkable for generally having the form of vast tabular masses. One seen during the *Challenger* expedition was 3 m. in length and about 200 ft. high. The swarms of these icebergs that have been seen in and near the Antarctic seas, and the deposits of terrestrial origin that have been found in the vicinity of the ice-barriers, afford clear evidence of the existence of an Antarctic continent. See also report of a voyage toward the Antarctic Sea in *Geog. Jour.* II. (1893) pp. 429–38.

Antigua (an-ti'ga), a Brit. West India isl., colony of Leeward Is., of which it is the seat of government, in 17° 6′ N., 61° 45′ W., 50 m. N. Guadeloupe. The island was discovered by Columbus in 1493, and the first settlement of British took place in 1632. Coasts deeply indented and rugged, interior diversified but almost treeless, though considerable tracts have been overrun with 'bush.' There are no rivers and few springs, water being chiefly provided by catchment reservoirs; irrigation works now in progress. Climate remarkable for dryness. Chief products, sugar; pine-apples are also grown for export, and yams, sweet potatoes, &c., grown for home consumption. Experiments are being made with fibre-plants of the genera *Sansevieria, Boehmeria,* and *Furcræa.* Value of combined imports and exports about £400,000. Cap. St. John, which is also the seat of the Bishop of Antigua. Average rainfall about 30 in. Area, 108 sq. m. P. (1871) 34,300; (1891) 36,700 (mostly negroes).

Antingham, par., Eng., Norfolk, N. div., 6½ m. S. by E. Cromer, 2 m. S. Gunton stn. P. <250; eccles. par. (**A. with Thorpe Market** and **Bradfield**) P. <500. See **Walsham, North.**

Antioch, Turkish **Antakieh,** or **Antakiyeh,** tn., Syria, vilayet and 57 m. W. Aleppo, on l. bk. of the Orontes (Nahr-el-Asy), about 20 m. above its mouth. It has warm springs, and a trade in silk and other products of the district. Shattered remains of the city walls, a ruined aqueduct, two bridges, and a portion of pavement are the only vestiges of ancient magnificence. A. was embellished and named by Seleucus Nicator, B.C. 300. Although it suffered severely by successive earthquakes, it maintained its importance till taken by the Saracens in 658. Its ancient population was estimated at 400,000, in its most flourishing state. Chrysostom computes the population in his time at 200,000, more than one-half of whom were Christians. It was the capital of a Christian principality from 1098 to 1269, since which time it has progressively declined. Near it was Daphne, the sanctuary of Apollo. It was here that the followers of Christ were first called Christians. In 1872 was almost destroyed by an earthquake, but has since recovered. P. 23,600; Moham. 16,000; Greeks, 3500; Armenians, 3900 (Cuinet).

Antioche, Pertuis d', strait between the isls. of Ré and Oléron, W. ct. France, dep. Charente-Inférieure.

Antioquia, state, Colombia. See **Colombia.**

Antioquia, Santa Fe dé, tn., Colombia, dep. A., 280 m. S. by W. Cartagena; outside the mining region. Founded 1541, and formerly flourishing; seat of a bishop. Alt. 1875 ft. P. 13,000.

Antiparos, the ancient *Oliaros* or *Olearos,* isl., Greece, one of the Cyclades, 70 m. SSE. of the S. point of Eubœa, just W. of Paros, with a famous stalactite cavern. P. <2000.

Antipatris, place named in N. T. See **Râs el Ain.**

Antipaxos, small isl., Greece, little more than 1 sq. m. in area in the Ionian Sea, 1½ m. SE. Paxos.

Antipodes, small isl. in S. Pacific Ocean, SE. of New Zealand, so called from being the land most nearly opposite to Great Britain in the S. hemisphere, in 49° 32′ S., 178° 42′ E.

Antipovxa, vil., Russia, govt. and 115 m. SW. by S. Saratov, on the r. bk. Volga. P. 3000.

Antirrhion, fort, Greece, on the N. of the strait connecting the Gulfs of Patras and Lepanto, 5 m. SW. by S. Lepanto.

Antisana, mt., Ecuador. Mean temp. at alt. 13,320 ft. (1 yr., 1845–46), yr. 40.8° F., Jan. 43.2°, July 37.4°. See **Andes, B.**

Anti-Taurus, a series of mt.-chains stretching about 140 m. NE. by N. to SW. by S. in the SE. of Asia Minor, mainly between the Zamanti-chai and the Gök-su, the two chief headwaters of the Seihun, but including also the Binbogha-Dagh, E. of the Gök-su.

Antivari, fortified tn., Montenegro, 23 m. SSE. Cetinje, 2½ m. from the bay and roadstead of A.

Antler, vil., Canada, in the SE. of dist. Assiniboia, on North Antler R., 162 m. SE. by E. Regina. P. <1500.

Antofagasta, the largest prov. of Chile, stretching from the Pacific to the Bolivian and Argentine frontier at the widest part of the country, nearly bisected by the Tropic of Capricorn. It is in the rainless region of Chile, and is without agriculture, except in a few places capable of irrigation. Its original development is due to the working of the silver mines of Caracoles, discovered in 1870, and it contains also deposits of nitrate of soda of economic value, besides other vast saline deposits or salt lakes. See **Chile, Antofagasta** (seapt.), and **Atacama** (town).

Antofagasta, seapt., Chile, cap. prov. A., on the W. ct., about 23° 43′ S., with poor harbour. The railway connecting it with the silver-mining dist. of Caracoles has been continued to Oruro in Bolivia, so that it now exports the silver ores of Huanchaca and Potosi in Bolivia, as well as nitrate of soda. P. 7600.

Antrim, a maritime co. in the extreme NE. of Ireland, Ulster, including Rathlin I. on the N., divided into the following baronies:—

Baronies.	Acres.	P. 1891.
Antrim, Lower	80,826	20,048
Antrim, Upper	36,490	10,868
Belfast, Lower	56,160	22,204
Belfast, Upper	32,942	17,136
Cary	75,036	12,901
Dunluce, Lower	30,576	8,246
Dunluce, Upper	52,789	13,353
Glenarm, Lower	64,945	8,427
Glenarm, Upper	24,032	7,671
Kilconway	68,649	16,590
Massereene, Lower	27,229	4,791
Massereene, Upper	56,862	24,517
Toome, Lower	36,135	23,944
Toome, Upper	47,580	15,610
Belfast City (part of)	4,322	212,899
Carrickfergus (town)	16,702	8,923
Total, Antrim	711,275[1]	428,128

[1] Exclusive of 50,804 ac., under the larger rivers, lakes, and tideways.

Surface near the coast rises in some places to 1600 ft. in height. In the SW. much of the soil is boggy [**Ireland,** table]. Chief rivers, the Bann, forming the W., and the Lagan, the S. boundary. The Lagan Canal connects L. Neagh with Belfast L. Volcanic rocks cover the greater part of the surface. In the E. archæan and metamorphic rocks prevail, with strips of carboniferous. The famous Giant's Causeway, one of the most perfect specimens of columnar basalt in Europe, is on the N. coast of this co. As to agriculture, see **Appendix,** pp. 10–12. The minerals are important. Iron ore (aluminous hematite) is worked at various places from Larne to Cushendall, and also at Portrush. Rock-salt is mined at Carrickfergus, and alum clay or bauxite at Glenarm, Ballintoy, Ballynure, and Ballymena. Chief industry, especially about Belfast, spinning linen and cotton yarn, and weaving. Salmon and other fisheries on the coast are important. The co. returns four members to Parliament, representing the N., S., E., and Mid divs., besides four members for the borough of Belfast. Apart from Belfast the pop. has steadily decreased since 1841 (in that year, 281,000, in 1891, 215,000). See **Ireland,** table.

Antrim, co., U.S., Michigan, in the NW., crossed by 45° N. and by 85° W., bounded on the W. by Grand Traverse Bay.

Antrona, val., Italy, Lombardy, dist. Domo d'Ossola.

Antuco, volc., in the Andes, Chile, prov. Bio-bio, in 37° 22′ S. Alt. 9060 ft.

Antwerp, *Flem.* **Antwerpen,** *Fr.* **Anvers** (from Flem. *aen't werf*, 'at the wharf'), a famous fortified city and naval arsenal of Belgium, and the centre of its foreign trade, cap. prov. of same name, on r. bk. of the Scheldt, 47 m. from its mouth, 27 m. N. Brussels. Lat. of cathedral, 51° 13′ 2″ N., long. 4° 24′ 2″ E. Its old fortifications, including a citadel built by Alba in 1567–8, have been destroyed, but since 1860 it has been provided with a new and larger fortification wall, as well as a semicircle of forts. Its cathedral, originally dating from the fifteenth century, was nearly destroyed in the eighteenth, and rebuilt at the beginning of the present century. It has a noted tower (the only one of two which has been finished) 403 ft. high. A. has also a gallery of sculpture, and museum of pictures with masterpieces of Rubens (some also in the cathedral, which has the tomb of Rubens), botanic garden, &c. Its situation for shipping is admirable. It has 2¼ m. of quay along the Scheldt, with a depth at low water of from 26.8 to 28.4 ft., and 12 docks, most of which have a depth over sill of 21 to 23 ft. It has ample railway facilities, besides communication with 930 m. of Belgian inland waterways connected with the Meuse and the Seine, and navigable for vessels of 300 to 400 tons. Its principal drawback as a port is that the navigation of the Scheldt below the town being difficult the port dues are heavy. In winter too the mouth of the Scheldt is sometimes closed by ice, in 1891, for example, for nearly an entire month. In the sixteenth century, till about 1560, A. was the richest and also the most commercial city in Europe, and contained 200,000 inhabitants. Its importance afterwards declined from political causes, and its revival in modern times dates from 1863, when the navigation

of the Scheldt was made free. In 1860, the gross tonnage that entered the port was 546,444; in 1870, 1,362,609; in 1880, 3,063,825; in 1890, 4,493,043; see also **Appendix,** p. 14. Its principal trade is with the ports of Western Europe, including Great Britain, and the chief American ports. It shares with Bremen the emigrant trade to America, and has a large import trade from the Argentine Rep., and Uruguay. More than half the tonnage visiting the port is under the British flag. It carries on numerous industries, among which lace-making, ship-building (at the suburb of Hoboken), and diamond-cutting may be specially mentioned. A. was taken by the Spaniards in 1576 and 1585, and by the French in 1792 and 1794. Birthplace of the painters Teniers, Jordaens, and Vandyck, the geographer Ortelius, and the engraver Edelinck. P. (1846) 100,000, (1869) 127,000, (1890) 225,500; including suburbs, 303,000.

Antwerp, prov., on the N. frontier of Belgium, bounded on the W. by the Scheldt, divided into the arrs. of A., Mechlin, and Turnhout; surface level. In the NE. are extensive heaths (the Campine); elsewhere the soil is fertile. See **Belgium.**

Antwerp, vil., U.S., New York, Jefferson co., 66 m. NE. Oswego, with iron-mines. P. <1500.

Antwerp, vil., U.S., Ohio, Paulding co., 72 m. WSW. Toledo. P. <1500.

Anunghoy, isl., China, at the mouth of the Canton R., E. side, with fort, taken by the British in 1841.

Anúpshahr, tn., Brit. India, NW. Provs., dist. Bulandshahr, on the r. bk. of the Ganges, 58 m. SE. by S. Meerut. P. 8000.

Anúrádhapúra, or **Anarajapura,** a deserted and ruined city, Ceylon, North Central prov., 64 m. W. by S. Trincomali, the ancient cap. of the island, with a bo-tree, or pípal (*Ficus religiosa*), sprung from a shoot derived from the tree under which Gautama is said to have sat at Buddh Gayá when he became Buddha. P. <3000.

Anure Lough, lake, Ire., in the extreme W. of co. Donegal, 23 m. N. by W. Donegal, drained by the Gweedore R. into the Atlantic.

Apana, tn., Asiatic Turkey, on the N. ct., 56 m. W. Sinope.

Aparri, seapt., Philippine Is., at the mouth of the Rio Grande, near the middle of the N. ct. of Luzon.

Apatin, market-tn., Hungary, prov. Zombor, on the l. bk. of the Danube, 45 m. SW. Maria Theresiopel. P. 12,800.

Apeldoorn, comm. and vil., Holland, prov. Gelderland, 9 m. WSW. Deventer. P. (comm.) 19,300.

Apennines, Italian **Appennino,** the ancient *Mons Apeninus* (probably from Celtic *pen,* a mountain), a long chain of mountains which unites in the NW. with the Maritime Alps, from which it may be said to be separated by the Col dell' Altare [**Alps**], and the main chain of which describes a great curve to the eastwards, passing through the peninsular portion of Italy, and ending, at least on the mainland, in the 'toe' of that country. The mountains of Sicily are mostly a continuation of this chain. On the mainland, this chain, with its numerous branches, fills up the greater portion of Italy, S. of the valley of the Po. It is divided into the Ligurian A., in Liguria; the Etruscan A., the main chain of which runs along the NE. frontier of Tuscany; the Roman A., the main chain of which lies between Umbria and the Marches; and the Abruzzi, in the prov. to which this division of the chain gives its name. To the S. of Abruzzi no general name is given to any considerable section of the range. **A.** The Ligurian A. are for the most part narrow, and rise more or less abruptly from the sea. Down to recent times, the principal pass across this section was the **Bocchetta P.** (2560 ft.), on the road from Genoa to Alessandria, but this pass has been superseded by the railway which crosses the more easterly **Giovi P.** at the height of 1550 ft. The highest peak in this section is the **Monte Bue** (5915 ft.), in the E. of Liguria. **B.** The Etruscan A. may be taken as beginning in the NW. with **La Cisa P.** (3410 ft.), on the road from Parma to Pontremoli, between the Monte Molinatico on the NW. and the Monte Orsaro on the SE. In former times the most important pass across this section was **La Futa,** or **Pietra Mala** (2960 ft.), on the road running nearly direct from Florence to Bologna; but this pass is also superseded by a railway which passes first NW. to Pistoja, then winds up the mountains, and finally traverses the main ridge in a tunnel near the head of the valley of the Reno. The highest peak in this section is the **Monte Cimone** (7110 ft.), in the S. of Emilia, NNW. of Pistoja. The region to the SW. of the main chain in this section is mainly mountainous, but the basin of the Arno, which belongs to it, includes one of the largest lowland valleys of the whole chain. The elevated L. Trasimeno, W. of Perugia, may, though beyond the frontier of Tuscany, be referred to this section. **C.** The Roman A. have their principal peaks in the short chain of the **Monti Sibillini,** in the SW. of Umbria, where the **Monte Rotondo** rises to 6900 ft. in the N., the **Monte Pretara** and **Vettore** in the S. to 8125 ft. and 8005 ft. respectively. In ancient times the principal road leading N. from Rome across the A., the Via Flaminia, entered the mountains near the modern town of Foligno (to the SE. of Perugia), crossed the **Scaletta P.** to the NE. of Monte Catria (S. of Urbino), traversed the defile bounded by walls 1650 ft. high, now known as the **Furlo P.,** or **Pietra Pertusa,** and then descended the valley of the Metauro to Fano. Another important road, the Via Salaria, crossed the main chain of the A. by a pass immediately to the S. of the Monti Sibillini, which may be taken as the limit between the Roman A. and the Abruzzi. No part of the main chain of the Roman A. is as yet crossed by a railway. The W. of this section is covered with volcanic rocks, on which lies a series of round lakes, Bolsena, Vico, Bracciano, Albano (in the order from N. to S.), occupying the craters of extinct volcanoes. **D.** The Abruzzi constitute the loftiest and most rugged part of the whole system, sloping steeply down on all sides, but especially towards the E. They culminate in the short chain known as the **Gran Sasso d'Italia** ('great rock of Italy'), the highest peak of which is **Monte Corno** (9580 ft.), the upper part of which, on the E. side, shoots precipitously up to the height of about 6500 ft. Further to the S. lies the group called **La Majella,** the highest of which is the **Monte Amaro** (9170 ft.). Between these two mountain masses, the A. are now crossed by a railway which ascends the valley of the Pescara, or Aterno, to Aquila, and is continued thence NW. to Terni. **E.** The southern A. are confined mainly to the western part of the penin. Their higher parts are scattered, and the general elevation is lower than in the N. and Middle A. Still the region occupied by them is generally wild, and affords passage for few easy cross-

roads. In ancient times the Via Appia, the great S. road from Rome, after descending the Campanian plain to about 41° N., turned ENE., and passed through the gorge known as the Caudine Forks [**Arienzo**], on a route running nearly direct from Naples to Benevento. In modern times the railway makes a sweep to the N., round the mountains lying N. of this defile. Now, as in ancient times, Benevento is the point of divergence of several routes on the E. side of the passes. In modern times a railway proceeds from Salerno by valleys belonging to the basin of the Sele, into the wild highland 'compartment' of Basilicata, then through that compartment past Potenza, down the valley of the Basento. A branch from this railway ascends the marshy Val di Diano between the Basilicata on the E., and the isolated plateau of Alburno and the mountainous penin. between the gulfs of Salerno and Policastro on the W., and a road continues southwards across a rugged highland tract into the valley of the Crati, the large N. Calabrian valley which has its mouth at the western angle of the Gulf of Taranto. Among the principal groups and peaks of this section are the following:—Between Campania and the prov. of Molise the **Montagna del Matese,** highest peak **Monte Miletto** (6725 ft.); on the S. frontier of Basilicata, **Monte Pollino** (7375 ft.) and **Dolcedorme** (7450 ft.); in the extreme S. behind Reggio, **Aspromonte,** highest peak **Montalto** (6420 ft.). In this section volcanic areas, with remains of extinct volcanoes, occur in the W. of Campania, round the Bay of Naples, in the N. of Campania, and in the N. of Basilicata, and in the first-mentioned district, Mount Vesuvius (4200), the only active volcano on the mainland of Europe, rises isolated from the plain on the E. of the bay. **Geologically,** the A. generally, apart from the volcanic areas mentioned, are composed principally of limestones of Cretaceous or Tertiary age. Old crystalline rocks, plutonic or metamorphic, occur principally in the extreme S. (Calabria) and the extreme NW. The mountains are poor in metals. Iron is found in small quantities, and extensive saliferous depôts occur near Cosenza. The celebrated marble of Carrara, Serravezza, and Siena constitutes the chief riches of the Apennines. Below 3000 ft. in elevation, the flanks of the principal chain are covered with a varied vegetation, of which the orange, citron, olive, and palm form the lower zone; but forests are rare. Above 3200 ft. the mountains are generally arid and comparatively bare of vegetation, but green bush is found on Monte Corno as high as 5500 ft. With regard to the Middle A., see Partsch in *Verhandlungen d. Gesell. für Erdkunde*, Berlin, 1889, pp. 427–42, and abstract of the same in *Proc. R. G. S.*, 1889, pp. 743–6.

Apenrade, tn., Ger., Prussia, prov. Schleswig-Holstein, in A. circle, 18 m. N. Flensburg, at the head of the Apenrader Föhrde (firth), which admits vessels of the largest size; with a school of navigation. P. 5200.

Apostle Islands, a group of beautiful isls., U.S., Wisconsin, Ashland co., in the W. of Lake Superior, in 90° 25′ to 91° W.; settled by the French in 1680; have several Jesuit missions.

Appalach'ian Mountains (*ach*, like *atch* in 'catch'), the general name for the great mountain system in the E. of North America, extending with a general south-westerly trend over a length of 1320 m. from Maine and the SE. of Quebec in the NE., to Georgia and Alabama in the SW. **A.** It is divided in a marked manner into two unequal sections by the line of valleys affording direct communication between New York and Montreal, namely, the valley of the Hudson and that of the Richelieu, with L. Champlain, this breach separating the **Green** and **White Mts.,** the **Hoosac** and **Taconic Mts.** from all the rest of the system. To the W. of this breach the **Adirondacks** in the N. are isolated by the Mohawk Valley, in which lie the Erie Canal and the railway that carries most of the traffic from New York to the western states. **B.** The remainder of the system is more continuous, and is characterised by general topographical features not belonging to the northern ranges and groups, and hence the name of A. Mts. is sometimes confined to mountains S. and SW. of the valleys mentioned. The main features in this part of the system are two series of mountain ranges running nearly parallel to one another, and separated in the N. at the widest section of the system by ranges of mountains known as the Middle Belt of the A., and further S. merely by a wide valley. **I. The Eastern Members of the System.** The name of **Blue Ridge** is sometimes applied to the whole of the eastern series of mountains, but sometimes confined to the part in which the series is most continuous, from Virginia southwards. In Pennsylvania the mountains of this series are sometimes called the **South Mts.** In its southern part (N. Carolina) the Blue Ridge spreads out laterally, having mountain ranges on the E. and W. connected by transverse ridges. The western ranges are here known as the Iron Mts., Great Smoky Mts., and Unaka Mts. (in the order from N. to S.), the eastern ranges forming the Blue Ridge proper. To this latter part of the Blue Ridge, and in particular to the **Black Mts.,** belong the highest peaks of the whole system. Here **Clingman's Mountain,** or the **Black Dome,** attains the height of 6707 ft. (Guyot), and several other peaks rise above 6500 ft. Immediately to the W. of the eastern series of mountains, a great longitudinal valley, sometimes known generally as the Great Valley, runs through the whole length of the southern section of the system. It begins in the extreme SE. of New York, where it communicates with the mouth of the Hudson valley. In New Jersey and Pennsylvania, where it is bounded on the W. by the Kittatinny Range, it is called the Kittatinny Valley, in Virginia the Great Valley (including the Shenandoah Valley), and in Tennessee also the Great Valley, or the Valley of E. Tennessee. **II.** The **Middle Belt of the A.** can be traced in the S. of New York state, but in that state, in which the only striking topographical feature S. of the Mohawk Valley is the **Catskill Mts.,** it has no importance. It attains its greatest extent in Pennsylvania, and is a prominent feature only in that state and Virginia, and a narrow tract in Maryland. In Tennessee it dies away, merging in the Great Valley, which there extends across the whole width between the eastern and western members of the system. Where well developed, this belt is characterised by long, straight, or gently curving ridges, having the same general direction as the whole system (NE. to SW.), for the most part with narrow sharp crests of remarkably equable elevation, these ridges separated by narrow valleys, which in most cases are open at both ends, but in some instances are closed at one end by the meeting of two adjacent ridges. **III. The Western member of the system** is for the most part not properly a mountain range, but only the eastern escarpment of a plateau which extends for a long distance westwards, gradually merging in the low plains of the Mississippi basin. In the northern section, Pennsylvania and on the E. frontier of W. Virginia, this escarpment forms the **Alleghany Mts.,** according to the proper application of that name (sometimes used as equivalent to A. Mts.); in the southern section, Tennessee and the E. frontier of Kentucky, it forms the **Cumberland Plateau,** or, seeing that in places, especially in Tennessee, it slopes somewhat abruptly to the W. as well as the E., the Cumberland Mts. The plateau stretching to the W. of this escarpment is broadest in the N.; narrowest, but at the same time loftiest, most rugged, and most sparsely peopled in the S. (Tennessee). **C.** It is the western member of the A. system S. of the Potomac that offers the principal barrier to communication. That river crosses the whole of the system except the western member, and an easy passage across this part of the system also is afforded for the railway that ascends the lower valley of the Potomac. The Chesapeake and Ohio Canal followed the same route. To the N. of the Potomac many river valleys (those of the Juniata, Susquehanna, Delaware, &c.) intersect the ranges of the Middle Belt, or both the Middle

Belt and the E. member of the system. The Susquehanna crosses the entire system. The famous Delaware Water Gap is where the Delaware breaks through the Kittatinny Range on the border of Pennsylvania and New Jersey. These and other valleys allow of the passage of numerous railways. S. of the Potomac a transverse division of the A. Mts. is formed where the Great Kanawha R., which crosses the western members of the system from SE. to NW., approaches nearest to the James R., which crosses the eastern members of the system eastwards. At this division a railway crosses from Virginia into W. Virginia at the height of about 2000 ft., but there is no other railway across the western A. from Maryland to the **Cumberland Gap** (1675 ft.), at the meeting-place of the states of Virginia, Kentucky, and Tennessee, a distance of nearly 400 m. Through this gap, which long afforded the only practicable route westwards in this region, a railway was laid only about 1890. To the S. of this gap two railways have been laid for a longer period across the Cumberland Mts., one by a route running NW., another by a route running SW. from Clinton on the Clinch R., Tennessee; but to the S. of that there is no other railway crossing till the Cumberland Mts. begin to die away to the NW. of the Tennessee R., in the S. of the same state. This paucity of westerly railways makes the Great Valley of the A. system of special importance in the traffic between E. and W. Access to this valley from the E. is afforded even across the highest part of the A. system by a railway which crosses the Blue Ridge by the **Swananoa Gap** to the S. of the Black Dome, connecting the upper parts of the Catawba and French Broad valleys (N. Carolina and E. Tennessee). **D.** Archæan, Cambrian, and Silurian rocks are found throughout the length of the system, the newer rocks following the older, SW. of the Hudson, in the order from E. to W. S. of the Mohawk Valley Devonian rocks prevail in the N., and can be traced in most cases to the W. of the Silurian strata, and further W. the great Carboniferous area of the U.S. is met with; and productive coal-measures are found from Pennsylvania to Alabama. Next to coal (including anthracite), iron ore is the most important mineral, this being abundant in Pennsylvania in the N. and Alabama in the S. All the A. highland was covered originally with a great forest of maple, oak, ash, chestnut, hickory, butternut, walnut, and other trees. Much woodland still remains, especially on the Cumberland Plateau and the southern Alleghanies.

Appelland, small sand isl., Prussia, off W. ct. Schleswig, in 54° 38′ N., 8° 44′ E.

Appenzell, a cant. in the NE. of Switzerland, wholly surrounded by the cant. St. Gall. Is subdivided into the *Outer Rhodes* and *Inner Rhodes.* The former division is nearly all Protestant, and the latter Roman Catholic; the inhabitants speak the German language. Surface mountainous in the S., where Mount Sentis is 8232 ft., and the lowest part of the surface is 1300 ft. in elevation. Chief river the Sittern, which runs through its centre. *Inner Rhodes* is agricultural. In *Outer Rhodes,* cotton and linen weaving, embroidering and dyeing, are branches of industry. Cap. of Inner Rhodes, Appenzell; of Outer Rhodes, Trogen; Herisau is the only other town of importance. Government in both subdivisions is vested in a grand council, which meets the assembled population once a year for legislative business. Appenzell holds the thirteenth place in the Swiss confederacy. Area 162 sq. m. P. 67,000. See **Switzerland.**

Apuan Alps. See **Alpe Apuane.**

Apuí, Caxoeira de, falls on the Tapajoz R., Brazil, in 4° 34′ S., 55° 55′ W.

Apulia, in Italian **Puglia,** a territorial div. in the extreme SE. ('heel') of Italy, consisting of the provs. Foggia, Bari, and Lecce, a vast plain almost without undulation, and for the most part treeless, bounded on the E. by the Adriatic, on the W. by the Apennines and Gulf of Taranto, but includes in the N. the Monte Gargano. The northern portion of the Apulian plain is pasture land, known as the *Tavoliere* ('chess-board') *di Puglia,* a region of about 1200 sq. m. in extent, or nearly one-seventh of the entire div., upon which great flocks of sheep, the chief wealth of the dist., feed—the name probably referring to the regular arrangement of the distinct pasturages in which the area is divided. This pastoral dist. is the characteristic feature of A., and has been in existence under all the governments that have prevailed in this region from the time of the Romans. The region is traversed in every direction by grassy roads (*tratturi*) over 100 yards in width, and with a total length of 940 m., by which the sheep descend to these lowland pastures for the winter season. During the summer the region is a scorched and arid waste [**Italy,** climate]. The soil is poor, there being only a thin layer of humus upon a substratum of clay. Among the crops of A. the most noted is wheat, which is renowned for its weight and quality, and is that mostly used in the manufacture of maccaroni. In Bari and Lecce large quantities of excellent oil are produced. The wine is generally poor, but the industry is making progress, and production is rapidly increasing, large areas of corn-fields being converted into vineyards. The mineral products are unimportant, with the exception of the fine marbles quarried round Monte Gargano. Salt is scarce. The coasts both on the Adriatic and on the Gulf of Taranto are in many places (round the Monte Gargano, round Brindisi, Otranto, Taranto, &c.) malarial, owing to lack of drainage. In other parts irrigation is required. Pellagra is unknown. See **Italy,** table, and with regard to the history, **Naples.**

Apure, riv., Venezuela, S. America, and one of the tribs. of the Orinoco, rises in the Andes of the U.S. of Colombia, near 7° N. to 72° W., flows E., and joins the Orinoco in about 7° 40′ N.; navigated by steamers. On it are the towns of Nutrias and San Fernando.

Apurimac, riv., S. America, one of the head-streams of the Amazon (*q.v.*). Its course, till its junction with the Ucay, is between 500 and 600 m.; navigable for small steamers even in the dry season up to the confluence of the Mantaro, in about 11¾° S.

Apurimac, dep. Peru, comprising the provs. of Abancay, Aymareas, Anta, and Cotabambas, and a portion of Ayacucho. Chief town, Abancay. See **Peru.**

Aquafort Harbour, port, Newfoundland, E. ct., in 47° N.

Aqualate Mere, a small lake, Eng., Staffordshire, in the extreme W., 9 m. W. by S. Stafford.

Aquambo, or **Akwamu,** a country of Africa, Upper Guinea, on the river Volta, on the interior border of the British protected terr., with a town of same name.

Aquapim, or **Akwapim,** a maritime state of Africa, British protected terr., Upper Guinea, in 6° N. to 0°. Soil barren near the coast, but fertile inland.

Aquë, or **Aztgo,** vil., French W. Africa, on the Bight of Benin, in 1° 42′ E.

Aquidabau, riv., Paraguay, rises in the NE. of the country, flows SW. then W. into the Paraguay, which it enters in 23° 12′ S.; useless for navigation on account of its numerous rapids.

Aquila, a fortified and episcopal city of central Italy, cap. prov. Aquila [**Abruzzi**], on the Aterno, 40 m. ESE. Terni. The city was much injured by earthquakes in 1688, 1703, and 1706. Aquila was built by the Emperor Frederick II., from ruins of the ancient *Amiternum,* the birthplace of Sallust, vestiges of which city are still traceable. Alt. 2105–2365 ft.; mean temp., yr. 52.4° F., Jan. 34.9°, July 72.7°; rfall. (1874–91), yr. 25.6 in., Oct.–Nov. 6.2 in. P. 17,000.

Aquila, vil., Switzd., cant. Ticino, 16 m. E. by S. Airolo. P. <1000.

Aquileja, or **Aglar,** vil., Austria, Görs and Gradisca, to the W. of the Isonzo, 18 m. SW. Görz, connected with the Adriatic by the navigable canal of Ansoca. In the reign of Marc Aurelius it was the strongest fortress of the Roman empire, and its pop. was reckoned at 10,000 before it was taken and burned by Attila (452). It was the frequent residence of the Emperor Augustus. See **Venice.** P. <2000.

Aquilonia, ruined city, Italy, Campania, prov. Avellino, 38 E. by S. Benevento. P. <3000.

Aquin, or **Yaquimo,** vil., isl., and repub., Haiti, on the S. ct., 72 m. WSW. Port au Prince, in 73° 20′ W.

Aquino, col., Argentine Republic, Terr. Formosa, 75 m. NNE. Corrientes, on the r. bk. of the Paraguay.

Aquiqui, a river-arm, Brazil, connecting the l. bk. of the mouth of the Xingu with the Amazon.

Aquiry, or **Acre,** riv., Bolivia and Brazil, flows N. by E. into the Purus, which it joins in about 8° 45′ S., 67° 20′ W., navigable by steamers during the rainy season, by smaller boats in the dry season, to the india-rubber trading station of **Novo York** at the confluence of the Iriariape, in about 10° S. *Proc. R. G. S.,* 1889, p. 500; 1890, p. 240.

Ara, tn., W. Africa, Yoruba country, 137 m. NE. Lagos.

Arab, place named in O. T. See **Er Rabiyeh.**

Arabah, Wady El, a great valley extending from the Dead Sea to the Gulf of Akaba.

Arabat, a Russian fortress, Crimea, on the Sea of Azov, 70 m. ENE. Simferopol, on the Bay of A., at the S. end of the penin. of A. See **Azov, Sea of.**

Arabet, the ancient *Araba,* vil., Palestine, 32° 51′ N., 35° 20′ E., 11 m. N. by E. Nazareth.

Arabia (*Arabistan* of the Turks), the most westerly of the three great penins. of S. Asia, between the Persian Gulf and the Gulf of Oman on the E. and the Red Sea on the W. On the NW. it is connected with Africa by the Isthmus of Suez, is divided in two parts by the Tropic of Cancer. Length from N. to S. about 1500 m.; average breadth, 800 m. Ptolemy subdivided the country into *Arabia Petræa* (the stony), *Arabia Felix* (Araby the blest), and *Arabia Deserta* (Araby the desert); the first comprising its NW. portion, with the penin. of Sinai between the Gulfs of Suez and Akabah; the second, the terr. along the W. and S. coasts; and the last, all the rest of its extent; but this partition is unknown to the inhabitants and to Arab geographers. A. is mainly composed of a tableland with an average elevation of about 3500 ft., sloping steeply down on the W. and SW., but for the most part more gradually in other directions. Where the steeper slope occurs the strip between the low coast-lands and the tableland is in some places occupied by a succession of terraces or broken by ranges of mts. parallel to the coast. The low coast-strip is called by the Arabs *tehama,* the ascent to the tableland *hejaz,* and the tableland *nejd* or *negd,* but the two latter terms are also the names of certain regions. The highest elevation is in the mts. of Oman (9900 ft.), in the SE. Mount Sinai in the NW. attains the height of 8535 ft. The middle portion of the interior is known as Nejd (*q.v.*), a region studded with numerous oases, and having on its N. and S. vast sand-deserts. The southern sand-desert is called the Roba-el-Khali, and is by much the larger, the northern the Nefud (*q.v.*), and to the N. the Nefud is succeeded by the stony Syrian desert (El Hamid, 'the stony'), which begins to the S. of 30° N., and in the SW. of which lies the remarkable depression of Wady Sirhan (*q.v.*). Several mt. ranges traverse the N. half of the penin., and there are also a number of vast elevated platforms composed of volcanic outpourings known as *harrats* (*Proc. R. G. S.,* 1884, pp. 386–8, 395). The climate is among the driest in the world; the rainy season, which in general lasts from the middle of June to the end of September, and in Oman from

November to the middle of February, occurs only in December and January in the northern deserts. Heat excessive in the plains [**Aden, Jedda, Maskat**], but temperate in the mountainous regions of Yemen and Hadramaut, and the winters are rigorous in the elevated regions of Nejd. The *Simoom* or *Samiel*, the hot wind of the desert, blows from the interior towards the coast in all directions. The most fertile tracts of A. are in Yemen (*q.v.*), in the SW. The products are dates, durra, and other cereals; tamarinds, bananas, and in the SW. coffee, spices, drugs, gums, resins, cotton, and sugar. Minerals comprise ores of lead, iron, silver, sulphur, and precious stones. Arabia is famous for the horse and camel (especially in Nejd); wild animals comprise the wild ass, goat, and sheep, musk deer, antelope, hare, monkeys; in the S., bears, wolf, hyæna, fox, eagle, vulture, hawk, pheasant, ostrich, tortoise, serpents, and locusts. Lions were formerly numerous. The sperm whale is found on the coasts. Politically, A. is divided. The penin. of Sinai belongs to Egypt. The strip W. of the tableland forms the Turkish provs. of Hejaz and Yemen, and a narrow strip on the Persian Gulf called El Haza (improperly El Ahsa) also belongs to Turkey. Aden in the SW. is British, and the remainder is under independent rulers (sheikhs or emirs), the principal being those of Oman, Hadramaut, Mahra, and Kara. The inhabitants settled around the coast appear to have a distinct origin from the Beduins or true Arabs, who are the traditionary reputed descendants of Ishmael, and wander with their flocks and herds, dwelling in tents, and subsisting partly by plunder. The Wahábis, who form a distinct sect of Mohammedans, occupy the interior of the country, having subjected a great portion of it to their dominion at the commencement of the present century. Agricultural processes are rude, and manufactures at a low ebb. The Beduin women weave hair tent-covers and bags, and coarse linen and woollen fabrics. The trade of A. is considerable, and large quantities of merchandise are brought by caravans and by sea from the surrounding countries, partly for internal consumption, and partly for distribution among the numerous pilgrims and merchants who resort to the holy cities of Mecca and Medina. The principal seaports are Jedda and Hodeida on the Red Sea, and Maskat on the Gulf of Oman. The religion of the country is Islamism, which had its origin here towards the end of the sixth century, replacing the Sabæism and Judaism which had previously been the prevailing forms of worship. The Arabic language, called vulgar to distinguish it from that of the Koran, is used all over the N. of Africa, and extends even to the SE. of Asia. The literary Arabic is still used in the liturgy of all Mussulmans. It was long the language of the sciences, arts, and civilisation, and its literature is the richest of all the ancient nations of the East. Area estimated at 1,172,000 sq. m. P. about 3,500,000.

Arabian Sea, the northern part of the Indian Ocean, between the Indian penin. and Arabia.

Arabkir, or **Arabgir,** tn., Asia Minor, 107 m. NW. Diarbekir. P. 20,000.

Aracajú, seapt., Brazil, Sergipe, in 11° 56′ S. P. 15,000.

Aracan. See **Arakan.**

Aracaty, tn., near the NE. ct. of Brazil, and the mouth of the Rio Jaguaribe, state and 75 m. SE. Ceará. P. 16,000.

Aracena, tn., Spain, prov. Huelva, 45 m. NW. Seville. Pleasantly situated in a small carefully cultivated valley at the foot of a hill crowned by a large Moorish castle. P. 6000.

Arad, place named in O. T. See **Tell Arâd.**

Arad, co., Hungary, bounded S. by the Maros, traversed by the White Körös, a plain in the W. occupied by spurs of the Bihar Mts. in the E.

Árad, Ó (German, **Alt A.**), municip. and fortified tn., Hungary, on the r. bk. of the Maros, 30 m. N. Temesvar, seat of a bishop of the non-united Greek Church, and of a Theological School. P. (1850) 22,400; (1869) 32,700; (1890) 42,100.

Arad, Uj (German, **Neu A.**), tn., 4 m. to the SE. of Ó. Á., some distance from the l. bk. of the Maros. P. 5600.

Aradan, tn., Persia, prov. Irak Ajemi, 70 m. SE. by E. Teheran.

Arafale, tn., Eastern Sudan, at the head of Annesley Bay, 42 m. SSE. Massaua.

Arafat, a sacred area with a naked granite hill, called the Hill of Mercy, in the middle, about 15 m. SE. Mecca, Arabia. To 'stand' on this area is the principal ceremonial of the Mohammedan pilgrimage to Mecca.

Arafuras. See **Alfuras.**

Arafura Sea, a name sometimes given to the sea between the NW. of Australia and the W. of New Guinea.

Araglin, place, Ire., NE. co. Cork, bar. Condons and Clangibbon, 7 m. NE. by E. Fermoy, P.O.

Aragon, Kingdom of, one of the provs. into which, previous to 1833, the Spanish monarchy was divided, bounded N. by the Pyrenees, separating it from France, E. by Catalonia and Valencia, S. Valencia, and W. by New and Old Castile and Navarra; now divided into the provs. of Huesca in the N., Zaragoza in the middle, and Teruel in the S., cap. Zaragoza. Surface largely mountainous, spurs of the Pyrenees, which in this prov. attain their highest altitudes, reaching down towards the left, and outliers of the Iberian tableland (Sierra Moncayo in the W., and Sierra Albarracin in the S.) advancing towards the r. bk. of the Ebro, which traverses the lowlands in the middle, and here receives the Jalon and Guadalope on the r. bk., the Gallego and Segre (the latter chiefly in Catalonia) on the l. bk. The other chief rivers are the Cinca (trib. Segre) and its affluent the Isuela. The principal railways are that traversing the lowlands from Navarre to Catalonia and that which ascends the valley of the Jalon into Old Castile. Upper A. is a picturesque well-wooded region with climate and vegetation of a central European character [**Huesca**]; lower A., a dreary timberless tract, mostly incapable of cultivation, but containing here and there some irrigated and very fertile oases, producing corn, pulse, fruit, wine, olives, and mulberries; with saline streams and salt lakes and ponds, which in the exceedingly hot and hazy summers [**Zaragoza**] get wholly or partly replaced by incrustations of salt. The present barrenness of the prov. is largely due to the expulsion of the Moors by Philip III. (1609-10) and other historical causes. The minerals include salt, salt-petre, iron and copper ores, and coal, but owing to the deficiency of the communications are little worked. The kingdom of Aragon was founded in 1034, and united to the crown of Castile by Ferdinand the Catholic. See **Spain,** table, and **Pyrenees.**

Aragon, riv., Spain, rises in the Pyrenees on the slopes of the Pic du Midi, and flows on the whole W. and then SW. to the Ebro, which it joins about 1° 48′ W.; not navigable. Only its headwater belongs to the old kingdom, to which it gives name.

Aragona, tn., Sicily, prov. and 7 m. N. by E. Girgenti. P. 11,000.

Aragon Canal, Spain. See **Imperial Canal.**

Aragua, tn., Venezuela, Bermudez, 165 m. ESE. Caracas.

Aragua, tn., Venezuela, Bermudez, 110 m. W. of the SW. point of the isl. of Trinidad.

Araguaya, Araguay, or **Rio Grande,** a large riv., Brazil, rises in the Serra Cayapo in about 18½° S., 53° W.; flows northward between the provs. Goyaz and Grão Para on the W., and Matto Grosso on the E., and joins the Tocantins, length 1000 m. Navigable at all seasons of the year in its middle course—from Itacayu in 15° 7′ S., 51° 11′ W., to the rapids of Sta. Maria in 9° 25′ S., below which there is a succession of rapids as far as the Cachoeira Grande in 6° 10′-14′ S., the second that of Sta. Maria (10° 22′ to 9° 48′ S.). In its middle course it twice separates into two arms, enclosing two large islands, the first that of Santa Anna or Bananal (13° 27′ to 10° 29′ S.), more than 200 m. in length. See *Scot. Geog. Mag.*, 1893, pp. 44-46.

Aragva, riv., Trans-Caucasia, l. bk. trib. of the Kur, which it joins a few miles above Tiflis.

Arahal, El, tn., Spain, prov. Seville, 24 m. E. by S. Seville. P. 8200.

Ar'air, ruins, Palestine, *Aroer* in the O. T., 31° 27′ N., 35° 51′ E., 20 m. NNE. Kerak (ancient *Kir of Moab*).

Araish, El, seapt., Morocco. See **Arish, El.**

Arakan, or **Arracan,** a div. of Lower Burma, a prov. of British India, Burma, extending along the E. side of the Bay of Bengal, between 18° and 21° 33′ N., separated from Upper Burma and the Pegu and Iráwadi divs. of Lower Burma on the E. by the A. Yoma Mts.; divided into four dists., Akyab, N. Arakan, Kyauk-pyu, and Sandoway; cap. Akyab. Coast swampy and unhealthy. Among the numerous islands, two, Ramri and the Eastern Boronga I., are noted for the production of excellent petroleum. Chief rivers, the Kúladan, An, and Sandoway, all in some degree navigable. See **Burma, Lower.**

Arakan, riv. See **Kúladan.**

Arakan, tn. See **Mro-haung.**

Arakan Hill Tracts, a wild and backward dist., between 4000 and 5000 sq. m. in extent, to the N. of the Arakan div. of Lower Burma, between Chittagong and the Arakan Yoma Mts. It is composed of parallel ridges of sand-stone clothed with dense forest, and is sparsely peopled by a number of wild hill-tribes described as 'demon-worshippers.'

Arakan Yoma Mountains, a range 700 m. long, stretching from the mountains of the Naga city downwards along the E. of Chittagong div., Bengal, and Arakan div., Lower Burma, and through the Iráwadi div., and terminating in C. Negrais; highest peak, Blue Mt., 7100 ft. The range is very steep, and there are few practicable passes. The principal are one on the road leading from An, alt. 4663 ft.; and one on the road from Sandoway to Padaung, in Prome dist.

Arakhova, tn., Greece, Laconia, 15 m. N. by E. Sparta. P. <4000.

Arakhthos, riv. See **Artinos.**

Arakoon, tn., New South Wales, Macquarie co., on Trial Bay, 125 m. E. Tamworth. P. <1500.

Aral (*Khovaresm, Aral-denghis*), an extensive brackish lake of Asia, Russian Turkestan, between 43° 42′ to 46° 44′ N. lat.

and 58° 19′ to 61° 47′ E. long., 170 m. E. of the Caspian Sea; 158 ft. above the level of the Black Sea, 243 ft. above that of the Caspian; length, NE. to SW., 280 m.; NW. to SE., 80–180 m. Area, 26,166 sq. m.; depth, 75–220 ft. The slopes of the desert plateau of Ust Urt, 200–500 ft. high, rise on its W. shore; the sands of Kara-kum stretch NE., where it receives the Syr-daria; those of Kyzyl-kum in the E.; and the low delta of Amu in the S. Its shores are uninhabited, and only visited by a few Kirghizes. Kazalinsk, 35 m. E., and Kungrad and Chimbai in the Amu-delta, are the nearest settlements. There are a number of small islands, the number and size of which are rapidly increasing — Lake A. rapidly desiccating. The 80 m. long Gulf of Aibughir, in the SW., which was crossed on boats in 1859 by a Russian mission, is now quite dry and partly covered with fields. A. is very stormy, but freezes entirely in the N., and partially in the S. Rich in fishes, some fishing now carried on. Since 1847 Russia has kept a small flotilla on Lake A.

Aralar Mountains, a chain of the Cantabrian Mts., Spain, separating Navarre from Guipuzcoa. Alt. 3300 ft.

Araluen, tn., New South Wales, St. Vincent co., 65 m. S. Goulburn. P. <1500.

Aralykh, fort, Russia, Transcaucasia, govt. and 26 m. S. Erivan, near Persian frontier.

Aramac, tn., Queensland, Rodney co., 270 m. SSW. Townsville. P. <1500.

Aramengo, old tn., Italy, Piedmont, prov. Alessandria, dist. Asti. P. <2000.

Aramon, tn., France, dep. Gard, arr. Nimes, on the r. bk. of the Rhone, 7 m. WSW. Avignon. P. <3000.

Aran, riv., India, in S. of Berar, flows E. then S. into the Pengangá.

Aran, a Pyrenean val. in the Spanish prov. of Lerida, though on the N. side of the main chain, being enclosed on the S. and SE. by the Maladetta, and containing the source of the Garonne; chief village, Viella (alt. 2875 ft.), whence the Puerto (pass) de Viella (alt. 8200 ft.) leads S. over the Maladetta to the valley of the Noguera-Ribagorzana.

Aran Benllyn, mt., Wales, Merionethshire, 9 m. NE. by E. Dolgelly. Alt. 2902 ft.

Aranda de Duero, tn., Spain, prov. Burgos, on the r. bk. of the Douro, 47 m. S. Burgos. P. 5700.

Arandjelovac, tn., Servia, prov. Kraguyevatz, 30 m. SW. by S. Semendria. P. <2000.

Aranga, comm., Spain, prov. Corunna, dist. Betanzos. P. <5000.

Aran Island, Ire., off the W. ct. of co. Donegal, bar. Boylagh, Lat. 55° N.

Aran Isles, a group of isls. forming the barony of Aran, Ire., co. Galway, Connaught, at the entrance to Galway Bay, largest Inishmore. Soil extremely sandy. The people depend mainly on the fisheries, which have been fostered by the Congested District Board, partly on kelp burning. The principal village is Kilronan (*q.v.*). The islands contain many antiquities. There is a lighthouse visible 16 m. on Eeragh I., the westernmost of the group, and another visible 15 m. on the S. side of Inisheer I., the SE. member of the group.

Aranjuez, the ancient *Ara Jovis,* tn., Spain, prov. Madrid, on the l. bk. of the Tagus, 25 m. ENE. Toledo; castle with celebrated art treasures and fine park, the spring residence of the Court. P. 9600.

Aran Mowddwy, mt., Wales, Merionethshire, 9 m. ENE. Dolgelly. Alt. 2972 ft.

Aransas, co., U.S., Texas, on the Gulf of Mexico, crossed by 28° N., divided into three sections by **A. Bay,** which communicates with Gulf of Mexico by **A. Pass,** which has a lighthouse visible 13 m. in 27° 52′ N., 97° 3′ W.

Arányos, Hungarian, 'golden.'

Aranyos, riv., Hungary, Transylvania, flows E. from the Bihar Mts., then SE. into the Maros; carries gold.

Arányos-Gyéres, tn., Hungary, Transylvania, 22 m. SE. Klausenburg.

Arányos-Marót, tn., Hungary, 44 m. NNE. Komorn. P. <3000.

Araona, or **Arauna,** a tribe of American Indians inhabiting the N. of Bolivia between the rivers Madre de Dios and Beni.

Arapahoe, co., U.S., Colorado, bounded on the N. by 40° N., and stretching from the E. frontier to 105° W.

Arapahoe Peak, mt., U.S., Colorado, 43 m. NW. by W. Denver. Alt. 13,520 ft. (Hayden).

Arapahoes, or **Arrapahoes,** a tribe of N. American Indians, called by early French travellers *Gros Ventres,* originally found to the E. of the Rocky Mts. between the S. Platte and upper Arkansas. A retrograding and intractable remnant is now settled in Oklahoma.

Arapatak, Hungary. See **Elöpatak.**

Arapés, vil., Greece, Acarnania and Ætolia, on the Gulf of Arta, 43 m. NNW. Mesolonghi. P. <2000.

Arapiles. See **Salamanca.**

'Ar'arah, ruins, Palestine, *Aroer* in the O. T., 31° 8′ N., 35° E., 14 m. SE. by E. Beersheba.

Araraquara, vil. and rly. stn., Brazil, São Paulo, 187 m. NW. Santos.

Araras, an isl. in the Madeira, Brazil, 600 m. SW. by S. Manaos, 25 m. from the Bolivian frontier.

Ararat, a famous volcanic mt. of Armenia, and the culminating point of Western Asia, at the junction of the Russian, Turkish, and Persian empires, on the NW. border of the prov. Azerbaijan, in 39° 42′ N., 44° 35′ E. The two peaks, Agri Dagh (16,925 ft.) and Allah Dagh (12,850 ft.), surpass the limit of perennial snow. A. is the supposed place where the ark rested after the flood, but a similar distinction is claimed for several other heights in Asia.

Ararat, tn., Victoria, Ripon co., 82 m. WSW. Sandhurst. Alt. 1072 ft.; rainfall (14 yrs.) 24.37 in. P. <1500.

Araruama, tn., Brazil, on a lagoon on the S. ct. of the prov. Rio de Janeiro, 57 m. E. Rio de Janeiro.

Arary, riv., on the isl. of Marajo, Brazil, flows N. into the mouth of the Amazon.

Arary, vil., Brazil, Maranhão, on the r. bk. of the Guajahu, opposite the mouth of the Pindare, 39 m. S. by W. Maranham.

Aras (Araxes), riv., Armenia, rises in the Turkish vilayet Erzerum, near 41° 30′ N., 41° 10′ E., flows E., dividing for the greater part of its length the terrs. of Russia and Persia, and joins the Kur 60 m. W. of its mouth in the Caspian Sea. Course is 635 m., very rapid. Chief affluents, the Arpa-chai and Kara-Su.

Arasaig, or **Arisaig,** place, Scot., Inverness-shire, on W. ct., 3½ m. NE. of A. point, FMT.O. P. <1000.

Arasaig, Sound of, bay, Scot., SW. of Inverness-shire, in 56° 50′–53′ N. **A. Point** is a cape in 56° 53½′ N.

Arashkol, Jebel, a mt. group, Eastern Sudan, rising abruptly from the plain to the W. of the White Nile, crossed by 14° N., 100 m. long. NE. to SW.

Arassuahy, vil., Brazil, Minas Geraes, 360 m. SW. by S. São Salvador.

Aratapu, tn., New Zealand, North I., Hobson co., on the W. side of the Wairoa R., 70 m. NW. Auckland. P. <1500.

Arauca, riv., S. America, rises in Colombia, flows E. partly in the frontier of Colombia and Venezuela, and then through Venezuela, enters the Orinoco. Length about 450 m.; all except the headwaters navigable.

Araucanians, S. American Indians. See **Chile.**

Arauco, city, Chile, prov. A., on A. Bay, which offers bad anchorage, 28 m. S. by W. Concepcion, in 37° 13′ S.; coal-mines near, the production of which is increasing. P. <4000.

Araure, tn., Venezuela, Zamora, 170 m. SW. by W. Carácas. P. 4000.

Árávalli, or **Aravulli,** range of mts., India, stretching 300 m. NE. through Rájputána and Ajmere-Merwára, 6–60 m. in width. Average alt. 1000–3000 ft. See **Abu.**

Arawaks, a gentle race of American Indians, numerous in the W. Indies at the time of their discovery by the Spaniards, but now confined to Guiana (the banks of the Surinam and Essequibo).

Arawata, settlement, New Zealand, North I., E. Taupo co., 67 m. N. by W. Napier.

Arawan, or **Arauan,** oasis, Africa, Sahara, NW. of Timbuktu, in about 18° 55′ N., 3° W., a centre of trade between W. and NW. Africa. Alt. 835 ft. (Lenz, *ab.*).

Arawis, settlement, Cape Colony, dist. Namaland, 37 m. N. by W. Ookiep.

Aray River, Scot. See **Glen Aray.**

Arbe, tn., Austria, crownland Dalmatia, on the W. side of **A. I.,** 45 m. E. by S. Pola. P. <2000. The **island** is 13 m. long NW. to SE., and 2–5 m. broad. P. <5000.

Arcevia, tn., Italy, The Marches, prov. and 29 m. WSW. Ancona. P. 10,000.

Archambault Lake, Quebec, Montcalm co. See **Trembling Lake.**

Archangel, in Russian **Arkhangelsk,** govt., occupying the whole of N. Russia from Lapland to the Ural Mts., and including the White Sea and the **Kola** penin. The islands of **Novaya Zemlya, Vaigach,** and many others are also reckoned in A. The spurs of the Ural Mts. and the Timanskiy ridge in the E.; granitic and schistose plateau, cut through by deep valleys, in Kola penin.; low and marshy tracts in middle portions, and wide *tundras* in the E. of White Sea, entirely devoid of tree vegetation. Watered by several large rivers: Pechora, Northern Dvina, and its large tribs. Pinega and Vaga; Mezeń, Onega, Kem, and many smaller rivers. The two former are connected by canals with tribs. of the Volga. Some gold in Kola penin.; iron and copper ores. Immense forests, partly used for ship-building. Population consists chiefly of Russians; Lapps (about 2500), and Karelians (about 15,000) in the W.; Zyryans (about 8000), and Samoyedes in the E. Agriculture in the S. only; grain imported; cattle-breeding, especially in Kholmogory dist. Seal-hunting gives occupation to nearly 3000 men; important fishing (cod, herring), especially on the Norman (Murman) coast of Kola penin.; extensive hunting; timber, grain, shipped from the S.; charcoal, tar, pitch, and wooden goods exported; considerable trade in timber, wooden goods, ropes, &c., exported; and corn, fish, grocery, and manufactured goods imported (**White Sea**). Divided into 7 dists., the chief towns of which are: Arkhangelsk, Kem, Kholmogory, Mezeń, Onega, Pinega, and Shenkursk. Area 331,505 sq. m., out of which nearly 45,000 sq. m. occupied by two large islands. P. (1860) 282,180; (1887) 340,251.

Archangel (Russian, **Arkhangelsk**), Russia, cap. govt. A., at the mouth of the Northern Dvina, in 64° 33′ N., 731 m. NE. St. Petersburg. Important seaport for export of corn, flax, linseed, timber, tar, pitch, and tallow. Harbour free from ice from about the middle of May to the first week of November. Great fair. Mean temp., yr. 32.1° F., Jan. 7.7°, July 60.8°; mean rainfall (18 yrs.), yr. 15.6 in., June to Nov., 10.3 in. P. 18,000.

Arcola, settlement, U.S., Texas, Fort Bend co., 21 m. SW. by S. Houston.

Arcona, or **Arkona,** cape, Ger., in the NE. of the island of Rügen, 28 m. NNE. Stralsund, with a lighthouse visible 21 m. Alt. 177 ft.

Arcos de la Frontera, tn., Spain, prov. Cadiz, on the Guadalete, 20 m. E. by N. Jerez. P. 16,200.

Arcos de Valle do Vez, tn., Portugal, prov. Minho, 48 m. N. by E. Oporto. P. <3000.

Arcot, tn., Brit. India, Madras, cap. dist. North A., on Pálár R., 15 m. E. by S. Vellore. It is enclosed by walls; has fine mosques, tombs, and a ruined palace of its former nabobs. The ramparts of a former fort, memorable for its brilliant defence by Clive in 1751, still remain, and protect the city from the inundations of the river. P. 11,000.

Arcot, North and **South,** two contiguous dists. of Brit. India, presidency Madras, stretching N. from the Coleroon R., South A. on the coast, but North A. separated from the sea by the dists. of Chengalpat and Nellore; traversed in the W. by the Eastern Ghâts. In North A. the rivers in the plains are dry for most of the year, but there is always an underflow, which is tapped by channels for irrigation. Both liable to drought; most serious recent famines, 1866, 1875–76, a less serious one in 1891. Both dists. contain abundance of iron ore, North A. also copper. South A. also liable to floods. Malarious fever endemic in many places; smallpox very prevalent in North A.; cholera epidemics frequent in South A. See **Madras.**

Arctic Ocean, or **Northern Icy Sea,** is that part of the ocean which extends from the Arctic Circle, lat. 66° 30′ N., to the North Pole; it bathes the whole of the N. coasts of Europe, Asia, and America, and communicates on the NW. of Europe with the Atlantic; on the NE. of Asia with the Pacific by Bering Strait. It forms the White Sea in Europe, and the Gulfs of Kara, Obi, and Yenisei, in Siberia; in N. America, where it takes the name of the Polar Sea, it forms Baffin Bay. The principal rivers which flow into the Arctic Ocean are the Obi, Yenisei, Olenek, Lena, and Kolima in Asia; the Mackenzie, Coppermine, and Back in America. The ocean is mostly shallow, but a tongue-shaped area exceeding 2000 fathoms in depth advances southwards to within about one degree of the Arctic Circle, about midway between the coasts of Norway and Greenland. During the winter ice extends in every direction

round the pole, covering a space of from 3000 to 4000 m. in diameter; and even during the four months of summer the surface is at the freezing-point. Icebergs and fields of ice are continually drifting southwards into the Atlantic—the latter sometimes extending to 100 m. in length, and from 25 to 30 m. in diameter. This ocean is remarkable for the abundance of its animals, and it is the principal field of the northern whale fishery.

Arctic Regions, the regions lying N. of the Arctic Circle; chief islands, Spitzbergen, the Lofoten Is., Kolguev, Franz Josef Land Archipelago, Vaigach, and Novaya-Zemlya, in Europe; the islands of New Siberia, Kotelnoi, and Wrangell Land in Asia; and the Polar Archipelago in America. The coast-line of the Arctic Ocean in Asia and Europe has been pretty well ascertained by English, Russian, German, and Swedish navigators. Scoresby, in 1822, traced the E. coast of Greenland as far as 77° N., and the German expedition of 1870 reached 77° 1′ N.; the portion intervening between Franz Josef Sound and Cape Farewell being for the most part traced by Graah (1829-30) and other Danish expeditions (1883 and 1892); and Cook, Hearne, Parry, Franklin, Back, Ross, Inglefield, Lyon, Richardson, Dease, Simpson, Beechy, Collinson, Rae, M'Clintock, and the American explorers Kane, Hayes, and Hall, have made known most part of the coast-line in N. America, the last-named discoverer having succeeded in reaching by ship the lat. of 82° 16′ in Robeson Channel. Sir E. Parry, in 1827, penetrated as far N. as lat. 82° 45′ 15″ by boat sledges over the ice N. of Spitzbergen; and great additions have been made to our knowledge of the Frozen Regions by the expeditions sent in search of Sir John Franklin, who left England in 1845, with two ships and a crew of 138 men, all of whom perished, and whose sad fate was unknown till the document containing news of the ships was discovered in 1859 by Captain M'Clintock on a small island in the estuary of the Back R. In one of the search expeditions the long-sought-for NW. passage was at last discovered, Captain M'Clure having sailed, between 1850 and 1853, from Bering Sea along the N. coast of America into Baffin Bay, but the route is too encumbered by ice to be of any use to commerce. Subsequent to the discovery of Franklin's remains, the most important expeditions to the A. R., apart from Greenland (*q.v.*), have been the American expedition under Hall, in 1871, which reached 82° 26′ N., and by which it was ascertained that the Atlantic tides enter Robeson Channel from the N.; the Austro-Hungarian expedition, under Weyprecht and Payer, in 1872–74, in search of a NE. passage, in the course of which Franz Josef Land was discovered; the expedition under Nordenskiöld, a Swede, by which the NE. passage round Eurasia was effected in 1878-9; the British expedition under Nares, in 1876, when lat. 83° 20′ was reached; Leigh Smith expedition in 1880 to Franz Josef Land, by which 118 m. of new coast were explored; the U.S. *Jeannette* expedition under De Long, which, after ascertaining the extent of Wrangel Land, and discovering several small islands, was in 1881 lost off New Siberia in Iceland, to which the vessel had drifted; and the U.S. expedition under A. W. Greely, in 1883, when lat. 83° 24′ was reached; these last two expeditions having sailed up through Smith Sound. In the American expedition, a series of ice-free valleys, with pastures grazed by herds of musk-oxen, were discovered, stretching from Hall Basin (N. of Smith Sound) to the W. coast between Grinnell Land and Grant Land, in about 81° N. At present a project is entertained for another expedition to try to reach the North Pole, the expedition to be under the command of Dr. Nansen, the Norwegian who first crossed Greenland in 1888. The following may serve as examples of the mean temperatures that have been experienced in Arctic expeditions:—

Place.	Lat.	Long.	Period of Observation.	Date.	Jan.	Feb.	July.	Year.
			Years.		Fahr.	Fahr.	Fahr.	Fahr
Ooglamie . . .	71° 23′ N.	156° 40′ W.	2	1881-3	−16.3°	..	39.7°	9.8.

Ardèche, a dep. in the SE. of the Central Plateau of France, bounded on the E. by the Rhone, divided into three arrs., Privas, Largentière, and Tournon, cap. Privas. A. is one of the most rugged and mountainous deps. of France, decreasing in

fertility as it recedes from the Rhone, the Cevennes, here called the Monts Vivarais, occupying the W. of the dep. The calcareous rocks which border that river are succeeded by schistose rocks containing coal, then by granite, over all of which are spread immense fields of lava from volcanoes now extinct, by which most of the valleys originally descending to the Rhone across the granitic regions have been filled up. All the craters are situated in the granitic zone not far from the junction with the calcareous rocks. The chief natural curiosity among the many of this volcanic region is the Pont de la Beaume. The character of the surface causes the communications with the W. to be defective. The dep. is indeed traversed by excellent roads made at the time of the revolution, but the only railway across the mountains is in the narrow angle in the N., where a railway runs from the valley of the Rhone to that of the Loire (St. Etienne). Owing to the great differences in altitude and the shelter which the mountains afford to the valleys, there is great diversity in the vegetation of the dep. The olive flourishes as far N. as 44° 50′ (about the middle of the dep.), the highest latitude which it reaches in France. The vine and mulberry grow throughout the lowlands of the dep. and attain higher altitudes than the olive. A. is the principal silk-producing dep. in France. Chestnuts abound, and besides being exported under the name of Lyons chestnuts, form a large part of the food of the people, especially in the districts where the production of grain is small. Skirting the more fertile districts is a region of treeless plateaux, snow-covered during six or eight months of the year, and producing little but pasture grasses. Iron-mines are numerous, those of Lavoulte, Veyras, and Aubenas being the most considerable; lignite, antimony, galena, and copper also occur, and silver ore was formerly mined [**Largentière**]. A. corresponds very nearly to the old prov. of Vivarais, which in former times belonged in turn wholly or partly to the duchy of Burgundy or the county of Toulouse, and part of which was united to the crown of France in 1271, the remainder in 1308. Area 2145 sq. m. P. (1891) 371,269. See **France,** table.

Arden with Ardenside, par., Eng., Yorkshire, N. Riding, in the N. of the Thirsk and Malton div., 17½ m. NE. by E. Ripon, 7½ m. NW. by W. Helmsley stn; 4524 ac. P. <250.

Ardenne, or **Ardennes,** the *Silva* or *Saltus Arduenna* of the Romans, a name undoubtedly of Celtic origin, probably meaning 'the forest' (*ar dean*), though by some connected with the root *ard*, 'high,' applied in ancient times to a vast forest extending from the Seine and Oise to the Rhine in the NE. of the ancient Gaul, now applied to a tract extending from the N. of France through the SE. of Belgium to Luxemburg and the Prussian Rhine prov. N. of the Moselle, and when used with most precision to a curved strip on the NW. of the slate plateau occupying this region, beginning in the NE. of the French dep. of Aisne and ending near Aix-la-Chapelle, and having a total length of about 140 m. with a width of 25–30 m. This strip is still wooded in places, marshy in others, but for the most part made up of uncultivated heaths and poor pastures.

Ardennes, a dep. on the N. frontier of France, with a tongue of land advancing N. into Belgian terr. to enclose the platform on which stands the fortress of Givet; formerly belonging mainly to the prov. of Champagne; now divided into five arrs. Mézières, Rethel, Rocroy, Sedan, and Vouziers, cap Mézières. The elevations of this dep. take the form rather of plateaux than of mts. The central tableland which parts the basin of the Meuse from that of the Aisne is a continuation of the wooded highlands of Argonne (dep. Meuse). The eastern region (Meuse basin) lies higher and presents more irregularities than the western (the fertile valley of the Aisne). The Canal des A., completed in 1832, connects the Meuse (midway between Sedan and Mézières) and Aisne (at Rethel). The NW. region is of schistose formation, covered with wood and moorland, with very important slate quarries, but the rest of the Meuse valley is more fertile, and furnishes the greater part of the cereals raised in the dep. To the SW. lies a chalky plain, on the pastures of which large flocks of sheep are reared, noted for excellent wool, which as far back as the end of the sixteenth century gave rise to an important woollen industry [**Sedan**]. Iron-mines are worked chiefly in the cantons of Grandpré and Buzancy, and the blast-furnaces of the dep., now numerous, date back to the same period. The arr. of Mézières produces nails, and in the neighbourhood of Givet are important copper-works. Area 2028 sq. m. P. (1891) 324,923. See **France,** table.

Ardkill, par., Ire., co. Kildare, bar. Carbury, near Edenderry; 5848 ac. P. <500.

Ardlamont Point, cape, Scot., Argyllshire, on the S. ct., in 5° 13′ W. **A. Bay,** to the NW., at the entrance to L. Fyne.

Ardlaw, place, Scot., 3 m. from Rosehearty, P.O.

Ardleen, stn., Wales, Montgomeryshire, on the Cambrian Rly., 6 m. NNE. Welshpool.

Ardleigh, par., Eng., Essex, Colchester div., 4 m. NE. Colchester, on the G. E. R., PMT.O.; 5062 ac. P. <2000.

Ardler, stn., Scot., on the W. border of Forfarshire, on the C. R., 2½ m. ENE. Coupar Angus, P.O.

Ardley, par., Eng., Oxfordshire, Woodstock div., 9 m. NE. Woodstock, 4 m. NW. Bicester, 3 m. E. by S. Somerton stn., P.O. P. <250.

Ard, Loch, lake, Scot., in the extreme SW. of Perthshire, 9½ m. WSW. Callander. Alt. 105 ft.

Ardlougher, place, Ire., NW. co. Cavan, bar. Tullyhunco, 10 m. WNW. Cavan, with a P.O. (**Ardlogher**).

Ardmayle, par., Ire., co. Tipperary, bar. Middlethird, 3½ m. N. by W. Cashel; 4940 ac. P. <750.

Ardminish, place, Scot., Argyllshire, on A. Bay, in the E. of Gigha I.

Ardmolich Bridge, place, Scot., Inverness-shire, at the head of L. Moidart, on R. Moidart, 10½ m. NW. by W. of the head of L. Sunart.

Ardmore, stn., Ire., co. Londonderry, bar. Keenaght, on Limavady and Dungiven Rly.

Ardmore, par. and tn., Ire., SW. ct. of co. Waterford, bar. Decies within Drum, 6 m. E. Youghal, near **Ardmore Head,** PM.O. Par. 24,215 ac., P.<4000; vil. P.<500.

Ardmore, vil., U.S., Pennsylvania, Montgomery co., 8 m. NW. Philadelphia. P.<3000.

Ardmore Point, cape, Ire., on the E. co. Wicklow, 5 m. S. Wicklow.

Ardmore Point, cape, Scot., Argyllshire, the N. extremity of the I. of Mull. **A. Bay,** a small bay to the W.

Ardmore Point, cape, Scot., Argyllshire, on the SE. ct. of Islay I., in 55° 41′ N.

Ardmore Point, cape, Scot., Ross-shire, on the S. shore of Dornoch Firth, 5½ m. WNW. Tain, in 4° 11′ W.

Ardmucknish Bay, Scot. See **Nell, Loch.**

Ardmulchan, par., Ire., co. Meath, bar. Skreen, 2 m. NE. Navan; 3582 ac. P.<500.

Ardnacrusha, place, Ire., SE. co. Clare, bar. Lower Bunratty, 2½ m. N. Limerick, P.O.

Ardnageehy, par., Ire., co. Cork, bar. Barrymore, near Rathcormack; 16,334 ac. P.<1500.

Ardnahien, place, Scot., Argyllshire, on the SW. shore of L. Goil, 9 m. NW. Helensburgh.

Ardnamurchan, par., Scot., Argyllshire and Inverness-shire, 9½ m. NW. by N. Tobermory, PM.O.; 216,969 ac. P.<4000.

Ardnamurchan Point, cape, Scot., Argyllshire, in the W., in 56° 43′ N., with a lighthouse, exhibiting a white flashing light 180 ft. above high water, visible 18 m. Mean rfall. (1861–90), 00 in.

Ardnave Point, cape, Scot., Argyllshire, on the N. ct. of Islay I., in 6° 20′ W.

Ardnish, penin., Scot., Inverness-shire, in the SW., at the head of the Sound of Arisaig, in 56° 51′–53½′ N.

Ardnurcher, or **Horseleap,** par., Ire., S. cos. Westmeath and King's, bars. Moycashel and Kilcoursey, 9½ m. NNW. Tullamore; 12,010 ac. P.<1500.

Ardoch, vil., Canada, Ontario, co. Frontenac, 70 m. from Kingston. P.<1500.

Ardoch, place, Scot., Kircudbrightshire, 3½ m. N. New Galloway, and 8 m. N. by W. New Galloway stn.

Ardoch ('high field'), par. and vil., Scot., Perthshire, 7 m. S. by W. Crieff; 22,127 ac. P.<1000.

Ardoch, vil., U.S., N. Dakota, Walsh co., 53 m. S. by W. Pembina. P.<1000.

Ardon, vil., Switzd., Valais, 5 m. WSW. Sion. P.<2000.

Ardon, two vils., Russia, Caucasia, on the A. Riv. (l. bk. trib. Terek), govt. Tiflis, 25 m. NW. by W. Vladikavkaz. P. 3000 and 2000.

Ardore, tn., Italy, Calabria, prov. and 29 m. E. by N. Reggio. P. 5000.

Ardoye, market-tn., Belgium, prov. West Flanders, cap. cant., 16 m. SW. Bruges. P. (with comm.) 6100.

Ardoyne, place, Scot., W. Aberdeenshire, 8 m. WNW. Inverurie, 1 m. NNW. Oyne stn.

Ardoyne, par., Ire., cos. Carlow and Wicklow, bars. Forth and Rathvilly (Carlow) and Shillelagh (Wicklow); 6613 ac. P.<750.

Ardpatrick, par. and vil., Ire., SE. co. Limerick, bar. Coshlea, 22 m. S. by E. Limerick, P.O.; 624 ac. P.<250.

Ardpatrick, hamlet, Scot., Argyllshire, 1 m. from A. Point., PM.O.

Ardpatrick Point, cape, Scot., Argyllshire, on the SW. ct., in 56° 46′ N., the S. end of Knapdale.

Ardquin, par., Ire., E. co. Down, bar. Upper Ards, 9 m. NE. Downpatrick; 3044 ac. P.<500.

Ardrahan, par. and vil., Ire., S. co. Galway, bar. Dunkellin, 10 m. WSW. Loughrea, on the Waterford and Limerick Rly., PMT.O.; 17,946 ac. P.<2000.

Ardree, par., Ire., co. Kildare, bar. Kilkea and Moone, near Athy; 323 ac. P.<250.

Ardres, tn., France, dep. Pas de Calais, 10 m. SE. Calais, arr. St. Omer. Near A. was held, in 1520, the interview of the 'Field of the Cloth of Gold,' between Henry VIII. of England and Francis I. of France. P.<2000.

Ardrishaig, eccles. par. and small seapt., Scot., Argyllshire, on the W. shore of Loch Gilp, at the SE. end of the Crinan Canal. Mean rainfall (20 yrs., 1866–85), 67.2 in.; PMT.O. P.<1500.

Ardristan, par., Ire., co. Carlow, bar. Rathvilly, near Tullow; 1571 ac. P. 250.

Ardross, hamlet, Scot., Ross-shire, 12 m. WNW. Tain, 3 m. from Alness, P.O.

Ardrossan, par., seapt., and watering-place, Scot., N. Ayrshire and Bute, 6 m. WNW. Irvine, on the G. & SW. R.; two wet docks, one of which, Eglinton Dock, includes an inner and outer tidal basin, 18 ft. deep at low, 28 ft. at high water; exports coal and pig iron. Mean rfall. (20 yrs., 1866–85), 38.54 in. Par. 7341 ac., P. 9897; tn. P. 5294. See **Appendix,** p. 13.

Ardrossan, New, eccles. par., adjoining Ardrossan.

Ardrossan, tn., S. Australia, Fergusson co., 53 m. NW. Adelaide, on the W. side of the Gulf of St. Vincent. P.<1500.

Ard Rudha Mor, penin., Scot., Inverness-shire, on the SE. ct. of Barra I.

Ardrumkilla, tnld., Ire., co. Galway, bar. Clare, 4½ m. W. Tuam. P.<250.

Ardsallagh, par., Ire., co. Meath, bar. Lower Navan, near Navan; 1740 ac. P.<250.

Ards Beg, tnld., Ire., NW. co. Donegal, bar. Kilmacrenan, 33 m. WNW. Londonderry. P.<250.

Ardscalpsie Point, cape, Scot., co. and on the W. ct. of the I. of Bute, in 55° 46′ N.

Ardscull Moat, place, Ire., S. co. Kildare, bar. Narragh and Reban East, 3½ m. NE. Athy.

Ardshulhane, riv., Ire., S. co. Kerry, flows into estuary of Kenmare R. at Sneem.

Ardskeagh, par., Ire., co. Cork, bar. Fermoy, near Charleville; 1928 ac. P.<250.

Areas, tn., Brazil, prov. São Paulo, 100 m. W. by N. Rio de Janeiro. P. 5000.

Arecibo, tn., isl. of Porto Rico, N. ct., 41 m. W. San Juan, in 66° 41′ W. P. 11,000.

Arecife, seapt.-tn., Canaries, Lanzarote, on the SE. ct., the best port of the islands. P.<5000.

Areg, or **Erg, El,** a region of sand-dunes, Sahara, to the S. of Algeria.

Aregua, vil., Paraguay, 14 m. E. Asuncion. P.<2000.

Areley Kings, or **Regis,** par., Eng., Worcestershire, Bewdley div., on the r. bk. of the Severn, opposite Stourport, 4 m. SW. by S. Kidderminster. P.<750.

Arena, tn., Italy, Calabria, prov. and 31 m. SW. Catanzaro. P.<3000.

Arena, Point, cape, U.S., California, in 38° 53′ N.

Arenac, co., U.S., Michigan, on the NW. of Saginaw Bay.

Arenas, the N. point of Sebastian Bay, on the E. ct. of Tierra del Fuego, at the entrance to the Strait of Magellan.

Arenas de San Pedro, comm., Spain, prov. Avila, 73 m. W. by S. Madrid, on the S. slope of the Sierra de Gredos. P.<4000.

Arenas, Punta, cape, Chile, in about 21° 40′ S.

Arenas Gordas, Las, the vast sand-dunes on the S. ct. of Spain, in the lowlands between the lower Guadalquivir and Rio Tinto.

Arenberg-Meppen, formerly a portion of the bishopric of Münster, annexed in 1814 to the kingdom of Hanover.

Arendal. See **Arndal.**

Arendsee, tn., Ger., Prussia, prov. Saxony, 52 m. N. by W. Magdeburg, on a small lake very deep and rich in fish. P.<3000.

Arenenberg, or **Arenaberg,** seat, Switzd., cant. Thurgau, on the Lake of Constance, 6 m. W. Constance, at one time the residence of the ex-Queen of Holland, Hortense, and of her son Napoleon III.

Arenig, stn., Wales, Merionethshire, on the G. W. R., 6 m. WNW. Bala.

Arenig Bach, mt., Wales, in the N. of Merionethshire, 17 m. E. by N. Portmadoc. Alt. 2264 ft.

Arenig Mawr, or **Fawr,** mt., Wales, Merionethshire, to the W. of Bala, 16 m. E. Portmadoc. Alt. 2800 ft.

Arenitas, Punta, cape, Costa Rica, on the W. side of the Golfo Dulce, in 8° 32′ N., 83° 17′ W.

Arensburg (Esthonian *Kurre-Saare*), dist. tn., Russia, govt. Livonia, on SE. ct. of Oesel I., 58° 15′ N., 22° 29′ E. Roadstead open to S. winds. P. 3600.

Arenys de Mar, seapt.-tn., Spain, prov. Barcelona, on the ct., 25 m. NE. by E. Barcelona. P.<5000.

Arenzano, vil., Italy, Liguria, on the ct., prov. and 11 m. W. Genoa. P.<4000.

Areopolis, or **Tisimova,** vil., Greece, prov. Laconia, near the E. shore of the Gulf of Messenia, 21 m. N. by W. of Cape Matapan. P.<2000.

Arequipa, a littoral dep. of Peru, extending along the Pacific, between 15° and 17° 20′ S., 70° 40′ and 74° W. Chief ports, Islay and Chala. See **Peru.**

Arequipa, tn., Peru, cap. dep. A., 50 m. NE. Mollendo, situated on the SW. slope of the volcano of Misti, and subject to earthquakes, almost entirely destroyed by one on August 13, 1868. Large deposit of sulphur near the town; carries on a large trade with the port of Islay, on the Pacific, and with the interior of Peru. A line of railroad passes from Mollendo through Arequipa, and on to Puno, and is being continued on to Cuzco. The Arequipa-Puno section is one of the most remarkable railways in the world. It is 218 m. long, and its summit-level is 14,460 ft. above the sea. Seat of a high level observatory (alt. 16,275 ft.). Alt. of tn. 7850 ft. P. 30,000.

Arera, Monte, mt., Italy, in the N., in the Alps, 18 m. NNE. Bergamo. Alt. 8235 ft.

Ares, seapt.-tn., W. ct. of Spain, prov. Corunna, on the bay (ria) of A., 6 m. SSW. Ferrol. P.<4000.

Åreskutan, an isolated mt., Sweden, prov. of Jemtland. Height, 4919 ft.

Aretaka Rapids. See **Essequibo.**

Arévalo, tn., Spain, prov. Avila, 32 m. W. by N. Segovia. P.<4000.

Arezzo (the ancient *Arretium*), city, Italy, Tuscany, cap. prov. A., on a healthy elevated site overlooking the plain of Chiana, to the S. of the upper Arno, 34 m. NW. by N. Perugia; see of a bishop, with cathedral of the thirteenth century, and numerous remains of antiquity. *Arretium*, one of the principal towns of the ancient Etruria, was famous for its terra-cotta vases. Birthplace of Mecænas, Petrarch, Vasari, Guittone (Guido d'A.), the inventor of musical notation, and the physiologist Redi. P. 11,000.

Arezzo, prov., Italy. See **Tuscany.**

Arfak, mts., Dutch New Guinea, W. of the mouth of Geelvink Bay.

Arfon, N. parl. div., Carnarvonshire, Wales. P. (1891) 45,800.

Argentière, L', tn., France, dep. Hautes Alpes, on the Durance, 49 m. SE. by E. Grenoble, arr. and 10 m. SW. by S. Briançon; with silver-lead mines (whence the name). P.<2000.

Argentine, city, U.S., Kansas, Wyandotte co., adjoining Kansas City (*q.v.*). P.<5000.

Argentine Republic, a republic of S. America, occupying the greater part of the continent to the S. of Bolivia and Paraguay, between the Andes and the Uruguay R., N. of the estuary of La Plata, and between the Andes and the Atlantic S. of that estuary. By the treaty of 1881 the crest of the eastern chain of the Andes forms the boundary with that country, except at the Straits of Magellan, both sides of which belong to Chile. The R. Uruguay separates the republic from Uruguay and the Brazilian prov. of Rio Grande do Sul. Besides the terr. on the mainland, the republic also includes the eastern half of the main island of Tierra del Fuego. The following table shows its divs., area, and pop. :—

Provinces.	Area in sq. m.	Pop. in Thousands.		Pop. (Latzina) per sq. m.
		1869.	Latzina[1]	
Buenos Aires, tn. and dist.	83	178	433	9.9
Buenos Aires, prov.	120,140	495	761	
Entre Rios	29,135	134	180	6.2
Corrientes	31,332	129	190	6.0
Santa Fé	50,804	89	220	4.3
Cordoba	67,479	211	310	4.6
San Luis	29,313	53	77	2.6
Santiago del Estero	39,519	133	150	3.8
Jujuy	17,485	40	65	3.7
Salta	49,524	89	155	3.1
Tucuman	9,343	109	170	18.2
Catamarca	34,999	80	92	2.6
Rioja	34,376	49	80	2.3
San Juan	37,648	60	85	2.3
Mendoza	62,091	65	75	1.2
Northern Terrs. (Gobernaciones)—				
Misiones	20,833			
Formosa	44,661			
Chaco	48,198			
Southern Terrs.—			160	0.3
Pampa	55,953			
Rio Negro	81,916			
Neuquen	42,116			
Chubut	95,495			
Santa Cruz	106,916			
Tierra del Fuego	[2]8,127			
Total	1,117,486[2]		3203	2.8

[1] *Geografia de la Republica Argentina*, Buenos Aires, 1888.
[2] According to the calculations of Wagner and Supan, 1,077,000 sq. m.

The **surface** consists for the most part of low plains, sloping SE. or E. from mountains in the W. and NW. Most of the mountains are branches of the Andes, and all of them, like the Andes, trend nearly N. and S. In the NW., the most mountainous area of the whole republic, the Sierra Lumbre, and the Sierras de Aconquija, Ambato, and Ancaste, succeed one another from N. to S. close to but detached from the Andes. To the W. of the more southerly of these ranges lie the Sierra Velasco and Sierra Famatina, the latter closely connected with the Andes. Further to the SE., and separated from all the other mountains mentioned by a wide plain, is the Sierra de Cordoba, about the meridian of 65° W. to the S. of 30° S. The country E. of the Parana is varied by low hills, especially in the densely forest-clad terr. of Misiones in the extreme NE. The plains vary in character. In the N., in the terrs. of Chaco and Formosa, to the N. of the Salado, forming part of the region known as El Gran Chaco ('the great hunting-ground'), the surface is covered, so far as it is known, with open forest, and slopes to the SE. so gently that in times of rain large areas adjoining the rivers are apt to be flooded. Further S. grass-covered prairies extend between the Parana R. and the Cordoba Mts., and within about the same meridians over the region still further S. as far as the Rio Colorado. Further W. the dryness of the climate causes the surface to be almost devoid of vegetation unless where irrigated. In this region vast *Salinas*, or salt-incrusted surfaces, partly converted for short periods by heavy rains into shallow lakes, occur here and there, the largest being

the *Salinas grandes*, in the area between the Cordoba Mts. and the Sierra de Ancaste. In Patagonia, to the S. of the Rio Negro, the surface is for the most part higher than further N. and becomes very varied in character, for the most part arid, stony, and unfit for cultivation, but not without valleys here and there suitable for pasture. In this region, indeed, at the base of the Andes, recent explorers have discovered large well-watered valleys, with a mild climate, likely at some future period to be the seats of a dense population. By far the most important **rivers** are the Parana and Paraguay, which are navigable for steamers everywhere within the terr. of the A. R. The navigation was thrown open to all nations in 1852. The three long r. bk. tribs. of the Parana, the Pilcomayo, Bermejo, and Salado, are all shallow and difficult of navigation. The Rios Dulce (Saladillo), Desaguadero, Nuevo Salado, and other rivers in the interior end in marshy tracts or shallow lagoons. Further S. the more important rivers, the Rios Colorado, Negro, Chubut, Chico, and Santa Cruz flow directly into the Atlantic. The principal **lakes** north of the Rio Negro are shallow lagoons such as the Mar Chiquita (prov. Cordoba) and the Laguna Ibera (prov. Corrientes). Innumerable small lakes are scattered over the pampas. Further S. there are several large and beautiful lakes, Nahuel-Huapi, Fontana, Viedma, and Argentino, at the base of the Andes, and there are two large lakes, Musters and Colhue, adjoining one another further E. in the course of the Senger (trib. of the Chubut). The **rainfall** declines on the whole from N. to S. and from E. to W. The following particulars may serve for illustration, the places being arranged roughly in order from N. (top) to S. (bottom), and from W. (left) to E. (right), the figures giving the average annual rainfall in inches (altitudes in brackets):—

Salta (3950 ft.), 25.
Tucuman (1520 ft.), 38; Santiago del Estero, 28; Corrientes, 52.
Rioja (1770 ft.), 12.
San Juan (2160 ft.), 3 in.; Cordoba (1460 ft.) 28; Parana, 38.
Mendoza (2640 ft.), 8 in.; San Luis (2490 ft.), 22; Rosario, 46.
Buenos Aires, 34.

The exceptional position of Tucuman is noteworthy, and is no doubt due to the fact that it lies in a plain immediately to the E. of a lofty range of mountains, the Sierra de Aconquija. The following figures may serve to illustrate the temperature:—

	Mean Temperature.		
	Jan.	July.	Year.
	Fahr.	Fahr.	Fahr.
Corrientes	79.3°	61.0°	70.6°
Tucuman	77.7	54.0	66.9
Rioja	81.5	56.3	69.3
Mendoza	73.4	46.4	60.6
Buenos Aires	75.6	50.0	63.0
Chubut (Rawson)	70.0	42.4	56.2

The **staple products** of the A. R. are live-stock, above all, horned cattle, sheep, and horses; the principal producing provinces those nearest the estuary of the La Plata—Buenos Aires, Entre Rios, Santa Fé, and Cordoba; the next in importance, Corrientes, Santiago, and the Pampa terr. Arable agriculture is rapidly extending, the chief crops being maize, wheat, lucerne, flax, oats, the vine and sugar-cane. The wine is cultivated principally on irrigated land near the principal towns at the base of the western mountains. Sugar-cane is grown principally in Tucuman, but also to a considerable extent in Santiago, Jujuy, and Salta. The orange, peach, apple, and other fruit-trees now grow wild in many places. (For a table showing the area under different crops in the separate provs. in 1891, see *Petermann's Mitteil.*, 1893, p. 164.) The guanaco, llama, and vicuña abound in the vicinity of the Andes; and the native animals comprise the puma, jaguar, and armadillo; the biscacha, and the small quadrupeds which furnish the nutria and chinchilla skins. The **mineral production** of the A. R. is as yet unimportant. Enormous deposits of good coal are said to exist along the base of the Andes from the prov. of San Luis to the terr. of Neuquen, but they are not yet worked. So far the most important mineral is salt. Even it is not yet largely produced, but arrangements have been made for utilising for salt production large salt lakes between the Rios Negro and Colorado. The **means of communication** have been enormously increased since 1880. The first railways were opened after 1860. In 1880 the total mileage opened was 1536; in 1891 the number of miles open was nearly 7000, and upwards of 4800 m. were then under construction. The railways belong partly to companies, partly to the state. The cheapness of horses favours the use of tramways. One horse tramway with cars for goods as well as passengers runs from Buenos Aires for hundreds of miles across the pampas towards Bahia Blanca. As to the trans-Andine railways, see **Andes, E.** The **foreign commerce** has grown rapidly with the development of internal communications (see **Appendix,** pp. 3–5). The principal articles of export are wool (nearly or quite half the total value), dried and salted ox-hides, sheep-skin, salted and hung beef, tallow, wheat, flax. Among minor exports may be mentioned, fresh mutton, maize, bones. Considerable numbers of live cattle and other animals are exported to Chile across the passes of the Andes. The principal imports are cotton and other manufactures, metal wares, wine and spirits, coal, and olive oil. France and Belgium are the principal countries receiving the exports, nearly all the wool and sheepskins of the A. R. being sent to the mainland of Europe. The United Kingdom, Germany, the United States and Italy, rank next. The United Kingdom ranks first among the countries supplying the imports, and is followed by France, Germany, and the United States. The bulk of the foreign trade is carried on through the port of Buenos Aires, which has been greatly improved. A considerable ocean trade is also carried on at Rosario. **Money, weights, and measures.**—The chief money of account is the dollar or peso, of the value of 47.57*d.*, divided into 100 centavos. Both gold and silver are unlimited legal tender, but only gold is received in unlimited amount by the mint. Since the beginning of 1885 there has been a forced paper currency, the value of which is greatly depreciated, especially since a great financial crisis which took place in 1890. Since Jan. 1, 1887, the use of the French metric system of weights and measures is compulsory. The bulk of the **population** are of Spanish origin, and Spanish is the official and prevailing language. Large numbers of immigrants, principally from Italy, Spain, and southern France, arrive annually, but the financial crisis above mentioned put a check to the growth of their numbers. In each of the three years 1886–88, the number considerably exceeded 100,000, in 1889 the excess of the number of immigrants over that of the emigrants was nearly 250,000, but in 1890 this excess was only 55,400. **Government.**—The constitution, dated 1853, with modifications in 1860, places a president, elected for a term of six years, at the head of the executive, and vests the legislative authority in a National Congress composed of a Senate of thirty members (two for the cap. and two for each prov.) elected for three years, one-third retiring for re-election every year, and a House of Deputies, consisting of one member for every 20,000 inhabitants, the members elected by the people for four years, one-half retiring for re-election every two years. The president is elected by a body of representatives of the provs., equal in number to double the number of the senators and deputies combined. Each prov. has a governor and local legislature, and these local legislatures elect the senators representing the provs. The senators representing the capital are elected by a special electorate. There is a small standing army and a militia, composed of men between seventeen and forty-five. As to **Revenue,** &c., see **Appendix,** pp. 3–5. Primary education in the cap. and the terrs. is under the control of the general government, and in the provs. under that of the local governments. In the cap. and the provs. the elementary schools are supported by special taxation. Secondary education is controlled by the general government. There are two universities (Buenos Aires and Cordoba). The principal towns are Buenos Aires, the seat of the general government, La Plata, cap. of the prov. of Buenos Aires, Cordoba, Rosario, Tucuman, Mendoza, Parana, Salta, Corrientes.

The most comprehensive English work on the A. R. is Mulhall's *Handbook of the R. Plate.* The best map is that of Brackebusch, on the scale of 1 : 1,000,000 (13 sheets), 1891.

Argenton-sur-Creuse, tn., France, dep. Indre, on the Creuse, 57 m. E. Poitiers, 18 m. SSW. Chateauroux. P. 5500.

Arges, dist. and tn. See **Curtea de Arges.**

Arges, riv., Roumania, rises in the Transylvanian Alps, and flows S. and SE. to the Danube, which it joins on the l. bk., opposite Tutrakan, in about 26° 39′ E.

Arghana, tn., Asiatic Turkey, vilayet and 35 m. WNW. Diarbekir, cap. sanjak A.; important copper-mines at **A. Maden,** 10 m. NW., on the Tigris, near its source. P. (Arghana) 6200; (A. Maden) <4000.

Arghandáb, riv., in E. of Afghanistan, flows SW., passing a few miles to the W. of Kandahar, then W. into the Helmand.

Argo, isl., in the Nile, Nubia, between 19° 10′ and 29° 32′ N., 25 m. by 5 m. On it are several villages.

Argoed, stn., Eng., Monmouthshire, on the L. & NW. R., 6½ m. W. Pontypool, PM.O.

Argoed and Ystrad, vil., Wales, Cardiganshire, with rly. stn. (**Ystrad**) on the Taff Vale Rly.

Argolis and Corinthia, prov. (*nomos*) of the kingdom of Greece, Morea, cap. Nauplia, forming a small part of the ancient Argolis, and extending along the N. shore of the gulf of same name. See **Greece.**

Argonia, settlement, U.S., Kansas, Sumner co., 215 m. SW. Kansas City.

Argonnes, two chains of hills in the NE. of France, stretching NNE. from the plateau of Langres and the Monts Faucilles, on opposite sides of the Meuse; the name of **Forêt d'Argonne,** or Argonne simply, is applied in a special sense to the part of the

W. chain N. of the sources of the Aisne, forming a short but continuous ridge, forming an important line of defence intersected only by narrow defiles, one of which, that of Islettes, just S. of Ste. Menehould, is now traversed by the rly. from Paris to Verdun.

Argos, tn., Greece, prov. Argolis and Corinthia, 7 m. NW. Nauplia. P. (1889) 9800.

Argos, tn., U.S., Indiana, Marshall co., 79 m. SE. by E. Chicago. P.<1500.

Argostolion, or **Argostoli,** tn., Greece, on the W. ct. of Cephalonia I. P. 9100.

Argovia. See **Aargau.**

Arguello, Point, cape, U.S., California, in 34° 35′ N.

Arguenon, riv., France, dep. Côtes-du-Nord, passes Jugon, and falls into the English Channel at the port of Guildo, 10 m. W. St. Malo. Length 35 m.

Arguin, bay, Africa, on the W. ct., S. of Cape Blanco, with three isls., the largest called A. I. Upon the mainland opposite is A. town, which has a caravan trade with Timbuktu. A fort built here by the Portuguese in 1448, and a stn. founded by a Brandenburg company about the end of the 17th century.

Argun, riv., Cis-Caucasia, mainly in the Terek dist., rises in govt. Tiflis, and flows NNE., then NE., entering the Terek in about 46° 10′ E.

Argun̆, riv., En. Siberia, forming, by its confluence with the Shilka at Ust-Stryelka, the Amur. Its sources were formerly in the Kentei, or Guntu Mts., near Urga, whence the Kerulen flows to Lake Dalai-nor; but since the last century, this lake, which is rapidly drying up, ceased to send its water into the A., whose headwater is now in the Khailar, which rises on the W. slope of the Great Khingan, flows 170 m. W. and SW., and, suddenly turning NE. at Tsurukhaitui, receives the name of Argun̆. The A. forms the frontier between Russia and China along the whole of its course, 440 miles. It first waters the high prairies of Transbaikalia, then enters the Nerchinsk Mts., flows past Nerchinskiy Zavod, pierces the Gazimur chain, and in its lower course runs through a wild, almost uninhabitable valley.

Argyle, settlement, Canada, Nova Scotia, Yarmouth co., on the W. ct., 128 m. WSW. Halifax.

Argyle, or **Argyll,** a maritime co. of Scotland, on its W. side, greatly indented by arms of the sea between the Firth of Clyde and Inverness-shire. It includes the islands of Mull, Islay, Jura, Tiree, Coll, Iona, &c. Surface mostly rugged and mountainous. The only railway as yet is that which, after ascending the Fillan valley in Perthshire, crosses the Grampians on the frontier, and proceeds to Oban, skirting the N. shores of Loch Awe. The total area of fresh water is estimated at 52,000 ac. Average annual rainfall is upwards of 80 inches. Many cattle are reared here for export to southern markets. See **Appendix,** pp. 10–12. The salmon and herring fisheries are important branches of industry. The rocks are mainly Silurian, with large patches of granite N. and E. of Loch Etive and near Inveraray, and volcanic outpourings S. of Loch Etive and in Mull, and to the N. of Mull. The only minerals are slate, quarried at Ballachulish, on the I. of Luing and elsewhere, and coal mined at Campbeltown. Chief towns, Inveraray, Campbeltown, and Oban. It returns one member to the House of Commons. Area 2,056,402 ac. P. (1891) 75,003. See **Scotland,** table.

Arica, seapt., Chile, prov. Tacna, cap. dep. A., on the ct., in 18° 28′ S., connected by rail with the town of Tacna; built on a flat close to the sea-shore, having a high promontory to the S., which protects the roadstead, there being no harbour; climate unhealthy, on account of stagnant waters and the presence of hills, which impede the circulation of the air; water-supply, however, good. Chief exports are copper, ore, and silver. The port is one of the chief outlets for the products of Bolivia. The dist. is subject to frequent shocks, and was devastated by the great earthquake of 1868. A. was sacked by Sir Francis Drake in 1579, and in 1880 was taken by the Chileans from Peru. Mean temp. (1½ yr., 1854–55), yr. 67.5° F., Jan. 71.6°, Aug. 63.1°. P.<4000.

Ariccia, vil., Italy, prov. Rome, summer resort of German artists. P.<3000.

Arichat, seapt., Canada, Nova Scotia, Cape Breton I., Richmond co., on S. ct., 58 m. SW. Sidney. P.<1500.

Ariège, dep., France, on the frontier of Spain, divided into three arrs., Foix, Pamiers, St.-Girons; cap. Foix; traversed by offshoots of the Pyrenees, which diminish in height, and become more interspersed with fertile valleys towards the N. Montcalme (the culminating peak of the dep.) is 10,100 ft. in height, and peaks of nearly equal importance are numerous in the S. This main portion of the chain abounds in passes (*ports*), the most frequented being that of Puymorenns (alt. 6335 ft.), along which runs the highway from Toulouse *viâ* Foix, following the course of the river A. into the Cerdagne. These highlands offer pasturage to great flocks of sheep, but possess little else in the way of vegetation except half-devastated forests. The plains of the lower-lying districts, however, yield grain of all kinds, and potato-culture is very extensive. The iron-mines of A. yield excellent ores, the iron made from which is reputed to be the best in France for steel-making. The most noted mine is worked at Rancié, near Vicdessos, where enormous masses of the metal exist. In addition to this chief mineral wealth, lead, copper, zinc, and manganese occur in different parts of the dep. Mineral and warm springs are very numerous. The dep. corresponds to the old county of Foix, together with the dists. (*pays*) of Donézan and Cousérans. Area 1893 sq. m. P. (1891) 227,491. See **France,** table.

Ariège, riv., France, rises on the Spanish side of the Pyrenees, and flows N. through dep. A., then NW. through dep. Haute Garonne, and joins the Garonne, r. bk., about 5 m. above Toulouse, regarded as navigable from Cintegabelle, but, in fact, scarcely used even for floating timber. Length 95 m.

Arienas, Loch, lake, Scot., Argyllshire, drained S. by E. into Loch Aline by the river Aline, in the W. of the Morven Penin.

Arienzo, tn., Italy, Campania, prov. Caserta, 16 m. SW. by W. Benevento. At Arpaia, 2½ m. ENE., are the Furculæ Caudinæ, or Caudine Forks, a narrow pass in the mountains, where the Roman army surrendered to the Samnites, and was sent under the yoke, B.C. 321. P.<4000.

Aries, dist., Scot., Wigtonshire, on the W. ct., 7 m. NW. Stranraer.

Ariezo, vil., Sardinia, prov. and 41 m. N. by E. Cagliari, at the foot of Monte Gennargentu, W. side. P.<2000.

Arigna, place, Ire., N. co. Roscommon, bar. Boyle, 6 m. NNW. Leitrim, formerly with iron mines and works, P.O.

Arigna River, Ire., in the extreme N. of co. Roscommon, trib. of river Shannon, which it joins on the r. bk. just below Lough Allen.

Arima, hill station, Japan, 9 m. from Kobe; favourite summer resort. Alt. 1400 ft.

Arima, inland tn., Trinidad, W. Indies, 15 m. E. by S. Port of Spain, with which it is connected by rail. P. 3000.

Arisaig, Scot., Inverness-shire. See **Arasaig.**

Arita, tn., Japan, in the W. of the isl. of Kiushiu, N. of Nagasaki; one of the chief seats of Japanese porcelain manufacture (established 1592). Clay from Hirado and the Goto Is. is now generally used for glazing. P. 6000.

Ariza, vil., Spain, prov. Zaragoza, 31 m. SE. by S. Soria. P.<2000.

Arizona (a name of native, Pima, origin), a terr., U.S., nearly equal in extent to the British Isles, bounded on the S. by Mexico, and mainly bounded on the W. by the Colorado, which traverses the terr. in the NW., composed of terr. acquired from Mexico mainly at the cession of 1848, but partly included in the Gadsden purchase of 1853; admitted as an organised territory in 1863. The surface is mainly composed of high plains or mesas, with sides sloping steeply down to lower plains. More than half the area is upwards of 5000 ft. above sea-level, and there are two systems of summits rising to above 7000 ft. The Grand Cañon, and other cañons of the Colorado (*q.v.*), with the Shiwits (or Sheavwitz), Uinkaret, Kanab, and Kaibab plateaux, are included in the state in the N. The Mogollon and Pinal Mts. occupy the middle. The geological structure is extremely complicated, but Cretaceous and Eocene rocks prevail in the W., Archæan in the NE., and volcanic deposits in the SE. At least six-sevenths of the surface is composed of rock or soil of irreclaimable barrenness, and the remainder demands irrigation. There are, however, rich alluvial bottom lands in the valleys of the Colorado, Gila, Salt R., Rio Verde, and Hassayampa, all in the SW. of the terr., well suited for grain-growing and the cultivation of the vine. The area, with a rainfall above 20 in. annually, is comparatively small, but according to the report cited below, there occurs twice each year a sufficient amount of aqueous precipitation to reclaim every acre of land worthy of being reclaimed. The most abundant rainfall is in July and August [**Fort Apache, Benson, Fort Bowie, Florence, Tucson, Prescott**], but winter rains occur from December to February. In former times irrigation has

been practised on a large scale in the valley of the Santa Cruz, near Tucson, by people of whom nothing is known beyond the ruins of their aqueducts, by the Aztecs in the Colorado valley, and by the Indians who were found in possession of the region by the Spaniards, and whose descendants have continued the practice down to the present day. The total area already irrigated at the date of the report referred to was less than 600,000 acres, chiefly in Maricopa co. The terr. is remarkably rich in minerals, above all silver, gold, and copper. The principal silver-mining dists. are round Tombstone, Cochise co., in the SE., and Pioneer dist., to the W. and SW. of Globe, in Gila and Pinal cos., and in the Bradshaw dist., SSE. of Prescott. The most remarkable deposit of copper, pure or nearly pure, occurs at Clifton, Graham co.; and other copper mines are worked in Cochise co. and elsewhere. Coal occurs in the NE. See **United States,** table; and also *Report of the Chief Signal Officer of the Army in response to the House [of Representatives] Resolution . . . relating to Irrigation and Water Storage in the Arid Regions,* Washington, 1891. Area 113,916 sq. m. P. (1890) 59,620.

Arkaig, Loch, lake, Scot., in the SW. of Inverness-shire, 12 m. long, drained E. into Loch Lochy by the Arkaig. Alt. 140 ft.

Arkansas, riv., U.S., rises in the Rocky Mts., near 39° N., 106° W., in the state of Colorado, to the W. of the S. Park, flowing generally ESE.; it waters the central parts of Kansas and Arkansas states, and joins the Mississippi in 33° 40′ N. after a course, including windings, of more than 2000 m., unobstructed by rapids, and navigable when exceptionally high to Fort Gibson in the Indian Terr., 462 m., at other times across the state of A. In the dry season it is only 1 or 2 ft. deep in places hundreds of miles below the Rocky Mts. Its water is in places so salt as to be unfit for drink. Its valley is generally fertile, and it is estimated to drain 178,000 sq. m. of country. Chief trib. the Canadian R., flowing through the Indian terr. from New Mexico. Little Rock and A. towns are on its banks.

Arkansas (official pronunciation, ar-kan-sâ′), one of the United States of N. America, somewhat larger than England, between 33° and 36° 30′ N., 89° 30′ and 94° 30′ W., bounded on the E. by the Mississippi R. Length 240 m., breadth 228 m. Surface swampy and extensively wooded in the E., where lies one of the most important cotton-growing regions of America; undulating and drier in the centre; hilly in the W.; and in the SW., which is renowned for its apples, mountainous (alt. 2850 ft.). Chief rivers, the Mississippi, on which the state has a shore line of about 400 m.; the Arkansas, Washita, St. Francis, Black, Red, and White rivers, and the Saline, all navigable in part. The length of navigable river highways in the state is upwards of 3000 m. Climate mild [**Little Rock, Fort Smith**]; healthy in the higher parts, but unhealthy in the low grounds in the E. The forest trees include yellow pine (the pine lands covering more than one-fourth of the area of the state), oaks, yellow poplar, walnut, &c. Carboniferous rocks, comprising productive coalfields, which yield both anthracite and bituminous coal, and are being rapidly developed, cover the greater part of the NW. of the state. The SW. is mainly composed of cretaceous and eocene rocks, and in the E. all the rocks are overlaid by aqueous deposits of pleistocene age. Besides coal, the chief minerals are manganese ore, lignite (in the S.), granite, and whetstone rock. Iron ores are widely distributed—in the NE. of the state, in the Washita Mts., and in the S.; but it is only in the NE., where limonites containing 23–58 per cent. of iron occur, that the conditions are favourable for an iron industry. Chief towns, Little Rock, the cap., Fort Smith, Pine Bluff, Hot Springs (*q.v.*), and Helena. A. takes its name from a tribe of Indians once settled on the Mississippi near the mouth of the A. River. It was first visited by Spaniards under Hernando de Soto in 1541, afterwards by Marquette in 1673; first settled by Frenchmen in 1686; held by Spain as part of Louisiana from 1763 to 1800, when it was restored to France, and acquired by the U.S. with the rest of Louisiana in 1803. Area 52,203 sq. m. P. 1,128,179. See **United States,** table.

Armagh, or **St. Cajetan,** vil., Canada, Quebec, co. Bellechasse, 24 m. from St. Valier. P.<1500.

Armagh, an inland co., Ireland, Ulster, bounded on the N. by Lough Neagh, on the NW. by the Blackwater, divided into the following baronies:—

Baronies.	Acres.	P. 1891.
Armagh	47,864	23,683
Fews, Lower	29,757	8,394
Fews, Upper	47,434	14,165
Oneilland, East	21,422	24,853
Oneilland, West	57,512	29,392
Orior, Lower	32,151	10,453
Orior, Upper	49,500	25,703
Tiranny	27,393	6,646
Total of county	313,035[1]	143,289

[1] Exclusive of 15,050 ac. under the larger rivers and lakes.

Surface hilly and even mountainous in the S., where Slieve-Gullion rises to 1893 ft. in height; elsewhere flat and undulating. Chief rivers, the Blackwater, Bann, Callan, and Newry Water. Soil fertile, apart from 27,460 ac. of bog and other waste land. For agricultural products, see **Appendix,** pp. 10–12. Geologically, the surface is mainly composed of Silurian and Carboniferous rocks, but the volcanic rocks of Antrim stretch across the Bann in the NE.; granite stretches from co. Down into the SE., and there are Pliocene deposits in the NW. A. is traversed by several lines of the G. N. R., skirted in the E. by the Newry Canal, and in the NW. partly by the Ulster Canal. Weaving is often combined with agriculture, linen being the staple manufacture. A. is mostly in the NE. circuit, mostly in the archdiocese of A., and for parliamentary purposes is divided into a N., Mid, and S. div., each returning one member. Chief towns, Armagh city, Lurgan, Portadown, and a part of Newry.

Armagh, bar., Ire., in the NW. of co. A.

Armagh (*Ard Magha,* 'Magha's height'), munic. bor. and par., Ire., cap. of A. co., and the archiepiscopal seat of the primate of 'all Ireland,' on the slope of a hill crowned by the Protestant cathedral, 34 m. SW. Belfast, on the G. N. R., 4 m. from the Ulster Canal. A. has also an observatory and a Roman Catholic cathedral. A. had great repute as a seat of learning from the sixth to the ninth century, and was much frequented by students from England. In 1765 there were only three stone houses in the city; since then it has been entirely rebuilt. Alt. 206 ft. Mean temp. (20 yrs. 1861–80), yr. 49° F., Jan. 39.7°, July 60.5°. Par. 3763 ac., P. 9490; tn. P. 7438.

Armagon, or **Armeghon,** shoal and lighthouse, Brit. India, Madras, on an island off the E. ct., 40 m. S. by E. Nellore.

Armançon, riv., France, rises in the dep. Côte d'Or, passes Sémur, Ancy-le-Franc, and St. Florentin, and falls into the Yonne, 5 m. above Jorgny; length, 67 m. Affluents Brenne and Armance.

Armand, or **St. Honoré,** vil., Canada, Quebec, Temiscouata co., 26 m. from Rivière du Loup. P.<1500.

Armathwaite, vil., Eng., Cumberland, Penrith div., 8½ m. SE. Carlisle, on the M. R., PM.O.

Armavir, old cap. of Armenia, on SE. slope of Mount Ahaghöz.

Armavir, vil., Russia, Cis-Caucasia, Kuban terr., 40 m. W. Stavropol, on Caucasian Rly. P. 6400.

Armeghon, India. See **Armagon.**

Armenia (the *Minni* of the Scriptures), a country of western Asia, extending from Caucasia on the N. to the mountains of Kurdistan on the S., and to near the Caspian on the E., being between about 38° and 42° N. and 38° and 48° E., now forming the Turkish vilayet of Erzerum, with the greater part of that of Diarbekir (Kara Amid), the Russian govt. of Erivan, with the dist. of Kars and part of the govt. of Tiflis, and part of the Persian prov. of Azerbaijan. The greater part of the surface constitutes a tableland, or congeries of tablelands, with an average elevation of about 5000 to 5250 ft. in height, containing the headwaters of the Kur and its trib. the Aras, the two chief headstreams of the Euphrates, and those of the Tigris, the first four streams all rising in the W. of A. in a small area, with a radius of about 55 m. Two of the tablelands are so completely isolated as to contain salt lakes, Van and Urmia, and a third, occupied by Lake Gokcha, or Sevanga, has only a narrow outlet, by which the surplus waters of that lake escape to the Aras. The climate in the higher regions is very cold, and the valleys in summer are scorched with heat. Soil various; has many fertile cornlands and pastures, and its valleys produce excellent cotton, maize, tobacco, grapes, and other fruits. Manufacturing industries unimportant. The Armenians proper, who form only a fraction of the whole population, which is very mixed, are a people of Caucasic type, speaking a language of the Aryan family, and adherents of a peculiar rite of Christianity which was introduced among them in the early part of the fourth century. From an early date large numbers of them have emigrated into adjoining countries in Asia and Europe, always retaining their language and religion, and generally acquiring a large share of the commercial and banking business of the countries in which they settle. According to native tradition, Armenian kings ruled in A. at a very remote period, but the first dynasty known to history is that which reigned from the early part of the sixth century B.C. to B.C. 328, when it was overthrown by one of the generals of Alexander the Great. Other Armenian dynasties subsequently ruled at various times, but the country was invaded and subjugated, in whole or in part, by Romans, Persians, Arabs, and Turks in turn. It was entirely subjected by the Turks about the middle of the sixteenth century. At the beginning of the present century Armenia was shared by Turkey, Persia, and Georgia, the last of which had already recognised the suzerainty of Russia in 1783, and was annexed by that power in 1802. Russia thus acquired some of the Armenian terr. between the upper Aras and upper Kur, and all the remainder of A. north of the Aras was acquired from Persia in 1827. Parts of the pashalic of Akhaltsykh were acquired by the same power from Turkey between 1829 and 1833, and the dist. of Kars from Turkey in 1877. *Armenia Minor* is the ancient name of the country forming the modern Turkish pashalics Kaisariyeh, Sivas, and Marash, included in Asia Minor, but which were respectively termed First, Second, and Third Armenia, Fourth Armenia having been the modern pashalic of Diarbekir in Mesopotamia.

Arrow, lake, Canada, Brit. Columbia, an expansion of the Columbia R., about 95 m. in length. A narrowing in the middle divides it into two portions, called Upper and Lower Arrow Lake.

Arrow, lake, Canada, Ontario, on the borders of Minnesota (U.S.), crossed by 90° W.

Arrow, riv., Canada, Ontario, flows E. by S. into Pigeon R., on the frontier of Minnesota, U.S.

Arrow, riv., Eng., rises in Radnor, Wales, and flows NE. past Kington, then E. into the Lugg below Leominster. Length 30 m.

Arrowsmith, isl., Pacific Ocean, one of the Mulgrave group, to the E. of the Caroline Is.

Arrowsmith, or **Irwin,** riv., W. Australia, enters the Indian Ocean in 29° S.

Arrowtown, bor., New Zealand, South I., Lake co., 106 m. N. by E. Invercargill. P. <1500.

Arroyo, tn., I. of Porto Rico, S. ct., 36 m. S. by E. San Juan, in 65° 59′ W.

Arroyo del Puerco, tn., Spain, prov. Cáceres, 25 m. SE. Alcantara. P. 6000.

Arroyomolinos de Leon, vil., Spain, prov. Huelva, 48 m. NW. by N. Seville. P. <2000.

Arroyos y Esteros, vil., Paraguay, 30 m. NE. by E. Asuncion. P. <2000.

Arru, Aru, or **Aroo,** a group of isls. in the Eastern Archipelago, between 5° and 7° S., 134° and 136° E. The largest (Tanah Bessar) is divided into several parts by narrow straits. To the E. of the group is an extensive coral reef, and the islands themselves are entirely coralline in structure. The inhabitants, who can be distinguished from Papuans only by the absence of woolly hair, are a kind of fetish-worshippers, but there are a number of Christians and Mohammedans. Sago is the principal food. Principal trade-products, pearl, mother-of-pearl, tortoise-shell, birds of paradise, and trepang, which are exchanged for arrack, brandy, calicoes, hardwares, axes, knives, arms, and gunpowder. The sea between these islands and New Guinea is shallow, and the similarity of the fauna shows that they were once connected with the larger island. See *Scot. Geog. Mag.*, 1889, p. 207. Area, 3000 sq. m. P. 25,000.

Ars, tn., Ger., govt. of Alsace-Lorraine, on the l. bk. of the Moselle R., 5 m. SW. Metz. P. <3000.

Arsa, a small group of isls., En. Arch., in the Strait of Malacca, between the E. ct. of Sumatra and the Malay Penin.

Arsachena, gulf, Sardinia, in the NE., in 41° 8′ N.

Ars-en-Ré, tn., France, dep. Charente-Inférieure, on the W. ct. of Ile de Ré, 17 m. W. La Rochelle; with a system of dykes to protect the town, which is below the high-water line, from the encroachments of the sea. P. <2000.

Arsiero, vil., Italy, Venetia, prov. and 20 m. NNW. Vicenza. P. (with comm.) <4000.

Arsoli, vil., Italy, prov. Rome, 12 m. ENE. Tivoli. P. (with comm.) <2000.

Arsuf, tn., Palestine, the site of the ancient *Apollonia*, near the ct., about 10 m. NNE. Yáfa.

Arsus, tn., Asiatic Turkey, on the Gulf of Iskanderun, 21 m. NW. Antioch.

Art, vil., Switzd. See **Arth.**

Arta, tn., Greece, prov. Arta, on R. Arta, 59 m. NNW. Mesolonghi, the scene of the victory of the Turks over the Greeks, July 16, 1822. The naval battle of Actium was fought near the entrance to this gulf, B.C. 29. See **Artinos.** P. (1889) 7048.

Arta, Gulf of, a gulf of the Ionian Sea (Mediterranean), forming part of the N. frontier of the kgd. of Greece.

Arta, comm. and vil., Italy, Venetia, prov. Udine, dist. Tolmezzo. P. <3000.

Arta, tn., I. of Majorca, 40 m. E. by N. Palma. P. 5900.

Artafallie, place, Scot., Black Isle, Ross-shire, 6½ m. E. Muir of Ord, P.O.

Artaine, or **Artane,** par. and hamlet, Ire., co. and 4 m. NE. Dublin, bar. Coolock; 952 ac. P. <1500.

Artaki (*Greek*), *Turkish*, **Erdek,** ct. tn., Asia Minor, on the SW. ct. of the Kapu Dagh penin., and on the N. side of the Gulf of Artaki, 68 m. W. by N. Brussa.

Artashen, tn., Asia Minor, on the N. ct., 38 m. SW. Batum.

Artcljo, comm., Spain, prov. and dist. Corunna. P. 7800.

Artemesia, Canada, Ontario. See **Flesherton.**

Artemisa, place, Cuba, 35 m. SW. Havana.

Artern, tn., Ger., Prussia, prov. Saxony, at the head of navigation on the canalised Unstrut, 29 m. NNE. Erfurt; with royal salt refineries, &c. P. <5000.

Artesian City, vil., U.S., S. Dakota, Sanborn co., 83 m. NNW. Yankton. P. <1500.

Artfield Fell, hill, Scot., Wigtonshire, in the N., 11 m. W. Newton Stewart. Alt. 888 ft.

Arth, vil., Switzd., cant. Schwyz, at the S. end of L. Zug, 7 m. S. Zug, starting-point of one of the railways up the Rigi. P. <4000.

Arthabaska, co., Canada, Quebec, crossed in the middle by 46° N. and 72° W.

Arthabaska, vil., Canada, Quebec, A. co., 62 m. SW. by S. Quebec. P. <1500.

Arthington, par., Eng., Yorkshire, W. Riding, Otley div., 7 m. S. by W. Harrogate, on the NE. R., P.O. P. <500.

Ascension, bay, in the middle of E. ct. of Yucatan penin.

Ascension, isl., in the Atlantic, belonging to Great Britain, 800 m. NW. St. Helena. Lat. of the fort, 7° 55′ 55″ S., long. 14° 25′ 5″ W. It is of volcanic origin. Mountainous in the SE., where one peak is 2820 ft. high. Surface nearly destitute of verdure. Climate healthy, but so dry that until wells were sunk water was very scarce. Mean temp. (2 yrs. 1863–5), yr. 77.2° F. Green turtles, 600–800 lbs. in weight, are caught in great numbers from Christmas to midsummer, when they come to the island to lay their eggs. On its NW. side is an open roadstead, opposite George Town, a station (the only one in the island) consisting of a fort, military quarters, and a few detached residences. The island is named from having been discovered on Ascension Day in 1501. It was taken possession of by the English in 1815, and is used as a victualling station for the African squadron. Area, 38 sq. m. P. about 200.

Ascension, isl., Pacific Ocean. See **Ponape.**

Ascension, par., U.S., Louisiana, in the SE., N. of 30° N., crossed in the W. by 91° W., bounded on the E. by Lake Maurepas.

Ascension, W. Indies. See **Grenada.**

Asch, manufacturing tn., Austria, Bohemia, 13 m. NW. by N. Eger. P. 15,600.

Aschaffenburg, tn., Ger., kgd. Bavaria, govt. Lower Franconia, on the r. bk. of the Main, 22 m. ESE. Frankfurt, cap. of dist. A., with a castle, once the summer residence of the prince-bishops of Mainz. Alt. 450 ft.; mean temp., yr. 47.7° F., Jan. 30.2°, July 65.1°. P. 13,400.

Ashworth, par., Eng., Lancashire, Heywood div., 3 m. W. Rochdale. P.<250.

Asia, the largest of the continents, is about five times as large as Europe, the smallest. Its **coast-line** is the most varied in outline except that of Europe, but it has comparatively few good natural harbours in the latitudes most frequented by shipping. Most of the small bays affording a good shelter are on the E. coast, a few in Annam, more in China, and on the W. side of the Sea of Japan, on the E. or S. side of the islands of Japan, and on some of the islands of the Eastern or Malay Archipelago. **Surface.**—The highland regions lie chiefly in the middle and towards the E., and in the southern penins. The extreme N. is one vast low plain, and this increases in extent from E. to W., spreading southwards in the W. through nearly 40° of lat. as far as the mountains in the N. of Persia and Afghanistan. The whole of Central Asia is a series of plateaux varying from 2000 to 20,000 ft. in height, enclosed and partly cut off from one another by mountains, the chief of which take their origin in an elevated and complicated region to the N. and NW. of India. From this centre the Himalayas proceed south-eastwards, the Karakorum Mts. for a shorter distance in the same direction; the Kuenlun Mts. proceed E. and slightly S.; the Tian-shan Mts. more towards the NE. The Himálayas (highest Mount Everest, 29,000 ft.) are the highest mountains in the world, having more than a score of peaks higher than the highest of the Andes. The **principal rivers** are the Yang-tse-kiang, Hwang-ho, Amur, Mekong, Iráwadi, Ganges, Indus, all flowing from the highland region in the middle E., SE., or S., into the Pacific and Indian oceans, the Ob, Yenisei, and Lena flowing N. into the Arctic Ocean, and the Tigris and Euphrates, which enter the Persian Gulf as one stream. In the interior, both on the high plains from which the encircling mountains cut off the supplies of rain, and in the plains of the W., between the Caspian Sea and the mountains, there are numerous rivers, which after a longer or shorter course dry up in sandy deserts, their water being partly absorbed by the porous soil, partly evaporated. Such rivers are, however, of the highest importance, since on their banks are found fertile oases, sometimes with large towns for their centre. The fresh-water **lakes** are comparatively few and small. The largest is Lake Baikal, which is less than half the area of the largest lakes of Africa and N. America, not quite twice the size of Lake Ladoga. On the other hand, there are large inland seas of salt or brackish water, besides an immense number of small salt lakes in the low-lying region adjoining Europe, S. of the Ural Mts., and other salt lakes elsewhere. The Caspian Sea is the largest sheet of inland water in the world. Next in size are the Sea of Aral and Lake Balkhash. Elsewhere among the salt lakes are Tengri Nur and Koko (or Kuku) Nor in Tibet, Urmia and Van on the Armenian tableland. From its more easterly position, A. has a **climate** subject to greater extremes of temperature than Europe. The mean temperature of the year is everywhere lower than in corresponding latitudes in the western continent, the mean temperature of January, the coldest month, relatively still lower, but the mean temperature of July, the hottest, everywhere higher, notwithstanding that on and near the E. coast the sea has a certain effect in moderating extremes. Owing to the great width from E. to W. of the land-mass to which it belongs, the coldest area in the world lies towards the NE. of this continent, and it is a fortunate thing for that part of A. which lies to the S. that the mountains intervene to shelter it from the cold winds that would otherwise sweep down on it from this area. The following particulars may serve for illustration.

Mean temperature, places in about 52°–54° N. :—

	Barrow-in-Furness.	Hamburg.	Barnaul (459 ft.).	Irkutsk (1536 ft.).	Nikolaevsk.
	Fahr.	Fahr.	Fahr.	Fahr.	Fahr.
Jan. . .	39.4°	33.1°	—0.9	—6.8°	—9.2°
July . .	59.6	63.4	68.6	65.9	63.6
Year . .	48.9	47.1	33.7	30.3	28.2

Places in about 40° N. :—

	Naples.	Samarkand (2379 ft.).	Peking.	Aomori.
	Fahr.	Fahr.	Fahr.	Fahr.
Jan. . .	47.7°	30.8°	23.4°	27.6°
July . .	76.5	81.9	79.3	69.4
Year . .	61.1	57.4	53.3	47.8

The **rainfall** is insufficient, not only in many parts of the interior, but also in the SW. (as far E. as the Indus valley), where the southerly winds of summer blow not over the ocean but over Africa, or both Africa and Arabia. On the other hand, in the monsoon region in the SE., where the winds blow in summer from the ocean, and especially in the tropical portion of it, the summer rains are very abundant. The region just referred to, including the whole area from India to the N. of China, together with the islands of the Eastern Archipelago and Japan, is that which contains the great mass of the Asiatic population. It comprises, according to the best estimates, seven-eighths of the inhabitants, although not much more than a quarter of the area. In the rest of A., the average density of the population is only about eight to the square mile, or about half that of Norway; the principal parts in which a greater density is found are the western skirts of the central tablelands and some districts in A. Minor. With regard to its **fauna,** A. is referred by Wallace to two great regions, the Palæarctic, embracing the whole of the continent N. and W. of India, and N. of an irregular line drawn through the S. of China, and the Oriental Region, embracing India, the Eastern Peninsula, the S. and SE. of China, and all the islands as far as a line drawn through the deep channel between Bali and Lombok, and through the straits and seas separating Celebes from Borneo and the Philippine Is., this line, known as 'Wallace's Line,' marking the boundary between the Oriental and Australian zoogeographical regions. In the Palæarctic Region the animals are the same as or similar to those of Europe, those S. of the Black Sea, the Caspian, the Elburz Mts., and the Hindu-Kush corresponding to those of the Mediterranean sub-region. In the Oriental Region the characteristic animals include the orang-utan or mias, the tiger, sun-bear, and honey-bear, the tapir, chevrotain, Indian elephant, the semnopithecus, nycticebus, and several peculiar prosimians, flying squirrels, &c. The great divisions of the **flora** correspond roughly with those of the fauna. Most of the **inhabitants** of A. belong to two types, the Mongolian and Caucasian—the former characterised among other things by yellow complexions without ruddy tinge, small almond-shaped obliquely set eyes, and high cheek-bones; the latter by a fair complexion usually with a ruddy tinge, low cheek bones, and round eyes set straight. Of the Mongolian type (most abundant in the E.) the Chinese are the most numerous representatives, as the Hindus are of the Caucasian. Each type is broken up into great groups, the languages of which are entirely distinct from each other, while the groups are themselves sub-divided into smaller groups, speaking allied languages. Among the races of the Mongolian type, the most important of the great groups are the Chinese and Anamese, the Finno-Tatars, inhabiting Siberia and Western A., and the Malays in the SE. Of those of the Caucasian type, the chief great linguistic groups are the Aryan (comprising Hindus and Iranians), and the Semitic (of which the Arabs are now the principal representatives). To this type belong also the majority of the inhabitants of the Caucasus (whence the name Caucasian). As regards religion, A. is remarkable as the cradle of all the great religions of the world—Judaism, Christianity, and Mohammedanism; Zoroastrianism, Brahmanism, Buddhism; and three of these (the first three) arose among Semitic peoples, the others among Aryans. Brahmanism or Hinduism, Buddhism, and Mohammedanism are now the prevailing religions, the first in India, to which it is confined, the second throughout the monsoon area except in India, the land of its birth, and the third in Western A., and partly in India and the Eastern Archipelago. See **Appendix,** p. 1, the articles on the different countries of A., and the article on **Continents.**

Asiago, tn., Italy, Venetia, prov. and 23 m. N. Vicenza, cap. of the Sette Comuni. P.<6000.

Asia Minor, Anatolia, or **Anadoli,** an oblong penin. which forms the W. of Asia, extending between 36° and 42° N. to 26° and 41° E., having E. Transcaucasia, the Armenian vilayet of Erzerum, Kurdistan, and the Syrian vilayet of Haleb or Aleppo, S. the Mediterranean, W. the Ægean Sea, and N. the Sea of Marmora and Black Sea. Greatest length about 750 m., greatest width 410 m. The penin. consists mostly of a tableland, the greater part of which is upwards of 3000 ft. in height, but the tableland is partly bordered, partly traversed by mountain-ranges, and here and there studded with isolated cones (extinct volcanoes). The highest chains meet in the S., where the Taurus range (mean height, 9800 ft.) has only one passage, the narrow gorge of the Cilician Gates, leading through it from the tableland to the plain of Adana. To the N. of this range the extinct volcano of Erjias Dagh (ancient *Argæus*) rises to the height of 13,000 ft. In the NW. of the penin., to the SE. of Brussa, the Keshish Dagh (ancient *Olympus*) attains the height of 8300 ft. The surface is for the most part arid, and in great part desert. Even the largest rivers, the Kizil-Irmak, and Sakaria flowing into the Black Sea, the Gediz-chai and the Menderes into the Ægean Sea, and the Seihun and Jihun into the E. of the Mediterranean, are too shallow for navigation

except for short distances. The principal valleys are those traversed by the last four of these rivers, and by the Küchük (little) Menderes, whose valley lies between those of the Menderes and Gediz-chai. The broad and fertile valley watered by the Seihun and Jihun is called the plain of Adana. The tableland contains several areas of inland drainage, the rivers ending in large salt lakes. Lake Tuz-göl, the largest, is 50 m. by 15 m., and 2525 ft. above the sea. Its water contains 32 per cent. of saline matter. There are also several large freshwater lakes—Beishehr, Egerdir, and Soghla in the S.; Maniyas, Abullonia, and Isnik in the NW. The coasts are bold and present many fine inlets. These are the Gulfs of Adalia and Makri, on the S.; those of Symi, Kos, Scala-Nova, Smyrna, and Adramyti on the W., and Ismid and the Injir Liman on the N. coast (Sea of Marmora). The minerals comprise copper [**Arghana**], silver [**Gümüshkhane, Denek, Akdagh-maden**], lead [**Bereketlimaden**], and iron ores, alum, nitre, and rock-salt; but mining is carried on only to a small extent. The climate of A. M. has been celebrated for excellence in all ages [**Smyrna, Scutari, Brussa, Samsun, Trebizond, Brussa**]. The mountains are covered with forests of oaks, beeches, planes, and ash. The flora is very beautiful, and evergreens, myrtle, bay, laurel, and holly abound. Sheep, goats, and horses are of excellent breeds. Manufactures leather, carpets, cotton and woollen stuffs. Exports raisins and figs, produced principally in the western valleys, cotton, a rapidly increasing product of the Adana valley as well as the western valleys, valonia (a forest product), opium (a product of the tableland), excellent barley, liquorice, wool and mohair (hair of the Angora goat), carpets, sponges, chrome ore, and meerschaum clay. Smyrna, Trebizond, and Brussa are the principal seats of commerce. Railways lead from Smyrna up all the three principal western valleys, the northernmost at present terminating at Alashehr; one in the NW. from Scutari to Ismid, and thence to the valley of the Sakaria and up that valley and that of one of its tribs. past Angora, this railway being intended ultimately to lead to Bagdad; and one in the SE. from the port of Mersina to the town of Adana. Another was constructed in the NW. from Mudania on the Injir Liman to beyond Brussa, but was rendered unfit for use by the weather before it was opened. This railway is now (1893) being restored. The name *Anatolia* (from the Greek, meaning 'land of the rising sun') was given to the country under the Byzantine emperors, and is retained under the form of Anadoli by the modern Turks. Ruins scattered over almost every portion of its surface attest its former wealth and prosperity. The present population consists mainly of Ottoman Turks; the other people are Greeks, Armenians, Jews, Kurds, wandering Arabs, and a few Zingari or gypsies. The *Asia* of the N. T. refers to a Roman prov. which embraced the W. part of the penin. of A. M., and of which Ephesus was the capital. Area about 159,000 sq. m. P. about 8,500,000. See **Turkish Empire.**

Asientos de Ibarra, mining-tn., Mexico, Aguas Calientes, 14 m. SSE. Zacatecas.

Assahan, vil., Straits Settlements, 28 m. NE. by E. Malacca.

Assahan, riv., Sumatra, formed by several streams (one being the outlet of Lake Toba), which unite at a great waterfall, flows E. into the Strait of Malacca, in about 3° N.

Assahan, inland vil., on A. River, Sumatra.

Assal, salt lake, E. Africa. See **Asal.**

Assala, a large village in the S. of Arabia, 21 m. NE. Aden.

Assam, chief commissionership, in the extreme NE. of India. The prov. consists of three parts; in the N., that part of the valley of the Brahmaputra which runs from E. to W. to the S. of the Himálayas, the hill-region to the S. of that valley, and the part of the valley of the Surmá which lies to the S. of that again. Its subdivisions are given in the following table:—

Districts.	Area in sq. m.	Population (in Thousands). 1881.	1891.	Per sq. m. 1891.	Increase per Cent.
Cachar Plains	2,472	294	368	149	25
Sylhet	5,414	1,969	2,155	398	9·4
Surmá Valley	7,886	2,263	2,522	319	11
Goálpára	3,954	446	452	114	1·4
Kámrúp	3,660	645	634	173	1·7
Darrang	3,418	273	308	90	12
Nowgong	3,258	311	344	106	10·8
Sibságar	2,855	370	457	160	23
Lakhimpur	3,724	180	254	68	41
Brahmaputra Valley	20,869	2,225	2,450	117	10
North Cachar	1,728	20	19	10	5·8
Gáro Hills	3,270	110	122	37	11
Khásiand Jaintiá Hills	6,041	169	198	33	17
Nágá Hills	5,710	94	123	21	30
North Lushai	3,500	...	44[1]	12	...
Hill Districts	20,249	393	505	25	28
Total	49,004	4,881	5,477	112	12·2

[1] Mainly estimated.

For religions, see **India,** table. The whole prov. is less densely peopled than any other part of India situated immediately to the S. of the Himálayas. The most sparsely peopled part of all is the hill country in the middle. The Brahmaputra valley, in Assam, notwithstanding the fact that it communicates freely at its mouth with the valley of the Ganges, has had in a great measure a separate history from the rest of India. This is to be ascribed to its narrowness and the peculiarities of its situation in other respects. The valley is upwards of 400 m. long, but only from 25 to 100 m. wide, the higher width being attained only at the mouth. Of this width the Brahmaputra alone, with the area of dense grassy jungle incapable of cultivation on its banks, occupies a space from 6 to 20 m. wide, and the inhabitants of the fertile plains were thus restricted to narrow limits, exposed to incursions from hill tribes on both sides, as well as to invaders across the passes on the E. and SE. These seem to have been the chief causes that kept down the destiny of population in former times. The Ahams, the inhabitants who gave name to this valley, a name afterwards extended to the whole prov., entered it from the E., apparently in the thirteenth century, but they had to maintain an almost constant struggle against Mohammedans in the W., who were ever trying to annex the prov. to Bengal. These attempts were unsuccessful, and it was from the kingdom of Burma that the valley was ultimately acquired by the British in 1826. The Goálpárá dist. had previously become British with Bengal in 1765. The hill, or rather mountain, tract to the S. of the Brahmaputra valley is made up of a number of ridges and plateaux separated by deep valleys. The plains to the S. form the most thickly-peopled part of the whole prov. That of **Sylhet,** in the W., is similar in character to the neighbouring plains of Bengal—a region of countless rivers flowing along ridges, with gently curving hollows (locally called *hâors*) between them. The **Cachar** valley is narrower, and has numerous long minor valleys opening into it from the Lushái hills on the S., that is, from the region in which a succession of mountain chains, trending N. and S., separate Bengal from Burma. The hill tracts and southern valleys were brought under British rule at different dates, mostly after the annexation of the Brahmaputra valley. Under British rule the whole prov has been rapidly increasing in population, largely in consequence of the rapid spread of tea-cultivation, first tried in northern Assam in 1835. The tea-plant had already, in 1823, been discovered growing wild in the prov. The labourers on the European tea plantations are mostly coolies, introduced from the crowded dists. of western Bengal, and working under contracts for a term of years. The introduction of these coolies is under the close supervision of the Government to prevent abuses. The ordinary crops of the natives are similar to those of Bengal. Dense forests of tropical evergreens cover nearly all the mountainous and hilly tracts of the prov., but the forest products are as yet comparatively small in amount, the working of the forests being nearly confined to the dists. of Kámrúp and Goálpárá, at the mouth of the Brahmaputra valley. The principal forest product is rubber, obtained from the *Ficus elastica.* The chief hard-wood tree is the sál (*Shorea robusta*), but others, including the sisu, or sissoo, abound. The lacquer tree of Japan is said to be found growing freely. Among minerals, the most important is coal, which is of exceptional quality, forming a good steam-coal. It is at present worked only in the Mákúm coal-field, which is connected by a short railway with the river-port of Dibrugarh, but the coal is said to extend along the foot of the Nágá Hills for over 100 m. Petroleum is also found in abundance, and is now worked. Iron ore is plentiful, and is worked to some extent by native methods. Immense beds of limestone exist on the S. side of the hills, and have been a source of supply for Bengal from time immemorial. There are only a few short railways in Assam unconnected with the general railway system of India, but a line is now being constructed from the Dibrugarh to the port of Chittagong in Bengal, and from this line it is intended to have a branch to Chandpur on the Meghná. The towns of Assam are for the most part merely groups of agricultural villages, and none of them had at last census as many as 20,000 inhabitants. The seat of administration of the prov. is Shillong, on a tableland of the Khási Hills, nearly 5000 ft. high. It is now connected by a well-made road with Gauhátí, on the Brahmaputra, the old capital of the prov.

Assini, or **Assinie,** vil., on the Ivory Coast, Upper Guinea, in about 3° 17′ W., a French trading stn. Mean temp. (3 yrs. 1847–48, 57–58, 63) 82.8° F.

Assiniboia, one of the three dists. forming the govt. of the NW. Terrs. of Canada, situated on the S. frontier of the Dominion between Manitoba and Alberta. Its NE. half belongs to what is called the second prairie steppe, average alt. about 1600 ft.; the SW. half to the third prairie steppe, alt. above 2000 ft. The boundary between the two, formed in the S. by the Grand Coteau du Missouri, begins on the S. frontier in about 104° W., and runs northwestwards. The NE. section contains many tracts well suited for tillage, above all in the valley of the Qu' Appelle R.; the higher steppe to the SW., which contains the greater part of the S. Saskatchewan R. included in the dist., is better suited for stock-rearing. Outcrops of coal occur on the Souris R., near the U.S. frontier, in the Wood Mts. further W. (106°–107° W.), on the White Mud R., between about 108° and 109° W. (also near the frontier), and near Medicine Hat. Natural gas occurs at Medicine Hat and at Langevin, the latter close to the W. frontier. The cap., Regina, is the seat of the general legislature for the NW. Terrs. Area about 95,000 sq. m. P. (1891) 30,400. See also **North-West Territories** (Canada) and **Assiniboine.**

Assiniboine, riv., Canada, rises in the SE. of Saskatchewan dist. and flows SE. through Assiniboia into Manitoba, then E. to the Red R. of the North, which it joins at Winnipeg. Length about 600 m.; navigable for vessels of 100 tons to Fort Ellice, near the W. frontier of Manitoba. It takes its name from the **A.** or **Stone Indians,** a branch of the Sioux family, which gives its name also to the dist. of Assiniboia, and is settled both in the neighbourhood of this valley and in the Rocky Mts.

Assuan, Assouan, Aswan, or **Es-suan,** tn., Upper Egypt, on the r. bk. of the Nile, just below the 'first cataracts' (rapids), in 24° 5′ 23″ N. (Nouet). It is the ancient *Syene,* which gives the name of syenite to a variety of granite quarried in the neighbourhood, largely used in building by the Pharaohs of the eighteenth dynasty. Opposite A. is the beautiful island of *Elephantine* (the Jeziret-ez-Zaher, or 'flowery isle' of the Arabs), a large mound on which marks the site of numerous remains of antiquity, now all destroyed. The island of *Philæ,* 6 m. to the S. above the cataracts, is still covered with remains of temples, obelisks, and other ancient structures.

Astrakhan, a govt. of European Russia, on the Lower Volga, has Saratov and Samara in N., Don Cossacks in W., and the terr. of the Bukéev Horde in the E. With the exception of the low hills along the course of the Volga in the NW., it is flat and consists of sandy deserts, large parts of which are below the level of the ocean, and gradually slope to the Caspian Sea (85 ft. below the level of the Black Sea). They are intersected by many old beds of the Volga, and covered with hundreds of brackish lakes, from which salt is extracted to the amount of about 150,000 tons every year (Elton and Baskunchak, now connected by rail with the Volga, being the most important). Gypsum, rock-salt, and grinding-stones are extracted from the hills. Climate continental, very hot in summer and cold in winter (average temp., yr. 49° F., Jan. 19°, July 78°; yearly rainfall, 6.1 in.). Only the delta and the banks of the Volga have a settled population, chiefly Russian. The Russians make about 60 per cent. of the population, the remainder being Kirghizes (23 per cent.), Kalmucks (14 per cent.), Tatars (4 per cent.), Armenians, Turkomans, a few Hindus, &c. Cattle-breeding is the chief occupation; agriculture insufficient for population. Vineyards cover several thousand acres, and wine is exported. Fishing and seal-hunting in the Caspian and the Volga delta are important trades (100,000 to 125,000 seals, and nearly 30,000 tons of fish every year), fish and caviare being largely exported. Manufactures in infancy. Divided into five dists., the chief towns being: Astrakhan, Chornyi Yar (5070), Krasnyi Yar (6230), Tsarev (6860), and Yenotaievsk (2450), and six Kalmuck dists. The *Astrakhan Cossacks* (about 25,000) constitute a separate *voisko* under their own military administration. Area 91,237 sq. m. P. (1860) 475,000, (1888) 932,539.

Astrakhan, cap. of above prov., 1021 m. SE. of Moscow, and 271 m. from nearest railway station, at Tsaritsyn, on l. bk. of Volga, 40 m. from its mouth; 46° 21′ N., 48° 4′ E. Formerly a Tatar fortress, annexed to Russia in 1551–54; has an old citadel (Kreml), a botanic garden, a small admiralty, and is a considerable entrepôt for Caspian fisheries and for trade between Russia, Transcaucasia, Transcaspian region, and Persia. Regular steam communication with upper Volga, as well as Baku, Krasnovodsk, and Ashur-ada; extensive vineyards in suburbs. P. (1860) 44,587, (1888) 73,710.

Astrolabe, large bay in the E. of Ger. New Guinea, 5°–5½° S.

Atacama, prov., Chile, situated between the Andes and the coast, and between about 24° 40′ and 29° 10′ S. Two-thirds of its area in the N. is mainly an elevated and partly mountainous stony or sandy desert. In the S. there are a few rivers which afford the means of irrigation, and in this part of the prov. the bulk of the population is collected. The great wealth of the prov. consists in its deposits of silver, gold, and copper. The prov. is divided into four deps., **Chañaral** in the N., **Copiapó** in the middle, **Freirina** in the SW., and **Vallenar** in the SE. Easter I., about 2000 m. off, and San Felix and San Ambrosio Is., nearly 600 m. off, belong to the prov.; cap. Copiapó; chief ports Caldera and Carrizal Bajo. Area 28,400 sq. m. P. (1870) 83,000, (1885) 64,000. See *Jour. R. G. S.*, 1877, p. 250 (map about 1: 1,500,000).

Atacama, or **San Pedro de A.,** tn., Chile, prov. of Antofagasta, 240 m. SE. by S. Iquique, to the N. of a great salt desert of A., the point of convergence of several trade-routes across the Andes. Alt. 7900 ft. P.<1000.

Ateuas, tn., Costa Rica, 20 m. W. San José, with gold-mines.

Ateshgah ('place of fire'), a place in Trans-Caucasia, about 10 m. E. Baku, formerly celebrated as a seat of Zoroastrian fire-worship.

Atessa, tn., Italy, Abruzzi e Molise, prov. Chieti, 24 m. SE. by S. Chieti. P. 10,000.

Ateyba, a Beduin tribe, inhabiting a granitic and basaltic plateau to the N. of Mecca, Arabia.

Atfi, vil., Lower Egypt, r. bk. Nile, 40 m. S. Cairo, on the site of ancient *Aphroditopolis.*

Atford, hamlet, Eng., Wiltshire, Westbury div., 7 m. E. Bath, 2½ m. S. Corsham stn.

Ath, manufacturing tn., Belgium, prov. Hainaut, on the Dender, 15 m. NW. by N. Mons. P. 9900.

Athabasca, a provisional dist. in the NW. Terrs. of Canada, bordering on Alberta dist. on the S., and Brit. Columbia on the W.; not yet settled, and inhabited by a small pop., mainly of Indians. Area, about 122,000 sq. m. See **North-West Territories** (Canada).

Athabasca, a large shallow lake, about 200 m. long W. to E., the W. end of which forms part of the E. boundary of A. dist. It receives the A. Riv. at its W. end, and one of the outlets of Wollaston Lake at its E. end, and discharges its surplus waters northwards by the Slave R. into the Great Slave Lake from its W. end. **2.** A difficult pass across the Rocky Mts., between Mounts Brown and Hooker, in about 52° 20′ N. **3.** A river, rises in Alberta dist. to the E. of Mount Hooker, and flows NE. then on the whole N., forming part of the E. boundary of A. dist. into A. Lake; navigable by steamers from A. Landing to the Grand Rapids in about 56° 13′ N., from that point obstructed by bad rapids for 60 m., then again navigable by steamers from Fort M'Murray, where it begins to form the boundary of A. dist. to its mouth; thus navigable in all for about 400 m. out of a total of nearly 1000.

Athabasca Landing, place, Canada, dist. Alberta, on the A. Riv., 80 m. N. by E. Edmonton.

Athelstan, or **St. Michael,** vil., Canada, Quebec., co. and 5½ m. from Huntingdon, on R. Hinchinbrooke. P. <1500.

Athelstaneford, locally called **Elshinford,** par., Scot., co. and 2½ m. NNE. Haddington, 2 m. SE. Drem Junction; said to owe its name to the victory of a Pictish king of the eighth century over a Northumbrian leader named Athelstane; P.O. 5077 ac. P. <750.

Athenry, par. and market-tn., Ire., co. Galway, bar. A., 10 m. NW. Loughrea, on the Midland Great Western Rly. Market-day, F. Par. 14,950 ac., P. <3000; tn. 42 ac., P. <1000.

Athens, Greek **Athenai,** cap. of the kgd. of Greece or Hellas, and of the dep. Attica and Bœotia, situated in a small plain on the NW. side of the Gulf of Ægina, between the rivers Ilissos E. and Kephissos W., and between the Acropolis on the S. and the hills of Strephon and Lykabettos on the NE., 4½ m. by rail from its harbour, the Piræus. Lat. of the Parthenon, 37° 58′ 20″ N., long. 23° 43′ 8″ E. It is the residence of the sovereign, and the seat of an archbishop, a university (founded in 1836), an observatory, and a botanic garden. The Acropolis or citadel, on which most of its noble monuments are placed, is a square craggy rock, about 510 ft. high. Summit enclosed by walls. The cathedral is a handsome Byzantine structure with a modern steeple. A. has recently been rapidly growing in importance as an industrial city, manufacturing chiefly coarse cotton yarns and tissues, morocco leather, and silks. A. is reputed to have been founded by Cecrops, leader of an Egyptian colony; it fell to Rome, B.C. 86; since then it has belonged successively to Goths, Byzantines, Franks (1204), Catalans (1312), the kings of Sicily (1326), Venetians, and Turks (1456). Principal antiquities, the Acropolis, surmounted by the Parthenon, an edifice of white marble, 228 ft. in length by 100 ft. in breadth, and still tolerably perfect; the Erechtheion, a building 90 ft. in length; remains of the Temple of the Wingless Victory; the Propylaia, or grand entrance, in front of the foregoing temples; and the theatre of Herodes Atticus, at the SW. angle of the Acropolis. N. of the Areopagos is the Temple of Theseus, one of the most perfect monuments of ancient A., having thirty-four remaining Doric columns outside, and containing a rich museum of antiquities. Areopagos or Mars' Hill, where St. Paul addressed the Athenians; the Pnyx, where popular meetings were held; the Eleusinion, the prison of Socrates, and Tower of the Winds, vestiges of the Temple and Theatre of Dionysos (Bacchus), the Grotto of Apollo and Pan. Outside of the city, sixteen Corinthian columns, 60 ft. in height, on a raised platform, remains of the Temple of Zeus Olympios; and near the Ilissos, the Stadium, or ancient race-course, is still traccable. A. became the seat of the Greek government (removed hither from Nauplia) in 1835. Shortest sea track to Liverpool, 2566 nautical miles. Alt. 337 ft.; mean temp. (yrs. 1859–82), yr. 63.1° F., Jan. 46.4°, July 80.6°; rainfall (12 yrs.), 15.04 in. P. (1870) 25,000; (1879) 68,700; (1889) 107,250. See also **Greece,** climate.

Athos, the ancient name, still current in western countries, for the mountainous penin. in Turkey forming the eastern-most of three narrow penins. in the NW. of the Ægean Sea, and more particularly for the mountain at the end of that penin. ; called by the Greeks **Hagion Oros** ('sacred mountain'), which has been corrupted by the Turks into **Aineros** ; called by the Italians **Monte Santo** (same meaning). The mountain is composed of a white marble or limestone, rising about 3000 ft. above the pine-forests to a total alt. of 6345 ft. At an early date it became the seat of a Greek theological seminary, and it now possesses twenty monasteries, in which are preserved the remains of the famous libraries which supplied the MSS. of many masterpieces of ancient Greek literature. No female is permitted to enter the penin. Vestiges of the canal cut by Xerxes at the narrow N. end of the penin. have been discovered. *Jour. R. G. S.*, 1837, pp. 61–74 ; 1847, pp. 145–150 ; *Ausland*, 1885, pp. 184, 211, 228.

Atlantic Ocean (ancient *Atlanticus Oceanus*, from Mount Atlas), one of the five great hydrographical divisions of the globe, occupies an immense longitudinal val., extending from the Arctic circle on the N. to the Antarctic circle on the S., bounded W. by the coast of America to Cape Horn, and E. by the shores of Europe and Africa to the Cape of Good Hope. It is naturally divided into three portions : 1st, the N. ; 2nd, the S. ; and 3rd, the intertropical Atlantic. The North Sea, the Caribbean Sea, and the Irish Sea form portions of the Atlantic ; but the Baltic and the Mediterranean, which communicate with the ocean only by narrow channels, are properly considered separate seas. The principal gulfs of the Atlantic are, in Europe, the Bay of Biscay ; in Africa, the Gulf of Guinea ; in America, the Gulfs of Mexico and St. Lawrence. The chief islands are, in Europe, the British Isles and Iceland ; in Africa, the Azores, Madeira, and Canary islands, and the archipelago of the Gulf of Guinea ; in America, the Antilles, Newfoundland, and the islands of the Gulf of St. Lawrence. The Atlantic, with its branches, receives the drainage of nearly the whole of Europe W. of the Volga, of N. America E. of the Rocky Mts. and the mountains of Mexico, of S. America E. of the Andes, and the greater portion of Africa. Its chief affluents are, in Europe, the Rhine, Loire, and Tagus ; in Africa, the Senegal, Niger, and Congo ; and in America, the St. Lawrence, Mississippi, Orinoco, Amazon, and La Plata. The bed of the Atlantic rises in some places in immense sand-banks to within a few fathoms of the surface, and in others sinks to considerable depths. The bed of this ocean in the N. as far S. as 60° N. is for the most part under 1000 fathoms in depth, and down to 50° N. in most places between 1000 and 2000 fathoms. S. of that line the principal feature of the bed of the ocean is a submarine tract 1000 to 2000 fathoms in depth, running from N. to S. about midway between the opposite shores, the Azores Is. and the island of St. Paul, resting on this tract in the N. hemisphere the islands of Ascension, Tristan da Cunha, and Gough in the southern. It ends a little to the S. of Gough I. E. of this tract there is a single trough upwards of 2000 fathoms in depth, but to the W. of it the areas exceeding that depth are divided into two by a branch from the median shallower tract running SW. to the coast of S. America between the mouths of the Amazon and Orinoco. Large areas more than 3000 fathoms deep occur on both sides of the median tract both in the N. and S. Atlantic [**Oceans**]. The most extensive banks are Newfoundland, the Dogger in the North Sea, and the Agulhas, off the S. point of Africa. Many of the shallower and smaller banks rise out of deep water, and even the several members of the island groups, such as Tristan da Cunha and Madeira islands, are separated by deep channels. A submarine telegraph cable was laid across the Atlantic in 1858, but failed after transmitting a few messages ; another, attempted in 1865, also failed ; but in July 1866 a new cable was successfully laid between Valentia I., Ireland, and Heart's Content, Newfoundland, and in September the cable of 1865 was recovered and successfully spliced. There are now three cables between these two places, one between Ballinskelligs Bay, Ireland, and Tor Bay, Nova Scotia ; one between Ballinskelligs Bay and Dover Bay, Nova Scotia ; one between Sennen Cove, Cornwall, and Dover Bay ; two from Brest, in France, to the islands of St. Pierre and Miquelon, which are connected by cable with Boston, U.S. ; two from Lisbon by Madeira and the Cape Verde Is. to Pernambuco. Another cable is being laid from Senegal to Brazil. Submarine cables following the coast connect the principal ports of Africa with Teneriffe and Europe ; others connect the principal ports of S. America with each other, the West Indies, and the U.S. Immense numbers of fish are found in the Atlantic, and herring and cod fishing are important branches of industry in Northern Europe. Animal life occurs in profusion at all depths. For dimensions, greatest depths, prevailing winds, currents, tides, and floating ice, see **Oceans.**

Atlantic Peak, mt., U.S., Wyoming, Fremont co., 152 m. NE. of the SW. corner of the state. Alt. 12,794 ft. (Hayden).

Atlas Mountains, the general name given to a number of mountain-ranges in the NW. of Africa, stretching nearly continuously from near the W. coast of Morocco to the E. coast of Tunis, for the most part with a SW. by W. to NE. by E., or WSW. to ENE., trend. They are known by different special names in different parts and to different writers. They are most conveniently divided first into (**A.**) the Morocco Atlas, and (**B.**) the Atlas of Algeria and Tunis. **A. The Morocco Atlas.**—Four great chains, running nearly parallel to one another, have been distinguished in this division:—(1.) The **High Atlas** (sometimes called the **Great Atlas**), which contains the highest elevations, and is also the longest, beginning about 40 m. to the E. of Cape Gir, where a valley traversed by a trib. of the Wady Sus separates it from the tableland of Haha-Mtuga, and ending on the N. margin of the Shot Tigri in the W. of Algeria (about 1½° W.). The name of **Adrar-n-Deren** is sometimes applied to the whole of this chain, but properly that is merely a general term, meaning 'snow-mountains.' Sometimes this name is used to denote the part of the chain to the S. and SE. of Morocco, where the highest elevations occur. The **Tizi Likumpt,** in this portion of the chain, SSE. of Morocco, ascended by Thomson in 1888, had its altitude determined by him at 13,150 ft., but another summit was seen by him to the SW., the **Tizi Tamjurt,** which he believed to be from 1500 to 2000 ft. higher. This chain offers a serious hindrance to communication. The passes across it are mostly high and difficult. The principal pass to the S. of the city of Morocco, the Tizi Tagherat, is nearly 12,000 ft. in height. E. of the pass called **Tizi-n-Telghemt** (about 4° 15′ W.) this chain rapidly diminishes in height, till at last it merges in the Algerian plateau. See also **Miltsin** and **Bibawan.** (2.) The **Middle Atlas,** to the N. of the High Atlas, stretching from about 7° to 3° W., terminating in the E. at the valley of the Muluya; named on account of its being intermediate in altitude between the High Atlas and the chain to the S. of the High Atlas, namely—(3.) The **Anti-Atlas,** also called the Little Atlas, which, beginning on the coast a little to the N. of 29° N., and ending in about 2½° W., is connected with the High Atlas by transverse ridges lying between the basins of the Wady Sus and Wady Draa. (4.) The **Jebel Bani,** a short distance S. of the previous, with which it unites in the E. to the NW. of the oasis of Tafilet. **B. The Atlas of Algeria and Tunis.**—In this section two series of chains or short ranges are distinguished, one in the N. called the **Tell Atlas,** or **Little Atlas** (the *Atlas minor* of Ptolemy), the other in the S., the **Great Atlas,** or **Atlas of Sahara** (the *Atlas major* of Ptolemy), the two series being for the most past separated by a plateau 50 to 80 m. in width. According to Rothpletz, however, these two series cannot be distinguished by their position with reference to the plateau. In the Great Atlas the ranges all have a more or less SW. to NE. trend, while those of the Little Atlas trend more nearly E. and W. The two series being distinguished by this test, the Great Atlas is found to advance further to the N. as one goes eastwards, until in Tunis it embraces all the mountainous parts of the country. The highest range in the Great Atlas is that of **Aures,** between about 6° and 7° E. (highest peak Sheliya, 7635 ft.); in the Little Atlas the **Jurjura,** or **Jerjera,** between about 3¾° and 4¾° E. (highest peak **Lella Khedija,** 7570 ft.). Both in an orographical and a geological sense the Wady Draa in the W. and the Wady Jedi in the E. may be taken as forming the southern limit of the A. Mts. S. of that limit are the tablelands of the Sahara, distinguished by the absence of the older mesozoic rocks, while the region to the N. is characterised by the abundance of synclinal and anticlinal folds, and the complete development of a geological series, from the earliest to the most recent period, closely allied to that of south-western Europe. See *Proc. R. G. S.*, 1889, pp. 1–17, map, p. 64 (about 1:1,030,000); De Foucauld's *Itinéraire au Maroc* in *Bull. Soc. Géog.*, Paris, 1887, pp. 118–125, with numerous maps; Schnell, *Das Marokkan. Atlasgebirge* (Erg.-heft., No. 103 to *Petermann's Mitteil.*), with map (1:1,750,000), Gotha, 1892; and Rothpletz in *Petermann's Mitteil.*, 1890, p. 188.

Attica and Bœotia, a prov. (*nomos*) of the kingdom of Greece, extending from the Ægean Sea and the Channel of Egripos W. to the Gulf of Corinth. Surface hilly, in places even mountainous. The eastern or Attic portion of the prov. is rich in vines and olives, and is noted still, as it was in ancient times, for its honey. The Bœotian portion is better adapted for the cultivation of cereals and the rearing of cattle. The prov. comprises the Greek cap. Athens, its port Piræus, and contains the silver-mines of Laurium and marble quarries of Pentelicus. See **Greece.**

Au, 'water.' See *Aa, Ab.*

Au, Aue, Ger., 'a valley,' or more particularly 'a fertile dist. bordering on a river'; frequent as a suffix in German names, as Ilmenau. *Die goldene Aue,* 'the golden valley,' the sheltered and fertile valley between the Thuringian Mts. and the eastern end of the Harz, between Nordhausen and Eisleben, watered in its upper part by the Helme. *Die blaue Aue,* 'the blue valley,' round Plaue in Schwarzburg-Sondershausen.

Au, suburb of Munich, Bavaria, on the r. bk. of the Isar.

Aubagne, tn., France, dep. Bouches du Rhone, arr. and 11 m. E. Marseilles. P. 5400.

Aube, central dep. of France, in the SE. portion of the Seine basin, divided into five arrs., Arcis-sur-A., Bar-sur-A., Bar-sur-Seine, Nogent-sur-Seine, and Troyes; cap. Troyes. A. is a lowland dep. through which flows the upper course of the Seine and its trib. the A. The dep. consists of two dists. physically opposite in character; that of the NW., an arid, treeless, nearly sterile plain, with a gravelly or chalky soil (part of Champagne Pouilleuse), and that of the S., fertile, and still in places covered with extensive remains of forests, which were formerly of even greater extent. The contrast between these two regions is most sudden and striking. The mineral products of the dep. are marble, lithographic stone, and iron, the last principally worked at Vendeuvre. Principal manufactures, hosiery and cotton and woollen goods. A. belonged in former times mainly to the prov. of Champagne, but partly also to the Sénonais (the NW.) and partly to Burgundy (the SE.). Area, 2327 sq. m. P. (1891) 255,548. See **France,** table, and **Troyes.**

Auckland, vil., Canada, Quebec, co. Compton, 30 m. from Sherbrooke. P.<1500.

Auckland, co., New South Wales, in the extreme SE. **2.** Prov. dist., New Zealand, comprising about three-fifths of the North I. in its N. portion. It has more safe harbours than any other part of the colony. Principal minerals, gold (largely produced in the Thames district) and coal (produced in the valley of the Waikato, about 60 miles S. A., and at Whangerei, and on the Bay of Is. in the northern penin.). Other important products (apart from those of agriculture, as to which, see **New Zealand**), are kauri gum and timber. The gum is the resin of a tree, *Dammara australis,* confined to this prov., and indeed to its northern portion; but is also found fossil, sometimes at a considerable depth, where the tree no longer exists. **3.** An important seaport in this prov., in Eden co., picturesquely situated on the S. shore of Waitemata Harbour (a western arm of Hauraki Gulf) and on the N. side of an isthmus only six miles in width, having on the other side the much shallower harbour of Manukau, which it is proposed to connect with Waitemata Harbour by a canal; lat. 36° 50′ S., long. 174° 51′ E., 1270 nautical miles from Sydney, about 5440 nautical miles from San Francisco. The harbour is broad and deep, so that the wharves of the port can be reached in any state of the tide by the largest vessels afloat. A. is a port of call for the Californian mail-steamers. It has two graving-docks, a university college, a free public library, and another public library, including a valuable collection of MSS. presented by Sir G. Grey; numerous manufacturing industries, including sugar-refineries and glass-works. A. was founded in 1840, and named after Lord Auckland. It was the seat of govt. of New Zealand till 1864. Average rainfall (4 yrs.), 43.62 in.; mean temp., yr. 59.3° F., Jan. 66.6°, July 51.9°. P. of municipality (1881) 26,083; (1891) 25,773; including suburbs, 51,287.

Auckland, West, par., Eng., Durham, Barnard Castle div., on the Gaunless, 3½ m. SW. Bishop A., on the N. E. R.; with coal-mines, PMT.O. P.<4000.

Auckland Islands, a group belonging to, and to the S. of New Zealand, in 50½° to 51° S., 166° E.; uninhabited, but occasionally visited by whalers in search of water and wood.

Auckland St. Andrew, par., Eng., Durham, including town of Bishop A., on the N. E. R. (**Bishop A.**). P.<3500.

Auckland St. Helen, par., Eng., Durham, 2½ m. SW. Bishop A., P.O. P.<1000.

Auckley, or **Awkley,** par., Eng., Yorkshire (W. Riding) and Nottinghamshire, 5 m. SE. Doncaster, P.O. P.<500.

Aude, maritime dep. of France (formed with other deps. out of the ancient prov. of Languedoc), on the W. shore of the Gulf of Lyons; divided into four arrs., Carcassonne, Castelnaudary, Limoux, and Narbonne; cap. Carcassonne; also, locally, into various dists., of which the most noteworthy are, Rasez, on the W. of the A. to the S. of Carcassonne, and the Pays de Sault, the part of the basin of the A. above Rasez. It is mainly mountainous, the Canal du Midi marking the division between the spurs of the Pyrenees on the S. and those of the Cevennes on the N. The Pyreneran portion is divided by the upper (S. to N.) course of the riv. A. into two sections, the eastern including the Corbières, between which, following the course of the river, runs the highway from Carcassonne to the Col de la Perche (dep. Pyrénées Orientales). In the N. are the granitic Montagnes Noires, culminating in a peak of 3970 ft. The coast-line of A. is characterised by extensive lagoons (*étangs*), of which the principal are those of Sigean, Gruisson, and Leucate. Wheat is grown throughout the dep., rye chiefly in northern portion, but barley rarely. Buck-wheat is cultivated to some extent, and maize, which forms the customary food of the people in rural districts, much more largely. The vine cultivation of the dep. is second only to that of grain, and is combined with fig and almond culture. The dep. is fairly wooded, and is noted for the fine quality of its wool, more particularly that of the Corbières. The mineral products include iron, copper, lead, tin, and manganese, and from the calcareous rocks on either bank of the R. A. fine marbles are quarried. In the S. iron-mines are numerous and important. Area, 2448 sq. m. P. (1891) 317,372. See **France,** table.

Aude, riv., France, rises in the dep. of Pyrénées Orientales, flows first N. then below Carcassonne turns E., and finally enters the Mediterranean by two branches, one of which, canalised, and bearing the name of La Robine, passes south-eastwards by Narbonne, and by its upper end is connected with the Canal du Midi, the other continues the easterly course of the river; used for floating timber from Quillan, a distance of 90 out of a total of 129 m.; navigable only in the canalised portion.

Audenarde, in Flemish **Oudenaerden,** in English frequently spelt **Oudenarde,** manufacturing tn., Belgium, E. Flanders, on the Scheldt, 15 m. SSW. Ghent, at one time noted for its tapestries (it furnished the first workmen for the manufactory of the Gobelins); scene of the great battle in which Marlborough defeated the French under the Dukes of Burgundy and Vendôme in 1708. Aujila, oasis, Africa. See **Aujila.**

Auglaize, co., U.S., Ohio, in the W., crossed in the SW. by 40½° N., and in the E. by 84° W.

Auglaize, riv., U.S., in the W. of Ohio, flows N. into the Maumee.

Augpadlartok, glacier, on the W. ct. of Greenland, behind the settlement of Upernivik, in about 73° N. It has been observed to advance in August at the rate of 99 ft. in 24 hours. See *Petermann's Mitteil.*, 1888, pp. 68 and 70.

Augsburg, the ancient *Augusta Vindelicorum,* a city of Germany, Bavaria, cap. govt. Schwaben and Neuburg, on a hill between the confluence of the rivers Lech and Wertach, on rly. 35 m. WNW. Munich. Principal buildings, the Rathhaus, or Golden Hall, palace of the former prince-bishops, one of the finest old buildings in Germany, in which the memorable 'Confession of Augsburg' was presented by the Protestants to Charles V. in 1530; cathedral of the sixth century, academy of arts, polytechnic and other schools, library, and picture-gallery. Towards the close of the middle ages A. was the great centre of commerce between S. Germany and N. Italy (see **Alps**), and was even the principal money-market of Europe. It is to this city and period that the Fuggers, a wealthy family of weavers and bankers, belonged. The city reached the height of its prosperity about the beginning of the sixteenth century, and gradually declined after the commerce between Europe and the East began to follow the sea-route round the Cape of Good Hope. It still retains importance as a manufacturing town, deriving great advantage as such from the water-power afforded by the rapid Lech. Principal manufactures, textiles and machinery. It is also an important centre of the book-trade. A. was a free and imperial city from 1628, until annexed to Bavaria by Napoleon I. in 1806. Alt. 1638 ft.; mean temp., yr. 45.1° F., Jan. 27.9°, July 64.0°. P. (1871) 51,000; (1880) 61,000; (1890) 75,600; including suburbs, more than 100,000.

Augst, two adjoining vils., Switzd., 6 m. E. by S. Basel, on the l. bk. of the Rhine at the mouth of the Ergolz, which separates one of the two villages in cant. Basel-land from the other (distinguished as **Kaiser A.**) in Aargau. They represent the ancient *Augusta Rauracorum,* of which these are remains. P. of each <500.

Augusta, or **Agosta,** tn., Sicily, on an isl. on the E. ct., connected with the mainland by a bridge, and 12 m. NNW. Syracuse. In a naval battle between the Dutch and French, fought off this town, the Dutch admiral Van Ruyter was mortally wounded, April 2, 1676. P. 13,000.

Augusta, S. Australia. See **Port Augusta.**

Augusta, vil., U.S., Arkansas, Woodruff co., on l. bk. of White R., 78 m. W. by N. Memphis, Tennessee. P. <1500.

Augusta, city, U.S., Georgia, cap. of Richmond co., on r. bk. of, and at the head of navigation on, Savannah R., 113 m. ENE. Macon. The A. canal, which conducts the waters of the Savannah R., affords inexhaustible water-power, which is used in large cotton-mills, A. being one of the chief seats of the southern cotton manufactures. Mean temp., yr. 64.8° F., Jan. 48.3°, July 82°; rainfall (14 yrs.), 49.56 in.; alt. 134 ft. (R. R.). P. (1880) 22,000; (1890) 33,300.

Augusta, vil., U.S., Illinois, Hancock co., 115 m. NNW. St. Louis (Missouri). P. <1500.

* Census 1850. † Census 1851.
‡ Excluding Maori as well as Moriori in the Chatham Is., estimated at 37,502 in 1871, 44,097 in 1881, and 41,993 in 1891. § Including Maori, 6.40.

Australia, a vast island lying between the Indian and Pacific Oceans, separated from New Guinea and the Eastern Archipelago by Torres Strait, the Arafura Sea, and the Sea of Timor, from Tasmania by Bass Strait; extreme points of mainland, in the N. Cape York in about 10° 40′ S., in the S. Wilson's Promontory in about 39° 11′ S., in the W. Steep Point in about 113° E., in the E. Cape Byron in about 153° 38′ E.; greatest length from W. to E. (in about lat. 27° S.) more than 2300 m., greatest breadth, from Cape York to Wilson's Promontory, about 2000 m., breadth from the Gulf of Carpentaria on the N. to the head of Spencer Gulf on the S., about 1050 m.; area, including small islands adjacent, about 3,000,000 sq. m. [**Continents**]. The **coast-line** of A., like that of Africa, is remarkable for its long stretches of uniform character, without inlets that can be made use of by shipping even for shelter. As in the part of Africa which corresponds in lat. to A., the portion of the coast-line which is richest in inlets and natural harbours is that in the E. and SE. On the S. coast, on the other hand, there is, along the Great Australian Bight, one unbroken stretch of sandy beach backed by barren cliffs a few hundred feet high, and the only good natural harbour W. of Spencer Gulf is that of King George's Sound, within 200 m. of Cape Leeuwin, the cape first sighted by vessels coming from Europe by Suez or the Cape of Good Hope. Equally uninviting is a large part of the W. and N. coast. In some places the shore presents to view a line of hills and cliffs, in other places low flats of sand or mud, and on the shores of the warmer seas within and near the tropics the mud-flats are generally covered with mangroves. A more varied and more beautiful coast-line, and one more convenient for shipping, is met with in the NW., where the map shows numerous creeks bordered by small islands. As to the NE. coast, see **Great Barrier Reef.** The principal **surface** feature of A. is the Great Dividing Range given to the series of mountain ranges, which run from N. to S. near the E. coast, and then turn westwards, where the coast begins to trend to the W., terminating a little to the E. of the W. frontier of Victoria. The highest summit of the Dividing Range which is in many places only the steep outer edge of a tableland, is in the Australian Alps, 7350 ft. [**Australian Alps**]. The interior of A. consists for the most part of broad level or rolling plains of greater or less height. In the E. the tableland extends at its widest only to about 100 m., and slopes away to plains under 1000 ft. in height, and in places not much, if at all, above, if not below, sea-level. In the very heart of A., however, just on the Tropic of Capricorn, the Macdonnell Ranges approach 4000 ft. in height, and further to the SW. the Musgrave Range reaches about 4500 ft. The western half of A., so far as it has been explored, consists mainly of a tableland 1000 ft. high or less. All the great **rivers** of A. take their rise on the inner slopes of the tableland, and flow towards the W. or SW. Only one, the Murray, enters the sea by an independent mouth. Of the other long rivers of the interior shown on the map many are merely water-courses, filled at times with running water, but often empty except for a few days in the year. Many, such as the Diamantina, dry up after a longer or shorter course, partly through evaporation, partly through absorption by the porous soil. Others, such as the Barcoo or Coopers' Creek, terminate in large shallow salt lakes. Over extensive areas much of the water lost by sinking into the ground can be recovered by means of artesian wells. Most of the rivers on the E. and SE. of the Dividing Range are comparatively short, but well supplied with water all the year round. Many of them are navigable for a shorter or longer distance up, but they bring down so much sediment from the neighbouring highlands, that bars are formed in most cases at their mouths. The largest **lakes** of A. are shallow sheets of salt water which in summer become almost dry. The principal are Lakes Eyre, Torrens, Frome, Gairdner, all in S. Australia, Amadeus in S. and W. Australia, Austin, Barlee, and Moore in W. Australia. The principal freshwater lakes are coast lagoons, like Lakes Alexandrina and Albert in S. Australia, Lakes Wellington and King in Victoria.

The Dividing Range not only divides two regions with different physical features, but which also present marked contrasts in **climate.** As the greater part of A. lies in latitudes in which the trade-winds blow over the ocean from the SE. towards a belt near the equator, these winds on the E. side tend to blow over the land, but on the W. side away from it. But the presence of the land has an influence on the direction of the winds. The fact that the broad plains in the interior are more rapidly heated in summer than the surface of the ocean causes the air above to be rarefied, so that there is a tendency for the winds to blow inwards on all sides from the ocean. But this has different results on opposite sides of the continent. On the E. side it strengthens the winds which at all times tend to blow towards the land, but on the W. side it has to act against the tendency of the wind to blow away from the land, so that the currents of air that blow inwards are only feeble, and bring with them so little moisture, that that little is retained in the hot atmosphere of the interior as vapour without falling as rain. On the E. side of the continent, on the other hand, the mountains and edges of the tablelands have their usual effect in causing the moisture-charged winds to let fall their moisture, hence the coast strips on this side are in general plentifully supplied with moisture. It is, however, an unfortunate circumstance for A. that the highlands lie in close proximity to the E. coast, thus causing the rain-bearing winds to be so soon deprived of the greater part of their moisture. The amount of rain that falls on the coast strip increases on the whole from S. to N., seeing that the further N. we go the winds that bring the moisture come from warmer seas, and are hence more heavily charged with moisture. Within the tropics, where true monsoon winds prevail, the amount of rain that falls in the year, mainly in the summer months, is in some places near the coast twice as much as at Sydney and three times as much as at Melbourne. In winter, when the land gets cooled more rapidly than the adjoining seas, and the air over the land becomes in consequence denser and heavier than that over the sea, the effect on the direction of the wind is opposite to that which exists in summer. The wind then tends to blow away from the land, and thence does not carry as a rule a great deal of vapour. But the greater coldness of the season favours the condensation of vapour into rain, especially on mountain slopes and near mountains, so that winter is in some parts more rainy than summer. In general, rain, when it does fall, falls in a deluge, so that A. may be described as a land of drought and flood There is one part of A. which receives nearly all its rain in winter from winds blowing directly from the sea. That is the SW. corner, and the districts further E. which lie near that part of the coast which looks to the SW., including chiefly the more populous parts of S. Australia. That part of the continent lies outside of the trade-wind zone in winter, when the trade winds move further to the N. It then comes to lie within the region in which the prevailing winds are from the NW., and these coming vapour-laden from warm seas deposit their moisture on the colder land, and especially where they approach mountains or hills. As regards its **fauna,** A. belongs to a great zoogeographical region, which includes the neighbouring islands in the N., NE., and E., the boundary of which on the NW. is described under Asia. The great feature of this region is 'the almost total absence of all the forms of the mammalia which abound in the rest of the world, their place being supplied by a great variety of Marsupials' (kangaroos and wallabies, phalangers, koales, wombats, &c.). A. with Tasmania forms one of the sub-regions of this great region, and is characterised by the entire absence of Insectivora, Carnivora (for the dingo or native dog was almost certainly introduced by man), and Ungulata,

while even the rodents are represented only by a few small rats and mice. The **flora** is as peculiar as the fauna. Its main distinguishing feature is the great variety of eucalypts among its forest trees, the genus Eucalyptus numbering about 150 species, most of which are confined to A. They include the tallest trees in the world, some specimens of the taller species reaching nearly 500 ft. in height. Besides eucalypts, acacias abound in A., and various species of casuarina (including the she-oak, swamp-oak, &c.), banksia, xanthorrhœa, &c., are also characteristic. The native grasses of A. are numerous and nutritious, and among these the tall kangaroo grass is notable for its power of withstanding long drought. The **native Australians** are a dark-coloured race, as black as negroes, but without the woolly hair and thick protruding lips which distinguish the latter. Their weapons are spears, wooden axes, clubs, and the curious boomerangs, which when skilfully thrown return to within a short distance of the thrower. Very few even have bows and arrows. A few boughs or pieces of bark form their only shelter, and their only clothing consists of a scanty covering of skins or matting. A few of the natives have taken employment as shepherds under European settlers; and others, especially in Queensland, where the natives are very fierce, are employed against the people of their own race as a kind of police. At no time were the natives numerous, and since the arrival of Europeans they seem to be quickly dying out. In Queensland, where they are most numerous, they are not believed to number much above 50,000. The great majority of the present inhabitants are immigrants or descendants of immigrants of British or Irish origin, with an admixture of Germans and other Europeans, along with a few Chinese and Polynesians. The first settlers were a body of convicts sent from England in 1787, who landed in Botany Bay early in 1788. **Discovery, Name, and History of Exploration.**—Old maps show that A. was known to the Portuguese before 1540. Early in the seventeenth century some knowledge of the coasts was gained by several Dutch navigators, to whom we owe the Dutch names for several coast features and maritime tracts. Towards the close of the same century several parts of the coast were visited by Dampier. In 1770 Cook sailed along the E. coast and through Torres Strait, and in 1791 some important discoveries were made by Vancouver on the S. coast. In 1801–3, Flinders made important explorations on the SE. and N. coasts, and it was he who, in the account which he published of these voyages in 1814, first proposed A. as the name of the vast island now so called. The name *Terra Australis* (southern land) had previously been in use as a general name for all the lands of the southern seas, and the name of New Holland, which was bestowed by the Dutch navigator Tasman in 1644, remained in use long after that date. Our knowledge of the interior of A. has been gradually accumulated since the date of the first settlement by the British. In 1813, Wentworth, Lawless, and Blaxland first crossed the Blue Mts. and discovered the plains to the W. At various dates between 1817 and 1823, J. Oxley explored the regions on the Upper Lachlan and Macquarie, and discovered the Brisbane R. In 1824, Hume and Hovell crossed a river now known to be the upper part of the Murray, but which was then called the Hume. In 1827, Allan Cunningham passed northwards across the Liverpool Range, and discovered the Darling Downs. In 1828–30, Captain Sturt made two important journeys in which he traced the Macquarie R. to the Darling, the Murrumbidgee to the Murray, and the Murray to its mouth in Alexandrina Lake (*Jour. R. G. S.*, 1833, pp. 248, &c.). In 1831, Major Mitchell made important discoveries in the N. and W. of New South Wales, and what is now Victoria, and it was on this occasion that the Darling was shown to flow into the Murray (*Jour. R. G. S.*, 1837, pp. 271, &c.). In 1837–39, Lieut., afterwards Sir George Grey, made two arduous journeys in the NW., discovering the Glenelg, Gascoyne, and other streams (*Jour. R. G. S.*, 1838, pp. 454, &c.). In 1840, E. J. Eyre first proceeded NE. from the head of Spencer Gulf to Mount Hopeless, then turned SW. to Eyre's Penin., and proceeded along the shores of the Great Australian Bight to King George's Sound (*Jour. R. G. S.*, 1841, p. lxii.; 1842, p. lxxix.). In 1845, Capt. Sturt penetrated northwards to about 26° S., 139½° E. (*Jour. R. G. S.*, 1847, pp. 85, &c.). In 1844 and 1846–47, Dr. Ludwig Leichardt made three expeditions in the NE. regions. The last expedition, through Cape York Penin., never returned, and its fate was never definitely known. In the course of an expedition in the same penin. in 1848 Kennedy was killed by the natives a few miles to the S. of Cape York (*Jour. R. G. S.*, 1849, pp. lxxiii., 193; extracts from his journal, 1852, pp. 228, &c.). In 1848 also J. S. Roe, proceeding NE. from the settled districts of W. Australia, reached the Russell Ranges in 33½° S. (*Jour. R. G. S.*, 1852, pp. 1, &c.). In 1856, A. C. Gregory proceeded SE. from Cambridge Gulf, and reached a point in about 20½° S., and thence continued eastwards to Moreton Bay (*Jour. R. G. S.*, 1858, pp. 1, &c.). In Aug. 1860, Burke and Wills started from Melbourne to cross the continent to the Gulf of Carpentaria, and in Feb. 1861, Wills, with the other survivors of the party, which underwent extreme hardships in consequence of which Burke and other members perished, arrived at the destination of the expedition. In 1861–62, J. M. Stuart, after various preliminary journeys to the neighbourhood of Lakes Eyre, Gairdner, and Torrens, and to other parts of S. Australia, crossed the continent from S. to N. (Van Diemen's Gulf), following the route afterwards adopted for the overland telegraph (*Jour. R. G. S.*, 1863, pp. 276, &c.). In 1870 John Forrest travelled from Perth to Adelaide, keeping for the most part near the coast, except on the route from Perth to 120° E. and in Eyre's Penin. (*Jour. R. G. S.*, 1871, pp. 361, &c.). In 1871, Alex. Forrest made a journey E. from Perth to beyond the Hampton Plains, returning by the coast from about 123° E. by the same route that John Forrest had taken eastwards (*Jour. R. G. S.*, 1872, pp. 388, &c.). In 1873, Major Warburton explored about 10° of long. between about 20° and 22° S. in W. Australia. In 1874, John Forrest, starting at Champion Bay on the W. coast in about 28° 45′ S., explored about 20° of long. chiefly between 25° and 27° S. (*Jour. R. G. S.*, 1875, pp. 449, &c.). In 1875, Ernest Giles, starting from Fowler's Bay on the S. coast in 132½° E., proceeded W. to Perth, keeping mainly between 29° and 31° S. (*Jour. R. G. S.*, pp. 328, &c.). In 1875–76, W. O. Hodgkinson explored first the Cloncurry and then the Diamantina, proceeding down the latter to the frontier of Queensland. In 1876, E. Giles, after proceeding from the W. coast north-eastwards to the upper part of the Ashburton R., ascended that river to its source, and then continued eastwards mainly between the Tropic of Capricorn and 25° S. to the frontier of S. Australia, and then SE. to the telegraph line. In 1879, John Forrest explored some fine sheep country in the NW. on the De Grey R., and Alex. Forrest some similar country on the Fitzroy R., which he traced to its source (*Proc. R. G. S.*, 1880, pp. 512–14). In 1883, C. Winnecke explored the region in the SW. of Queensland and the adjoining parts of S. Australia between about 22° and 28° S. (*Proc. R. G. S.*, 1884, pp. 566–69). In 1885–86, D. Lindsay explored the Finke R., and travelled thence N. to Palmerston (*Proc. R. G. S.*, 1889, pp. 650, &c.), and in 1887 made a second transcontinental journey from Palmerston to Adelaide. In 1888, E. Favenc explored the regions of the Upper Gascoyne and Ashburton rivers (*Proc. R. G. S.*, 1889, pp. 492, &c.). In 1891, D. Lindsay made an attempt to penetrate N. in the E. part of W. Australia, but was baffled by want of water. In all directions from the point whence he turned back, the 90-Gallon Rock Hole, in 27° 40′ S., 126° E., he found nothing but sandy desert, sandstone hills, and plenty of spinifex, but no water. See **Appendix**, pp. 3–5, and the articles on the different colonies.

Australia Felix. See **Victoria.**

Australian Alps, a range of mountains in the SE. of Australia, forming part of the great Dividing Range, stretching from the neighbourhood of Melbourne, about 37° 40′ S., 145½° E., to the SE. of New South Wales, about 35° S., 149° E., over a length of about 400 m., with a width of about 100 to 150 m. The highest peaks are in New South Wales, and the highest of all, according to Lendenfeld, is the peak called by him Mount Townsend (7350 ft., *ab.*), belonging to a group which he calls the Kosciusko group, the latter name having been previously applied to another peak (called Mueller's Peak by Lendenfeld), a few miles to the N., which was long believed to be the highest. The peaks next in height belong to the Bogong group in Victoria and the W. of the Mitta Mitta, the highest of which is Mount Bogong (6508 ft., *Survey of Victoria*). They do not reach the snow-line, though snow lies in the higher valleys all the summer. Geologically the A. A. are composed mainly of very ancient metamorphic rocks, and have been worn down in the course of ages to tablelands, which slope down rather steeply on all sides, and are crowned by the higher peaks. Volcanic rocks cover the tableland to the S. of Mount Bogong. Forests of lofty trees reach to about 5500 ft. in height, passing gradually over into a dense scrub, which reaches about 1000 ft. higher. There are no railways as yet across these mountains. See Lendenfeld, *Forschungsreisen in den A. Alpen* (*Ergänzungsheft*, No. 87, to *Petermann's Mitteil.*), Gotha, 1887.

Austria, Archduchy of, the terr. which formed the nucleus of the Austro-Hungarian empire, occupying both sides of the valley of the Danube between the Salzach and Inn on the W., which form the boundary with Bavaria to the S. of the Danube, and the March and Leitha on the E., which form together the greater part of the boundary with Hungary; now divided into the crownlands of **Upper** and **Lower A.,** the boundary between which S. of the Danube is partly formed by the lower Enns; chief towns, Vienna in Lower, Linz in Upper A. Surface for the most part mountainous or hilly, but sinking down to plains on both sides of the Danube in the E., the Marchfeld (*q.v.*) on the N. of that river between Vienna and the March being remarkably level. S. of the Danube the mountains and hills belong chiefly to the Alps, which stretch along the S. frontier between A. and Styria and Salzburg, the highest peaks being found in the dist. of the Salzkammergut (*q.v.*) in the extreme S. of Upper A. (Dachstein, at the meeting-place of Upper A., Salzburg, and

Styria, 9825 ft.). In the E. of Lower A., the valley of the Triesting (now traversed by a railway) separates the range known as the Wienerwald (highest peak Schöpfl, 2930 ft.), which stretches NE. to Vienna, from the Alps proper, and in the W. of Upper A. the Völcka and Traun valleys (also traversed by a railway) separate the Kobernauser-Wald and the Hausruck (2630 ft.) from the Alps in a much more marked manner. N. of the Danube the hills are all connected with the Bohemian-Moravian plateau. The Salzkammergut is occupied by a number of deep Alpine lakes (Atter, Traun, Mond, Hallstatt), which are all drained by or into the Traun. The valleys of the Traun and Enns are both ascended by railways, which connect Upper A. with Styria, and the railway connecting Lower A. with the Mürzthal in the same prov. crosses the frontier at the Semmering Pass. The only special agricultural product that need be mentioned is wine, some choice kinds being produced on the sunny slopes of the Wienerwald. The most important mineral product is the salt of the Salzkammergut, the centre of which is Ischl. As regards other minerals, the chief mining dists. are Wels in Upper, St. Pölten in Lower A., and the principal products lignite in Upper, and coal, iron ore, lignite, and graphite in Lower A. The principal manufacturing centres in Lower A. are Vienna (miscellaneous), Wiener-Neustadt (cottons, &c.), and, in the W., Waidhofen (iron); in Upper A., Steyr (iron), and Linz (woollens, &c.). Originally a margraviate, A. was erected into a duchy in 1156, and the title of archduke (borne solely by members of the Habsburg family) was first formally conferred by imperial letters patent in 1453, though it had previously been assumed by some of the Dukes of A. See **Austria-Hungary,** table and historical notes, and **Vienna.**

Austria, Circle of. See **Austria-Hungary,** end of historical notes.

Austria-Hungary, in German **Œsterreichisch-ungarische Monarchie,** a dual state in Central Europe, situated chiefly between 42⅓° and 51° N. (but extending in Dalmatia to 42° 3′ N.), and 9° 35′ and 26° 25′ E. The two sections of the state, which have independent legislatures (see below), are known as the Austrian or Cis-Leithan and the Hungarian or Trans-Leithan portion, the Leitha being a r. bk. trib. of the Danube, which forms a small part of the frontier between the two. The provs. of Bosnia and Herzegovina, still nominally forming a part of the Ottoman Empire, are now (since 1878) under the administration of the monarchy, but do not belong to either section, and the sanjak of Novi-Bazar is occupied by an Austro-Hungarian military force. The whole monarchy forms a single customs union, in which Bosnia and Herzegovina and the small independent principality of Liechtenstein are also included. The following table gives the names of the provs. of the two sections of the monarchy :—

Population in Thousands, and Annual Increase per Cent. 1869–80 and 1880–90.

	Area in sq. m. Official.	Pop. 1869.	Pop. Dec. 31, '80.	Incr. 1869-1880.	Pop. Dec. 31, '90.	Pop. p. sq. m. 1890.	Incr. p. ct. 1880-1890.[1]

[1] Including military abroad, 41,384,638.

The principal part of the terr. presents the form of an oblong square, parallel with the equator lengthwise, and its centre is indicated, nearly, by the position of Pest, on the Danube. Three-fourths of its area is mountainous, and there are three great mountain systems—the Alps in the SW., the Bohemian and Moravian mountains in the NW., and the Carpathians, the latter forming a great curve, the one extremity of which abuts on the Danube at Pressburg in the NW., and the other at Orsova in the SE. The most elevated summits are in the Alps of Tirol, where the Ortlerspitze attains the height of 12,810 ft. [**Alps,** SUBDIVISIONS, **B. III.**]. The most mountainous provs. are the Tirol, Salzburg, Upper Styria, the W. part of Upper Carinthia (all belonging to the Alps), and the E. part of Transylvania (belonging to the Carpathians). A.-H. has many plains, remarkable for uniform level, the principal being the plains of Lower Austria, on both sides of the Danube, the plains of Hungary, and the plains of Slavonia. It is abundantly supplied with water, nearly all of which is collected into five great rivers, viz., the Danube and the Dniester, flowing to the Black Sea; the Adige to the Adriatic; the Vistula to the Baltic; and the Elbe to the North Sea. The most important lake is Lake Balaton or the Plattensee. [See also **Neusiedler-see.**] Of the Italian lakes, only the N. end of Garda is now within the Austrian empire. The principal gulfs are those of Trieste, Quarnero, and Cattaro. Earthquakes occur in Dalmatia, Illyria, Hungary, and Transylvania.

As to **climate,** the inner lowlands are more especially subject to those extremes of temperature which become more characteristic as we go eastwards. With the exception of the maritime tracts, even the warmest parts of the empire have at least two months in the year in which the mean daily temperature is under the freezing point, and all the lowlands of the Hungarian section have three or four months in which the mean daily temperature is above 68° F. N. of the Carpathian Mts. the summer temperature is more moderate, and in the eastern part of the empire it is only within that system that a summer temperature lasts long enough for the cultivation of the vine. The dists. in which the rainfall is most scanty are the interior of Bohemia and Moravia, and the tract between the Danube and Theiss in Hungary, in all of which the mean annual amount is under 23 inches. The following particulars may serve for illustration. In all cases the mean temperatures are those of the fifteen years 1870–84. The places are arranged roughly in the order from W. (left) to E. (right), and from N. (top) to S. (bottom) :—

		Eger (1943 ft.).	Prague (660 ft.).	Lemberg (978 ft.).
Mean temp. Fahr.	Jan.	27.6°	30.2°	24.4°
	July	63.4°	67.1°	65.4°
	Year	44.3°	48.0°	44.6°
Mean rainfall		...	18.5 in.	26.9 in.

		Salzburg (1430 ft.).	Vienna (664 ft.).	Debreczen (453 ft.).
Mean temp. Fahr.	Jan.	28.3°	29.6°	17.4°
	July	65.2°	68.5°	71.0°
	Year	46.8°	48.8°	49.3°
Mean rainfall		45.6 in.	23.4 in.	...

		Laibach (943 ft.).	Szeged.	Hermannstadt (1381 ft.).
Mean temp. Fahr.	Jan.	27.8°	29.0°	23.8°
	July	68.0°	72.1°	67.2°
	Year	48.2°	51.1°	47.1°
Mean rainfall		...	20.3 in.	25.9 in.

		Trieste.	Ragusa.
Mean temp. Fahr.	Jan.	40.5°	47.7°
	July	76.3°	77.2°
	Year	57.1°	61.2°
Mean rainfall		43.9 in.	65.7 in.

The **flora** of the Austrian empire comprises the different grains and plants common to the countries of Central Europe, as vines, hops, tobacco, saffron, and a great variety of fruit-trees. A third part of the productive soil is covered by **forests.** The Alps and the mountains of Bohemia and Moravia produce pine, beech, and larch; while the forests of Hungary, Galicia, Transylvania, and Croatia-Slavonia furnish oak, beech, and elm. The vegetation of these zones is modified by the elevation of the soil; thus the vine ceases at a height of 1750 ft., the oak at 3000 ft., cereals generally at 4500 ft., pines at 6000 ft., and pasture at the limits of snow in the Alps. Among the **animals** of Austria may be noticed, in the Alps and Carpathians, the bear, wolf, fox, lynx, and chamois; in the high Alps, the jackal; in Dalmatia, the marten, otter, marmot, beaver, wild boar, wild cat, stag, deer, hare, and rabbit. Eagles and other birds of prey are found in the mountains, and herons are plentiful in the plains. Fish is abundant in most of the streams, and leeches are exported from the marshes. **Agriculture** is rapidly being improved in many parts of the empire, above all perhaps in Hungary, where the great demand for Hungarian wheat and flour, renowned for their high quality, have greatly stimulated this industry. Among corn crops rye and oats predominate on the whole in the Austrian provs., maize and wheat in the Hungarian. Among other important

crops are potatoes, common beet, hemp, and rape, in both sections; flax, mostly in Austria; sugar-beet, principally in the Austrian provs., and especially in Bohemia; hops, chiefly in Bohemia; tobacco, principally in Hungary. Even a little rice is grown in the irrigated dists. of the Banat, in the SE. of Hungary. In Styria, Illyria, and the Tirol the rearing of cattle forms the chief branch of agricultural industry, and the produce of wine is abundant. Sheep and pigs are reared principally in the Hungarian provs. The rearing of silkworms is also a source of wealth in the southern provs. Mules are numerous in Dalmatia, and donkeys in Hungary, goats in the provs. adjoining the Mediterranean. Of the **mineral production** about two-thirds of the annual value falls to the Austrian provs., the remainder to Hungary. In the Austrian section the most productive provs. in order are Bohemia (yielding about half the total value of the Austrian production), Silesia, Styria, Moravia, Carinthia, and Carniola; and the principal minerals produced are coal (in Bohemia, Silesia, Moravia, &c.), lignite (four-fifths in Bohemia, the remainder chiefly in Styria), salt (in Galicia, Upper Austria, Salzburg, Istria, Styria, Tirol, &c.), silver ore (chiefly in Bohemia), iron ore (chiefly in Styria and Bohemia), lead ore (chiefly in Carinthia and Bohemia), quicksilver (nearly all in Carniola), graphite (in Bohemia, Moravia, Styria, &c.), copper ore (chiefly in Salzburg and Tirol), zinc ore (chiefly in Styria and Galicia), sulphur ore and alum slates, gold, tin, bismuth, antimony, arsenic, manganese, uranium, asphalt. The principal minerals of the Hungarian provs. are coal and lignite, salt, silver, gold, lead, copper, and iron ores. **Manufacturing industries** are advancing rapidly, especially in the Austrian provs. The regions in the neighbourhood of the chief coal supplies, northern Bohemia, Moravia, and Silesia, which have long been the principal seats of such industries, have naturally remained so under the changed conditions due to the application of machinery. Elsewhere manufactures are carried on chiefly in the capital and other large or considerable towns of the eastern Alpine provs. The most important articles produced are woollens, linens, cotton, jute, raw iron, and iron and steel wares, glass, porcelain, wooden wares, sugar, beer. Among the specialties of the woollen industry of Austria may be mentioned the fez caps made for the eastern markets, which are of great importance for the products of Austrian manufacturing industry generally. Raw, including cast, iron is made chiefly in Styria and Carinthia, and the northern coal-producing provs., and is worked chiefly in Upper Austria and Styria. Agricultural implements (scythes, &c.) and agricultural machinery take a high place among the wares of this class. Glass-making has long been a specialty of Bohemia. In Hungary the principal manufacturing industries, so far, are flour-milling and others connected with the preparation of agricultural produce. The **means of communication** include, besides a network of railways, a great length of navigable rivers. Among the more noteworthy railways are the Brenner and Semmering lines [**Alps,** PASSES, **IV.** (2) and (3 *e*)]. There is no railway as yet across the Stelvio Pass, the route followed by the shortest carriage road between Vienna and Milan, and none from Trieste up the valley of the Isonzo and across the Predil Pass. There are only one or two railways across the eastern and southern Carpathians (*q.v.*). Both in Austria and Hungary, part of the railway system belongs to the state. It was on the Hungarian state railways that the system of zone tariffs, according to which the fare is increased only at intervals of several miles (in Hungary after the first two stations, 10 to 16 m.) was first tried (for passengers on the 1st of August 1889, for goods on the 1st of January 1891). It was afterwards adopted on the Austrian railways. Of the waterways, the most important is the Danube, which is navigable by steamers throughout the empire. Of the tribs. of the Danube, the Theiss is navigable by steamers to Tokay, the Drave to the confluence of the Mur (which is navigable to Graz), and the Save to Sissek, at the confluence of the Kulpa. The Moldau-Elbe steamer navigation is of importance, from Prague downwards. The principal **imports** are raw cotton, grain (principally maize), raw wool, coffee, and tobacco; the principal exports grain (principally wheat and barley), sugar and molasses, timber, animals, and woollen manufactures. The only commercial seaports of consequence are Trieste (Austrian) and Fiume (Hungarian), but there are numerous small ports and fishing towns on the islands and coasts of Dalmatia. The **monetary system** of A.-H. is on a silver basis. The money of account is a florin (gulden) of 100 kreutzers, and the standard coin a two-florin piece of the gross weight of 385.209 grains troy, nine-tenths fine. For many years, however, the actual currency has consisted of inconvertible paper, which has circulated at the rate of about 12 florins nominal value to the £1 sterling. Steps are now being taken to introduce a metallic currency on a gold basis. The metric system of **weights and measures** is now obligatory. The **population** is one of the most diverse in Europe. Its constituents, on the basis of language, are shown in thousands in the following table, according to the census of 1890:—

	Austria.	Hungary.
Non-Slavonic—		
German	8,462	2,106
Italian	674	21
Roumanian	209	2,592
Magyar	8	7,431
Gipsies	..	95
Others	...	85
Slavonic—		
Bohemian, Moravian, and Slovaks	5,473	1,938
Polish	3,721	...
Ruthenian	3,107	383
Slovene	1,176	94
Servian and Croatian	644	2,604

The Germans inhabit the Alpine provs. N. of the Drave, and in Tirol N. of Trent, the outer parts of Bohemia on the SW. and N., the N. and S. of Moravia, and the NW. of Silesia, and are found scattered in larger or smaller districts in other parts of the empire. The Italians are found in the S. of Tirol, and on the coasts and islands of the Mediterranean. The Roumanians are almost confined to the S. and SE. of Transylvania. The Magyars, a people speaking a language belonging to the Finno-Tatar or Uralo-Altaic family, form the great bulk of the population in the lowlands of Hungary. Of the Slavonic-speaking peoples, the Bohemians and Moravians (or Czechs) are nearly confined to the interior of Bohemia and Moravia and the middle portion of Silesia; the Slovaks inhabit the mountainous or hilly tracts in the N. of Hungary, the E. of Silesia, and the SE. of Moravia; the Poles belong chiefly to Galicia; the Ruthenians to eastern Galicia, Bukovina, and the NE. of Hungary (the middle Carpathians); the Slovenians to the Alpine provs. S. of the Drave (Carniola, Görz, and Gradisca, and the SE. of Carinthia), and the Servians and Croatians to the Hungarian provs. S. of the Drave, along with the E. of Istria and the islands in the Gulf of Quarnero. Large numbers of Jews speaking the languages of the people among whom they are settled are scattered over the eastern parts of the empire N. of the Drave, where they form the trading population. Of late years, about 35–50,000 of the population have emigrated annually, the principal destination being North America. **Government.**—Austria formerly held the first rank in the Germanic confederation, which was dissolved in 1866, the event leading to the formation (1867) of the Austro-Hungarian monarchy. Under this organisation the western and the eastern part of the empire form two virtually independent states, the connection between both being formed by the hereditary sovereign—called emperor in Austria proper, and king in Hungary—and by a legislative body for common purposes (chiefly foreign affairs, military and naval affairs, and finance), entitled Delegations. These are two in number, each composed of sixty members, twenty in each from the upper, and forty in each from the lower houses of the Austrian and Hungarian parliaments respectively. They meet and vote separately, except after three interchanges of opinion on some question, when, in case of continued disagreement, the question is settled without discussion by a vote of the combined delegations. The legislation for Austria is vested in a parliament, called *Reichsrath*, formed of a chamber of lords (of princes of the imperial house, nobles or hereditary members, seventeen archbishops and bishops, and life members nominated by the crown, this last class outnumbering all the others together), and a chamber of representatives composed of members elected indirectly to represent rural districts, and directly to represent towns, chambers of commerce, and the larger landed proprietors. The franchise is exercised by all males paying at least five florins in taxes annually. The Hungarian constitution was first granted in 1222 by the golden bull (*bulla aurea*) of King Andrew II., often suspended, and finally re-established in 1867, but modified in 1885. Parliament (in German *Reichstag*, in Hungarian *Orszaggyülés*) has likewise two chambers. The upper chamber, called the House of Magnates, is composed of the archdukes of full age, all hereditary peers paying at least 3000 florins a year in land tax, 40 archbishops, bishops, and other dignitaries of the Roman Catholic and Greek Churches, 11 representatives of the Protestant confessions, 82 life members appointed by the crown, 17 *ex-officio* members, and 3 delegates of Croatia-Slavonia. The first two classes make up about two-thirds of the chamber. The lower chamber is composed of representatives elected by all male citizens of 20 years of age paying direct taxes to a small amount, or belonging to certain classes (professional and other), whether paying such taxes or not. The provs. both of Austria and Hungary have legislatures (diets) of their own for dealing with local affairs. The **joint revenue** of A.-H. is mainly derived from the common customs duties, Austria paying 70 per cent., Hungary 30 per cent. of the net proceeds of these duties; a per cent. of the deficiency is paid by Hungary. A fixed sum of 30,312,920 florins is paid annually by Hungary towards the expenses of the common debt

contracted before 1868. The separate revenue of the Austrian provs. is derived mainly from direct taxes, excise duties, customs duties, salt and tobacco duties, and government properties (posts and telegraphs and railways). The Hungarian revenue is derived from similar sources, the government properties in this case including, however, crown domains and forests, horse-breeding establishments, mines, and factories. **Military service** is obligatory on all. Normally it begins at the end of the twentieth year. From that age men are liable for ten years' service in the army (three years in the line) or its reserve, or twelve years in the Landwehr or its reserve, or twelve years in one of the branches of the navy, viz., the marines, the naval reserve, or the Seewehr. The Landwehr, the marines, and Seewehr are called out in time of peace only for periodical instruction and drill. All men from the end of their eighteenth to the end of their forty-second year belong to the Landsturm, which is called out only by special command of the emperor, but which can be used for filling up gaps in the army and Landwehr. The principal fortresses are Josephstadt, Theresienstadt, Olmütz, Cracow, and Przemysl (a fortified and entrenched camp) in the N.; Karlsburg, Arad, and Temesvar in the E. of Hungary; Orsova, Peterwardein, Eszek, Brod, Alt-Gradiska, and Karlstadt in the S. There are entrenchments round Lemberg in the SE., and Komorn on the Danube in western Hungary is also fortified. Pola in Istria is the chief naval station, and the coast towns of Zara, Ragusa, Cattaro, Sebenico, and Budua, and the harb. of Lissa, all have fortifications. As regards **religion,** the empire is divided into archbishoprics, bishoprics, Protestant superintendencies, and parishes. In the Austrian provs. in 1890 nearly 80 per cent. of the population were Roman Catholics, nearly 12 per cent. Greek Catholics, 2.4 per cent. non-united Greeks, or members of the Greek Oriental Church, 1.8 per cent. Protestants, and 4.8 per cent. Jews; in Hungary, in 1890, about one-half Roman Catholics, one-fifth Protestants, 15.1 per cent. non-united Greeks, 9.6 per cent. Greek Catholics, and 4.2 per cent. Jews. Education has made rapid strides in German Austria, and is very general in Hungary proper; the law requiring that in every prov. of the empire every child between the ages of six and twelve (in all the Austrian provs. except Istria and Dalmatia, Galicia and Bukowina, every child from six to fourteen) shall be educated either in the school or at home. There are eleven universities: those of Vienna, Prague (one German and one Bohemian), Budapest, Cracow, Lemberg, Graz, Innsbruck, Czernowitz, Klausenburg, and Agram; and there are seven government technical high-schools, at Vienna, Prague (one German and one Bohemian), Graz, Lemberg, Brünn, and Budapest. **Historical Notes.**—The history of A.-H. is to a large extent a dynastic and family history. It may be held to begin with the conquest of the Avars in the region now belonging to Lower Austria in 791–99. Soon after this conquest the margraviate of the Eastern Marches (*Ostmark*) was there founded, and this subsequently came to be known as the *Oesterreich* (E. kingdom, in Latin form *Ostarrichi*), a name first met with in documents in 996. For more than two and a half centuries this margraviate belonged to the family of Babenberg (Bamberg), and during their tenure Upper was united to Lower Austria, and the two were erected into a duchy (1156). The house of Babenberg came to an end in 1246, and after that date Austria was held till 1276 successively by the Margrave of Baden and the King of Bohemia, who in the latter year was compelled to cede Austria and Styria (which had already been joined to Austria under the Babenbergs) to Rudolf of Habsburg, and in 1278 lost his life in battle with Rudolph. Since then the Austrian dominions have belonged uninterruptedly to the Habsburg family, but have at different times been subdivided among branches of that family. In 1335 the Habsburgs came into the permanent possession of Carinthia and part of Carniola; in 1363 acquired the Tirol proper, and most of the remainder of Carniola, and about the same date some of the counties and other terrs. of Vorarlberg, the remainder being acquired at different dates down to 1523. In 1379 the Habsburg possessions were divided between two houses, one holding Lower Austria and the other Inner Austria, which at first comprised Styria, Carinthia, and Tirol, and in 1382 added Trieste and its terr. In 1496 all the Habsburg dominion was again united in the hands of one ruler, Maximilian (the son of Frederick III.), under whom the possessions of the family were permanently increased by the acquisition of Görz and Gradiska, parts of Tirol in the NW. in 1507, and other parts of the S. in 1518. In 1526 the family possessions were further increased by the addition of Bohemia, Moravia, and the greater part of Silesia (including most of the terr. afterwards ceded to Prussia), as well as Croatia and Hungary, or rather western Hungary, that is, so much of the kingdom as was not then held by the Turks. After the long wars with Turkey that ensued, the possession of the whole of Hungary except the Banat of Temesvar, along with Transylvania (previously surrendered by Prince Michael II. in 1696) and Croatia, was conceded to Austria in the peace of Karlowitz in 1699. The Banat of Temesvar was added in the peace of Passarowitz in 1718. In 1772 eastern Galicia and half of Cracow were acquired in the first partition of Poland; in 1776 Bukowina (which had been occupied in the previous year) was ceded by Turkey; and in 1795 the remainder of Galicia and Cracow became Austrian in the third partition of Poland, although these last acquisitions were not finally confirmed till 1846, at the close of the changes of the Napoleonic period and the period following. Meanwhile the Austrian terr. was increased in the W. and SW. by the addition of the Innviertel, a narrow strip on the r. bk. of the Inn and Salzach, between the Danube on the NE. and the Salzach on the SW., ceded by Bavaria in 1779; Istria and Dalmatia, ceded by Venice in the peace of Campo Formio in 1797; the secularised bishoprics of Trent and Brixen in Tirol, annexed in 1803; and the terr. of Salzburg, assigned to Austria by the peace of Pressburg in 1805. Since 1878 Bosnia and Herzegovina have been occupied and administered, and the sanjak of Novi-bazar occupied by Austria, under the treaty of Berlin, though all three remain under the suzerainty of Turkey. In the preceding sketch only those terrs. are mentioned which still remain under Austrian rule, and the sketch accordingly requires to be completed by an enumeration of the principal terrs. that have been at one time Austrian, although they are so no longer. Already in the thirteenth century, when Rudolf of Habsburg came into possession of Austria, the family held considerable terrs. in the Aargau, Thurgau, and Zürichgau (Switzerland), in the Black Forest, in the Sundgau (S. of Alsace), in Alsace proper, and elsewhere. Several dists. in Switzerland were lost through the defeats of Sempach and Näfels in 1386–88, others in Aargau, &c., in 1415–17, Thurgau in 1461, and the last remnants in the peace of Lunéville in 1801. The possessions in Alsace and the Sundgau were ceded to France in the peace of Westphalia in 1648. The Breisgau in Baden was Austrian from about 1368 to the peace of Campo Formio in 1797. The Netherlands (that is, the whole of the present Belgium and Holland, with Luxembourg and the county of Artois, but excluding the large bishopric of Liège) and Burgundy were claimed after the death of Charles the Bold in 1477 by his son-in-law, Maximilian of Austria, but ultimately Burgundy was divided in the peace of Senlis (1493), the duchy falling to France, and the part known as the Franche Comté assigned to Philip the Fair, son of Maximilian. The Netherlands were also handed over by Maximilian to his son, who married Johanna, heiress of Aragon and Castile, Naples and Sicily, and became the father of the Emperor Charles V. In 1519 Charles succeeded to the Austrian dominions, and thus united these under his rule along with his Spanish inheritance, including Burgundy and the Netherlands, as well as Spanish America, Naples, and Sicily, which had already fallen to him; but in 1521 he handed over the Austrian terrs. to his brother Ferdinand, retaining the Spanish for himself. Among the Austrian possessions at that time was Würtemberg, acquired in 1520, and retained till 1534. Lusatia, which was acquired along with Bohemia in 1526, was ceded in 1635 to Saxony. In 1714 the Spanish Netherlands (nearly equivalent to the modern Belgium and Luxemburg, with the exception of the bishopric of Liège) became Austrian once more in the peace of Rastatt (confirming that of Utrecht), and remained so till the peace of Campo Formio in 1797. The Milanese terr., also acquired in 1714, and the rest of Lombardy, acquired in 1735, were Austrian till 1859. Silesia, which had been increased in 1675 by the acquisition of the duchies of Liegnitz, Brieg, and Wohlau, was all ceded to Prussia in the peace of Breslau in 1742, excepting only the small strip that remains under the name of Austrian Silesia. Parma and Piacenza were Austrian from 1735 to 1748 (peace of Aix-la-Chapelle). The peace of Passarowitz, in which the Banat of Temesvar was ceded to Austria, also handed over to that power Servia as far as the Timok, and Little Walachia, or the Banat of Craiova (Roumania as far E. as the Aluta), but these latter were retained only till 1739. Venetia, which was annexed to Austria by the Congress of Vienna in 1814–16, was given up in 1866 at the close of the war with Prussia and Italy. See also **Tuscany.** Though from 1437 onwards the emperors of the old German empire always belonged to the house of Habsburg, and were for the most part rulers of the Austrian dominions, the portions of those dominions lying E. of Moravia and E. and S. of the Alpine provs. never belonged to that empire. The title Emperor of Austria was first assumed by Francis I. in 1806, when the old empire of Germany came to an end. **The circle of Austria,** one of the ten circles into which the German empire was divided in 1495–1512, embraced nearly all that portion of the present Austrian dominions lying to the W. of Hungary and S. of Bohemia and Moravia, with the exception of Salzburg and territory not belonging to the empire (Trieste, Dalmatia, &c.).

Australind, post-tn., W. Australia, Wellington co., near the W. ct., 90 m. S. by W. Perth.

Austonley, par., Eng., Yorkshire, W. Riding, Colne Valley div., near Huddersfield. P. <1500.

Autrey lès Gray, vil., France, dep. Haute Saône, 24 m. NE. by E. Dijon, arr. and 6 m. NW. by W. Gray, with blast-furnaces producing excellent iron. P.<2000.

Autun, tn., France, dep. Saône-et-Loire, at the confluence of the Arroux and Ternin, 44 m. SW. by W. Dijon; finely situated on a hill in a rather broad high valley surrounded by mountains; cap. of arr., with a bishop's see held at the time of the revolution by the celebrated Talleyrand; a seat of trade and manufactures, among which may be mentioned as a specialty the making of a kind of thick cloths used as horse-wrappings. Its present name is a corruption of *Augustodunum*, the celebrated and flourishing Roman town which succeeded *Bibracte*, cap. of the Ædui. Among the remains of the Roman period may be mentioned the gates of Arroux and St. André, and the ruins of a temple of Janus. Its cathedral, twelfth century, has a fine bell-tower of the fifteenth century. Alt. 940 ft. P. 11,300.

Auvergne, an old prov. in central France, taking its name from the ancient *Arverni*, now forming, for the most part, the deps. of Puy-de-Dôme, Cantal, and Haute-Loire; cap. Clermont.

Auvergne, Mountains of, France, chiefly in the deps. Puy-de-Dôme and Cantal, separating the basins of the Allier, Cher, and Creuse from those of the Lot and Dordogne. These mountains extend over an area about 70 m. long by 15–40 m. broad, and form intricate groups, which throw out contreforts to the N. and S., and present the highest points of the interior. They consist principally of volcanic masses (basalts, trachytes, scoriæ) heaped up in cones or poured out irregularly over a granite platform, presenting scenes of the wildest and most picturesque grandeur. There are three great volcanic centres: in the N. the Dômes, the highest of which is the Puy-de-Dôme (4805 ft.); immediately to the S. the Monts Dore, including the highest summit of all, the Puy-de-Sancy (6185 ft.); somewhat further to the S. the group containing the Plomb du Cantal (6095 ft.), and the Puy Mary (5850 ft.).

Averham, par., Eng., Nottinghamshire, Newark div., on the l. bk. of the Trent, 2 m. W. by N. Newark. P.<250; eccles. par. (**A. with Kelham**) P.<500.

Averias, vil., Uruguay, dep. Treinta y Tres, 132 m. NE. by N. Montevideo.

Averno, small lake, Italy, 9 m. W. Naples, occupying the

crater of an extinct volcano which in ancient times gave forth mephitic vapours, and was hence believed to be the entrance to the infernal regions.

Avers, val., Switzd., in the S. of cant. Grisons, opening from the SE. into the Hinter-Rhine valley, containing the hamlet of **A.** or **Cresta** (16 m. W. St. Moritz), one of the highest inhabited places in Europe (alt. 6400 ft.).

Aversa, tn., Italy, Campania, prov. Caserta, 9 m. N. Naples. P. 24,000.

Aves, or **Bird Islands,** a group of small Venezuelan islands to the E. of the Dutch island of Buen Ayre, producing guano. **2.** A small barren islet in the E. of the Caribbean Sea, 140 m. W. Dominica.

Avesnes, fortified tn., France, dep. Nord, 24 m. S. Mons, cap. of arr. P. 5300.

Avesnes-les-Aubert, vil., France, dep. Nord, arr. and 7 m. ENE. Cambrai, manufactures of linens and cambric. P. <5000.

Avesnes-le-Comte, vil., France, dep. Pas de Calais, 11 m. W. Arras. P. <2000.

Avestad, Sweden. See **Afvestad.**

Aveton Gifford, par. and vil., Eng., Devonshire, Totnes div., on the Avon, 11½ m. W. by S. Dartmouth, PM.O. P. <1000.

Aveyron, riv., France, a shallow stream flowing W., S. and again W. through deps. A. and Tarn-et-Garonne, partly on the NW. frontier of dep. Tarn, finally joining the R. Tarn, 6 m. below Montauban; length, 150 m.; not navigable.

Aveyron, a dep. in the SW. of the Central Plateau of France, partly bounded on the N. by the R. Lot, and traversed from E. to W. by the Riv. A., in the S. by the Tarn; divided into five arrs., Espalion, Millau, Rodez, Saint-Affrique, and Villefranche; cap. Rodez. Its surface is high (Rodez, 2075 ft.) and very varied, presenting a perpetual succession of mountains, plateaux, grassy valleys and deep ravines, and the external communications are consequently very defective, especially in the country dists. In the region N. of the R. Lot, a group of granite mountains succeeds the barren plateau of calcareous rock [**Causses**] of the centre and S. of the dep. In this group extinct craters abound, and the mountains of Aubrac, which form the NE. boundary of A., are entirely volcanic in character. The canton to which these mountains form the E. border is called Viadène, and is distinguished for its wild scenery. The Lot is the only river navigable within the dep. About two-fifths of the surface is arable. It is only in the W. dist. that vineyards are found, but all sorts of grain are cultivated, though in quantities barely sufficient for the consumption. The Laguiole and Roquefort cheeses are noted, the latter even in foreign countries. The most extensive forest is that of Aubrac. Foremost amongst the mineral products is coal, Aubin and Millau being the chief mining centres. The slate and marble quarries are productive, and the silver mines of this dep. were formerly prosperous. In ancient writings the inhabitants of A. are called Ruteni, and the name of Rouergue came to be applied to the dist. In 859 the county of Rouergue became the appanage of the eldest sons of the Counts of Toulouse. In 1589 it was finally united to the crown of France. Area, 3386 sq. m. P. (1891) 400,467. See **France,** table.

Avezzano, tn., Italy, Abruzzi e Molise, prov. Aquila, 32 m. E. by N. Tivoli. Alt. 2285 ft. P. 6400.

Aviano, tn., Italy, Venetia, prov. Udine, 33 m. NE. by N. Treviso. P. 6000.

Avich, Loch, a lake, Scot., Argyllshire, in the W., drained E. by R. Avich into Loch Awe. Alt. 311 ft.

Aviemore, stn., Scot., Inverness-shire, on the H. R., 27 m. S. Nairn, PMT.O.

Avigliana, tn., Italy, Piedmont, prov. and 13 m. W. Turin, on the r. bk. of the Dora Riparia. P. 3500.

Avigliano, tn., Italy, Basilicata, prov. and 8 m. NW. Potenza. P. 17,000.

Avignon (the ancient *Avenio*), city, S. France, cap. dep. Vaucluse, occupying a plain on l. bk. of the Rhone, 14 m. S. Orange, just above the influx of the Durance; seat of an archbishop. It has many scientific and literary establishments, among these the Calvert Museum, which includes a large public library; also numerous manufactures, those of silk being the chief. In the fourteenth century the city had a population of nearly 100,000. It was the residence of the popes from 1309 to 1376 (a relic of which epoch is to be seen in the fine ramparts and the ancient palace of the popes), and remained under the jurisdiction of the Holy See till 1791, when it was united to France. Mean temp., yr. 56.8° F., Jan. 40.6°, July 73.4°; rainfall, 22.44 in. P. 37,600.

Avila, walled tn., Spain, prov. A., 37 m. SW. by W. Segovia, 55 m. WNW. Madrid, on the R. Adaja, at the lower end of the beautiful Val de Ambles; from 1482 to 1807 the seat of a university. P. 10,900.

Avila, prov., Spain, occupies the southernmost angle of Old Castile, is in a large measure a region of romantic highlands belonging to the Sierra de Gredos, a range separated by the picturesque longitudinal valleys of the upper Alberche and Tormes from the high plain of Alava, which slopes towards the N. The lower tracts produce grain, the higher in the S. principally fine wool (merino). See **Spain.**

Aviles, tn., Mexico, Coahuila, 115 m. NE. by N. Durango.

Avilés, seapt., Spain, prov. Oviedo, 14 m. W. by N. Gijon. P. (comm.) 10,200.

Avington, par., Eng., Berkshire, Newbury div., 6 m. W. by N. Newbury, 2½ m. E. Hungerford stn. P. <250.

Avoca, tn., Victoria, Gladstone co., on A. Riv., 32 m. ENE. Ararat. P. <2000.

Avocet Rock, a small isolated patch of coral in the S. part of the Red Sea, with only 15 ft. of water over it, in 14° 22′ 8″ N., 42° 41′ 32″ E.

Avoch, par. and fishing vil., Scot., Ross-shire, on the W. shore of Inner Moray Firth, 6 m. NNE. Inverness, PMT.O. Par. 8030 ac., P. <2000; vil. P. <1500.

Avola, tn., Sicily, on the E. ct., prov. and 13½ m. SW. Syracuse, at the foot of a hill once crowned by an older town called A., which was destroyed by an earthquake in 1693. The famous honey of Hybla is still produced near. P. 13,000.

Avon, 'water.' See *Ab.*

Avon, riv., Canada, Nova Scotia, flows N. into Minas Basin.

Avon, hamlet, Eng., Hampshire, New Forest div., on the A., 6 m. NE. Bournemouth, 1 m. NE. Herne stn.

Avon, par., Eng., Wiltshire, Wilton div., on the A., 2½ m. NW. by N. Salisbury. P. <250.

Avon, or **East Avon,** riv., Eng., rising in Wiltshire, and flowing S. through that county and Hampshire into the English Channel at Christchurch; passes Amesbury, Salisbury, and Downton in Wiltshire, Ringwood in Hampshire; not navigable.

Avon, or **Lower Avon,** riv., Eng., rises in the Cotswold Hills, Gloucestershire, flows S. through Wiltshire, and W., partly through, partly on the N. boundary of Somerset, past Bath and Bristol, to the estuary of the Severn; 62 m. long. See **Bristol** and **Kennet and Avon Canal.**

Avon, or **Upper Avon,** riv., Eng., rises near Naseby, Northamptonshire, and flows SW. partly on the border of Leicestershire, then through Warwickshire and Worcestershire, and enters the Severn at Tewkesbury in Gloucestershire; passes Rugby, Warwick, Stratford, and Evesham; navigable to Harvington, about 5 m. above Evesham; 96 m. long.

Avon, riv., Eng., in the S. of Devonshire, flows S. into Bigbury Bay, in 3° 50′ W.

Avon, riv., Scot., Banffshire, flows NE. then N. to the Spey.

Avon, riv., Scot., flows NE. then NNW., and joins the Clyde at Hamilton.

Avon, riv., Scot., forms part of the W. frontier of Linlithgowshire, and enters the Forth below Grangemouth.

Avon, tn., U.S., Connecticut, Hartford co., on Farmington R., 9 m. W. by N. Hartford. P. <1500.

Avon, tn., U.S., Massachusetts, Norfolk co. P. <1500.

Avon, vil., U.S., New York, Livingston co., 19 m. S. of Rochester by rail. P. <2000.

Avon, small riv., Wales, Glamorganshire, flows SW. into the Bristol Channel at Aberavon.

Avon, riv., W. Australia, flows NW., and joins the Swan at Northam.

Avon, Loch, lake, Scot., Banffshire, at the source of the Avon, 15½ m. E. Kingussie.

Avon, Nether. See **Netheravon.**

Avonbeg, riv., Ire., in the E. of co. Wicklow, flows from Mount Lugnaquilla SE. to the Avonmore.

Avonbridge, vil., Scot., Stirlingshire, on the N. B. R., on the Avon, 4½ m. SSE. Falkirk, PM.O.

Avondale, par., Scot., Lanarkshire, S. div., containing Strathaven town; 37,533 ac. P. 5100.

Avondale, tn., U.S., Alabama, Jefferson co. P.<2000.

Avondale, vil., U.S., Ohio, Hamilton co., a suburb of Cincinnati. P.<5000.

Avon Dassett, par., Eng., Warwickshire, Rugby div., 6½ m. NNW. Banbury, 2½ m. SW. by W. Fenny Compton stn., PM.O. P.<250.

Avon Downs, settlement, Queensland, Bell co., 130 m. W. by S. Mackay.

Avonhead, vil., Scot., Lanarkshire, in New Monkland par. P.<750.

Avonmore, place, Ire., E. co. Wicklow, bar. Ballinacor North, 9½ m. W. by N. Wicklow, barracks 1 m. to the W.

Avonmore, riv., Ire., in the E. of co. Wicklow, flows SE. then S. till it unites with the Avonbeg to form the Avoca.

Avonmouth and **Avonmouth Dock,** stns., Eng., Gloucestershire, at the mouth of the Avon, on the r. bk., PMT.O. (**Avonmouth**). See **Bristol.**

Avon Plains, tn., Victoria, Kara-Kara co., 175 m. NW. Melbourne. P. (of tn. and dist.)<3000.

Avonport, vil., Canada, Nova Scotia, King's co., on R. Avon, 57 m. by rail from Halifax. P.<1500.

Avontuur, settlement, Cape Colony, dist. and 3 m. SSE. Uniondale, 100 m. SSE. Beaufort West.

Avonwick, place, Eng., Devonshire, Totnes div., near S. Brent stn., P.O.

Avoyelles, par., U.S., Louisiana, crossed by 31° N. and 92° W., bounded on the E. by the Atchafalaya R.

Avranches, tn., France, dep. Manche, on a hill near the W. ct. and the mouth of the Seé, 16 m. SE. Granville, cap. of arr., with a library containing some valuable MSS. which belonged to the old abbey of Mont St. Michel. On the site of its old cathedral, demolished 1799, is preserved the stone on which Henry II. of England is said to have knelt to receive absolution for the murder of Becket. P. 7600.

Avratynskiya (Ovratynskiya), hills, Austria and Russia, spurs of Carpathians, stretching through Galicia and Volhynia, 1120 ft. at Białozórki.

Avre, two rivs., France, one joining the l. bk. of the Somme above Amiens, navigable for 19 m. by small vessels; the other flowing E. into the Eure, its lower course partly on the frontier of deps. Eure and Eure-et-Loir, used for irrigation and as a source of water-power.

Avtura, vil., Russia, Caucasia, govt. Terek, dist. and S. of Groznyi. P. 3020.

Aw, awa, 'water.' See *Ab.*

Awah, mun. tn., Brit. India, NW. Provs., dist. Etah, 34 m. NE. by E. Agra. P. 5700.

Awaji, less properly **Awadzi,** isl. and prov., Japan, between Honshiu and the NE. of Shikoku I. Noted potteries.

Awamasoko. See **Awanyakusa.**

Awamba, tribe, central Africa, inhabiting the forest region of the Semliki valley.

Awanyakusa, or **Awamasoko,** a tribe occupying a rich but marshy plain at the head of Lake Nyassa. *Scot. Geog. Mag.,* 1890, pp. 281, 282.

Awarua Harbour, same as **Bluff Harbour,** New Zealand.

Awas, mt., Ger. SW. Africa, about 160 m. E. Walfisch Bay. Several spots at its base seem to be fit for cultivation.

Awatere, settlement, New Zealand, South I., Marlborough co., 46 m. SE. Nelson, on the Awatere R., which flows NE. into Cook stn.

Awbridge, eccles. par. and hamlet, Eng., Hampshire, New Forest div., 10 m. WSW. Winchester, P.O. P.<500.

Awe, Loch, lake, Scot., in the W. of Argyllshire, 23 m. long SW. to NE., ⅓–1 m. wide, fed by the Orchy from the NE. and the Strae from the NNE., drained by the **R. Awe** WNW. into Loch Etive from an arm near its N. end to the S. of Ben Cruachan (pass of Brander). At its N. end is the fine ruin of Kilchurn Castle on an island connected at low water with the mainland. Alt. 116 ft. Area 15.6 sq. m.

Awe, Loch, lake, Scot., Sutherland, 10 m. SW. by W. of the head of Loch Shin.

'Awertah, vil., Palestine, *Gibeah Phineas* in the O. T. 32° 10′ N., 35° 17′ E., 4 m. SSE. Nablus.

Awkley. See **Auckley.**

Awlis Combe, par. and vil., Eng., Devonshire, Honiton div., 13 m. SE. by E. Tiverton, 2 m. WNW. Honiton, P.O. P<500.

Ayr, settlement, Canada, Ontario, Waterloo co., 46 m. ENE. London.

Ayr, riv., Scot., flows W. through the middle of Ayrshire, entering the Firth of Clyde at the town of A.; not navigable except at its mouth. The 'Water of A.' stone, used for whetting fine-edged tools and for polishing marble and metals, is found in its bed near the town.

Ayr, royal and parl. burgh, seapt. tn. and par., Scot., cap. co., at the mouth of the A. Riv., 32 m. SSW. Glasgow, on the G. & SW. R. Lat. of lighthouse, 55° 28′ 17″ N., long. 4° 38′ 26″ W., with a fixed light on the N. pier. Of the two bridges ('twa brigs') celebrated by Burns, the 'auld brig' is the upper, and probably dates from about the end of the fifteenth century. The new bridge was built in 1785–88, but had to be rebuilt in 1878–79. The Wallace Tower, built in 1834 to replace an older structure so-called, is 113 ft. high. The A. Academy, founded in the thirteenth century, received a royal charter in 1798. A. is the seat of carpet, flannel, and other woollen manufactures, shoe-making on a large scale, &c. Its harbour is composed of a tidal basin, with 5000 ft. of quays and a depth of 19 ft. at ordinary high water; another basin, 300 ft. by 250 ft., with a depth of 23 ft. at ordinary spring tides; and a dock, 600 ft. by 400 ft., with a depth of 21 ft. at ordinary spring tides. There is a patent slip 800 ft. long, with 1200 tons lifting power. Alloway, the birthplace of Burns, and Burns's monument, are within 2½ m. of A. on the S. A. itself was the birthplace of Macadam, the celebrated road engineer (born 1756). It unites with Campbeltown, Inveraray, Irvine, and Oban (forming the A. dist. of burghs), to send one member to House of Commons. P. royal burgh (1891) 9512; mun. burgh (1851) 17,600; (1871) 17,900; (1891) 24,800; parl. burgh, 23,800; parl. dist. of burghs, 46,200.

Ayre, small isl., Balearic Is., S. of Minorca.

Ayre, Point of, the most northerly point of the Isle of Man.

Ayron, riv., Wales, Cardigan. See **Aeron.**

Ayr Road, stn., Scot., Mid Lanarkshire, on the C. R., 2½ m. SSW. Wishaw.

Ayrshire, maritime co., Scot., having W. the Firth of Clyde. Surface in the E. and SE. mountainous, elsewhere hilly; and along the coast, especially in the N., the land is fertile. For principal crops and live-stock, see **Appendix,** pp. 10–12. Agriculture has been much improved, and drainage carried to a large extent. Great attention is paid to the breeding of stock (A. gives name to a breed of cattle long valued for their milking qualities), and manufacture of cheese, for both of which the county is famed. The rocks belong chiefly to the Carboniferous system, including a large area of coal-measures, in the N., to the Silurian system in the S., and to the Old Red Sandstone in the middle (between the Ayr and Girvan rivers). Coal is mined at Ayr, Dalmellington (*bl.*), *Patna,* Maybole, Drongan, *Coylton,* Irvine, Stevenston (*bl.*), Beith, Kilwinning (*bl.*), *Dalry, Kilbirnie* (*bl.*), *Dreghorn,* Kilmarnock (*bl.*), Galston, Hurlford, Muirkirk (*bl.*), Auchinleck, *Cumnock* (*bl.*), and New Cumnock; and ironstone is also produced at the places in italics, while there are blast-furnaces at the places with (*bl.*) after their names. Fire-clay, ganister, limestone, and honestone [**Ayr,** river] are also obtained. The principal manufactures are various branches of the woollen industry, and the chief manufacturing towns are Kilmarnock, Kilmaurs, Stewarton, and Ayr. A. consists of three dists., Carrick in the S., Cunningham in the N., and Kyle in the centre; it comprises 46 pars. For parliamentary purposes the co. is divided into North and South Ayr, each sending one member to House of Commons. 722,229 ac. P. (1891) 226,283.

Ayrshire, co., Queensland, crossed by 22° S. and bounded on the W. by the Diamantina.

Ayrshire Downs, settlement, Queensland, Ayrshire co., 325 m. SW. by W. Townsville.

Aysgarth, par., Eng., Yorkshire, in the SW. of the Richmond div. of the N. Riding, on the Ure, 13½ m. SW. by W. Richmond, on the NE. R., PM.O. P. <250. Near it **A. Force,** a fine waterfall (*Scot. Geol. Mag.,* 1885, p. 411).

Azeglio, vil., Italy, Piedmont, prov. Turin, 23 m. WNW. Vercelli. P. <3000.

Azemur, vil., Tunis, 39 m. E. by N. Tunis.

Azerbaijan, or **Aderbaijan** (the ancient *Media Atropatene*), prov. in the extreme NW. of Persia. It includes part of Armenia, and is inhabited by Persians, Armenians, Tatar-Turks, Kurds, Arabs, and others; in religion Shiah and Sunni, Mohammedans and Christians. Surface mountainous; highest mountains, Ararat, about 17,000 ft., in the NW. corner of the prov., partly also in Turkish and Russian Armenia; Savalan Dagh, between the N. end of Lake Urumia and the Caspian, 15,792 ft. (Curzon); Mount Sahend, 11,630 ft. (Curzon), to the E. of the southern half of Lake Urumia. Its valleys are fertile, yielding wheat, maize, rice, cotton, hemp, madder, tobacco, and saffron, so that it is reckoned one of the most productive regions of Persia. Its great deficiency is that which is general in Persia, the lack of means of communication. 'There are no roads, not even the most elementary ones, between village and village, hamlet and hamlet' (*Consular Report*, Annual Series, No. 423). Principal rivers, the Aras (*Araxes*), forming its N. frontier, its trib. the Kara Su, and in the S. the Kizil Uzen. Lake Urumia, 4360 ft. above the sea (Curzon), is wholly comprised in this prov. Chief cities, Tabriz, Urumia, Ardebil, and Khoi. Area about 40,000 sq. m.; P. <1,000,000. See **Persia,** and as to ethnology, *Scot. Geog. Mag.*, 1890, pp. 84–93.

Azerley, par., Eng., Yorkshire, W. Riding, in the N. of the Ripon div., 3½ m. NW. by W. Ripon. P. <500.

Azincourt, usually spelt in English history **Agincourt,** vil., France, dep. Pas de Calais, 20 m. S. by W. St. Omer; scene of the victory of the English under Henry V. over the French under Charles VI., on Oct. 25, 1415. P. <1000.

Azizie, vil., W. of Asia Minor, 39 m. SSE. Smyrna, on the railway to Aïdin

Azjer, Azgar, Ajer, or **Adzer,** tribe, Africa, inhabiting the plateau of Tassili, western Sahara, adjoining the SW. of Fezzan.

Azmaveth, place named in O. T. See **Hizmeh.**

Aznalcóllar, comm., Spain, prov. Seville, dist. Sanlúcar la Mayor. P. <4000.

Azógues, tn., Ecuador, cap. prov. Cañar, 73 m. ESE. Guayoquil. Near it are exhausted mines of mercury (Spanish *azógue*), and to the NE. the silver-mines of Pilzhun. P. 4000.

Azores, or **Western Islands** (Portuguese *Açores* = 'hawk' islands), a group of nine islands in the N. Atlantic Ocean, between 36° 55′ and 39° 44′ N., 25° and 31° 16′ W., belonging to Portugal, from which they are distant about 800 m. W. Shortest sea route to Liverpool 1460 nautical miles. They consist of the following islands:—St. Mary (Santa Maria), St. Michael (San Miguel), the two easternmost, the second being the largest of all; Terceira, Graciósa, San Jorge, Pico, Fayal, these five forming the middle group (27°–29° W.); Flores and Corvo, both W. of 31°, with some rocky islets. They are of volcanic origin, with steep and rugged coasts, and abound in deep ravines and elevated mountains, the highest being on the island of Pico (whence the name meaning 'peak'), 7610 ft. The climate of the islands is healthy; in the summer months dry and fine, but throughout the rest of the year often stormy or foggy, and very moist. The islands are subject to violent earthquakes, are well watered and fertile, producing excellent wines, all kinds of grain and pulse, with bananas, oranges, pine-apples, and other fruits, tobacco, and sweet potatoes, these last used in distilling a kind of spirit. After prolonged cultivation, the leading vegetable products seem to become subject to disease, necessitating a change of culture. All the quadrupeds are of European introduction. The chief exports are the products above mentioned, the chief imports manufactured articles, tropical products (coffee, tea, sugar), and wood. The inhabitants are a mixture of Portuguese and negroes, with traces of Flemings descended from a colony introduced by Isabella of Burgundy in 1466. There is a large emigration from the islands, principally to Brazil, the United States, and the Sandwich Is. The Azores were first colonised by the Portuguese in the fifteenth century, at which time they were uninhabited and covered with forests. They form a colonial government, of which the cap. is Angra, in the island of Terceira; but Ponta Delgada and Ribeira Grande, in St. Michael, are larger towns. Horta is a town on Fayal. Since Aug. 1893 the islands have been connected by cable with Lisbon. Mean temp., Jan. 36.7° F., July 73.4°. Area, 922 sq. m. P. 270,000 (293 to the sq. m.).

Azotus, place named in N. T. See **Esdûd.**

Azov, or **Azof,** tn., Russia, govt. Ekaterinoslav, near mouth of the Don, 29 m. ESE. Taganrog. P. 16,600.

Azov, Sea of (the ancient *Palus Mœotis*), an extensive lagoon of S. Europe, between 45° 20′ and 47° 18′ N., 35° and 39° E., entirely surrounded by the Russian dominions NE. of the Black Sea, with which it communicates only by the Strait of Kerch or Yenikale (ancient *Cimmerian Bosporus*), in which the navigable channel is now being deepened to 22 ft. Another entrance to it is now being cut across the isthmus of Perekop. Length SW. to NE. about 235 m., greatest breadth 110 m.; water brackish. The Don enters it at its NE. extremity. The SE. shore is low; the NW. shore, and both shores of the narrower part of the sea in the NE. rise to 150–75 ft. The SW. is formed by the long and narrow sandy penin. of Arabat, which separates it from the Sivash or Putrid Sea. It is very shallow [**Berdyansk, Taganrog, Mariupol**], but of great importance to Russian commerce. Chief trade in corn, wool, &c., exported from S. Russia, linseed, iron, copper, &c. It appears to be gradually filling up, and its muddy shores are very unhealthy. The fisheries of this sea are important. It is usually frozen from the beginning of December to the end of March.

Azpeitia, tn., Spain, Guipuzcoa, 17 m. SW. by W. San Sebastian. About 1½ m. up the valley is the monastery of Ignatius Loyola, founder of the Jesuits. The building includes a tower of the house in which he was born. Close by are hot medicinal (sulphurous) springs. P. 6600.

Baagö, small isl., Denmark, in the Little Belt, between Fyen (Funen) and Schleswig, separated from Fyen by B. Sound, with vil. of same name; with a lighthouse, visible 10 m. Mean temp., yr. 45.6° F., Feb. 32.3°, July 60.7°. P. 875.

Ba'albek, Syrian, 'city of the sun' (the *Baalath* of Scripture, and *Heliopolis* of the Greeks), a ruined city of Syria, formerly of great size and magnificence, situated on the lower declivity of Anti-Libanus, in a valley, opening into the plain of Bekâ'a.

35 m. N. by W. Damascus, in 34° 0′ 36″ N., 36° 11′ 40″ E. Its remains, more extensive than those anywhere else in Syria except at Palmyra, comprise three temples, two formed with immense stones, besides numerous columns, altars, and the vestiges of the city walls, 2 m. in circuit. The date of its origin is lost in remote antiquity. A great temple, one of the wonders of the world, was erected by Antoninus Pius. It continued a place of importance down to the time of the Moslem invasion; was sacked in 748, and finally pillaged by Timur Bey in 1400. The present village, to the E. of the ruins, contains about a hundred mean houses. Alt. 3840 ft.

Bab, pl. *Bibân*, Arabic, 'gate.'

Bába Búdan, a spur of the W. Ghâts, India, Mysore, which strikes E. for 15 m., leaving a narrow opening at its W. end for the passage of the Bhadra, then S. in an unbroken line for 20 m., enclosing between itself and the main chain of the Ghâts a rich but unhealthy valley. To this spur belong three peaks above 6000 ft. high, among these Mulaina-giri, 6317 ft., the highest in the W. Ghâts. On the slopes of Kalhatti, one of these peaks, is a hill station, a resort of Europeans during the heat. Coffee was first planted in India on another part of this spur towards the close of the seventeenth century, by a Mohammedan saint named Bába Búdan.

Baba-burun (the ancient *Lectum promontorium*), cape, Asia Minor, at the mouth of the Gulf of Adramyti, opposite the I. of Mitylene, in 39° 28′ N., to the SE. of Mount Ida.

Bacup, mun. bor. (incorporated in 1882), Eng., East Lancashire, Rossendale div., 6 m. SSE. Burnley, on the L. & Y. R. The town has grown rapidly; in 1798 the population was 1426. This rapid growth is due to the extension of various manufactures, especially cotton, spinning and weaving (in the district are many large co-operative cotton mills). There are also large iron and brass foundries, machine shops, and at Irwell Springs (near the source of the Irwell) a large work for Turkey-red dyeing. P. (1881) 25,000, (1891) 23,500.

Bad, German, 'bath,' in place-names frequently *Baden.*

Badacsony, hill in the SW. of Hungary, co. Zala, noted for its wine (so-called Tokay).

Badágara, tn., Brit India, Madras, dist. Malabar, on the W. ct., 26 m. NNW. Calicut. P. 8000.

Badajoz (the ancient *Pax Augusta*), a strongly fortified frontier city of Spain, cap. prov. B., on l. bk. of the Guadiana, at the mouth of the Rivillas, 132 m. E. Lisbon and 12 m. E. the fortress of Elvas (Portugal). It is strengthened by outworks, and by the fortified height of San Cristobal, and has a cathedral, hospital, and arsenal. Manufactures, soap, coarse woollens, and leather. B. was taken by the French under Soult, March 10, 1811, and by the English under Wellington, April 6, 1812. Birthplace of the painter Morales. Alt. 561 ft.; mean temp., yr. 61.4° F., Jan. 46.2°, Aug. 79.7°. P. 27,000.

Badajoz, prov. See **Spain,** table, and **Estremadura.**

Badakshan, a territory of central Asia, recognised by Britain as belonging to the Afghan dominion, between the Hindu Kush Mts. and the R. Amu (Oxus), bounded E. by that part of the Panj headwater of the Amu which flows from S. to N., and on the W. by the state of Kunduz. The country has rich well-watered valleys. In the B. hills, gold, silver, iron, copper, and lead abound; there are also mines of lapis lazuli, emeralds, rubies, and a variety of other valuable stones. Its inhabitants appear to be of pure Aryan race, of the same stock as the highland Tajiks, and are Mohammedans of the Shiah sect, speaking the Persian language. The country has been conquered by the Chinese, by the Sultans of India, by the Afghans and Uzbegs of Kunduz; but in 1859 the Afghans conquered the whole country from Balkh to the Pamir, and reinstated the ancient line of Amirs of B. on the throne, at the capital Faizabad. The dist. of Wakhán (in the Wakhán valley, and S. of that part of the Panj which flows from E. to W.) is a dependency of B. See an exhaustive account of B. in *Jour. R. G. S.*, 1872, pp. 440–448.

Badalona (the *Betulo* of the Romans), tn., Spain, prov. and 6 m. NE. Barcelona. P. 16,000.

Baddow, Little, par. and vil., on the Chelmer, 2½ m. ENE. Great B., P.O. Par. P.<750.

Badema, African tribe, on the N. banks of the Zambezi, in about 32½°–33° E., just above the place where the river turns SE.

Baden (*Aquæ Pannoniæ*), tn., Austria, crownland Lower Austria, 17 m. SSW. Vienna, with mineral springs and several palaces. P. 7700.

Baden, vil., Canada, Ontario, Waterloo co., 42 m. NE. London. P.<1500.

Baden, gd.-duchy, SW. Germany, between Würtemberg and the Rhine, 47° and 50° N. lat., and 7° and 10° E. long., about $\frac{1}{15}$ of the side of Great Britain; divided into the following eleven circles, which are named roughly in the order from N. to S., the last four from W. to E.:—Mosheim, Mannheim, Heidelberg, Karlsruhe, Baden, Offenburg, Freiburg, Lörrach, Waldshut, Villingen, Konstanz (Constance); cap. Karlsruhe. Larger part of B. mountainous and hilly; there is no great plain except the valley of the Rhine. Chief mountains, Schwarzwald [**Black Forest**], Odenwald, and Kaiserstuhl. The Odenwald, N. of the Neckar, is less elevated than the Black Forest, and in its western part descends abruptly to the Rhine valley; it is densely covered with oaks, beeches, and pines. Highest point, Katzenbuckel (2060 ft.). The Kaiserstuhl (1825 ft.), between the Rhine and the Dreisam, is entirely isolated from the Black Forest, in the plains NW. of Freiburg. The most important of the rivers is the Rhine; it enters B. W. of the Lake of Constance, and leaves the gd.-duchy N. of Mannheim; rectification of its course ('Rheincorrektion') between Basel and Mainz, 186 m. in length. B. tribs. of the Rhine: the Main (with the Tauber), bordering B. near Wertheim; the Neckar, Murg, Rench, Kinzig, Elz (with Dreisam), Wiese, Wutach. The Brege and Brigach flow E., and at Donaueschingen form the Danube. The Rhine, Main, and Neckar are all navigable; Mannheim, on the Rhine, near the mouth of the Neckar, one of the most important river ports in Europe [Rhine]. The Kinzig and Murg are used for timber-floating. The largest lake is the Bodensee (Lake of Constance), the western portion of which belongs to B., viz., the Zeller-See (with island of Reichenau), and the Überlinger-See (with island of Mainau). Other lakes: Schluch-, Titi-, Feld-, Mummel-, Wild-, Eichner-, Ilmen-, and Mindel-See. Geologically the Black Forest region consists of granite and gneiss, overlaid with triassic sandstone ('Buntsandstein'). The formations of the Odenwald are similar, sandstone prevailing in its eastern parts. The Kaiserstuhl is of volcanic origin. The Rhine valley (within the B. terr.) consists of tertiary and diluvial deposits. In the lower regions, especially in the Rhine valley, the climate is mild and healthy (mean temp., yr., at Mannheim and Freiburg, 52° F., at Heidelberg and Karlsruhe, 50° F.). In the higher regions of the Black Forest and Odenwald the climate is raw and inclement. More rainfall on the western than on the eastern side of the mountainous dists.: rainfall, yr., Odenwald, 39.4 in.; Black Forest, 78.0 in. Vineyards are chiefly found on the hill-slopes skirting the valleys of the Rhine and Main; the wines of Kaiserstuhl, Durlach, Mülheim, and Wertheim, are known for their good quality. (As to agriculture generally, see **Germany.**) Timber is plentiful, especially in the Black Forest, and the central and upper parts of B.: fir, pine, oak, beech, birch, alder, aspen, and ash. The principal minerals are iron, silver, copper, lead, cobalt, bismuth, salt, alabaster, gypsum, chalk, coal.

Mineral waters occur at Baden, Badenweiler, Griesbach, Antogast, Petersthal, Rippoldsau, and Langenbrücken. Most of the lakes and rivers (the Neckar excepted) abound in fish. The sturgeon is found in the Danube and in the Lake of Constance. Among manufacturing industries are textiles (especially in the southern parts of the Black Forest), wooden ware, clocks, and musical instruments (Black Forest), chemical products, gold and silver manufactures; many tobacco factories and paper mills. The railways belong mostly to the state. S. of Karlsruhe the only railway that crosses B. is that which follows the valleys of the Kinzig and Brigach [**Black Forest**]. The

principal commercial centres are Mannheim, Karlsruhe, Pforzheim, Freiburg, Lahr, Offenburg. Two-thirds of the **inhabitants** are Catholics, one-third Protestants. There are two universities, Heidelberg and Freiburg. Oldest inhabitants of B.: Celtic tribes, Marcomanni, Alemanni. In the Middle Ages, the two reigning lines were those of Baden-Baden and Baden-Durlach. The former became extinct in 1771, the present reigning house is descended from the latter. In 1803 B. became an electorate, in 1806 a gd.-duchy. In 1869 it entered the N. German confederation, and since 1871 it has formed part of the German Empire. Area, 5823 sq. m. P. (1890) 2,035,000. See **Germany,** table. [**H. G. S.**]

Baden, or **Baden-Baden** (the ancient *Aurelia Aquensis*), tn., Ger., gd.-duchy B., cap. circle B., in a narrow valley of the Black Forest, traversed by the Oosbach, 19 m. SSW. Karlsruhe; owes its name to its celebrated warm mineral springs (containing sulphur, salt, and alum, 116° to 160° F.), which were known even to the Romans, and the bathing establishments connected with which attract about 40,000 visitors annually; in former times, when gaming tables (suppressed in 1872) existed here, an even greater number. The mild climate makes it also a winter resort. The seat of the former Margraves of Baden-Baden is about 2 m. distant. Alt. 600 ft. P. (comm.) 13,900.

Baffin Land, large isl., Canada, crossed by the Arctic Circle, W. of Davis Strait. Area about 236,000 sq. m.

Baffin Sea (erroneously styled a *Bay*), N. America, between Greenland and the lands or islands N. of Hudson's Bay, extending from 68° to 78° N., and 55° to 80° W. It communicates with the Atlantic Ocean by Davis' Strait on the S., with the Arctic Ocean by Lancaster Sound and Jones Sound on the W., and with the Polar Sea by Smith Sound and Robeson Channel on the N. Depth 200–1050 fathoms. The tides do not rise more than 10 ft. The surface of the sea is covered with ice during the greater part of the year, which extends from shore to shore in winter, though possessing a slow southward movement. In spring and summer the great mass, known as the 'middle ice,' begins to move less slowly southward, leaving navigable passages on the side of Greenland and America, and occasional channels, or 'crossings,' between these coasts. The coasts are mountainous, barren, and deeply indented with gulfs. Whale and seal fishing is followed. This sea was discovered by the English navigator Baffin in 1616, while in search of a passage to the Pacific.

Bafila, tn., W. Africa, to the N. of Togo-land, NE. of Salaga; has 10–15,000 huts.

Bafing ('black river'), riv., W. Africa, the W. headwater of the Senegal (*q.v.*).

Bagdad, or **Baghdad,** a city of Asiatic Turkey, cap. vilayet B., and formerly of the Saracen calíphate, on the Tigris (*q.v.*), 220 m. above where the Shat-el-Arab enters the Persian Gulf. The city stands on both sides of the river, its two portions being connected by a bridge of boats; is enclosed by a brick and earthen wall flanked with towers, and is 5 m. in circumference. A citadel, though of no great strength, here commands the passage of the Tigris. This city was long the great emporium of all the surrounding countries; but its commerce has

declined since Persia has received European goods from the N. by way of Trebizond, and on the S. direct from India and the Persian Gulf. Its transit trade with that country is still, however, important, and constitutes about one-fourth of its local commerce. *Imports.*—Merchandise (chiefly Manchester goods, also continental and Indian manufacture); loaf-sugar (chiefly from Marseilles), coffee, indigo, pepper, tobacco. *Exports.*—Wool, gum, galls, opium, carpets, dates. Steamers ply regularly between B. and Busrah. The climate is trying owing to great variations in temperature. The summer heat is excessive but dry, and the inhabitants then dwell chiefly in *serdabs* or semi-subterranean rooms. A cutaneous disease known as the 'Bagdad button' is prevalent [**Aleppo**], and cholera recurs periodically. This city, built out of the ruins of Ctesiphon and Selucia, was founded by Al Mansur in 762 or 763, and originally named *Medinet-es-Salam*, 'the city of peace.' It continued to flourish under succeeding caliphs, until sacked by Haluku in 1258. It has been held by the Turks since 1638. Mean temp. (1 yr. 1861-62), yr. 73.9°, Jan. 49°.5 F., July 94.8°; mean rainfall, 6 in. P. estimated at 150,000 (mostly Mohammedans, about one-eighth Jews).

Bagdad, vilayet, Asiatic Turkey, comprising the northern portion of Irak Arabi and the southern and eastern portion of Mesopotamia (Al Jezireh). See **Turkey-in-Asia, Irak Arabi,** and **Mesopotamia.**

Bagirmi, Begharmi, or **Baghermi,** central African sultanate, S. of Lake Chad. The greater part of the country consists of large plains which have a slight slope to the N., and only in the northern dists. of the terr. are there some hills and mountains, forming the watershed between Lake Chad and Lake Fitri. Average alt. 950 ft. The soil consists partly of lime and partly of sand, and accordingly the two principal cereals are Pennisetum and Sorghum; much Sesamum is also cultivated. The principal river is the Shari, flowing into Lake Chad; its chief tribs. are the Serbewuel. Ba-Irr, and Aukadebbe. Raw products, valuable for industrial purposes, are cotton and indigo. No valuable minerals. Cattle-rearing is practised by the Shoa or Shua, a tribe of Arabs, who have numerous flocks of cattle, horses, and sheep. The majority of the inhabitants are negroes, but, according to Lepsius, their language is in some way connected with those of the Bantu races. Area about 71,000 sq.m. P. estimated at about 1,000,000. [**H. G. S.**]

Baglan, Higher and **Lower,** two adjoining pars., Wales, Glamorganshire, Mid div., 3½ m. S. Neath, 1½ m. SE. Briton Ferry stn. B. Higher, P. <250; B. Lower, P. <500.

Baglen, Java. See **Bagelen.**

Bagne, Baignes, Bagnères, Bagnols, Bagno, Bagnolo, &c., different forms found in French and Italian names, from the Latin *balneum, balnearium,* meaning 'bath,' 'bathing-establishment.'

Bagnères-de-Bigorre (the ancient *Aquensis Vicus*), a town of France, celebrated for its mineral springs, dep. H. Pyrénées, cap. arr., on l. bk. of the Adour, at the entrance of the valley of Campan, 31 m. SE. by E. Pau. It has various manufactures, the most noted being those of 'barèges,' and has several marble-works utilising the products of numerous quarries round about. Its waters (sulphurous and ferruginous) vary in temp. from 66° to 125° F. They were resorted to by the Romans, and are annually visited from May to October by thousands of strangers. The neighbourhood abounds in places of interest, among which may be mentioned the works by which the waters of the Lac Bleu are used for the irrigation of the valley. P. 6800.

Bagnères-de-Luchon (the ancient *Aquæ Onesiæ*), tn., France, dep. H. Garonne, cap. cant., in valley of same name in the Pyrenees, arr. St. Gaudens, 5 m. from the Spanish frontier, 30 m. SE. Bagnères-de-Bigorre. It has sulphurous thermal springs (100°–136° F.), and a bath establishment, frequented from May to October. P. <4000.

Bagnes, Val de, a branch of the Rhone valley, about 30 m. long, running W. to SE., Switzd., cant. Valais, watered by the Dranse, with vast glaciers, among them the Getroz glacier (r. bk. Dranse), the lower end of which has occasionally blocked the course of the river, causing the formation of a large lake, which on the bursting of the ice-barrier, as in 1597 and 1818, has caused disastrous floods. P. <5000.

Bagno-a-Ripoli, tn., Italy, prov. and 2 m. E. Florence. P. 14,000.

Bagno-in-Romagna, tn., Italy, Tuscany, prov. Florence, 33 m. WSW. Rimini, with mineral springs. P. 8000.

Bagnoles, or **Bagnolles,** vil., France, dep. Orne, in a valley, 13 m. SE. Domfront. It has hot saline springs (temp. 82° F.), and cold ferruginous springs and baths. P. <2000.

Bagnolo, comm., Italy, Lombardy, prov. and 8 m. SSW. Brescia. P. 3000.

Bagnols, tn., France, dep. Gard, on the Cèze, arr. Uzès, 10 m. W. by N. Orange; centre of a coalfield. P. <4000.

Bagnols-les-Bains, vil., France, dep. Lozère, 58 m. NW. by N. Nimes, arr. and 8 m. E. Mende; with sulphurous and ferruginous spring. P. <2000.

Bahádur Khel, vil., Brit. India, Punjab, dist. Kohat, 65 m. SW. by S. Pesháwar, near B. K. salt-mine.

Bahádurpur, vil., Brit. India, Assam, dist. and 23 m. ESE. Sylhet.

Bahaghs, electoral div., Ire., co. Kerry, dist. Caher.

Bahal, tn., Brit. India, Punjab, dist. Dera Ismail Khan, 90 m. NNW. Múltán.

Bahama, or **Lucayos Islands**, a group of 29 islands and 661 islets (called *Cayos* or *Keys*), in the W. Indies, belonging to Great Britain, lat. 21° to 27½° N., long. 72° to 79° W., separated from Cuba and Florida S. and W. by the Great and Little B. channels. Only twenty of the islands are inhabited. *Guanahani* (*q.v.*), one of the group, was the first part of the new world discovered by Columbus in 1492. First settlement of English in 1629. Possessed by Spain in 1641, and restored to England in 1783. Most of the islands are mere coral rocks, but some are of tolerable size, as Abaco, the Great B., Eleuthera, Cat Island, Andros, New Providence, Watling [see **Guanahani**], Exuma, Long and Crooked Is., Mayaguana, Great Key, and Great Inagua. The soil is mostly composed of heaps of limestone and shell, with a thin covering of vegetable mould. Chief products, cotton, maize, Guinea corn, salt, sugar, turtle, pine-apples, and vegetables. The cultivation of sisal fibre has now become an important industry. Labour is deficient for the successful culture of cotton. Government vested in a governor, a council of 9 members, and a House of Assembly of 29 members elected by the inhabitants, of whom the majority are negroes. The colony now forms a diocese of itself, under a bishop. Salt and pine-apples and sponges are important items of export. Connected (1892) by telegraph cable with Jupiter Inlet, Florida. Numerous wrecks and casualties occur in this archipelago, and the islands are subject to severe cyclonic gales. Annual rainfall, 45 in., rainy season June to Oct. Nassau, or New Providence, is the cap. and seat of govt. Annual revenue about £50,000; exports about £120,000 to £180,000 (mainly to the United States). Area, 4466 sq. m. (three-fifths of that of Wales). P. (1871) 39,200; (1891) 47,565.

Bahama, Grand or **Great**, one of the Bahama Is., near the N. extremity of the group, 70 m. E. Florida, and 80 m. W. to E., by 10 m. in breadth. P. <1000.

Bahama Bank, Great and **Little**, are shoals among the W. India Is.; the former between 22° and 26° N., 75° and 79° W., having S. and W. the Bahama old and new channels. On it are the islands Providence, Andros, and Exuma. The Little Bank, NW. of the foregoing, between 26° and 27° N., 77° and 79° W., has on it the Great Bahama and Abaco islands.

Bahama Bank, a shifting sand across Ramsey Bay, Isle of Man, with a light-vessel, 1½ m. SE. of SE. tail of the bank, in 54° 19′ 40″ N., and 4° 12′ 55″ W., visible 11 m.

Bahama Channel, Old and **New.** The former separates the Great Bahama Bank and Cuba; the latter, also called the **Gulf of Florida,** is between the Great and Little Bahama Banks and Florida, and forms a part of the channel of the great Gulf Stream, which flows here at the rate of from 2 to 5 m. an hour.

Bahar-Kuta, riv., central Africa. See **Shari.**

Baharutse, an African tribe in the SE. of the Protectorate of Bechuanaland and the W. of the S. African Republic.

Bahawalpur, tn., India, cap. of B., 55 m. S. by E. Múltán, about 2 m. from the l. bk. of the Sutlej, surrounded by a mud wall 4 m. in circuit; 5 m. from B. the Indus Valley Rly. crosses the Sutlej by an iron bridge 4258 ft. in length. P. (1881) 13,600; (1891) 18,700; Moham. 11,100; Hindus, 7500.

Bahawalpur, native state, India, in relation with the govt. of the Punjab, and, except Kashmír, the largest of the native states connected with that prov.; bounded W. by the Indus and Sutlej, E. by Rájputána; two-thirds desert. See **Punjab,** table.

Bahhola, tn. See **Bahila.**

Bahia, Spanish and Portuguese, 'bay.'

Bahia, state of Brazil, on the Atlantic Ocean, to the S. of Sergipe, Alagoas, Pernambuco, Piauhy, E. of Goyaz, N. of Minas, Espirito Santo. Cabral landed at Cabralix Bay (Porte Seguro) on his discovery of Brazil (24th April 1500). Healthy and suited for white colonisation in the interior, viz., Caetete, Monte Alto, Maracai, Jacobina, Feira de St. Anna, 400 m. of sea-coast. See **Brazil.**

Bahia, or **S. Salvador da B.,** tn., state B., 13° S., 38° 31′ W., 800 m. NNE. from Rio de Janeiro, at the entrance of *B. de Todos os Santos* (Bay of All Saints), founded in 1510 by Thomar de Sousa, was the first capital of Brazil (1549–1763). It is the second seaport in Brazil. The commercial or lower town (*Cidade Baixa* or *Praia*) extends for 3 m. along the bay. The upper town (*Cidade alta*) is in amphitheatre form on a range of hills to an alt. of 270 ft., from which a splendid panorama of the bay and sea is obtained. The 'Hoisting Machinery Co.' (English) connects the two towns. There is a natural history museum, gallery of paintings, public library, theological seminary, technical college (*artes e officios*), academy of fine arts, academy of physical science and medicine. It is the residence of the Roman Catholic Metropolitan of Brazil. Some of the most important cotton, tobacco, and sugar factories in all Brazil are there. Shipbuilding yards (merchantmen). Unhealthy. Exports, tobacco, coffee, feathers, rubber, medicinal plants, coco-nuts, piassava and coquilla nuts, tapioca, hides, dye and cabinet woods, brandy, diamonds, bullion. Submarine cable to Pernambuco, Pará, Rio. To Southampton, 4366 m. Mean temp. (3½ yrs., 1881–84), 79.2° F.; rainfall (5 yrs.), 95.1 in. P. 200,000 (60,000 white).

Bahia Blanca ('white bay'), large bay, Argentine Republic, in 39°–39½° S.

Bahia Blanca, tn., Argentine Republic, in the S. of prov. Buenos Aires, terminus of railway from La Plata, 3 m. from its harbour on bay of same name, in dist. suitable for viticulture. Mean temp. (14 yrs., 1870–83), yr. 59.5° F., Jan. 73.2°, July 46.8°; rainfall (20 yrs.), 19.25 in. P. <2000.

Bahia de Campo-Azul, Central America. See **Blewfields.**

Bahia de Todos os Santos, or All Saint's Bay, Brazil, in 13° S., 7 m. in circuit, 12–32 fathoms deep, with numerous islands, viz., Itapasica, Beinbarra, Fontes, Bom Jesus, Medo, Cajahiba, dos Frader, da Maré. The soil (*Massaper*) of the country around the B., the *Reconcavo* (for 20–40 m.), is very rich, and well adapted for tobacco and sugar-cane cultivation.

Bahia Honda, seapt., Cuba, 53 m. W. by S. Havana, at the head of a bay of the same name, on the N. ct., in 83° 11′ W., with roadstead for large vessels; copper and coal obtained in the vicinity. P. 8500.

Bahia, Islas de la. See **Bay Islands.**

Bahila, or **Bahhola,** tn., in the interior of Oman, E. of Arabia, said to be strongly fortified.

Bahira, or *Baheira*, Arabic, 'lake,' applied as a proper name to the Lake of Tunis. See **Tunis.**

Bahiuda, desert. See **Bayuda.**

Bahlingen, vil., Ger., gd.-duchy Baden. circle Breisgau, dist. Emmendingen. P. <3000. See also **Balingen.**

Bahn, tn., Ger., Prussia, prov. Pomerania, 22 m. S. by E. Stettin. P. <3000.

Bahr, *Bakhr*, or *Bahar*, Arabic, 'lake,' 'river,' 'sea.'

Bahraich, dist., Brit. India. See **North-West Provinces.**

Bahraich, tn., Brit. India, Oudh, cap. dist. B., 65 m. NE. Lucknow. P. 24,000.

Bahramabad, tn., Persia, prov. Kerman, 57 m. W. Kerman.

Bahramghát, tn., Brit. India, Oudh, Bara Banki dist., on the r. bk. of the Gogra, here spanned by a bridge of boats; connected by rail with Lucknow, 39 m. distant.

Bahrámpur, tn., Brit. India, Punjab, dist. Gurdáspur, 50 m. NE. by N. Amritsar. P. <3000.

Bahrein, or **Aval Island** (Arabic, 'two seas'; the ancient *Tyros* or *Tylos* and *Tharras*), surrounded by smaller islands and shoals; in the Persian Gulf, B. Bay, near the coast of Arabia, 200 m. S. of Bushire. Supposed by Bent to be the ancient land of Punt and original home of the Phœnicians. Second island Moharek, NE. of B., separated from it by strait 1 m. broad, fordable at low water. Other islands are mere rocks. Commercial cap., Manameh, in NE. of B. Moharek, on island Moharek, is the seat of govt. Islands ruled by sheikh under British protection. Mohammedans. B. I., 27 m. long, and 10 m. broad, chiefly of coral formation; in centre are limestone hills, Jebel Dukhan, 400 ft., the rest flat, mainly desert, with cultivated patches and palm groves yielding excellent dates. Several submarine fresh-water springs off the coasts. Entrance to harbour too narrow for large vessels; basin of moderate depth, except near the shore, to which no boats can approach; no docks or wharves. The pearl fishery here em-

ploys about four hundred boats. Annual value of pearls about £200,000. The proximity of B. to the Arabian coast, and the shallowness of the intervening sea, render it well suited to be a commercial emporium, such as it was under the Portuguese rule in the sixteenth century. Climate very unhealthy during summer on account of prevailing mists. P. (?) 68,000. See *Proc. R. G. S.*, 1890, p. 1.

Bahrein, oasis, with salt lake in the Libyan desert, in 28° 31 N., 26° 30′–33′ E.

Bahr-el-Abiad, and **Bahr-el-Azrek,** rivs., Africa. See **Nile** and **Shari.**

Bahr-el-Ghazal ('river of the gazelles'), riv., Africa, Sudan, issues from Lake Chad and flows 300 m. NE. before spreading out in the marshy tract of the Bodele, where it comes to an end.

Bahr-el-Ghazal, one of the chief tribs. of the White Nile, l. bk., flows E. through a marshy country to the E. of Darfur, and enters Lake No in about 9° N. Its principal feeders come from the Niam-Niam country to the S.

Bahrikh, oasis. See **Beharieh.**

Bahr-Kuti, riv., central Africa. See **Shari.**

Bahr-Sefid-Boghaz. See **Dardanelles.**

Bahr Yusuf ('river of Joseph,' so called because popularly ascribed to Joseph the Israelite), an artificial irrigation channel, 270 m. long, led from the l. bk. of the Nile a little below Siut, and ending in the Fayum (*q.v.*).

Baládgi, tn., Brit. India, Bombay, dist. and 65 m. SSE. Dhárwár. P. 5100; Hindus, 4600.

Baigal-Dalai, or **Kosso-gol,** lake, Mongolia, in 50° N., 118° E.

Baignes. See *Bagne.*

Baigorry, val., France, dep. Basses-Pyrénées, arr. Mauléon, watered by the Nive. The inhabitants speak Basque.

Baikal, an extensive lake of Eastern Siberia, between 51° 20′ and 55° 30′ N., 103° and 110° E. It is crescent-shaped, and is surrounded by high and wild mountains rising 3000 to 4000 ft. above its surface. Length, SW. to NE., 370 m.; breadth, 20 to 70 m.; alt. about 1400 ft. Greatest ascertained depth, 4500 ft.; average depth of its southern part, about 800 ft. Divided by Olkhon I. and Svyatoi Nos Penin. into two basins, which may be considered as two longitudinal valleys connected together by a transverse passage. Receives the Upper Angara, Barguzin, and Selenga, all from the E., and very many mountain streams; its waters are discharged through the Lower Angara into the Yenisei. Frozen from January to the first part of May. Forms part of the line of communication between Russia, the Amur, and China, steamers plying between Listvenichnoye, at the outlet of the Lower Angara, and Posolskoye, in the delta of Selenga, smaller steamers plying up this latter to Verkhneudinsk, while in the winter the lake is crossed on the ice, and a temporary station is established half-way. Besides, a road has been built around its S. coast, past Kultuk, at the foot of the very steep slopes of the mountains. The Siberian railway will follow this road; but a temporary connection will be established from Listvenichnoye to Posolskoye by means of steamers, and, perhaps, also by means of a temporary railway on the ice. Shores very thinly peopled. Great fisheries in the N. (60,000 cwts. of cured salmon; 7000 fishermen). Area, 13,197 sq. m.

Baiso, comm., Italy, prov. and dist. Reggio nell' Emilia. P. <4000.

Baitarani, riv., India, Orissa, flows first SW. then E. to join the Bráhmaní, the united stream, under the name of the Dhámrá, flowing into the Bay of Bengal; navigable 15 m. up.

Baja, municip., Hungary, prov. Bács-Bodrog, 33 m. W. by N. Maria Theresiopel. P. (1850) 14,000; (1869) 18,100; (1890) 19,500.

Bajana, tn., India, Guzerát, 52 m. W. Ahmadábád, cap. native state B.

Bajaur, a dist. belonging to the independent area NE. of Afghanistan, N. of the Kabul R. and W. of the Swat, separated from Kunur and Chitral on the W. by the Lahori Mts., about 34° 20′–35° N., 71°–71° 45′ E.

Baj-baj, vil., Bengal, 15 m. by river below Calcutta, with which it is now connected by rail, site of a fort captured by Clive in 1756.

Bajil, tn., Yemen, 36 m. ENE. Hodaida, with large Turkish fort. P. about 3000.

Bajistan, tn., Persia, 125 m. S. by E. Sebzevar, prov. Khorassan.

Bajitpur, tn., Brit. India, Bengal, 50 m. NE. Dacca. P. (1881) 4600; (1891) 9400; Hindus, 5200; Moham. 4200.

Bajmok, comm., Hungary, W. Bács-Bodrog, 14 m. SW. Maria Theresiopel. P. 7200.

Bajone, Cape, Portuguese E. Africa, at the mouth of Mokambo Bay, 13° S., 13 m. SSW. Mozambique.

Bakalahari. See **Kalahari.**

Bakalai, or **Bakelai,** tribe in the French Congo Terr., between Gabun R. and the mouth of the Ogowe.

Bakalan, Madura. See **Bangkalian.**

Bakamba, vil., W. Africa, French Congo Terr., 168 m. NNW. Boma, in 3° 30′ S., 12° 20′ E.

Bakana, vil., Niger Coast Protectorate, 4° 44′ N., 7° E.

Bakangai, vil., Congo Free State, in 2° 41′ N., 26° 45′ E.

Bákarganj, tn., Brit. India, Bengal, dist. B., 82 m. S. Dacca. P. <5000.

Bákarganj, dist., Brit. India, Bengal, the southernmost dist. of the Dacca div. and a typical part of the alluvial delta, with extensive marshes and swamps, and subject to disastrous floods. In November 1876 the islands at the mouth of the Meghná were swept by a terrible cyclone and storm-wave, which caused great loss of life. The climate is said to be one of the healthiest in Eastern Bengal, owing to the strong SW. monsoon, which keeps the atmosphere cool.

Bakasi, penin. or isl., Brit. W. Africa, between the estuaries of the Old Calabar R. and Rio del Rey.

Bakel, a vil. and French stn., W. Africa, with fort on a hill commanding native village at its base, on the l. bk. of the Senegal, 475 m. by water above St. Louis, in 14° 52′ N., 12° 28′ W. Mean temp. (1 yr., 1860–61), yr. 83° F., Jan. 77.7°, Feb. 82°. P. 4000.

Bakelai, tribe, Africa. See **Bakalai.**

Baker, settlement, Canada, Ontario, Hastings co., 70 m. NW. by W. Kingston.

Baker, co., U.S., Florida, on the N. frontier, W. of 82° W.

Baker, co., U.S., Georgia, N. of 31° N., and bounded on SE. by Flint R.

Baker, Mount, U.S., Washington, Whatcom co., 65 m. SE. by E. New Westminster (B. C.). Alt. 10,827 ft. (U.S. Coast and Geodet. Survey).

Baker City, city, U.S., Oregon, Baker co., 95 m. SSW. of the NE. corner of the state. Alt. 3418 ft. (R.R.). P. <3000.

Baker Island, a guano island, Pacific Ocean, in 0° 13′ 27″ N., 176° 29′ 26″ W., belonging to the U.S., without water and with dangerous anchorage.

Bakers Falls, U.S., New York, on the Hudson R., about the place where it finally turns S., of remarkable beauty, and furnishing a great amount of water-power.

Bakersfield, tn., U.S., California, Kern co., 105 m. NNW. Los Angeles. P. <3000.

Bakersfield, tn., U.S., Vermont, co. Franklin, about 30 m. NE. Burlington. P. <1500.

Baker Street, hamlet, Eng., Essex, SE. div., 9 m. SE. by E. Romford, 3 m. W. Stanford le Hope stn., PM.O.

Baker Street, stn., Eng., London, on the District Rly. (inner circle), the junction for the St. John's Wood line, 2½ m. W. by N. St. Paul's.

Bakersville, tn., U.S., N. Carolina, Mitchell co., included in B. tp. P. (of tp.) <3000.

Bakewell (ancient *Badican-Wylla,* 'the bath wells'), par. and market-tn., Eng., Derbyshire, W. div., 10½ m. ESE. Buxton, on the R. Wye and the M. R. It has chalybeate springs, with bath-rooms and museum; a woollen factory established by Arkwright. Chatsworth House, seat of Duke of Devonshire, is in the vicinity. Market-days, M. and F. Par. P. <3000.

Bakharich, oasis, Egypt. See **Beharich.**

Bakhcheish-köl, tn., Turkey in Europe, prov. Chatalja, at the mouth of riv. Kara-Su, 22 m. W. by N. Constantinople.

Bakhchisaral (*Bagche-serai,* Turkish, 'garden-palace'), tn., Russia, Crimea, 18 m. SW. Simferopol. Formerly residence of Khans of Crimea; has now ruins of their palaces, and many mosques and gardens. P. 15,650.

Bakhmach, tn. and rly. junc., SW. Russia, govt. Chernigov, 120 m. by rail ENE. Kiev. P. 6000.

Bakhmut, dist. tn., Russia, govt. and 125 m. E. Ekaterinoslav, important coal-mines round it (1,000,000 tons in 1891). P. 15,400.

Bakhoi, or **Bakhoy** ('white river'), the E. headwater of the Senegal, navigable to Badombe, 50 m. above its confluence with the Bafing.

Bakhtegan, or **Deria Numuk,** a large salt lake, Persia, to the E. of Shiraz, communicating in the N. with Lake Tashk or Nargis, which receives the Bundamir R. from the NW. The lake sometimes dries up, leaving a wide expanse of saline deposit. Alt. 5100 ft. *Proc. R. G. S.,* 1891, pp. 288–9, 1892, map, p. 140; *Jour. R. G. S.,* 1872, p. 202.

Bakhta, riv., E. Siberia, r. bk. trib. of Yenisei, which it joins at Chulkovo, 435 m. below Yeniseisk.

Bakhtiari, a semi-civilised tribe inhabiting the mountains and high valleys on the borders of the provs. Irak-Ajemi and Luristan in the W. of Persia, between Ispahan and Khuramabad; estimated to number 29,100 families, or about 232,800 persons (Mrs. Bishop).

Bakke, tn., Norway, prov. Lister and Mandal, 50 m. WNW. Kristiansand. P. <2000.

Bakkeveen, tn., Holland, prov. Friesland, 15 m. SW. by W. Groningen. P. <2000.

Bakony, in German **Bakonyer-wald** ('forest of Bakony'), a mountain range of Hungary, S. of the Danube, between the Raab R. and Lake Balaton, and separating the Great and Little Hungarian plains, the former of which is on its SE., and the latter on its NW. side.; highest summit Köröshegy, alt. 2340 ft. It is densely wooded, and contains quarries of excellent marble.

Baksaich, ruins, Asiatic Turkey, near the Persian frontier, 118 m. ESE. Bagdad.

Baksan, glacier, Persia. See **Elbruz.**

Baku, prov., Russia, Caucasia; has Daghestan and Elisabethpol in W., Persia in S., and Caspian Sea in E. The spurs of the main Caucasus ridge occupy its N. part, attaining to 12,000 ft. above the sea; valley of the Kur, with Mugan Steppe, in the middle; and slopes of Anti-Caucasus (Talysh), also 12,000 ft. high, in S. Watered by Kur and Arax, but deficient in water in the flat lands. Climate extreme; the average temp. at B. being, yr. 59° F., Jan. 38°, July 80°; yearly rainfall, 10 in. Immense quantities of rain (47 in.) are poured down on the slopes of Anti-Caucasus at Lenkoran. Agriculture sufficiently productive for population; extensive cattle-breeding, gardening, vine-tree, and sericulture. The extraction of naphtha on the Apsheron Penin. is growing rapidly, and from 4000 tons in 1860, it has now attained 4,600,000 tons every year. Divided into six dists.: Baku, Gheokchai, Jevat (chief town Saliany), Kuba, Lenkoran, and Shemakha. Area, 15,095 sq. m. P. (chiefly Tartars) 708,100.

Baku, cap. of above prov., on Caspian Sea, on S. ct. of Apsheron Penin., 42° 21′ N., 49° 50′ E. Old fortress; large city of an Asiatic character, surrounded by paraffin oil works. Good roadstead, visited every year by several hundred ships. Considerable trade with Persia and Astrakhan. P. 103,000.

Bakuba, tn., Asiatic Turkey, 28 m. NNE. Bagdad. Noted for the quality of its dates.

Bakuba, important Bantu tribe of the Congo basin, inhabiting the terrs. on the l. bks. of the Sankurru R. Intellectually, the B. show a higher development than that possessed by the surrounding tribes. (See Wolf, *Verhandl. der Gesell. für Erdkunde zu Berlin,* 1887.) [**H. G. S.**]

Bákud Creek, a short deep branch of the Mahánadi R., Bengal, the more southerly of the two channels leading inland from the anchorage at False Point. A bar across its mouth is dry during the last quarter of the ebb.

Bakundi, tn., western Sudan, in SE. of Sokoto, on a S. affluent of the Benue, in 8° 3′ N., 10° 35′ E. Alt. 620 ft.

Bakundu-ba-Nambeleh, vil., German W. Africa, Kamerun Terr., near the r. bk. of the Mungo, in about 4° 33′ N., 9° 27′ E.

Bal, Bally, Celtic, 'a dwelling,' 'a village,' combined with article *an* in the form *Ballin,* as in Ballintubbert; or *Ballyn,* as in Ballynure.

Bala, Celtic, in Wales, 'river-head.'

Bala, Persian, Turkish, 'high,' 'upper'; Bala Murgh-ab.

Bala, part of eccles. par. and tn., Wales, Merionethshire, on the Dee, 17½ m. NE. Dolgelly, on the G. W. R., PMT.O. Market-day, S. See **Llanycil.**

Balearic Isles, Spanish *Baleares*, a group of five islands in

the Mediterranean, consisting of Majorca, Minorca, Iviza, Formentera, and Cabrera, and forming an administrative prov. of Spain, cap. Palma. Climate temperate and healthy [**Palma**], soil fertile. The salt-pans of Iviza and Formentera are among the most important of Spain. The lighthouses of the islands are models of their kind. Submarine telegraph cables connect the group with the mainland. The name, meaning 'slingers' islands,' and having reference to the skill of the inhabitants in the use of the sling, is said by Egli to be of Phœnician or Carthaginian origin. It was originally applied only to the two larger islands. The inhabitants long remained independent. The islands came under the rule of Rome in 123 B.C. From 798 to 1238 they were under Arab rule, and for some time seat of a separate sultanate. In 1238 Majorca was conquered by the King of Aragon, and made the seat of an independent kingdom, which subsequently included the other islands, and which in 1343 was reannexed to Aragon, and under Charles V. was made part of the Spanish monarchy. See **Spain,** table, and the articles on the separate islands.

Bali, Bally, or **Little Java,** an isl. of the Asiatic archipelago, E. of Java, from which it is separated by **B. Strait** (at its narrowest 3 m. wide). Island 70 m. long by 35 m. in breadth. With Lombok, from which it is separated by the deep Lombok Strait [**Eastern Archipelago**], it forms a residency of the Dutch East Indies (*q.v.*). Two mountain chains traverse it from E. to W. Culminating point, the volcano of Gunung Agung, 11,400 ft. Island abundantly supplied with water from numerous large rivers and lakes. Exports, rice, cotton, coffee, tobacco, hides, oil, edible birds'-nests, catechu, &c. The people are said to be adherents of Hinduism, and they have certainly some Hindu institutions and practices, such as the caste-system and the burning of widows (rare), but otherwise there are few traces of that religion. Principal towns, Badong in the S., Bliling or Beliling, the chief seaport and seat of the Dutch resident in the N., and Karang-Assam on E. coast.

Bali, stn., far in the interior of the Kamerun Terr., Ger. W. Africa, in about 6° 10′ N., 9° 5′ E.

Báli, or **Bally** (census), tn., Brit. India, Húglí dist., on r. bk. Húglí, 4 m. N. Howrah. P. 16,700; Hindus, 14,900.

Balicuatro, cape in NW. of Samar I., Philippines, 12° 33′ N., 124° 15′ E., also small island a few miles to E.

Balkán, Turkish, 'mountains.'

Balkan Mountains, ancient *Hæmus,* a name applied at one time, when the orography of the easternmost of the great Mediterranean penin. of Europe was even less known than it now is, in a rather loose way to a great assemblage of mountains in the N. of that penin., now confined to a range stretching E. and W. for the most part on the frontier of Bulgaria and Eastern Roumelia, then curving north-westwards through the W. of Bulgaria and on the Servian frontier, and terminating in the Danube to the E. of the valley of the Timok. The whole range is called in Turkish Kodža (Koja) B., and in Servian Stara Planina, both names meaning 'old mountain,' though these names are sometimes restricted on maps to certain portions of the chain, the name Kodža B. being confined to the highest part of the chain, between about 23½° and 25½° E., and that of Stara Planina to the part lying to the W. of the narrow and tortuous defile of the Isker, the only river that crosses these mountains. Different portions of the chain are sometimes also distinguished by names belonging to towns in their neighbourhood, such as the Etropol B., NE. of Sofia and S. of Etropolje, the Karnabat B., N. of Karnabat, and the Emine B. (in which name some recognised the ancient *Hæmus*), the low range in the E. stretching W. from Emine. The highest peak is the Jumrukčal (7790 ft.), N. by E. of Philippopolis; the next in height are Kadimlja (7475 ft.), to the E., and Vežen (7215 ft.), to the W. of Jumrukčal, and Midžur (7105 ft.), on the Servian frontier, N. by E. of Pirot. The B. in their highest parts slope down for the most part very steeply to plains in the S., but on the N. they present a succession of terraces with easy slopes, vine-clad near the base, bearing forests higher up, and still higher covered with pastures, and intersected by numerous tribs. of the Danube, flowing through narrow defiles, leading up to mountain passes. The passes are for the most part merely baggage-tracks for animals. The principal pass-roads in the order from W. to E. are (1) across the Sveti Nikolaja Pass (4505 ft.), on the road from Lom Palanka on the Danube to the Nishava valley in Servia; (2) the Ginci Pass (4730 ft.), in the W. of Bulgaria, on the road from Lom Palanka to Sofia; (3) the road following the narrow and tortuous defile of the Isker from Sofia north-eastwards; (4) the Baba-Konak Pass (3240 ft.), on the road leading first eastwards from Sofia, then N. to Orchanie, and thence NE. to Plevna; and (5) the Šipka (Shipka) Pass (4370 ft.), on the road from Kezanlik to Trnova. Other less important passes are the Trojan Pass (3445 ft.), to the W., and the Rosalita Pass (6155 ft.), to the E. of the Jumrukčal, both on routes from Plevna to Philippopolis; the Haiduci Čokar Pass (3600 ft.), to the W. of Sliven; the Demir Kapu, or Iron Gate (3600 ft.), further E., but still a little to the W. of Sliven; and the Karnabat or Dobral Pass (2735 ft.), SE. of Šumla (Shumla).

Still further E. the mountains are nowhere of great altitude. No railways as yet cross the B. Mts., and the steepness of the southern slopes and the narrowness of the Isker defile place difficulties in the way of their construction in the regions where improved means of communication could be of most importance. Railways connecting Plevna with Sofia, and Trnova with Nova Zagora (Yeni Zagra) are, however, projected. Geologically the higher parts of the B. Mts. have a core of granite, gneiss, and metamorphic rocks. Triassic strata also abound, succeeded by Cretaceous in the N. and E., and Jurassic in the NW. See also **Cerna-gora** and **Sredna-gora.**

Balkan Peninsula, the name commonly applied to the easternmost of the three great Mediterranean penins. of Europe, between the Adriatic and the Black and Ægean Seas, now divided among various powers. See **Dalmatia, Bosnia and Herzegovina, Servia, Roumania, Bulgaria, Eastern Roumelia, Turkey-in-Europe,** and **Greece.**

Balkh, a prov. of central Asia, the ancient kingdom of Bactria, noted for its fertility, even in its present state one of the most productive tracts in Turkistán, now subordinate to Afghanistan, having N. the Oxus, E. Badakhshan, S. the Hindu Kush Mts., and W. the desert. Climate very unhealthy. Length, 250 m.; breadth, 120 m.

Balkh (the ancient *Bactra*), city, Afghanistan, 86 m. E. by S. Andkhui, now fallen to decay, with ruins extending a circuit of about 20 m. New B. is open, with a central citadel at an hour's journey N. from Old B. The road from B. to Kabul, a thirteen days' march, leads over six highly difficult mountain passes. P. 6000.

Balkhan, or **Balkan, Great** and **Little,** two mountain groups in the W. of the Russian Transcaspian Terr., separated by a sandy plain, through which runs the Transcaspian Rly. Great B. (5450 ft.) to the N. of the line; Little B. (2625 ft.) to the S.

Balkhash (Kirghiz, **Ak-Denghiz,** or **Ala-Denghiz**), lake, Russian Turkistan, 45°–47° N., 74°–78° E., separates prov. Akmolinsk from Semiryechensk; receives Ili R. and several smaller streams from the Alatau Mts. The Lepsa, Ak-su, and Karatal are lost in the marshes of its low SE. ct. Length, NE. to SW., 280 m.; breadth, 10–55 m.; depth, 50–135 ft.; alt. 900 ft. Surface frozen from November to the middle of April. In comparatively recent times it probably extended eastwards so as to include the present lakes Sassyk-kul and Ala-kul, and possibly even Ebi-Nor, in one large freshwater or slightly brackish lake, and it is still contracting, its level being lowered at the rate of about 3 ft. in 14 or 15 years. See *Nature*, xxxv., p. 182, and xxxix., p. 67.

Balolo, a large Bantu nation in the Equatorial Prov. of the Congo Free State. They inhabit the forests on the banks of the Chuapa, Bussera, and Lomami, and their settlements are interspersed with the villages of the Batwa dwarfs. The principal tribes of the B. are the Boruki, Bangombe, Dulingo, Imballa, and Kimema. Agriculture exists among them to a certain extent, but they follow no pastoral pursuits. According to V. François, all B. tribes are addicted to cannibalism. The territories inhabited by the B. belong to the most promising of Equatorial Africa, especially as the climate is more favourable to Europeans than it is in many other parts of the Congo Free State. See V. François: *Die Erforschung des Tschuapa und Lulongo,* 1888. [**H. G. S.**]

Baltí. See **Baltistán.**

Baltic Provinces, name applied to the Russian govts. of Courland, Esthonia, and Livonia, situated on the Baltic Sea.

Baltic Lake Plateau, a low plateau in N. Ger., parallel to the S. ct. of the Baltic Sea; 750 m. in length, extending from E. Prussia to Schleswig-Holstein and Jutland. Its eastern parts form broad elevations, the highest points being the Thurmberg, near Dantzig (1086 ft.), and the Kernsdorf Mt. (1027 ft.); more to the W., in Mecklenburg and Schleswig-Holstein, the altitudes decrease and the elevations become less defined, but even the last offshoots of the plateau in Schleswig and Jutland are of importance, as they form the watershed between the basins of the Baltic and North Sea. A characteristic feature of the B. L. P. is the large number of lakes and ponds, some with very irregular outlines, others occupying wide basins, or narrow river-like channels. The largest of these lakes are the Müritz-See (93 sq. m.), in Mecklenburg, and the Spirding-See (46 sq. m.), in E. Prussia. Many of these lakes (mostly very small) in the E. section (Pomerania and W. Prussia) are without visible outlet. According to the most recent investigations, the lake basins date from the glacial period, when a massive sheet of ice covered N. Germany, the ridges and hollows of the B. L. P. being due to the action of the ice. See *Geog. Jour.*, vol. i., 1893, pp. 61–62; *Petermann's Mitteil.*, 1891, p. 38–41. [**H. G. S.**]

Baltic Sea, a large sea of N. Europe, between 54° and 66° N. lat., and 9½° and 30° E. long., surrounded by Sweden, Russia, Germany, and Denmark. Its principal direction is from SW. to NE. Three straits, viz., the Sound, the Great Belt, and the Little Belt, connect the B. S. with the North Sea. Moreover, there are communications between the two seas by means of the Göta and Eider Canals, and another very important canal is at present in course of construction, the North Sea Canal (*q.v.*). The characteristic features of the B. S. are those of an inland sea. It has hardly any tides, there being at Copenhagen 1 foot, and further to the E., on the average, not more than 1 in. difference between high and low water mark. The B. S. is colder, and contains less salt than the Atlantic (total salts from ½ to 1½ per cent.). On the whole the B. S. is very shallow, its average depth being not more than 20 fathoms; towards the N. it deepens to 100 fathoms. The greatest depth which has been sounded is 216 fathoms, near the isl. of Gotland. Important parts of the B. S. are the Gulfs of Bothnia, Finland, and Riga. The German coast is characterised by the Kurische-, Frische-, and Stettiner-Haffs. The southern coasts are flat and sandy, but in the northern parts rocky coast-lines prevail. Besides the Danish isls. which partly close in the B. S. on the W., Bornholm, Öland, Gotland, Ösel, Dagö, as well as the Ålands and Quarken Is., must be mentioned. There are also innumerable cliffs, called Skaeren, surrounding the coasts of Sweden and Finland. More than 200 rivers belong to the basin of the B. S., but only five of them are large, viz., the Oder, Vistula, Niemen, Düna, and Neva. The navigation of the B. S. is of the utmost importance, but, unfortunately, more or less suspended during the winter months, many ports being blocked by ice. In severe winters large parts of the B. S. are frozen up, *e.g.*, the Gulf of Bothnia in 1875–76; and there are three cases on record that the whole of the B. S. was covered with a massive sheet of ice, viz., in 1323, 1459, and 1709. For centuries past it has been observed that the Baltic coasts of S. Sweden and N. Germany are subsiding, whilst the coasts of the Gulf of Bothnia show signs of upheaval. Greatest length, 960 m.; greatest breadth, 390 m.; area, 160,000 sq. m.; length of coast-lines, 5000 m. [**H. G. S.**]

Baltimore, vil., Canada, Ontario, Northumberland co., 66 m. ENE. Toronto. P.<1500.

Baltimore, seapt. tn., Ire., SW. ct. of co. Cork, bar. Carbery W., E. div., 5½ m. SW. Skibbereen, on B. Bay, now a thriving fishing stn., connected with Skibbereen by rail, PMT.O. P.<1500.

Baltimore, city and seapt., U.S., Maryland, co. Baltimore, on l. bk. of the Patapsco R., 12 m. from its entrance into Chesapeake Bay, 34 m. NE. Washington, in 39° 17′ N., 76° 36′ W. The city has for its harbour a deep basin of 27 ft. of water in the channel, formed by one of the arms of the Patapsco. A stream called Jones' Falls run through the northern and eastern portion of the city, and another stream, known as Gwynn's Falls, runs through the western and southern portion of what was formerly the county but now included in the city. Six lines of railway lead into the city, and an underground system connects the principal lines with the wharves and immense elevators for the storage of grain, B. being now one of the principal grain markets of the U.S. The leading industries are iron, copper, glassware, bricks, leather, flour, tobacco, clothing, furniture, and bell casting, in which it excels, also the finest quality of pottery. The canning industry is large, especially that of oysters. Rich deposits of coal, copper, and clay are found; also marble, granite, limestone, slate, and chrome. Imports include iron, salt, coffee, sugar, and fruits. Exports, petroleum, grain, flour, tobacco, cotton, machinery, and live stock. Splendid system of waterworks. Several parks and cemeteries, including Druid Hill (880 ac.) and Green Mount cemetery. Washington and Battle monuments (the former 212 ft. high) commemorate the struggle for independence. Seat of the Johns-Hopkins university (unsectarian, opened 1876), and hospital. Mean temp., yr. 55.8° F., Jan. 35.4°, July 78.5°; rainfall (22 yrs.), 42.87 in. P. (1850) 169,054; (1870) 267,354; (1890) 434,439.

Balu, isl., Burma. See **Bilú-Gywon.**

Baluba, a large Bantu tribe of the Congo basin, living between the Kasai and Lubilash Rivs.

Balúchistán, or **Beluchistan** (the ancient *Gedrosia*, which comprised the coast tracts, together with the country of the *Oritæ*, &c.), is the country to the S. of Afghanistan, composed mainly of arid [**Quetta**] and rugged tablelands, but including, in the prov. of Kachh-Gandáva, in the E., an area of low-lying plains, traversed by the Nári, Bolan, and Badra rivers. The soil is generally stony, except in these plains, where it is rich and loamy, requiring only irrigation to make it highly productive. On the E., B. is separated from Sind mainly by the Kirthár Mts. (average height about 7000 ft.) and the Pab Hills (average height about 2000 ft.), which succeed the Kirthár range on the S., and terminate in C. Monze in Sind. Where not entirely desert B. is inhabited only by sparsely scattered tribes subject to the Khan of Khelát. The principal tribes belong to two main stocks, the Baluchis, who speak an Aryan language, and the Brahuis, whose language has no known affinities with any other. The agricultural products are similar to those of Afghanistan. Special attention is given to the cultivation of the date-palm in Mekran or Makran (the SW.). Khelat, the capital, is a fortified

town at the height of 6800 ft., occupying the W. side of a well-cultivated plain. The coast-line, 600 m. long, mostly craggy, though not very high, but in some places low and sandy, has not a single harbour, but has two or three fair roadsteads, at which a small trade is carried on with British India, the best being Sonmiáni, Ormarah or Homara, and Gwadar, the last of which belongs to Oman. In the tables of the trade of Brit. India this branch of trade is entered as with Mekran and Sonmiáni. The government of the whole area is now under the supervision of the agent of the Governor-General of India, and parts of B. (including the fortress of Quetta) are now included in the British districts. The part under British rule extends from the Suláiman Mts. westward nearly to 60° E., includes in the W. the high valley of Pishin (average height about 5000 ft.), with the Khwája (Khoja or Khojak) Amrán Mts., which form the western boundary of this valley; in the SW., the whole route of the railway which has been laid from Sukkur in Sind to Pishin, and for the continuation of which towards Kandahár a tunnel nearly 2½ m. long has been pierced through the Khwája Amrán range, and on the NW. the valley of the Zhob, a trib. of the Gumál (Gomul). Almost the whole region is high and mountainous, being traversed by spurs of the Suláiman Mts., but it embraces also part of the desert plain of Kachh to the S. The railway just mentioned forms a loop before entering Pishin, one branch ascending by the Nári Pass, the other (western) branch by the Bolan Pass (5800 ft.) and the town and fortress of Quetta (5600 ft. above sea-level). Workable deposits of coal and petroleum have been found on or near the route of this railway. Area of the whole of B. about 130,000 sq. m. P. about 500,000; Brit. B. (1891) 173,00.

See *Jour. R. G. S.*, 1874, pp. 163–182 (Southern B.); *Notes on Afghanistan and Balúchistán*, by Major H. G. Raverty, Lond. 1881; *Unexplored Balúchistán*, by E. A. Floyer, Lond. 1882; *Across the Border; or, Pathan and Bilooch*, by E. E. Oliver, Lond. 1891. The whole of B. is included in Curzon's map of Persia (*Proc. R. G. S.*, 1892, p. 140).

Baluk Göl, or **Ak Deniz,** lake, Syria, 15 m. long, 12 m. NE. Antioch, drained SW. into the Orontes.

Banff (bamf), a royal and parl. burgh, seapt. tn., and par. of Scot., cap. Banffshire, at the mouth of the Deveron, 6 m. E. by S. Portsoy, with two stns., **B. Bridge,** and the **Harbour** stn., on the G. N. of S. R.; birthplace of Archbishop Sharp; has various small factories, including ironworks; shipbuilding carried on. The harbour has a water area of 4 acres, and 12–14 ft. of water on the sill in ordinary spring tides. Par. 6037 ac., P.<5000; royal burgh, P.<4000; tn. and parl. burgh, P. 7600.

Banffshire, co., Scotland, stretching from SW. to NE., where it has a coast-line on the North Sea, between Elgin and Inverness cos. on the W. and Aberdeenshire on the E. There is also a small detached part surrounded by Aberdeenshire to the S. of Huntly. Less than a third of the surface is under 500 ft. in height. This lies wholly in the N., to which part also the railways (Great North of Scotland and Highland) are confined. From the N. the surface rises on the whole to the S. frontier, which is formed by the granitic Grampian knob of the Cairngorms (Cairngorm 4084 ft., Ben Macdhui 4296 ft., the second highest mountain in the British Isles). The NE. belongs to the basin of the Deveron, which traverses a great part of the county, and in two places separates it from Aberdeenshire (principal trib. the Isla, also a B. river). The SW. belongs to the basin of the Spey, which forms part of the W. boundary, and receives from B. the Avon, with its affluent the Livet Water [**Glenlivet**], and the Fiddich. As regards agriculture, the rearing of cattle is of more importance than cropping. [See **Appendix,** pp. 10–12.] Besides the S., granite occurs towards the NE., and the greater part of the remainder of the county is composed of archæan and metamorphic rocks, small areas of Old Red Sandstone occurring, however, in the extreme NE. and extreme NW. There are no minerals of great economic importance, but there is an interesting outcrop of serpentine at Portsoy. Chief towns, Banff and Macduff, Portsoy, Cullen, Buckie, Keith, the last of which is the only inland town. Area, 410,112 ac. P. 64,200. See **Scotland,** table.

Banffy-Hunyad. See **Hunyad-Banffy.**

Bangala, or **Liboko,** stn., Congo Free State, on the r. bk of the Congo, in about 1° 50′ N., 18° 45′ E., in marshy unhealthy situation.

Bangalore, tn., India, in the SE. of Mysore, near the main water-parting of the state. Since 1811 the chief military station in Mysore, now also the seat of the British Resident. It is also a manufacturing town, noted for its carpets. In the beautiful botanical gardens numerous experiments have been made with a view to the introduction of various tropical exotics (vanilla, cacao, ipecacuanha, &c.). The climate both of B. and the surrounding country is healthy, but in the hilly jungles W. and S. malarious fever is endemic. The city is not ancient; its fort, which lies on the SW., is said to have been founded in 1537. Lord Cornwallis besieged and took B. in 1791. The cantonments lie on the NE. Alt. 3113 ft.; mean temp., yr. 73° F., Jan. 67°, April 80°; rainfall, yr. 35.6 in., May–Oct. 30.8 in. P., including Brit. stn. (1852) 134,000; (1871) 142,000; (1891) 180,000.

Bángarmau, tn., Brit. India, Oudh, dist. Unáo, 30 m. NNW. Cawnpur. P. 6000.

Bangasi, a fortified tn. of W. Africa, Senegambia, Mandingo country, on the R. Vulima.

Bangeston, hamlet, Wales, Pembrokeshire, 3½ m. SW. by S. Milford, on Angle Bay.

Banggaai, or **Bongay,** a group of small isls., Eastern Archipelago, to the E. of the middle of Celebes.

Bangi, tn., French Congo Terr., on the Ubangi, opposite Zongo, in 4° 20′ N.

Bangka, isl. See **Banka.**

Bangkálan, Bangkallan, or **Bakalan,** tn., Eastern Archipelago, on the ct., near the W. end of Madura I.

Bangkális, vil., Sumatra, on an isl. on the E. ct., at the mouth of the Siak, in about 1° 30′ N.

Bangkok, or **Bankok,** the cap. city and only important seapt. of Siam, on the Menam, 20 m. above its mouth, in a flat marshy situation; it is the 'Venice' of the E.; in 13° 38′ N., 100° 34′ E. It consists of three portions—the palace or citadel, on an island enclosed by walls, and comprising the residences of the sovereign and court, with many Buddhist temples and gardens; the city proper; and the floating town, composed of movable bamboo rafts, each bearing rows of eight or ten houses. The more solid buildings are of brick, but the dwellings are mostly of wood mounted on posts. Intercourse is carried on by water, and the Menam is navigable to the city; but a bar 5 miles from the mouth of the river, with a depth about it of only 13 to 14 ft. at ordinary spring tides, prevents the access of large vessels, the largest that can reach the wharves being of about 1500 tons burden. Railways are now in progress [**Siam**]; tramways and the electric light have been introduced; and European shipbuilding yards, rice-husking works, and works for timber-sawing have been established. For the principal exports see **Siam.** The average value of the exports is about £1,000,000 to £3,500,000, imports £1,500,000 to £3,000,000. B. is a modern city, and succeeded Ayuthia as cap. of Siam. Mean temp. (10 yrs. 1858–67), yr. 80.1° F.; mean rainfall (10 yrs.), 58.55 in. (five-sixths of this amount from May to Oct.). P. about 600,000.

Bangor, par., seapt., and fishing-tn., Ire., N. ct. co. Down, bars. Lower Castlereagh and Lower Ards, near the mouth of Belfast Lough, 5 m. N. by E. Newton Ards, connected by rail with Belfast; with a coastguard station; carries on flowering and embroidering of muslin; also a sea-bathing resort. Market-day, Tu. Par. P. 7600; tp. P. <4000.

Bangor, tnld., Ire., NW. co. Mayo, bar. Erris, 24 m. W. Ballina, with P.O. (**B. Erris**).

Bangor, settlement, U.S., S. Dakota, Walworth co., 70 m. N. by E. Pierre.

Bangor, tn., U.S., Maine, Penobscot co., at the head of the navigation, and on the r. bk. of the R. Penobscot, 58 m. NE. by E. Augusta, 60 m. from the open sea. The Penobscot is navigable to B. for vessels of 300–400 tons; about 2000 vessels annually freight lumber and timber, besides those engaged in the fisheries. P. (1880) 16,900; (1890) 19,100.

Bangor, vil., U.S., Michigan, Van Buren co., 51 m. NE. of the SW. corner of the state. P. <1500.

Bangor, bor., U.S., Pennsylvania, Northampton co., 46 m. SE. by S. Scranton. P. <3000.

Bangor, par., Wales, Cardiganshire, 5 m. E. Newcastle in Emlyn. P. <250.

Bangor (Celtic, said to mean 'high choir'), a city, mun. and contributory parl. bor., seapt., and par. of N. Wales, at the N. entrance of Menai Straits, co. and 9 m. NE. Carnarvon, on the L. & NW. R. The tidal basin is 11 ft. deep at ordinary neap, 17 ft. at ordinary spring tides. The trade consists principally in the shipping of slate from several slate-yards. It is a favourite watering-place. During the summer steamers ply daily between Liverpool, Llandudno, and B. St. Daniel founded a college at B. in 525, and about 25 years later the cathedral was built. The borough was incorporated in 1883. B. has the University College of N. Wales, and a Normal College. The borough forms part of the Carnarvon dist. of boroughs, sending one member to House of Commons. The diocese comprises the co. Anglesey, nearly the whole of Carnarvonshire, and parts of Merioneth and Montgomery. Market-day, F. Par. 6524 ac., P. 12,300; con. parl. bor. and mun. bor. P. 9900.

Bangor Erris, Ire., Mayo. See **Bangor.**

Bangor (**Monachorum,** or **Isycoed**), par., Wales, in a detached part of Flint, on the r. bk. of the Dee, 4½ m. SE. by E. Wrexham, PMT.O. (**B. Isycoed**). P. <750.

Bangor Teivi with Henllan, par., Wales. See **Henllan.**

Bang-pa-kong, riv., Siam, flows W. then SW. into the Gulf of Siam, which it enters about 25 m. E. of the mouth of the Menam, with which it is connected by canal.

Bang Pla Soi, tn., Siam, 40 m. SE. by E. Bangkok, on the E. side of the Gulf of Siam.

Bang-Tapan, tn., Siam, on the E. ct. of the Malay Penin., in about 11° 12′ N.

Bang-tse, tn., Manchuria, prov. Liautung, 102 m. SW. Kirin.

Banguey, a small isl., Brit. N. Borneo, off the N. ct., to the E. of 117° E.; turtle plentiful.

Bangwaketse, African tribe inhabiting the SE. of the Protectorate of Bechuanaland.

Bangweolo, or **Bemba,** a lake of Central S. Africa, between 29½° and 30¾° E., and extending permanently from about 10° 40′ to 11½ S., while it spreads during the rains over a marshy flat reaching to about 12¼° S. Discovered by Livingstone in 1868. The R. Chambeze is the chief affluent of the lake, joining it from the E., but it also receives numerous tributaries from the SE. and S., drained from the S. by the Luapula (*q.v.*). It contains several islands, the largest called Chiribe, Chirube, or Kirwe. Alt. 4000 ft. (Livingstone), 4260 ft. (Giraud), 3750 ft. (J. Thomson). See *Scot. Geog. Mag.*, 1889, pp. 125–34; *Geog. Jour.*, 1893, p. 109.

Banhaglog, vil., Wales, Montgomeryshire, 11 m. SW. Newtown, close to Tylwch stn. See **Llandinam.**

Banham, par., Eng., Norfolk, Mid div., 17 m. SW. Norwich, 3 m. SE. by E. Eccles Road stn., PMT.O. P. <1500.

Banhos, Portuguese, 'baths.' See *Bagne.*

Bani, tn., I. of Haiti, S. ct., rep. and 39 m. WSW. Santo Domingo, in 70° 21′ W.

Baniak Islands, a group in the Indian Ocean, off the W. ct. of Sumatra, residency Tapanuli, in 2° N., 97° E. A conical hill on the Pulo Baniak I. is a conspicuous sea-mark.

Banians. See **Baniyás.**

Bánias, vil., Palestine, *Cæsarea Philippi* in the N. T., 33° 18′ N., 35° 41′ E., 29 m. E. Tyre.

Banias, vil., Syria, on the ct., 25 m. SSE. Latakieh.

Bánihal Pass, India, Kashmír, 50 m. SSE. Srínagar, connecting the basin of the Jehlam with that of the Chenáb, in 33° 21′ N., 75° 20′ E. Alt. 9200 ft.

Bani, Jebel. See **Atlas** (of Morocco).

Baniyás, Banians, or **Banyans,** an Indian trading caste, Vishnuites in religion, originally from Gujarat, but found in Bombay and many other parts of western India, as well as in Aden, Zanzibar, &c. In the NW. Provs. and Oudh the name is applied generally to the merchant class. See **Agroha.**

Banja, Banya, Slavonic form of the Latin *balneum,* 'bath,' 'mineral spring.' See *Bagne.*

Banja, tn., Servia, prov. Aleksinac, 24 m. N. Nish, with warm springs (upwards of 110° F.), which were known to the Romans. P. <3000.

Banja, vil., Servia, dist. Kruševac. See **Jošanica-Banja.**

Banja, Dolnje, tn., Bulgaria, Eastern Roumelia, prov. Tatar-Pazardzik, 50 m. W. by N. Philippopolis. Alt. 2170 ft. P. <3000.

Banjaluka, tn., Bosnia, cap. prov. B., on R. Vrbas, 47 m. SW. by W. Brod, with hot springs. Alt. 535 ft. P. 11,400.

Banjermasin, or **Banyermassing,** cap. of Dutch Borneo, and also cap. of E. ct. and S. ct. residency (see **Borneo**), on the Martapura, about 8 miles above its junction with the Barito, in 3° 19′ S., 114° 35′ E. The houses are built on piles. It is the seat of an active trade, in the hands of Chinese and Arabs, in spices (especially pepper), diamonds, gold-dust, ratans, wax, drugs, and other exports, and in salt, cotton stuffs, iron goods, glass, rice, &c., imported. Mean temp. (8 yrs., 1851–58), yr. 80.6°; rainfall (12 yrs.), 95 in. P. 39,350, of whom 36,000 are Dayaks and Malays. For the former independent state of this name, see **Borneo.** [**J. T. B.**]

Banjumas, Banjuvanggi. See **Banyumas, Banyuvangi.**

Banka, Banca, or **Bangka,** isl., Dutch E. Indies, situated between 1° 30′ and 3° 5′ S., 105° 10′ and 106° 53′ E., on the E. of Sumatra, from which it is separated by the Strait of Banka, 7 to 17 m. wide; area, 4895 sq. m. (officially, 5024), being five-sevenths the size of Wales. An irregular oblong, B. stretches NW. to SE.; is hilly in the N. and S., with isolated granite peaks, reaching 2500 ft.; consists of ferruginous clays and

sandstones (laterite) in the middle; and has for the most part low flat coasts, marshy on the W., sand-dunes on the E. alternating with numerous cliffs, especially on the E. The W. coast is gradually rising (or the sea receding). The rivers are numerous, but of no great size. The climate is moist, the annual rainfall averaging (12 yrs.) 118 in. Heavy storms are frequent during the rainy season. The coastlands are unhealthy, particularly for Europeans. The thermometer ranges between 80° and 87° F., but goes down to 40° in the mountainous peaks of the interior. The chief vegetable productions are **wax** and honey, coco- and areca-nuts, fruits, and drugs. The crocodile and numerous birds are the principal fauna. The most valuable product, however, is tin, which is obtained both from the sand of the river-valleys and from the mountain rocks; 3500 to 5400 tons are extracted annually, principally by Chinese. Magnetic iron exists. Rice and salt rank first among the imports; cap. Muntok, in 105° 10′ E., 2° 4′ S., on the NW. coast. B. forms a separate residency of 10 dists., and has been a Dutch possession since 1608. P. of island, 80,500, of whom 56,000 are Malays and 24,000 Chinese. [**J. T. B.**]

Banka, tn., China, Formosa I., on the Sintiam R., a few miles above Tamsui, close to the tea-producing dists. P. 40,000.

Bantu, collective name of the great majority of the inhabitants of S. Africa. The Bantu races extend from the Kameruns, the Mobangi, and Upper Nile to Cape Colony, only the SW. parts of S. Africa being occupied by the Hottentot races, and the districts E. of the Victoria Nyanza by the Masai, Wakwafi, and Wandorobbo tribes belonging to the Nuba races. About the most important B. nations see **Congo Free State,** moreover, Waganda, Wanyamwezi, Barotse, Matabili, Bechuanas, Zulu, Ovambo, and Ovaherero. All B. languages are entirely different from those of the negroes proper and of the Hottentot races. In the eastern and south-eastern territories mixtures between B. and Arabs have taken place in ancient and modern times (Suahili, Kafirs, Barotse). In many countries occupied by the B., small settlements of the old aborigines of S. Africa, the Batwa, are found. [**H. G. S.**]

Barbacoas, tn., Venezuela, Miranda, 75 m. S. Carácas, on E. bank of Guarico R. P. 13,000.

Barbadanes, comm., Spain, Galicia, prov. and dist. Orense. P.<4000.

Barbados, or **Barbadoes** (said to have been first visited by the Portuguese, and named by them *Los Barbados,* 'the bearded,' with reference to the bearded fig-trees which they observed there), the most easterly of the W. India Is., 100 m. E. St. Vincent; a little more than half the size of Anglesey; length 21 m., breadth 14 m.; cap. and only seapt., Bridgetown, on W. side of island. Lighthouse on S. point of island, visible 18 m., in 13° 3′ N., 59° 31′ W. The island is composed of stratified rocks (including clays used in making fire-bricks and pottery), on which rest unconformably chalky-looking calcareous and silicious deposits (including infusorial earth), all of deep-sea origin, above which again a crust of coral limestone lies over a large part of the surface. The island is almost encircled by coral reefs, which in some parts extend 3 m. seaward. Shore low, except on the E. side; surface level, but towards the N. Mount Hillaby rises to 1104 ft. The island is free from swamps, and has a generally healthy climate, but hurricanes occur, though at long intervals. B. was taken possession of in the name of England in 1605, when it was almost uninhabited, but first received an English colony in 1625. At first indigo, cotton, ginger, and aloes were grown, and it was not till later that sugar, now the staple product, was grown with success. Aloes (*Aloe vulgaris*) is still cultivated to a small extent, and renewed experiments are being made with ginger, as well as with cacao, and other tropical products. Annual imports and exports each more than £1,000,000 in value; sugar and molasses making up three-fourths of value of exports, imports chiefly manufactures, food-stuffs, coal, timber, &c. B. is a separate colony. The government is vested in a governor, a legislative council of 9 members nominated by the crown, and a house of assembly composed of 24 elected members. B. is the headquarters of H.M. forces in the W. India command, the see of a bishop, and possesses a college, affiliated to Durham University, called Codrington College in memory of its founder, Gen. Codrington (died 1710). B. has direct steam communication with Southampton, London, Liverpool, New York, and Quebec. Shortest track to Plymouth 3498 nautical miles. It is a station of the W. India and Panama Telegraph Company [**West Indies**]. Mean temp., yr. 80.7° F.; rainfall (Bridgetown, 30 yrs.), 55.6 in.; rainy season, June to Nov. Area, 166 sq. m. P. (1851) 136,000; (1891) 182,306=1096 to the square mile, the great majority being negroes or 'coloured.'

Barbajeda, mts., Spain, belonging to the Serrania de Cuenca, prov. Cuenca, with two considerable lakes.

Barbania, tn., Italy, Piedmont, prov. and 16 m. N. by W. Turin. P.<3000.

Barbara, harb., on the S. side of Curaçao I., W. Indies.

Barbara Channel, a strait, S. America, filled with rocky islands leading S. from the Froward Reach of the Strait of Magellan, between Santa Ines and Clarence Is.

Barbara Hoofd, cape, Dutch Guiana, in 55° 42′ W.

Barbarano, comm., Italy, Venetia, prov. Vicenza, 17 m. W. by N. Padua. P.<3000.

Barbary (ancient *Mauritania, Numidia, Africa Propria*), an extensive region, comprising all the N. portion of Africa, from Egypt to the Atlantic Ocean, and from the Mediterranean to beyond the Greater Atlas, and extending between 25° and 37° N., 10° W. and 25° E. It was peopled chiefly by Moors, Numidians, and Phœnician colonists; attained celebrity under the dominion of the Carthaginians, was afterwards subject to the Romans, and occupied for nearly a century by the Vandals. The Arabs took it finally from the Romans in the year 697. See **Morocco, Algeria, Tunis, Tripoli, Barka,** and **Berbers.**

Barcelona, prov., Spain, ancient co., part of the ancient principality of Catalonia, traversed from N. to S. by riv. Llobregat; cap. B. See **Spain,** table; **Catalonia.**

Barcelona, tn., Spain, near the mouth of riv. Llobregat, on the Mediterranean, 310 m. ENE. Madrid, 440 m. by rail. Lat. 41° 21′ 44″ N., long. 2° 30′ 32″ E. Cap. prov. B., and of military dep. (Capitania) of Catalonia. Bishopric under Archbishop of Tarragona. The most important commercial and industrial centre of Spain. Good harbour, with two long piers; entrance 300 yds. wide, 20–26 ft. deep, 346 acres. On a plain surrounded by high hills, with villas, 'torres' (*towers* formerly circled as a refuge against Barbaresque pirates), picturesquely intermixed with vines, pine, orange, lemon, fig, and pomegranate trees.

Supposed to have been founded by Hamilcar Barca some 230 B.C. (*Barcina, Carthago nova*); Roman colony, 200 B.C. (Faventia-Julia-Augusta-Pia); cap. of Gothic Septimania, 533 A.D. (Barcinoma); conquered by the Moors, 713; cap. of Aquitania under the Franks and Charlemagne, and cap. of county of B. since 762; cap. of united Catalonia and Aragon (twelfth century), and then great commercial centre of E. trade (thirteenth to fourteenth century); united to Castilla under Ferdinand and Isabella (fifteenth century). Here the first commercial code, 'Consulado del Mar,' was promulgated (1279). Here Blasco de Garay tried his first steamship (1543). B. was taken by Berwick (1660), by Peterborough (1705), by Duhesme (1808). Long siege in 1823. Seat of a university (medicine, law, natural sciences, with valuable library rich in old MSS.). The archives of the ancient kingdom of Aragon are second only to Simancas (documents from 844). Several libraries (the Episcopal, with 2000 ancient MSS.). The 'Liceo' is the largest theatre in Europe (5000 spectators). All important branches of manufacture carried on, those of textiles taking the lead. Some 120,000 workmen are employed in the cotton mills. Exportations: manufactured goods, principally for the Spanish colonies, agricultural products (cork-wood, wine, saffron, anise, fruits), quicksilver, and lead. Importation: coal (from England), raw cotton (from the W. Indies). Average annual value of imports to foreign countries £1,500,000 to £2,000,000, to Spanish possessions abroad, £4,000,000 to £5,000,000. The most important port of Spain after Cadiz—12,000 ships of 2,000,000 tons yearly. Mean temp. (15 yrs.), 61° F., Jan. 47.7°, Aug. 77°; rainfall (14 yrs.), 22.8 in. Average number of rainy days, 69. The area now occupied is twice as large as that in 1868. P. (1868) 167,000; (1877) 248,943; (1887) 272,481; with suburbs, 400,000 to 450,000.

Barcelona, tn., Venezuela, cap. Bermudez, 150 m. E. Carácas, 3 m. from the coast, now connected by rail with the new port of Guanta 12 m. distant; coal deposits near. P. 12,800.

Barceloneta, fishing suburb of Barcelona, Spain.

Barcelonnette, tn., France, dep. Basses-Alpes, almost at the middle of the long valley of the Ubaye, 58 m. NW. by N. Nice, 15 m. SE. by S. Embrun. B. received its name from Reymond Bérenger, then Count of Provence, whose family belonged to Barcelona. Cap. arr. Alt. 3714 ft.; mean temp., yr. 45.8° F., Jan. 27.7°, July 65.3°. P. <2000.

Barcheston, par. and vil., Eng., Warwickshire, div. and 10½ m. SSE. Stratford-on-Avon, 7 m. E. Campden stn. P. <250.

Barchfeld, vil., Prussia, Hesse-Nassau, circle and dist. Schmalkalden. P. <3000.

Barclay, rly. stn., Canada, prov. Ontario, on the C. P. R. 1204 m. by rail W. Montreal.

Barclay, vil., U.S., Illinois, Sangamon co., 8 m. NE. Springfield. P. <1500.

Barclay, vil., U.S., Pennsylvania, Bradford co., 55 m. W. by N. Scranton, with mines of bituminous coal. P. <1500.

Barclay Sound, inlet, Canada, Brit. Columbia, on W. side Vancouver I., crossed by 49° N.; 35 m. long.

Barco, El, comm., Spain, Galicia, on the Sil, 86 m. ESE. Santiago. P. 6400.

Since 1866 the dist. has suffered seriously from malarious endemic fever, in the lower and purely alluvial tracts. Alt. 99 ft. Mean temp., yr. 78° F., Jan. 66°, April 86°; rainfall, yr. 57.7 in., May–Oct. 52.3 in., June–Sept. 42.7 in. P. 34,500; Hindus, 24,200; Moham. 10,100.

Bardwell, par. and vil., Eng., Suffolk, Stowmarket div., 8 m. NE. Bury St. Edmunds, 6 m. SE. Barnham stn., PM.O. P. <750.

Barefield, place, Ire., 4 m. from Ennis, with P.O.

Bare, hamlet, Eng., Lancashire, div. and 2½ m. NNW. Lancaster, with a stn. (**Bare Lane**) on the Morecambe branch of the L. & NW. R., P.O.

Barea, tribe, E. Africa. See **Barrea.**

Barèges, vil., France, dep. Hautes-Pyrénées, 12 m. SSW. Bagnères-de-Bigorre, with sulphurous thermal springs (88°–113° F.). The Vallée de Bastan, in which B. stands at an altitude of 4040 ft., is subject to terrible avalanches. P. <2000.

Bareilly, tn., Brit. India, NW. Provs., cap. of dist. B., 146 m. NNW. Cawnpore, for half a century the cap. of the Rohillá race. Has a government college. P. (including cantonment) (1872) 103,000; (1891) 121,000 (half Hindu, half Mohammedan).

Bärengrund, deep valley in the Riesengebirge, Bohemia, not far from the source of the Elbe.

Bärenstein, vil., Ger., kgd. Saxony, 17½ m. S. by E. Dresden. P. <3000.

Barentin, comm. and vil., France, dep. Seine-Inférieure, arr. and 10 m. NW. Rouen. The railway crosses the valley of B. by a remarkable viaduct of twenty-seven arches. P. <4000.

Barents Land, isl., in the E. of Spitzbergen Archipelago, crossed by 78½° N., named in honour of the Dutch navigator, 16th century, Will. Barents [**Spitzbergen**].

Barents Sea, between Spitzbergen and Novaya Zemlya.

Bareppa, hamlet, Eng., Cornwall, Truro div., 2½ m. SW. by S. Falmouth.

Bares, cape, Spain, N. ct. See **Vares.**

Baretun, El, ruins on the N. ct. of Africa, about 180 m. W. Alexandria, site of the ancient Parætonium.

Barflenr ('the summit or projection on the channel'), tn., France, dep. Manche, on the N. ct., 16 m. E. Cherbourg, 1½ m. S. of the **Pointe de B.,** with tidal harbour 9–16 ft. deep at high water. P. <2000. See **Gatteville.**

Barford, par., Eng., Norfolk, Mid div., 7½ m. W. Norwich, 3 m. E. Thuxton stn., P.O. P. <500.

Barford, par., Eng., Northampton, 2 m. NE. Rothwell. P. <250.

Barford, par. and vil., Eng., Warwickshire, Stratford-on-Avon div., on the Avon, 3½ m. SW. by S. Warwick, PMT.O. P. <750.

Barford, Great, par., Eng., Bedfordshire, Biggleswade div., 5½ m. ENE. Bedford, 1½ m. NW. Blunham stn., P.O. P. <750. See **Roxton.**

Barford, Little, par., on the Great Ouse, 4 m. NE. by E. Great B., 2½ m. SSW. St. Neots stn. P. <250.

Barford St. John, par., Eng., Oxfordshire, Banbury div., on the l. bk. of the Swere, 5 m. S. by W. Banbury. P. <250.

Barford St. Martin, par., Eng., Wilts., Wilton div., on the Nadder, 2½ m. W. Wilton, PM.O. P. <750.

Barford St. Michael, par., adjoining B. St. John on the S., 4½ m. W. Aynho stn. P. <500.

Barforth, par., Eng., Yorkshire, N. Riding, 6 m. SW. Darlington. P. <250.

Barfreston (local pron., bars'ton), par., Eng., Kent, St. Augustine div., 6 m. NW. by N. Dover, 1½ m. NNE. Shepherd's Well stn. P. <250.

Barfrush, Balafrush, or **Balfrush,** Persian **Barfurush** ('market-place'), important commercial tn., Persia, Mazanderan, 95 m. NE. Teheran, 12 m. from the roadstead of Meshed-i-Ser on the Caspian Sea. Though nearer Teheran than Resht, it has the disadvantage of a more difficult route to that cap., crossing the Elburz Mts. by the Imamzade-Hashim Pass, 7550 ft., and hence is more a seat of provincial than of international commerce. P. estimated in 1874 at 50,000, much less, according to Curzon, in 1890.

Barga, tn., Italy, Tuscany, prov. and 16 m. N. Lucca. P. 8000.

Bargagli, comm., Italy, prov. and dist. Genoa. P. <4000.

Bargas, comm., Spain, New Castile, prov. and dist. Toledo. P. <4000.

Barge, comm., Italy, Piedmont, prov. Cuneo, 29 m. SW. by S. Turin, manufactory of arms, slate quarries. P. 11,000.

Bargeddie, eccles. par., Scot., Lanarkshire, Old Monkland par., 2 m. from Baillieston, with PM.O. P. <3000.

Bargeddie and Dykehead, vil., Scot., Lanarkshire, Old Monkland par. P. <1500.

Bargoed, vil., Wales, Glamorganshire, E. div., 8 m. SE. by E. Merthyr Tydfil, with stns. on the L. & NW. and Brecon and Merthyr Rlys., PM.O.

Bargrennan, eccles. par., Scot., in cos. Kirkcudbright and Wigtown, on R. Cree, 8 m. NW. by N. Newton Stewart, P.O. P. <500.

Barguzin, riv., Siberia, govt. Irkutsk, flowing into Lake Baikal on its E. side, after a course of 200 m. Considerable fishing at the mouth of the river. Higher up the Bargusin R. a wide steppe, peopled with Buryates.

Barguzin, dist. tn., Transbaikalia, Siberia, on the B. riv., govt. 220 m. ENE. Irkutsk, in 55° 56′ N., 109° 47′ E. Near it are thermal springs and baths, and gold is found in the surrounding country. This is believed to be the *Bargu* of Marco Polo, and it is one of the oldest settlements in Siberia. P. <2000. See **Turka.**

Bargy, bar., Ire., in the S. of co. Wexford.

Bárh, tn., Brit. India, Bengal, dist. Patná, on the r. bk. of the Ganges, 31 m. E. by S. Patná. P. 12,400; Hindus, 9300.

Barham, par., Eng., co., div., and 7 m. WNW. Huntingdon, 4 m. NNW. Grafham stn. P. <250. See **Spaldwick.**

Barham, par., Eng., Kent, St. Augustine div., on the Little Stour, 5½ m. SE. by S. Canterbury, on the SE. R.; PMT.O.; 4698 ac. P. <1500.

Barham, par., Eng., Suffolk, Woodbridge div., 4½ m. NNW. Ipswich, 1½ m. NE. Claydon stn. P. <500.

Bar Harbor, vil., U.S., Maine, Hancock co., on the E. side of Mount Desert I., 42 m. SE. Bangor.

Barholme, par., Eng., Lincolnshire, div. and 4½ m. ENE. Stamford, 1½ m. N. by W. Tallington stn. P. <250; eccles. par. (**B. with Stowe**) P. <250.

Bárí, tn., India, Rájputána, 40 m. S. by E. Bhartpur. P. 12,000.

Barí, negro tribe, Africa, White Nile, between 4° and 6° N., independent and powerful, inhabiting a dist. 40 m. in extent between dists. of Madi and Gondokoro; the terror of ivory-traders.

Bari, tn. and seapt., on the E. ct. of Italy, Apulia, cap. prov. B., 65 m. NW. by W. Brindisi, with nautical school and arsenal, and various manufactures. Good anchorage in all weathers. Average depth of harbour, 25½ ft. P. 55,000.

Barí, conical mt., Tongking, on l. bk. of He-ho, at its confluence with the Song-koi.

Báría, tn., India, Rewá Kántha, 50 m. NE. Baroda. P. <4000.

Barichara, tn., Colombia, Santander, 150 m. N. by E. Bogotá. P. 11,000.

Bárí Doáb, tract of country, India, Punjab, between the Ravi, with the Trimáb, on the NW., and the Beas, with the Sutlej, on the SE. See **B. D. Canal** and **Sutlej.**

Bárí Doáb Canal, a canal irrigating with its main branches (in all 362 m.) the N. part of the B. D.; headworks 7 m. NW. Pathankot; completed in financial year 1859–60. In 1890–91 its net revenue was equivalent to a return of 8.08 per cent. on capital outlay.

Barigan, settlement, New South Wales, Phillip co., 70 m. NNE. Bathurst.

Barigazzo, vil., Italy, prov. Modena, at base of Monte Cimone. Near this is observed a phenomenon similar to that at Pietramala. Natural fire issues from the soil, ascends several feet, and continues for some days without intermission.

Barigazzo, Monte, mt., Italy, in the Apennines, prov. and 26 m. SW. Parma. Alt. 4200 ft.

Barika, torrent, Algeria, prov. Constantine, flows SW. towards the Salt Lake, Hodna, which it only reaches at high flood, after a course of 81 m.

Barile, comm., Italy, Basilicata, prov. and 23 m. NNW. Potenza; was destroyed by an earthquake, Aug. 14, 1851. P. <4000.

Bariloche Pass, a low pass across the Andes said to exist to the S. of Lake Nahuel Huapi, in about 41° 40′ S. According to Siemiradzki, no such pass exists in that region. See *Petermann's Mitteil.*, 1893, p. 58.

Barí'ma, a riv. in the NW. of Brit. Guiana, flows E. then NW. into the Atlantic, which it enters just E. of the mouth of the Orinoco; navigable about 80 m. up for vessels of 15 or 16 ft. draught. The first falls (ascending) occur in about 7° 35′ N., 60° W. (*Proc. R. G. S.*, 1892, p. 668.)

Barinas, vil., Venezuela, Zamora, 270 m. SW. by W. Carácas.

Báringen, tn., Austria, Bohemia, 11 m. NNW. Karlsbad. P. <3000.

Baringhup, tp., Victoria, Talbot co., 22 m. SW. by W. Sandhurst. P. <1500.

Baringo, lake, Central Africa, just W. of 36° E., crossed in the S. by 0° 30′ N.; 18 by 10 m.; with no visible outlet, but apparently a copious hidden one, for though fed by several streams its level rises very little even in the wet season, and its water is quite fresh; abounds in fish. Alt. 3217 ft. (*ab.* Thomson), 3725 ft. (*ab.* Teleki and Höhnel), 3300 ft. (*ab. Geog. Jour.*, II. 125).

Barisál, tn., Brit. India, Bengal, dist. Bákarganj, 70 m. S. Dacca. P. 15,500; Hindus, 8000; Moham. 7100.

Barisciano, comm., Italy, Abruzzi e Molise, prov. Aquila, 30 m. W. Chieti. P. <4000.

Baritbog River, Great, riv., Canada, New Brunswick, flows SE. into Miramichi Bay.

Barito, riv., Dutch Borneo, flowing S. into the Java Sea, passing a little to the W. of Banjermassin; estimated total length, 550 m. Steamers can ascend for five days. The bar at its mouth has 11–16 ft. of water at high tide. An arm flowing SW. joins the Kapuas below 3° S., and from the junction a canal runs SE. into the main stream again.

Barjac, tn., France, dep. Gard, arr. Alais, 32 m. N. Nîmes, with mineral springs and coal-mines. P. <2000.

Barjols, tn., France, dep. Var, 29 m. E. by N. Aix, arr. and 10 m. NNW. Brignoles. P. <3000.

Barka, or **Baraka,** riv., E. Africa, Upper Ethiopia, flows W. then N., passing Tokar and entering the Red Sea to the SE. of Suakim, receives the Anseba on the r. bk. Its valley is followed by an important road leading to the country of the Beni Amer.

Barka, or **Bengazi** (the anct. *Cyrenaica*), Turkish vilayet on the Mediterranean, in the N. of Africa, between Tripoli and the Gulf of Sidra on the W. and Egypt on the E., extending southwards to the Libyan desert, where its limits are undefined. It is mainly a desert plateau, but has a fertile strip along the coast, yielding corn and including tracts of fine pasturage. On the N. and W. slopes of the plateau are forest of pines, date and olive trees, and flowering shrubs. There are no permanent rivers. The region was anciently the seat of the *Pentapolis*, or five Greek cities of Berenice, Arsinoe, Barca, Apollonia, and Cyrene; of which the first, now called Bengazi, the cap. and only seaport of the vilayet, is the only one retaining any importance. Area about 60,000 sq. m. P. 500,000.

Barkadi, place, Africa, Sahara, S. of Ghadames.

Barkal, Jebel, an isolated sandstone rock in Nubia, in 18° 31′ N., 36° 46′ E. Between it and the Nile are the remains of several temples.

Barkal Rapids, India. See **Karnaphuli.**

Barkala, vil., Brit. India, Assam, dist. Cachar, 52 m. E. by N. Sylhet.

Barot, tn., Brit. India, NW. Provs., dist. Meerut, 32 m. N. Delhi. P. 6800.

Barotse, or **Marotse,** important Bantu tribe inhabiting the banks and the regions E. of the Upper Zambezi, from 14°–18° S. lat. In Livingstone's time the Makololo were the dominant tribe in these parts of S. Africa, but since then they have been almost entirely annihilated by the B., who now occupy the vast territory from the Kabompo R. to the Victoria Falls. Formerly they were inhabitants of Mashonaland, where many of them were destroyed by the Matabili, whilst the others retired into the Upper Zambezi valley. Selous, who has carefully studied them, is of opinion that they are not of pure Bantu origin, but that they commingled in ancient times with the Arabian colonists who built the fortress and temple of Zimbabye. See Selous, *Twenty Years in Zambesia, Geog. Jour.*, April 1893. [**H. G. S.**]

Barotse Valley, a low-lying, marshy, and unhealthy valley, inundated during the rainy season, on both banks of the Zambezi, where it flows from N. to S. between 15° and 16° S.; fertile, producing sugar-cane, bananas, sweet potatoes, and manioc. (*Proc. R. G. S.*, 1889, p. 220.)

Bar-panj, Shugnan. See **Kalai-bar-panj.**

Barrow Hill, PMT.O., Eng., Derbyshire, near Chesterfield.

Barrowhouse, electoral div., Ire., Queen's co., dist. Ballylynan.

Barrow in Furness, mun. bor., parl. bor., co. bor., par., and seapt., Eng., co. Lancaster, on Morecambe Bay, opposite Walney I., which is included in the bor.; till about 1850 a village, now an important town. In 1847 the Furness railway was extended to Barrow, in order to facilitate the exportation of iron ore (the valuable red hæmatite found in the neighbourhood); and in 1859 the erection of blast-furnaces was commenced. Foundries on a large scale, and engineers' shops, have been established; docks and timber-yards have been formed; and it has large shipbuilding yards, iron-rolling mills, wire-works, works for the making of ship-armour, hæmatite steel-works, and manufactories of jute and flax, paper pulp, and tubular wagons. The first of its magnificent docks was opened in Sept. 1867. The Buccleuch dock, opened in 1873, has a depth of 24 ft.; the Devonshire dock 26 ft., with a basin adjoining with a depth of 18 ft. at ordinary neap, 25½ ft. at ordinary spring tides; the Ramsden dock and basin (for Anchor Liners) with 24 ft. at neap, and 31½ ft. at spring tides. There is also the Cavendish timber basin with a water area of 142 ac., besides a large graining dock, a depositing dock, and a patent slip; and Piel Roads afford good anchorage in all weathers for vessels not drawing more than 21 ft. There is a large export trade in pig-iron, steel-rails, and ore, and a large trade in cattle is carried on with Belfast. Steamers go daily between B. and Belfast, and in the summer to the Isle of Man and Glasgow. See **Appendix,** p. 13. The town contains a town-hall, which includes a free public library, reading-room, and museum. The bor. was incorporated in 1867, and has returned one member to Parliament since 1885; co. bor. under Act of 1888. 10,987 ac. Parl., mun. bor., and par., P. (1871) 18,200; (1881) 47,300; (1891) 51,700.

Basel, comm., Belgium, E. Flanders, arr. St. Nicolas. P. <4000.

Basel (German), or **Bâle** (French), sometimes spelt in English **Basle,** one of the cants. of the Swiss Confederation since 1501,

in the NW., on the frontiers of France and the grand duchy of Baden; divided since 1832 into two portions, Basel-town (*Bâle Ville*), including only the city of B. and its immediate environs, and Basel-land (*Bâle Campagne*); cap. of latter, Liestal. Surface undulating, traversed by the N. spurs of the Jura. Principal rivers, the Rhine (which forms the greater part of the N. boundary), and its tribs. the Birs and Ergolz, the valley of the former traversed by the railway to Delemont, of the latter by that to Olten. Excellent pastures; considerable amount of fruit and wine produced. The legislative body in Basel-town is the Great Council, elected for six years, from which the Small Council, forming the executive body, is chosen. In Basel-land the legislative body, also elected for six years, is called the National Council, and elects the executive council, which holds office for four years. See **Switzerland,** table.

Basel, a city in the N. of Switzd., 42 m. N. by E. Bern, on the Rhine, where it changes its course from W. to N.; divided by the Rhine into Great Basel on the left, and Little Basel on the right bank. It has scientific and literary establishments, and a cathedral built on the site of the Roman fort *Basilia*. Its university was founded in 1460. It has also a botanic garden, museum, and library. It is one of the chief seats in Europe of the manufacture of silk ribbons, and has also manufactures of yarns, machinery, chemical products, &c. Great works have been constructed for the purpose of utilising the water-power of the Rhine in the neighbourhood by means of dynamos for electric lighting and working machinery. B. dates from the fourth century. In the eleventh century it was the most powerful city of Helvetia; was the seat of a great council from 1431 to 1449, and of a memorable treaty between France and Prussia in 1795. Near it the French were defeated by the Swiss at the battle of St. Jacob in 1444. Birthplace of John and James Bernouilli and Euler, and temporary residence of Hans Holbein, the younger, and Erasmus, the latter of whom died here in 1536. Alt. 912 ft.; mean temp., 49.3° F., Jan. 32.8°, July 66.7°. P. (1860) 38,000; (1870) 45,000; (1888) 69,800.

Bas-en-Basset, tn., France, dep. Haute Loire, arr. Yssingeaux, on the Loire, 17 m. SW. by W. St. Étienne, with mineral springs and manufactures of lace, ribbons, &c. P. <2000.

Basenga, S. African tribe, dwelling N. of the Zambezi, between the Loangwa and Pajozi rivers, about 30°–32½° E.

Basento, riv., Italy, in the E., it rises in the Apennines, and flows E. past Potenza, then SE. to the Gulf of Taranto, which it enters in 40° 20′ N.

Basford, par., Eng., Cheshire, Nantwich Union. P. <250.

Basford, par. and northern suburb of Nottingham, Eng., included in the parl. bor. of Nottingham, with stns. on the M. R. and G. N. R. Par. P. 22,800; eccles. par. (**B. Old with Cinderhill**) P. 11,300; (**New B.**) P. 5400.

Bashad, vil., Persia, prov. Khuzistan, on the l. bk. of the Shat-el-Arab, 22 m. SSE. Mohammera.

Bash, Turkish, *head.*

Bashahr, one of the Punjab Hill States, India, crossed by 31½° N. and 78° E.

Bashakerd, a rugged region in the S. of Persia, to the E. of the mouth of the Persian Gulf, having a scanty population of half-naked savages with a marked infusion of negro blood.

Bashall Eaves, par., Eng., Yorkshire, W. Riding, in the extreme SW. of the Skipton div., 10 m. NW. by W. Burnley, 1½ m. W. Horrocksford stn.; 3806 ac. P. <250.

Bashi, or **Bashee,** riv., Cape Colony, flows SE. between Transkei and Bomvanaland, and enters the Indian Ocean in 32° 15′ S.

Bashi-buzuks. See **Cherkesses.**

Bashi Islands. See **Bachi Islands.**

Bashkires, Finnish stem, inhabiting E. Russia, on the slopes of the Ural Mts., govts. Ufa, Orenburg, Perm, Samara, and partly Vyatka. Part of them are settled, and carry on agriculture, gardening, and cattle-breeding; the others are nomade. They owned in 1860 35,000,000 ac. of land, of which half under forests, but much of it has been appropriated since by Russians. They are Mussulmans, but have maintained many of their pagan customs. They are divided into *cantons* and *yurts*, and possess self-government under Russian supervision. They supply to the army, together with the Meshcheryaks, regiments of irregular cavalry. Total number, about 500,000.

Básí, vil. and rly. stn., India, Rájputána, 18 m. SE. by E. Jaipur.

Basi, tn., India, Punjab, Patiálá, 140 m. SE. Lahore. P. 13,800; Moham. 9400; Hindus, 4000.

Basidu, Basidoh, or **Bassadore,** vil., Persia, at the W. end of Kishm I., N. ct., 75 m. WSW. Bender Abbas. A British establishment which once existed here was abandoned on account of the heat and the lack of water.

Basignana, comm., Italy, Piedmont, on the r. bk. of the Po, prov. and 8 m. NNE. Alessandria.

Basilan, the largest isl. in the Sulu Archipelago, SW. of Mindanao I., from which it is separated by the Straits of B., cap. Isabela, on the NW. ct.

Basildon, par., Eng., Berkshire, Newbury div., on the Thames, 8 m. NW. by W. Reading, 1½ m. S. Goring stn. P. <750.

Basildon, par., Eng., Essex, div. and 10½ m. S. Chelmsford, 2 m. E. Laindon (*q.v.*) stn., P.O. P. <250.

Basildon Wood Green, hamlet, 2 m. S. of Basildon, Berkshire, 2 m. W. Pangbourn stn.

Basilicata, the ancient *Lucania*, div. (*compartimento territoriale*), S. Italy, composed solely of the prov. of Potenza; so called after the Emperor Basilius II., who reconquered it from the Saracens and Lombards in the 11th century. It is mountainous, several peaks rising to upwards of 4500 ft. (Monte Pollino, 7375 ft.). The Apennines here divide into two parts, which branch off to the E. and W. From these the rivs. Bradano, Basento, Salandrella, Agri, and Sinni take their source, and, after draining this fertile dist., fall into the Gulf of Taranto in the Ionian Sea. There are also many lakes, some of volcanic origin. The chief are Monticchio, Pesole, Maorno, and Santa Palagina. The bulk of the people are poor and ignorant, and talk a dialect called 'basilisco.' Its coast-line being for the most part marshy, and as a consequence unhealthy, the prov. derives next to no commercial benefit from it. Nevertheless, there are works of amelioration at present in progress or projected under the Acts of 1882 and 1886. The railway runs across the terr. from NW. to SE., where there is a junction at Metaponto with the lines from Reggio and Brindisi. There are, moreover, four other lines in course of construction or projected. Notwithstanding the great fertility of the soil agriculture is backward, and emigration to S. America comparatively large. The products are varied. On the slopes of the Apennines, forests and pasture-grounds are numerous, and the chestnuts plentiful. But even in the mountain valleys the vine is grown. In the vast plains that extend to Apulia and Calabria wheat is the principal product, while towards Melfi and the neighbourhood of Melfi it is noted for its excellent wine. The orange and lemon grow well nearer the coast. Among other products are cotton, flax, silk, honey, wax, liquorice, dried fruit, saffron, tobacco, &c. Mineral springs are many, chiefly sulphureous. There are marble quarries at Avigliano, Latronico, Muro, Lucano, and Picerno; chalk at Mauro Forte and Montemuro; transparent quartz at Lagonegro; tufa at Matera; and excellent lignite at San Chirico Raparo and Rotonda. [**E. A.**]

Basque Cape, Canada, Nova Scotia, Cape Breton I., on the W. ct., in 46° 39′ N.

Basque Provinces (Spanish **Vascongadas**), a country of France and Spain, on the Bay of Biscay, traversed by the

Pyrénées. The four Basque provs. belonging to Spain, forming the old provs. of Navarra and Vascongadas, are Vizcaya (Biscay), cap. Bilboa; Guipuzcoa, cap. Tolosa; Alava, cap. Vitoria; and Navarra, cap. Pamplona. The three Basque dists. in the French dep. Basses-Pyrénées are Labourd, Basse-Navarre, and Soule. The Basques, who are nearly all shepherds, are celebrated for their bravery and vivacity. They speak a language which has no analogy with any other living tongue, and which, in remote ages, appears from the occurrence of Basque roots in place-names in many parts of Spain and Portugal to have been used all over the peninsula. It is still spoken in the French Basque dists., and in two-thirds of Vizcaya, the whole of Guipuzcoa, the half of Navarre, and a small part of Alava in Spain. In their own language the Basques call themselves *Euscaldunherri*, their country, *Euscaldun*, and their language *Euscara*, in the first syllable of which names there probably survives the same root as is found in Basque itself, Vizcaya, and Gascony (ancient *Vasconia*).

Basra, Asiatic Turkey. See **Busrah.**

Básrá, vil., India, Bengal, in the 24 Parganás, on the Bidyádhári R., 8 m. from Port Canning. Important depôt of the timber trade of the Sundarbans.

Basurhát, tn., Brit. India, Bengal, dist. of the twenty-four Parganás, 30 m. E. by N. Calcutta. P. 15,100; Hindus, 9400; Moham. 5700.

Basuto-land, Brit. crown col., in the eastern portion of S. Africa, bounded by the Orange Free State on the W. and partly on the N., by Cape Colony on the S., and separated on the E. and NE. from Griqua Land East and Natal by the Quathlamba Mts.; divided into six dists., namely, in the order from N. to S., Leribe, Berea, Thaba Bosigo or Maseru, Mafeteng, Kornet

Spruit, and Quthing; cap. Maseru, near the middle of the W. frontier. Surface mostly above 5000 ft. high, mountainous, divided into three almost equal portions by two ranges of mountains (the Maluti and Molappo) running parallel to the Quathlamba, and fertilised by the head-waters of the Orange R., Kornet Spruit, and Caledon R. Climate temperate; mean temp. in SW. (1 yr. 1882–3), yr. 58.1° F., Feb. 70.2°, July 47.8°; mean rainfall at Leribe, in NW. (5 yrs.), 33 in. Very fertile, large quantities of grain (maize or 'mealies,' wheat, Kaffir corn) being harvested. B. is known for its hardy, sure-footed ponies; and its sheep and cattle thrive well. Throughout the terr. there is but little wood, and many parts are uninhabited, or nearly so—particularly the eastern dists., where the winter climate is excessively cold; the most populous part being the country between the Caledon R. and the Maluti Mts. The natives are perhaps the most intelligent members of the Kaffir race. They are both industrious and warlike. Their mountain fastnesses, to which they invariably retire during war, are almost inaccessible; and the Basutos, by artfully constructed defences, have added to their impregnability. These people, after waging a tedious and disastrous war with the Free State, placed themselves in 1868 under British protection. In 1871 the country was annexed to Cape Colony; but a rebellion breaking out in 1880, consequent on the Colonial Government trying to enforce the disarmament of the natives, the country was placed in 1884 under the direct administration of the Imperial Government. Area about 9720 sq. m. P. (1891) 219,000 (of whom 578 European), or about 22 to the sq. m. See *Proc. R. G. S.*, 1888, pp. 519–25, and map, p. 548 (1 : 1,100,000).

Batangas, comm., Philippine Is. (*q.v.*), on the **Gulf of B.,** S. ct. of Luzon, 60 m. S. by E. Manila, cap. prov. B. P. 35,600.

Batang Hari, riv., Sumatra, flows E. into Brahala Strait, which it enters by several arms to the S. of 1° S; navigable for small craft up to confluence of Seliti, in about 1° 15′ S., 101° 20′ E., 470 m. *Petermann's Mitteil.*, 1880, p. 13.

Batang Lupar, riv., in the S. of Saráwak, flows W. into the China Sea, which it enters in about 1½° N. and 111° E. Navigable for large vessels to Lingga, about 30 m. above its mouth, but only with difficulty higher up; the entrance obstructed by a bar with 3¾ fathoms at high water, 10 ft. at low water. *Proc. R. G. S.*, 1881, p. 196.

Batang Padang, a range of mts., Malay Penin., on the E. frontier of Perak, in about 4° 5′–20′ N. The riv. B. P. flows from these mountains SW. to the lower part of the Perak.

Batante, or **Battanta,** isl., off the W. end of New Guinea, just S. of Dampier Strait.

Bataszék, Hungary. See **Battaszék.**

Batataes, vil., Brazil, São Paulo, 220 m. NW. Santos. Alt. 2625 ft.

Batavia, vil., Dutch Guiana, on the r. bk. of the Coppename, 36 m. W. Paramaribo.

Batavia, the cap. of the Dutch East Indies, called 'the Queen of the East,' lies, in 106° 50′ E. and 6° 1′ S., on a bay of the Java Sea, on the N. coast of the island of Java, and near its W. end. The town consists of an old part next the bay, built in the Dutch fashion on a network of canals and small streams, and several newer handsome suburbs—Rijswijk, Koningsplein, Weltevreden, &c.—situated further inland, where the Europeans mostly live, and where the government buildings stand. The old town contains the business quarters, and is the seat of the commercial activity. B. is the principal trading-place in the Dutch East Indies, exporting all the products the islands yield, notably sugar, coffee, tin, rice, tea, hides, spices, &c., and supplying them with a large part of the European and other commodities they require, especially cottons and woollens, petroleum, ironmongery, provisions, coals, and earthenware. The total annual trade is valued at £3,000,000. Some islands and sandbanks in the bay shelter the roadstead and the entrance to the R. Chilivung, which served as the port before a new harbour was made at **Tanjong Priok,** 6 m. to the NE., in 6° 6′ S. and 106° 53′ E. This new harbour has a depth of 24 ft. at ordinary neap, 28 ft. at ordinary spring tides, and has 4000 ft. of quayage, besides two government cylinder docks, and a floating iron dock, the last 295 ft. long, with 4000 tons lifting-power. At Amsterdam I., one of the small islands adjacent, there is a floating dock 200 by 45 ft., with 2000 tons lifting-power. It is connected with B. by rail, road, and canal. B. itself is not healthy in the old districts, but fairly healthy in the new. Mean temp. (15 yrs.), yr. 78.6°, Jan. 77.5°, July, 78.2°; annual rainfall, 70 in. Founded in 1619, B. has been in the possession of Holland ever since, except during the period 1811–1816, when it was held by the English. P. 105,000, of whom 68,000 are Javanese, 27,000 Chinese, and 8000 Europeans. See **Java.** [**J. T. B.**]

Bath, settlement, Canada, Ontario, Addington co., on the Bay of Quinte, 16 m. W. by S. Kingston.

Bath, city, parl., mun., and co. bor., and fashionable inland watering-place, Eng., co. Somerset, Frome div., on the Avon,

11 m. ESE. Bristol, 107 m. from London by the G. W. R., likewise connected with the M. R., and L. & SW. R. It has water communication with Bristol by the Avon, and with London by the Kennet and Avon Canal. B., a British settlement from the earliest times, was known to the Saxons as *Caer Badon* ('the city of baths'). By the Romans, who founded a city, of which important remains have been discovered, it was called *Aquæ Solis* ('waters of the sun'). The first Bishop of Bath was John de Villula, in the reign of Rufus. His successor Gilbert adopted the title of Bath and Wells, which is still retained, though since the reformation Bath has had no chapter. The city was incorporated by Queen Elizabeth in 1590. On the site of the Temple of Minerva, Villula built a church, which in 1136 was almost destroyed by fire. This structure rebuilt and beautified was the predecessor of the church or abbey, as it is now called, erected during the reign of Henry VII. In the W. of the city is the Royal Victoria Park, 21½ ac. in extent. Bath has many educational and other institutions, a Roman Catholic college, a Wesleyan college, and the Grammar School, founded by Edward VI. The hot springs, which are saline and chalybeate, temp. 110° to 117° F., rise in the centre of the city, and supply five establishments: the King's, Queen's, Cross, Hot Baths, and the Baths of the Grand Pump Room Hotel. The old Roman Baths are closed. To the King's bath is attached the grand pump-room, 85 ft. by 48, and 34 in height, built in 1797. Parl. bor. P. (1891) 54,600; mun. bor. (now also co. bor.) (1881) 51,814; (1891) 51,844.

Baux, Les, vil., France, dep. Bouches-du-Rhône, arr. and 10 m. NE. Arles, with ruins of an old castle demolished by Richelieu in 1631; once the seat of powerful barons. P.<2000.

Bavaniste, or **Banvaniste**, vil., Hungary, prov. Temes, 23 m. E. Belgrade (Servia). P. 6000.

Bavaria, Ger. **Bayern** (name derived from the *Boïoarii*, or *Baiuvari*, German tribes, which settled in B. in the 6th century of the Christian era), a kingdom of S. Germany, one-third of the size of Great Britain, in size and population second state of the German Empire. B. is situated between 47° and 50½° N. lat., and 7° and 14° E. long. B. consists of two separate parts, B. proper and the Rhine Palatinate, which is treated of in a separate article, the present article dealing with B. proper only, though the palatinate is included in the following table showing the divisions of the kingdom :—

Area of the provs. of Bavaria, with the population in thousands on the 31st December, and increase or decrease per cent. per annum between the successive censuses for which particulars are here given.

	Area in sq. m.	Pop. 1871.	Pop. 1880.	Inc.	Pop. 1890.	Inc. or Dec.	Pop. per sq. m. 1891.
Upper Bavaria .	6,458	842	952	1.37	1103	1.48	171
Lower Bavaria .	4,153	604	647	.77	665	0.26	160
Upper Palatinate .	3,731	498	529	.67	538	0.17	144
Swabia . . .	3,792	583	635	.96	668	0.51	176
Upper Franconia .	2,702	541	575	.68	573	−0.03	212
Middle Franconia .	2,924	584	644	1.09	701	0.85	240
Lower Franconia .	3,244	586	626	.74	618	−0.13	191
Palatinate of the Rhine . .	2,289	615	677	1.33	728	0.73	318
Total . .	29,293	4,863	5,285	.93	5595	0.57	191

It is on the whole a mountainous country, walled in by mountains on S. and N., and intersected by various elevated ranges. But it contains also extensive plains and a number of valleys. The principal mountain ranges are the following :—the mountains S. of the Danube, which form part of the Alps (*q.v.*) (Subdivisions II. B. 4), consisting of three parts, which stretch along the S. of Swabia and Upper Bavaria ; the Algäuer, Bavarian, and Salzburger Alps. The highest summit of this part of the Alps is the Zugspitze (9710 ft.), which is the highest mountain of the German Empire. N. of the Danube are the mountains of the Bohemian Forest (*q.v.*), running along the E. frontier of B., and forming the watershed between Danube and Elbe. SW. of this range rise the Bavarian Forest Mts., a range lower than the Bohemian Forest Mts., and separated from them by the valley of the Regen. In the NE. corner of B. rises the Fichtelgebirge (3415 ft.), a group of mountains forming the centre of the surrounding mountain ranges (Thuringian Forest, Erzgebirge, Bohemian Forest). N. of the Fichtelgebirge are the Franconian Forest Mts. and more to the W., and N. of the Franconian Saale, the peculiar Rhön Mts. (3115 ft.), isolated and differing from all the surrounding ranges, the characteristic features being plateaux and conical peaks. SW. of the Rhön extends the Spessart, separated from the Odenwald—the NE. parts of which also belong to B.—by the Main. S. of this river are two more mountain ranges, viz., the Franconian Jura and the Steigerwald. Between the Alps and the Danube extends a large elevated plain, with an average altitude of 1650 ft. Most of the rivers of B. are tribs. of the Danube and Main, the Danube traversing the country from W. to E., and becoming navigable at Ulm, just before crossing the Würtemberg frontier, the Main winding from E. to W. in the N. of B., and becoming navigable at Bamberg. Danube and Main are connected by the Ludwigs Canal, 108 m. in length. A characteristic feature of the country between Alps and Danube are numerous **lakes** and **morasses** (the latter called 'Moose' and 'Filze'). The largest lake is the Lake of Constance, which, however, belongs only in part to B. More to the E. are situated a number of picturesque lakes, of which the Starnberger-, Tegern-, and Chiem-See are the most important. Widely extending morasses are the Dachauer-, Erdinger-, and Donau-Moos. **Geologically,** the above-mentioned groups of the Alps present the characteristic features of the Alpine Triassic and Tertiary formations ; Jurassic and Cretaceous rocks are likewise found. The plain N. of the Alps belongs chiefly to the Tertiary and Diluvial formations, and N. of the Danube Triassic and Jurassic formations prevail. The Bohemian Forest Mts. consist of gneiss and granite, and these rocks are likewise met with in the Fichtelgebirge. The Rhön Mts. are of volcanic origin, and rest on Triassic rocks. The climate of B. is on the whole temperate and healthy, but varies greatly in different parts of the country. In the higher regions of the mountains it is raw and inclement, the Alpine dists., the Bohemian Forest Mts., and the higher parts of the Franconian Jura having in many places a mean annual temp. of 40° F., and even less, whilst the lower parts of the country have a mean temp. of 48° F., and more. For further details as to temperature, see **Bamberg, Bayreuth, Regensburg, Munich, Aschaffenburg.** SW. and NW. winds prevail. B. is principally an agricultural country ; 57½ per cent. of its area are cultivated soil, which is very productive, and eminently adapted for the cultivation of grain, especially in the very fertile dists. of Lower Bavaria, and Middle and Upper Franconia. The total annual production of cereals amounts to 2½ millions of tons, rye yielding the largest crop. Next in quantity follow oats, barley, and wheat. The cultivation of potatoes, hops, pease, lentils and beans is likewise of great importance. Considerable quantities of tobacco are grown in the dists. of Nuremberg and Fürth, in Middle Franconia. Flax is cultivated in Upper Bavaria and Swabia. Excellent wines are produced in Lower Franconia, especially near Würzburg, whose Stein and Leisten wines are among the very best produced in Germany. Forests cover not less than 33 per cent. of the surface of B. ; oaks, beeches, firs, pines, and junipers are the principal trees. The largest forests are those of the Alpine dists., in the southern parts of Upper Bavaria and Swabia ; but there are also large forests in Lower Franconia and the Upper Palatinate, the Bavarian Forest, and the so-called 'Reichsforst' of Nuremberg. The value of the annual production of timber amounts to about £3,000,000. Excellent pastures are plentiful in the southern parts of B., and cattle-rearing is accordingly of very great importance in Upper and Lower Bavaria and Swabia. The celebrated Algäu cattle are reared in the last-named dist. Sheep-breeding is likewise of importance, fine merino breeds being met with in Upper Bavaria and Swabia. The lakes and rivers of B. abound in fish ; the Munich fish-market is one of the largest in Germany. The mineral production of B. is limited. The most important minerals are coal, lignite, iron, and salt. Coal-mining is carried on in Upper Bavaria (at Miesbach, Hausham, Penzberg), and in Upper Franconia (near Kronach) ; lignite occurs in Upper and Lower Bavaria (at Grosswcil and Kelheim), and in Lower Franconia (near Bischofsheim). Iron ores are found in Upper Franconia (at Arzberg, Wolfsdorf, Grundfeld, and Burgheim), and in Upper Bavaria (Achthal). Salt is plentiful in the Berchtesgaden dist. (SE. corner of B.) ; celebrated are the brine-springs and salt-works of Reichenhall, Traunstein, Rosenheim, and Berchtesgaden ; rock-salt is found at the last-named place. Of other mineral products must be mentioned graphite (in the district of Passau), and the excellent lithographic stones, which are obtained from the quarries of Solnhofen (Middle Franconia). Mineral waters occur at various places ; the brine and carbonic acid springs of Kissingen (in Lower Franconia) are famous. Although B. is chiefly an agricultural country, her industries have greatly developed since the middle of our century. Munich, Nuremberg, Fürth, and Augsburg are the chief industrial centres. One of the principal industries of B. is beer-brewing. There are more than 6000 breweries in the country, and very large quantities of beer are produced at Munich, Kulmbach, Erlangen, and Nuremberg. In recent years the export of this beverage has enormously increased, Bavarian beer being consumed all over the globe. The towns of Middle Franconia, especially Nuremberg and Fürth, are world-famed for their industry in toys, machinery, iron ware, gold and silver articles, pencils, and paper. Textile fabrics are also of very great importance ; the principal dist. of this industry is Swabia, which has numerous factories of woollen and cotton yarns and cloths. The railways of B. belong mostly to the state. The most important lines are those which connect B. with Italy (across the Brenner Pass, 4470 ft.) and with Austria (Munich-Vienna line). The navigation of the Danube and Main and of the Lake of Constance is of considerable importance. B. is a constitutional kingdom, forming part of the **German Empire** (*q.v.*). B. is inhabited by German tribes only, and nothing but German is spoken. The Bavarian tribe occupies the S. and SE. parts of the country, the riv. Lech forming the boundary towards the Swabians, who inhabit the SW. dists. The Franks, on the other hand, occupy nearly the whole of N. Bavaria. Three-fourths of the inhabitants are Roman Catholics, one-fourth Protestants ; Middle and Upper Franconia are the only parts of B. where the latter are in the majority. Education is progressing slowly but steadily, but in many parts of B. the lower classes are still very ignorant. There are three universities, Munich, Würzburg, and Erlangen ; the Academy of Fine Arts at Munich is one of the first of Europe. Among the towns, Munich, the cap. of B., take the first place ; other towns, like Augsburg and Nuremberg, were famous throughout the world in the Middle Ages, and, with Munich, they still form the political and industrial centres of the country. In the early times of antiquity B. was inhabited by Celtic tribes (Vindelici), and shortly before the commencement of the Christian era a considerable portion of its terr. became part of the Roman Empire. During the peoples' migration B. suffered greatly, and in the 6th century German tribes (Boïoarii, Alemanni) settled in it. Later on it became a dependency of the East Franconian Empire, and in 1070 it passed by imperial grant into the possession of the Guelfs, and in 1180 was transferred to Otho, Count of Wittelsbach. In 1623 it became an electorate. The direct Wittelsbach line became extinct in 1777, and the Elector Palatine Charles Theodor succeeded to the sovereignty. B. was a member of the Confederation of the Rhine, and became

a kingdom in 1806. Since 1871 it has belonged to the **German Empire** (*q.v.*). [**H. G. S.**]

Bechtheim, vil., Ger., gd.-duchy Hesse, 7 m. NNW. Worms. P. <2000.

Bechuana-land (usually spelt in accordance with a practice which the English of S. Africa have learnt from the Dutch, Bechuanaland), vast terr. in S. Africa, inhabited chiefly by the Kaffir race of the Bechuanas, who settled here after being driven from homes further E. by the Zulus. It extends from Cape Colony in the S., to the wedge of German terr. bounded by the parallel of 18° S. and the riv. Chobe, and from the frontier of German SW. Africa (Great Namaqua-land, Damara-land, and Ovampo-land) in the W., to the Orange Free State and Matabili-land on the E. An arbitrary boundary has been drawn on maps in the NE. from the confluence of the Chobe and Zambezi to a point on the Shashi below Tati, that river forming the remainder of the boundary between Bechuana-land and Matabili-land to a point near Fort Tuli; but in the N. this boundary runs through the terr. of one of the chief Bechuana tribes, the Bamangwato, who occupy land to the S. of the Zambezi below the Victoria Falls. The whole area is now under British administration or protection, the area to the S. of the rivs. Molopo and Nosob forming a British crown colony, the remainder a protectorate. The **B. Crown Colony** was established by royal proclamation in 1885 as far as the Molopo, and in 1891 it was extended westwards to the meridian of 20° E., as far N. as the Nosob. It consists of a plateau ranging in the E. from 3200-4200 ft. above sea-level, with a gradual slope towards the W. and SW. In the E. there is a rainfall of about 25 in. annually, which is adequate for tillage even without irrigation (principal crops, maize or mealies, and millet), but the rainfall diminishes rapidly towards the W. [**Kalahari**], so that there are now no permanent rivers beyond about 23° E. Even in the rains the Molopo does not reach beyond about 24½° E. The remainder of the so-called Molopo is merely a dry water-course with occasional water-holes, and such also is the character of the Nosob, Oup, and Hyghab, the last being the name of the water-course inclined southwards below the junction of the Molopo and Nosob. There are, however, extensive stores of underground water, likely in the future to afford the means of considerably increasing the cultivated area. Apart from the inadequate rainfall, the climate is one of the best in the world, at least for man. Horse-sickness causes tremendous mortality among horses, but the country is well adapted for cattle-ranching, and the Cape sheep and common goat thrive. At present the terr. is mostly unsuited for the merino sheep. Gold has been discovered in the neighbourhood of Vryburg and Mafeking. Vryburg, the seat of govt. of the colony, is the present terminus of the Cape railway system, which is now being extended to Mafeking. Since the terr. came under British administration it has been thrown open to settlement by Europeans, but large areas have been set apart as native reserves. The three principal Bechuana tribes are the Batlapin, or Batlaping (cap. Taungs), Barolong (cap. Mafeking), and Batlaro (cap. Kuruman). In the W. of the colony the Bakalahari (known to Europeans by the nickname of Vaalpense) live in a state of complete subjection to their Bechuana lords. The NW. is inhabited by a mixed race, known as Bastards, who immigrated from the Cape Colony. For administrative purposes the colony is divided into six divs., namely Taungs, Vryburg, and Mafeking, on the E. border, in that order from S. to N.; Kuruman in the middle, Gordonia in the SW., and Mier in the NW. Area about 60,800 sq. m. P. (1891) 60,400, of whom 5200 were of European origin (including Boers), about 48,000 inhabitants of the Bechuana native reserves, and the remainder (7500) Hottentots, Kaffirs, Malays, and others not belonging to the native reserves. The **B. Protectorate** is on the whole similar in physical features and climate to the crown colony, but in the N., where the terr. includes Lake Ngami, the Zuga (or Botletli) R., and the great Makarikari salt-pan, the slope is towards the E. It includes the goldfields of Tati in the E. All kinds of S. African game were formerly found here in great abundance, but their numbers have greatly diminished in recent years. The principal tribes are the Bamangwato (cap. Palapye, or Palachwe), the Bakhatla, or Bakathlu (cap. Mochudi), the Bakwena (cap. Molopolole), the Bangwaketese (cap. Kanye), and the Bamaluti (cap. Ramoutsa). Area about 386,000 sq. m. P. unknown.

Bedford, isl., South Pacific, in 21° 18′ 30″ S., 136° 38′ W. It is low and wooded, a coral reef, enclosing a lagoon.

Bedford (called by the British *Lettuydier,* or *Liswidur,* and by the Saxons *Bedicanford,* both names signifying 'a resting-place for wayfarers,' or 'inns upon a ford'), mun. and parl. bor. (1 member), and par., Eng., cap. Bedfordshire, on both sides of the Ouse, 45 m. NNW. London, with stns. on the M. R. and branch line of the L. & NW. R. B. has a large manufactory of agricultural implements. B. was incorporated by Henry II. In Saxon times there was a monastery in the town, where Offa was buried, and there are remains of two other monasteries. B. has many educational endowments and other charitable institutions, many of which are supported by a bequest of Sir W. Harpur, Lord Mayor of London in 1561. The town contains many memorials of John Bunyan (who was born in the neighbouring village of Elstow), one of which is Boehm's fine bronze statue of him on St. Peter's Green. The site of the gaol in which Bunyan was imprisoned, and where he wrote his 'Pilgrim's Progress,' is now occupied by houses. The Bunyan (Congregational) Chapel, at the entrance to which are a pair of massive bronze doors, their ten panels, by F. Thrupp, illustrating passages in the 'Pilgrim's Progress,' occupies the same site as that in which he often preached; his chair is in the vestry. P. (1871) 16,850; (1891) 28,000.

Bedfordshire, inland co., Eng., enclosed by the cos. Northampton, Huntingdon, Cambridge, Herts, and Bucks; divided into the following parl. divs.:—

	Acres.	Pop. 1891.
Northern, or Biggleswade . .	201,419	64,457
Southern, or Luton	94,852	68,224
Bedford, parl. borough . . .	2,223	28,023
Total (anct. and administrative co.)	298,494	160,704

Surface generally level, or slightly undulating, except in the S., where it is traversed by the chalk range of the Luton and Dunstable Downs, a continuation of the Chiltern Hills from Buckinghamshire. To the N. of these downs, which are chiefly used as sheep-walks, green sand and gault stretch from Leighton Buzzard to Potton (SW. to NE.), and in the higher parts of this dist. the soil is poor, though the sands of the greensand formation contribute greatly to the fertility of the market-gardens in the valley of the Ivel. The remainder of the county, including the Vale of Bedford, one of the finest corn-producing dists. in the kingdom, and containing deposits of a rich and gravelly loam, on the river banks is mainly oolitic. For principal crops and live stock see **Appendix,** pp. 7–9. Principal rivers, Ouse, Ivel, and Lea. Phosphate of lime is found at Potton, Sandy Heath, and Leighton Buzzard; stone and silver sand at Leighton Buzzard; and fullers' earth at Apsley Heath and Woburn Sands. Principal manufactures, straw plait for bonnets, and pillow lace (the latter has greatly declined), and matting made from the rushes of the Ouse. B. is in the Midland circuit and diocese of Ely. Principal towns, Bedford, Biggleswade, Leighton Buzzard, Dunstable, and Luton. The county is intersected by the G. N. R., M. R. and branches, and branch lines of the L. & NW. R. In Saxon times the county was included in the kingdom of Mercia. See **England,** table.

Bedford Level, dist., Eng., including the isle of Ely, in co. Cambridge; Peterboro' Fen, Northamptonshire; the parts of Holland in Lincolnshire; about 60,000 ac. in Huntingdonshire, 63,000 in Norfolk, and 30,000 in Suffolk, in all 400,000 ac., comprising most of the 'Fens,' a marshy flat, intersected by the Nene, Cam, Ouse, and Welland rivers. The Romans formed an immense embankment here, which excluded the tide, and rendered the dist. for a time very fertile, until the sluices became choked, and the level was gradually converted into one vast morass, increased by inundations of the sea in the 13th century. Various attempts were made to drain it in the reigns of Henry VI. and Charles I., and it was finally reclaimed in the 17th century, mainly by Sir Cornelius Vermuyden at the charge of the Earl of Bedford in 1649–52. The sea again burst the barriers in 1863, when 10,000 ac. were submerged, but the drainage was restored by Mr. Hawkshaw. This tract produces fine crops of grain.

Beiky, electoral div., Ire., co. Leitrim, dist. Rinn.

Beijerlanden, the general name for the three communes of **Oud** (Old) **Beijerland, Nieuw** (New) **B.,** and **Zuid** (S.) **B.,** in the W. of the island of Hoeksche Waard, between the Oude Maas and the Hollandsch Diep, to the W. of Dortrecht, Holland, prov. S. Holland. Oud B., P. 5300; market-tn., P. 4000; Nieuw B., P. 2000; Zuid B., P. 2000.

Bei-khem, upper part of Yenisei, rises in Erghik-targak-targa Mts., near Russian frontier, flows SW. on the high plateau of NW. Mongolia, and makes, by its junction with Khua-khem, the Ulu-khem.

Beikoz, vil., Asia Minor, on the Bosporus, 10½ m. NE. by N. Constantinople.

Beil (bīl), vil., Scot., Haddingtonshire, 3½ m. SW. by W. Dunbar, 3 m. E. by S. East Linton stn.

Beilan, tn. and pass of Syria, at its N. extremity, on the E. side of the Gulf of Scanderoon. The pass (about 2000 ft. high) between the Alma-dagh (*q.v.*) and the Jebel-el-Ahmar, is considered identical with the Syrian Pass of antiquity. It is now crossed by a macadamised road. The town, 6 m. S. Alexandretta (*q.v.*), W. of the pass, has numerous aqueducts. Here the Egyptians defeated the Turks in 1832. P. 5000.

Beilen, comm., Holland, prov. Drenthe, 17 m. NW. by N. Coevorden. P. <5000.

Beilngries, tn., Bavaria, govt. Upper Palat., 19 m. N. by E. Ingolstadt, on the Ludwig's Canal. P. <2000.

Beinn, Ben, Gaelic, 'a mountain.'

Beinn an Armuinn, Scot. See **Ben Armine.**

Beinn Buidhe, Scot. See **Ben Bui.**

Beinn Mheadhoin. See **Ben Mheon.**

Beinwil, vil., Switzd., cant. Aargau, 11 m. SE. Aarau, on the W. side of Lake Hallwil. P. <2000.

Beira, name of the central part of Portugal (from the riv. Douro to rivs. Tagus and Mondego), between the original provs. of the county and kingdom (Entre-Minho-e-Douro and Traz-os-Montes), to the N., and the last conquered terrs. on the Tagus and S. thereof. In its centre it has the highest mountain range in Portugal (Estrella). Here Viriatus resisted the Romans for a long time. It gives (1734) the princely title to the eldest child of the king. It was at one time divided into **B. Alta** ('High B.') and **B. Baixa** ('Low B.'). Modern Portuguese naturalists consider it as one of the natural sections of the country, and divide it into four sub-regions.—**B. Central** (Serras of Montemuro, Caramullo, and Estrella); **B. Transmontana,** from riv. Douro to the Serras; **B. Meridional,** from the Serras to the Tagus; **B. Littoral,** from the Serras to the sea. Part of B. was taken in 1835 to form the new prov. of Douro. In 1842 B. disappeared as a prov., and was replaced by the administrative dists. of Vizeu (the former B. Alta), Guarda, and Castello Branco (the former B. Baixa). See **Portugal.**

Beira (bai'ra), seapt., Portuguese E. Africa, 25 m. NE. by N. Sofala, on a tongue of sand at the mouth of the Pungwe, which forms an excellent harbour, 6 m. by 2 m., in which the tide rises 10 ft. It is the nearest port to Mashona-land. See **Pungwe.**

Beirut, or **Beyrout,** the anct. *Berytus,* a fortified seapt. and commercial town of Syria, on a bay of the Mediterranean, formed by a projecting headland, in 33° 5′ N., 26 m. NNE. Sidon, 55 m. WNW. Damascus, of which city it is the port, and with which it is connected by a well-made and well-maintained road, crossing the Lebanon range by the Mughitheh Pass (5200 ft.) and the Anti-Lebanon by the valley of the Barada; seat of European consuls, of a Greek and a Maronite bishop, with English and other mission schools, and various European benevolent institutions. Its walls are 3 m. in circumference, outside of which are new suburbs equalling the town in extent. It has well supplied bazaars. Water is conveyed in pipes for 10 m. from the Nahr el Kelb. The plain round the city is of the highest fertility. The harbour, protected by a mole, is adapted only for small boats, but in the bay beyond it ships may anchor in from 6 to 11 fathoms. Manufactures silk stuffs, and gold and silver thread. The principal trade of Syria is in the hands of B. merchants. Principal exports, silk (more than three-fourths of total value), wool, oils, soap, lemons, and oranges; imports mainly European manufactures, among which Manchester cottons hold the first place. Total value exports, £800,000 to £1,000,000; imports above £1,000,000. The position of B. as the port of Damascus is now threatened by the proposed Acre and Haifa-Damascus Rly. [**Damascus, Syria**], but a rly. from B. to Damascus partly on the rack system is also projected. Mean temp. (11 yrs., 1876–86), yr. 68.3° F., Feb. 55.4°, Aug. 80.8°; rainfall (8 yrs.), 37.8° in. P. 100,000.

Beisân, or **Besan,** tn., Palestine, *Bethshean* in O. T., 31½° N., 35½° E., 20 m. S. Tiberias, on the route of the Acre-Damascus Rly. The neighbouring streams might afford a large amount of water-power. Many ruins and other remains of antiquity.

Beishehr, tn., Asia Minor, on the E. shore of the **B. Göl** (lake), 40 m. WSW. Konieh. The lake, also called **Kirill Göl,** from a tn. near its NE. shore, is 38 m. long NW. to SE. by 1 m. broad, and is drained SE. into the Soghla Göl. Alt. 3070 ft.

Beit, Arabic, 'a house.' See **Beth.**

Beit Ainûn, ruins, Palestine, *Beth Anoth* in the O. T., 31° 34′ N., 35° 7′ E., 3 m. NNE. El Khulil (anct. Hebron).

Beit Alâm, site, Palestine, perhaps the *Holon* of the O. T., 31° 35′ N., 34° 47′ E., 18 m. W. by N. Hebron.

Beit 'Anân, vil., Palestine, *Elon Beth Hanan* in O. T., 31° 51′ N., 35° 6′ E., 9 m. NW. by W. Jerusalem.

Beit 'Atâb, vil., Palestine, *Etam* (rock) in the O. T., 31° 44′ N., 35° 3′ E., 11 m. W. by S. Jerusalem.

Beit Dejan, vil., Palestine, *Beth Dagon* in the O. T., 32° N., 34° 50′ E., 5½ m. SE. Jaffa (anct. Joppa).

Beit-ed-din, vil., Syria. See **Lebanon.**

Beith, Gaelic, 'birch tree.' See **Bedw.**

Beith, par. and market-tn., Scot., N. Ayrshire and Renfrewshire, 10½ m. SW. Paisley, on the Glasgow, Barrhead, and the Kilmarnock Joint Rly., with a stn. on the G. & SW. R. 1 m. to NNW.; coal and fireclay in neighbourhood. Market-day, F. Par. 11,222 ac., P. 7000; tn. P. <5000.

Beit Hanuna, vil., Palestine, *Ananiah* in the O. T., 31° 50′ N., 35° 12′ E., 4 m. NNW. Jerusalem.

Beitîn, vil., Palestine, *Bethel* in the O. T., 31° 56′ N., 35° 14′ E., 10 m. N. Jerusalem, with fine ruins. P. <2000.

Beit Jâla, tn., Palestine, perhaps the *Galim* of the O. T., 31° 43′ N., 35° 11′ E., 5 m. SW. by S. Jerusalem.

Beit Jibrin, vil., Palestine, 31° 36′ N., 34° 53′ E., 14 m. WNW. El Khulil (anct. Hebron).

Beit Kâd, vil., Palestine, *Beth Eked.* in the O. T., 32° 28′ N., 35° 21′ E., 16½ m. S. by E. Nazareth.

Beit Lahm, the Bethlehem (of Judah) of the O. and N. T., tn., Palestine, 31° 42′ N., 35° 12′ E., 5 m. S. by W. Jerusalem.

Beit Lahm, vil., Palestine, *Bethlehem* in the O. T., 32° 44′ N., 35° 11′ E., 7 m. WNW. Nazareth.

Beit Lif, site, Palestine, probably the *Heleph* of the O. T., 33° 8′ N., 35° 20′ E., 12½ m. SE. by S. Tyre.

Beit Likia, vil., Palestine, probably the *Eltekeh* of the O. T., 31° 52′ N., 35° 4′ E., 12 m. NW. by W. Jerusalem.

Beit Mizzeh, site, Palestine, *Mozah* in the O. T., 31° 49′ N., 35° 9′ E., 6 m. NW. by W. Jerusalem.

Belfast, vil., Canada, Ontario, Huron co., 67 m. N. by W. London. P. <1500.

Belfast, or **Eldon,** vil., Canada, Prince Edward I., Queen's co., 24 m. from Charlottetown. P. <1500.

Belfast (ancient *Bel-feirsde,* 'the ford of the farset or sand-bank'), parl. and mun. bor., seapt., and principal manufacturing and commercial tn., Ire., cap. of Ulster, and county town of Antrim, at the head of Belfast Lough, where it receives the Lagan, 12 m. from the Irish Sea, and 86 m. NNE. Dublin. Among its educational institutions are Queen's College, opened in 1849, with eighteen professorships in arts, medicine, and law; the General Assembly's College (Presbyterian theology), the Royal Academical Institution, Campbell College, Methodist College, St. Malachy's College (Roman Catholic), and the Royal Academy. Among the public buildings may be mentioned the White Linen Hall, erected in 1785 to be the centre of the linen trade; the Ulster Hall, and the Museum. There is a free public library, built by the corporation, besides other public libraries. In the suburbs are five parks—Ormeau, Falls, Alexandra, Woodvale, and Dunville, besides the Royal Botanic Garden. The neighbouring streams afford a great amount of water-power, which at one time constituted the chief motor used in the important textile industries of the town. B. is the principal depôt of the Irish linen trade, and indeed the principal centre of that industry in the British Isles, and has also distilleries, breweries, foundries, bobbin, hat, and shoe factories, alabaster and barilla works, rope and sailcloth factories, flour-mills, and bleaching grounds, &c. The cotton manufacture introduced here in 1777 is now extinct. In the harb. are three iron shipbuilding yards, one of which is placed in the Admiralty list as suitable for building for the royal navy, and, among other ships, has built the steamers of the White Star line. The harb., which is under the control of commissioners elected by the ratepayers, has several docks and basins, the largest of which are Abercorn basin and Spencer dock (tidal), the latter having a depth on the sill at high water of 24 ft. 10 in. in ordinary neap, and 25 ft. 8½ in. in ordinary spring tides. There are four graving docks, the largest of which is 825 ft. long, and has a depth of 25 ft. 8½ in. on the sill. The inland trade of B. is facilitated by a canal connecting the Lagan with Lough Neagh, and by railways crossing the country in all directions, and extending by direct communication to Cork, Galway, and Londonderry. B. has constant steam communication with the neighbouring ports of Great Britain, by means of which it carries on a large part of its foreign trade. [See **Appendix,** p. 13.] For parliamentary purposes it is divided into four divs., N., S., E., and W., each returning one member. Market-days, Tu. (cattle and sheep), W. (general), F. (flax). Mean rainfall (1866–80), 34 in. Area of mun. bor. 5992 ac. (including 1670 ac. in the suburb of Ballymacarrett, co. Down). P. (1841) 64,000; (1851) 73,000; (1861) 91,500; (1871) 133,000; (1881) 161,000; (1891) 256,000; parl. bor. (1891) 273,000.

Belford, tn., New South Wales, co. Northumberland, 138 m. N. Sydney. P. <1500.

Belfort, or **Béfort,** fortified tn., France, cap. arr. not belonging to any dep., on the Savoureuse, 35 m. W. by N. Basel, in a position commanding the opening between the Vosges and the Jura. It was besieged by the Germans during the war of 1870–71, and capitulated Feb. 16, 1871, but was retained by France under the treaty of 1871, when the rest of the dep. of Haut-Rhin, to which it belonged, was ceded to Germany. Since that date its fortifications have been greatly strengthened. In former times cap. of the Sundgau. Alt. (base of church) 1195 ft. P. 17,900.

Belgard, tn., Ger., Prussia, prov. Pomerania, on the Persante R., 21 m. SE. by E. Colberg. P. 6900.

Belgáum, tn., with large military cantonment, Brit. India, Bombay, cap. dist. B., 43 m. NW. Dhárwár, connected by rail with Marmagáo (Goa). At the close of the rainy season fevers are common in the dist., which at other times is considered healthy. Alt. 2550 ft.; mean temp., yr. 74° F., Aug. 70°, April 81°; mean rainfall, yr. 48.8 in., June–Oct. 41.9, June–Aug. 33.5. P. 28,400 (Hindus, 21,200); cantonment, 12,300.

Belgern, tn., Ger., Prussia, prov. Saxony, on the l. bk. of the Elbe, 8 m. SE. Torgau, with lignite mines. P. <3000.

Belgium (French **Belgique,** German **Belgien,** anciently a part of *Gallia Belgica*), a European kingdom, forming the southern division of the 'Low Countries,' on the North Sea between Holland and France, is about one-eighth of the size of Great Britain. The frontier line inland is purely arbitrary, not being marked by any well-defined physical features. It is divided into eight provs., the names, &c., of which are given in the following table:—

Area of the Provinces of Belgium, with the population in thousands on the 31st December, and increase per cent. per annum between the successive censuses, for which particulars are here given.

Provinces.	Area sq. m.	Pop. 1856.	Pop. 1866.	Inc.	Pop. 1880.	Inc.	Pop. 1890.	Inc.	Pop. per sq. m.
Antwerp . .	1093	434	466	.71	577	1.54	700	1.95	640
Brabant . .	1268	749	814	.83	985	1.37	1106	1.20	872
West Flanders	1249	625	642	.27	692	0.54	738	0.65	591
East Flanders	1158	777	806	.14	882	0.64	950	0.75	820
Hainaut . .	1437	769	845	.95	978	1.05	1049	0.70	730
Liège . . .	1118	504	557	1.00	664	1.26	757	1.32	677
Limbourg . .	931	192	195	.15	211	0.56	223	0.56	240
Luxemburg .	1706	194	200	.31	209	0.32	212	0.14	124
Namur . . .	1413	286	303	.58	323	0.76	335	0.37	237
Grand total	11,373	4529	4828	.64	5520	1.19	6069	0.95	534

The greater part of the **surface,** including the provs. of Limburg, Antwerp, Brabant, Hainaut, and the two Flanders, is flat or slightly undulating. In the SE. are the forest-covered hills of the Ardennes, which occupy a considerable part of the dist. lying beyond the Sambre and the Meuse, comprising the provs. of Liège, Namur, and Luxemburg. One branch of the Ardennes separates the Meuse from the Sambre. General elevation about 2000 ft., Baraque Michel 2230 ft. In the prov. of Limburg in the NE. is a tract known as the Campine, formerly entirely composed of sand and bog, but now in a great measure reclaimed, partly planted with fir-trees, and in some places producing rich pasture-grasses. The **coast** is of very limited extent and with no indentations of importance, and no good natural harbours. The coast is bordered with dunes or sandhills, which protect it against the inroads of the sea. Tracts of land wrested from the sea and enclosed by dykes are here, as in Holland, known as polders. About one-sixtieth of the surface has been reclaimed from the sea and the rivers. The chief **rivers** are the Meuse and the Scheldt, only the middle courses of which, however, are in Belgium. Both rivers have their source in France, and their outfall into the North Sea through Holland. The Meuse (*q.v.*) drains the eastern provs., both it and its chief tribs. (Sambre, l. bk., and Ourthe, r. bk.) flowing through narrow valleys which intersect the high grounds of this part of the country. The Scheldt (*q.v.*) and its tribs. (Lys, l. bk., Dendre or Dender, r. bk.) wind through the western plains. **Geology.**—In the SE. the stratified rocks belong mainly to the Palæozoic group (see below under **minerals**), overlying the granitic and other Plutonic rocks which crop out in the Ardennes. To the NW. these are covered by secondary deposits, which occupy an extensive area in the central part of the country. Still more to the NW. Tertiary deposits predominate, as they do also in the E. The **climate** is similar to that of England, but subject to greater extremes. The mean annual temp. for the whole country is about 50½° F., Jan. 37°, July 60°; rainfall about 28 in. Of **wild animals,** the bear, wolf, and boar are still found in the forests, but their numbers are few. **Agriculture** is pursued with great industry, though in a rather primitive fashion, the Flemings especially being very reluctant to adopt new methods. About 67 per cent. of the land is under cultivation, and more than 20 per cent. of the population are engaged in it. Subdivision of the land prevails to such an extent that the number of distinct holdings exceeds 900,000. The western provs. are the most fertile. In the S. and E. the soil is generally poor. The principal objects of culture are—cereals (wheat, oats, rye, which together cover about a third of the entire surface), potatoes, flax, beet-root (including sugar-beet), turnips, and other root crops; and among the minor crops are hemp, hops, chicory, madder, tobacco, &c. The flax is noted for its quality, and is principally grown in the Lys dist., where the water is remarkably free from lime salts, and hence peculiarly suited for the cleansing of the fibre. **Forests** cover about 17 per cent. of the surface; the principal are those of Ardennes and Soignies (*q.v.*). The **mineral wealth** of Belgium consists chiefly in coal, iron, and zinc. The region of production may be described as occupying the valleys which intersect the Belgian plateau from the eastern frontier, near Aix-la-Chapelle, to about the middle of the Franco-Belgian frontier, the principal valleys in this respect being those of the Sambre and Meuse, more especially that part of the Meuse valley which continues the line of the valley of the Sambre, and is traversed by the railway from St. Quentin in France to Liège. Geologically,

this strip is formed by a series of carboniferous strata lying on the north-western margin of a Devonian plateau which extends eastwards into Germany. The carboniferous area is occupied by a large proportion of productive coalfields, the chief coal-mining regions being round Mons, in Hainaut, near the French frontier, and round Charleroi in eastern Hainaut. Iron ores are chiefly found in the more easterly provs. of Namur and Liège, and zinc is obtained at Moresnet, close to the eastern frontier, between Verviers and Aix. There are also productive lead-mines near Verviers. The iron-ore production in B. is only about one-tenth of the amount consumed. This deficiency is, however, of less moment on account of the proximity of the very abundant iron ores of the grand-duchy of Luxemburg and the NE. of France. The coast and deep-sea **fisheries** form an important industry, employing about 360 vessels. Ostend is the headquarters of the herring-fishery. **Manufactures** are extensive and varied, giving employment to about one-seventh of the population. The textile industries, above all, woollen and linen, iron industries, and glass-making, are the most important. B. having local supplies of sand as well as coal, and manufacturing soda compounds for itself, has the most extensive manufacture of window-glass in Europe, and also makes excellent mirror-glass. The principal seats of the manufactures of iron and steel (Liège, Seraing, Namur, Charleroi); firearms (Liège); machinery (Seraing); cutlery (Namur); nails and glass (Charleroi); cotton (Ghent); woollens (Verviers, Liège, Ypres); linen (Ghent, Bruges, St. Nicolas, Courtrai); silk and velvet (Antwerp and Lierre); hosiery (Tournai); lace (Brussels, Louvain, Bruges); carpets (Brussels, Tournai); beet-sugar (Hainaut); beer (Louvain); shipbuilding (Antwerp); paper, &c. **Railway system.**—Railways, first introduced in 1835, now form a complete network throughout the country. The centre is at Malines (Mechlin), whence main lines radiate in all directions, and these again are united by numerous branch lines. Two-thirds of the railways are the property of the state. A great extent of **inland navigation** is afforded by the two large rivers, which, with their numerous tribs., ramify through the country, and this has been nearly doubled by the construction of canals, the total length of navigable waterways for vessels of from 300 to 400 tons being over 900 m. Amongst the principal canals are the Lieve, between Ghent and Heyst; the canal from Ghent to the estuary of the Scheldt (Terneuzen-Ghent canal); the Bruges and Ostend canal; the Brussels and Charleroi; and the Canal du Nord, which connects the Nèthe, a small trib. of the Dyle, with the Meuse at Liège. The last-named canal has a very circuitous route through Antwerp and Limburg to Maastricht in Holland, from which point it follows the valley of the Meuse to Liège. With regard to the amount of the **foreign commerce,** see **Appendix,** pp.4-5. In the special commerce, which includes all articles that have paid customs duty, grain, wool, vegetable fibres, and raw hides make up considerably more than one-fourth of the imports. Among others of importance are animals, oil-seeds, timber, metals, and minerals, petroleum, and coffee. Grain, coal, flax, yarns (linen, hemp, and woollen), machinery, glass and glass wares, make up more than a third of the value of the exports. Amongst minor exports may be noted eggs, butter, rabbits, clocks and watches, and gloves. The countries with which commerce is chiefly carried on are France, Germany, Netherlands, England, the United States, and Russia. The external trade is mainly in the hands of foreign carriers (chiefly England), the mercantile marine being very limited. The great bulk of the shipping trade is carried on at Antwerp. Of the other ports the principal are Ghent, Bruges, Nieuport, Ostend, Blankenberghe, and Heyst, all, with the exception of the first, in West Flanders. The system of **money, weights, and measures** is the same as in France. **Government, Army, and Fleet.**—The government is a constitutional hereditary monarchy, dating from 1831. The executive authority is vested in the King, and the legislative in the King, the Senate, and the Chamber of Representatives. Senators are elected for a period of eight years in the proportion of 1 to 80,000 inhabitants, and Deputies for four years in the proportion of 1 to 40,000. The franchise is limited to citizens paying direct taxes amounting to 40 francs annually. Service in the **Army** is compulsory. Every man over nineteen years of age is liable to serve, but may provide a substitute. The period of service is nominally eight years, of which two years and eight months are with the colours. B. has no navy. The **population** is partly of Teutonic and partly of Romance origin, the former represented by the Flemings, who predominate in the N. and W., and the latter by the Walloons in the S. The Flemings speak the Flemish, and the Walloons French, or a Romance dialect closely akin to it. French is the official language, and that of the upper classes generally. Immigration is slightly in excess of emigration. The difference, which has been decreasing for some years, is still over 1000. The prevailing **religion** is Roman Catholic. Protestants number about 10,000, and Jews 4000. Complete religious toleration is established, and the clergy of all denominations may be paid by the state. **Education**, though free for the children of the poor, is not compulsory, and a large proportion of the community is quite illiterate, as shown by the fact that of the military recruits about one-eighth are unable to read or write. Higher education is provided for by the Universities of Ghent, Liège, Brussels, and Louvain; by special academies for art and music, and by various technical schools. There are many middle-class schools subsidised by the state. The following are the **principal towns**, in order of population, above 20,000: —Brussels, Antwerp, Ghent, Liège, Bruges, Malines (Mechlin), Verviers, Louvain, Tournai, Seraing, Courtrai, Namur, St. Nicolas, Mons, Alost, Ostend, Charleroi. **Historical Notes.** —Under the Roman dominion Belgium formed part of Gaul. Afterwards, for several centuries, it was ruled by the Franks, and then divided into several independent states, as the duchies of **Brabant, Limburg,** and **Luxemburg,** and the counties of **Flanders, Hainaut,** and **Namur,** &c. In course of time the Counts of Flanders acquired the supremacy, but in 1385 their dominions passed to the House of Burgundy, whose sway was soon extended over the whole of the Netherlands. The marriage of Mary of Burgundy with Maximilian in 1477 transferred these provs. to the Austrian rule, from which they passed to that of Spain. When the northern provs. asserted their independence, the southern or Belgian still adhered to Spain. For a short period in the beginning of the 17th century B. was formed into an independent state under the Archduke Albert, but on his death it reverted to Spain. In 1713 it was ceded to Austria, from which it was taken by France during the revolutionary war. In 1814 it was united with Holland under the rule of the House of Orange. This union proved uncongenial, and in 1830 the Belgians asserted their independence, and formed themselves into a separate kingdom. See **Luxemburg,** duchy of. [**E. J. H.**]

Belgrade, Servian **Beograd** ('white fortress'), the anct. *Singidunum*, a fortified city, cap. of Servia, prov. B., at the confluence of the Save and Danube. The fortress, situated on a spur of the Avala Mts., on the tongue of land between the rivers, was formerly a Turkish stronghold, and was of special importance as long as the Danube and Save formed the frontier between Turkey and Austria. Seat of a metropolitan of the Greek Church. B. was taken by the Turks under Solyman II. in 1522, and retaken by Prince Eugene in 1717. It was partly ruined during the Servian insurrection in 1813, but the defences were strengthened during the Crimean war. Partly lighted with electricity. P. (1872) 26,700; (1890) 54,300. Bell Pat, vil., Brit. Baluchistan, Gandava, 55 m. NNW. Jacobábád, on the Quetta Rly.

Bell Rock, or **Inch Cape,** a reef of rocks in the N. Sea, 12 m. SE. Arbroath; 6 ac. The reef is 2000 ft. long, and at spring ebbs a portion is uncovered to the height of 4 ft. Between 1808 and 1811 a lighthouse was built on it, which is 100 ft. high, and 42 ft. in diameter at its base, with a revolving light; in 56° 26′ 3″ N., 2° 23′ 6″ W. At the distance of 100 yards all around the rock, at low water of spring tides, there is a depth of three fathoms of water. It owes its name to the tradition that a bell was attached to the rock by one of the abbots of Arbroath to give warning to mariners in storms.

Bell's, rly. stn., Canada, Ontario, on the C. P. R., 13½ m. from Brockville.

Belt, Great and **Little,** two straits of the Baltic Sea, by which it communicates with the Kattegat. Both extend from about 54° 50′ to 55° 40′ N.; the Great Belt in 11° E., between the Danish islands Seeland on the E., and Fyen (Funen) on the W.; the Little Belt, 9° 50′ E., between Fyen on the E. and the mainland of Schleswig and Jutland on the W., is 70 m. long and 4 to 20 m. broad. The navigation of the Belts, both of which have a navigable channel of at least 30 ft. depth throughout, is dangerous from the number of shoals, and their liability to storms in winter, when they are sometimes frozen over. In 1893 Denmark resolved to keep them open by ice-boats.

Beltana, tn. and rly. stn., S. Australia, co. Frome, 144 m. N. Port Augusta. Mean rainfall (9 yrs.), 9.11 in. P.<1500.

Benares, city, India, NW. Provs., cap. of B. dist., 390 m. NW. Calcutta, 72 m. E. Allahábád, the anct. cap. of Hinduism. It stands on the edge of the R. Ganges, l. bk., where it makes a bend to the left, thus presenting at one view the whole series of the imposing ghâts or steps descending to the river-bank, along with the temples and mosques by which these ghâts are surmounted. The river is still accessible here to large steamers,

and is now crossed by a railway bridge; but the town, in spite of its size, is not specially remarkable as a seat of trade and manufactures. It is enriched rather by the concourse of wealthy pilgrims. B. has shown a tendency to shift its position. The oldest town occupied the site of Sárnáth, where colossal Buddhist remains still lie thickly scattered over the ground. Three-fourths of the inhabitants are Hindus, less than one-fourth Muhammadans. The climate in the dist. is one of the hottest and dampest in the NW. Provs. Alt. 267 ft.; mean temp., yr. 78° F., Jan. 61°, June 91°; mean rainfall, yr. 39.6 in., June–Sept. 35.0, July-Aug. 23.5. P., including cantonment (1881) 199,700; (1891) 219,500.

Bender, Persian, 'a harbour.'

Bender' (Bandar, or **Bunder) Abbas** (at one time called also **Gombroon,** but renamed after Shah Abbas the Great after he had, in 1622, with the aid of the English, driven the Portuguese out of Ormuz), seapt., Persia, on the Persian Gulf, at the most northerly point of the Strait of Ormuz, and about 10 m. NW. Ormuz I., starting-point of the caravan route to Kerman and Yezd; roadstead exposed to the SE., otherwise sheltered. It is a dirty town, and so hot and unhealthy that the wealthier native merchants mostly retire during the greater part of the year to Minab, 50 m. to the E., though healthy residences could, it is said, be obtained on hills a few miles off. Trade chiefly with Brit. India and Arabia; total value exports (mainly cotton, opium, asafœtida, and henna) about £500,000. P. variously estimated at 5000 to 12,000.

Bengal, a presidency of Brit. India, one of the three great divisions of the country, roughly embracing all India N. of the Vindhya Mts., at one time under a single administration, but now divided into several provinces, which are still united, however, as regards military organisation. The provinces are the lieutenant-governorships of Bengal, the NW. Provinces and Oudh, and the Punjab, the chief commissionership of Assam, and the commissionership of Ajmere. See **India,** table.

Bengal, or **Lower Bengal,** a lieutenant-governorship of Brit. India, composed principally of the lower basin of the Ganges and the Brahmaputra. In ancient times Banga was the name of an Aryan kingdom practically conterminous with the Ganges-Brahmaputra delta, and the name Bangala, a form which first appears in the works of Marco Polo, and other writers of the 13th century, was applied under Mohammedan rule to the same region. The present lieutenant-governorship is made up of the nine divisions enumerated in the following table. Of these Orissa (*q.v.*) in the SW., and Chutiá Nágpur (*q.v*) in the W., correspond to two old provs. The divisions of Bhágalpur and Patná in the NW. are equivalent to the old prov. of Behar. The remaining divisions form Bengal proper. Bardwán, Presidency, Dacca, and Chittagong succeed one another from W. to E. in the S., and Rájsháhi lies between Bhágalpur and Assam.

The greater part of the area of the lieutenant-governorship consists of plains. These plains are widest in the S., where they spread out along the seaboard. They are narrowest in an E. to W. direction, about the place where the Ganges and the Brahmaputra turn southward, the Ganges skirting the Rájmahál Hills on the W. of the plains, the Brahmaputra washing the base of the Gáro Hills on the E. The width of the plain is here about 130 m. Farther N. the plain expands in an E. to W. direction, the narrower dimensions being that from N. to S. between the Himálayas and the southern tableland. The width in this direction is about the same as that in the neck between the Rájmahál and the Gáro Hills. The plains to the S. of this neck form one of the most extensive regions of river alluvium in the world. The greater part of the area made up of these plains belongs to the delta of the Ganges and Brahmaputra, which is about equal in extent to the whole of Ireland [**Deltas**]. The main streams of these rivers now unite at Goálánda; the bulk of their water is carried to the sea by the Meghná estuary, whereas the Húglí (Hooghly) has throughout the historical period formed the principal highway for ships [**Húglí, Ganges, Calcutta**]. The principal rivers of this basin, belonging at least in part to Bengal, are the Gogra (the lower course of which forms part of the frontier on the side of the NW. Provs.), Gandak, and Kúsi, three l. bk. tribs. of the Ganges, the Son, a r. bk. trib. of the Ganges, and the Surmá, a river joining the main stream on the left in the delta. Orissa has a separate river system from Lower Bengal. The chief rivers are the Mahánadí, Bráhmaní, and Baitaraní, together with the Subarnarekhá, on the confines of the prov. in the N. The chief river of Chittagong division, the Karnaphulí, also has a basin wholly distinct. Its upper waters flow between the parallel ranges of mountains which bound the Ganges delta on the E. The **climate** of Bengal generally is more tropical than might be expected from the situation of the province, seeing fully half of it lies outside of the torrid zone. The mean temp. at all the stations at moderate elevation (less than 400 ft.) N. of Orissa is from 77° to 79° F. at Cuttack in Orissa, 3° S. of the Tropic of Cancer, 81° F. The mean rainfall in the half of the prov. E. of the meridian of 88° (near that in which the Ganges turns to the SE.), as well as in Orissa [**Cuttack**], is generally above 50 in. [**Calcutta, Berhampur, Jessore, Dacca, Purniah**], at hill-stations and places near the W. base of hills [**Darjiling, Dacca, Chittagong**], much higher; in the half W. of that meridian the mean rainfall is generally below 50 in., as in Behar [**Patna, Darbhanga**], and the Chutiá Nágpur div. [**Hazáribágh, Gayá**]. Everywhere the rainiest months are June to Sept. The less rainy parts in the NW. are almost the only parts that can be called healthy. The rest suffer from malarious diseases, and in many of the dists. cholera is endemic. **Irrigation** works are not required in the E. half of the prov. The only irrigation works, indeed, are those of the deltaic system in Orissa, the Midnapur Canal running W. from the Húglí, and the Sáran and Son canals in the NW. of the prov., the Sáran canals, between the lower Gogra and Gándak, being principally designed to supply water for the manufacture of indigo. **Famine** is seldom experienced E. of the Húglí. In 1865–6 the whole of the W. half of the prov. was visited by famine, which was intense in Orissa, and in 1873–4 the NW. was visited by famine, which was very severe to the N. of the Ganges between the Gandak and the Tísta. **Agricultural Products.**—Rice is the great staple, but numerous other grains besides pulses are grown. Among other products of the soil are oil-seeds, sugar-cane, pepper, ginger, indigo, jute, tropical fruits, the silk-mulberry—in fact, almost everything that tropical India can furnish. A large proportion of the silk of the prov. is tasar or tussur silk, the produce of 'wild moths' in the hill-forests of Chutiá Nágpur. On the Himalayan slopes in Darjiling (*q.v.*) are grown tea and cinchona [**India**]. Among **minerals** the coal and iron of the W., on the outskirts of the Indian tableland, are the most important. Here, in the valley of the Dámodar R., a r. bk. trib. of the Húglí, and in that of the Barákhar, a l. bk. trib. of the Dámodar, are several coal-fields, which together produce about four-fifths of the coal raised in India, the principal being that round **Ráníganj**, about 120 m. NW. of Calcutta. The coalfield of **Karharbárí** yields a better quality of coal, and the amount of its output is rapidly increasing. It is connected by a branch line with the East Indian Railway, which possesses some of the mines belonging to it. The same railway is projecting the laying of another branch line to the Jhariá coalfield, about 30 m. to the S. of that of Karharbári. The principal beds of iron ore are near Ráníganj, but are not of good quality, while the Raniganj coal is not suitable for iron-smelting. Karharbári coal can, however, be used for the purpose; but hitherto the attempts to develop a great iron industry in this neighbourhood have not been successful [**Barákhar**]. Coal also exists among the eastern hills, though here there is as yet but a scanty production. The northern plains of Behar have long been noted for their yield of saltpetre, which appears as an incrustation on the surface, and is regularly renewed after its removal. Other salts incrust the surface elsewhere, but only in the drier parts of the prov. Common salt is obtained in the dist. of Balasor, in the N. of Orissa, by the boiling of sea-water in earthenware pots, and in that of Purí, in the S. of Orissa, by solar evaporation. Muslins [**Dacca**], cotton piece goods, diaper, pack-thread, sailcloth, chintzes, silks, calicoes, blanketing, and other woven goods are occasionally manufactured, but the bulk of the native manufactures have now been superseded by European imports. Jute cloth and gunny-bags are now, however, made in Bengal in large and increasing quantity in mills working modern machinery. As to the foreign commerce, see **India** and **Calcutta.** In the delta the rivers form the principal **means of communication.** Almost every cottage there has a navigable stream at its door, and the Bengal *rayat* keeps his boat almost as regularly as an English farmer keeps his gig. The Brahmaputra is the principal means of communication with the valley of Assam. A railway is, however, being constructed from Chittagong to Assam (*q.v.*). The principal railways of the prov. are those which run from Calcutta (or Howrah on the r. bk. of the Húglí opposite Calcutta) westwards; the most important being the E. Indian Rly., which ascends the Ganges valley, and communicates with the Bengal-Nágpur Rly., by means of which communication has since March 1891 been established between Calcutta and Bombay. The Eastern Bengal State Rly. runs first E. to Goálánda, the starting-point of steamer-traffic on the Brahmaputra, and then by means of a ferry effects communication with another line running N. to the base of the Himálayas, where a narrow gauge (2 ft.) mountain railway, the highest in the Old World (reaching a height of 7300 ft.), takes one up to the hill-station of Darjiling. The principal and most celebrated **towns** are Calcutta, the seat of government, its suburb Howrah, Murshidábád, Dacca, Patna, Gayá, Cuttack, and Purí; the only seaports of any consequence Calcutta and

Chittagong. As regards **language,** nearly all the inhabitants of B. proper speak Bengáli, and the allied Uriyá is the prevailing dialect of Orissa. In the NW. divs., on the other hand (Behar and Chutiá Nágpur), the main dialects are Hindí [**India**]. The principal 'aboriginal' tribes [**India**] are Santáls and Kols, who are most numerous in the hill-tracts of Chutiá Nágpur (*q.v.*). About one-third of the population are Mohammedans in religion, and the remainder principally Hindus. [See **India,** table.] In early times the chief seat of power in this part of India was in Behar [**Patna**], and Hindu princes ruled in petty principalities in Bengal proper down to the end of the twelfth century. From about that date to 1336, B. was ruled by governors dependent on the Mohammedan emperors in the N. From 1336 to 1539, it remained under independent Mohammedan kings. From 1539 to 1576 it was governed by an Afghan or Pathan dynasty, and from the latter date till 1765 it formed part of the Mughal empire. Meantime, the British East Indian Company had been acquiring influence in the delta, and becoming involved in war with the Mughal empire, succeeded after several victories (Plassy, 1757; Baxar, 1764) in obtaining in 1765 the cession of most of the terr. now constituting the lieutenant-governorship.

Bengazi, or **Benghazi,** seapt., on the N. ct. of Africa, Barka, in 19° 54′ E., starting-point of caravans proceeding S. by the oases of Aujila, Kufra, and Kebabo, to Wanjanga and Wadai, and SE. by those of Siwah and Beharieh to Egypt; shallow harbour but good roadstead. A breakwater is now being constructed to divert the currents which encumber the harbour with sandbanks. Principal exports, sheep and other animals (including camels sent by land to Egypt), wool, barley, butter, salt, sponges (from Gulf of Sidra), ivory. Annual value, £200,000 to £300,000. Mean temp. (1 yr., 1882), yr. 69.0° F., Jan. 54.7°, Aug. 80.4°. P. 15,000.

Beni, Arabic, 'tribe.'

Beni, riv., S. America, Bolivia, formed by the junction of all the streams descending from the eastern Cordillera, between 14° and 18° S. It flows N. then NE. till it unites with the Mamore on the Brazilian frontier in about 10° 20′ S. to form the Madeira. Falls occur at Esperança, about 22 m. up, but above that it is navigable with ease to the confluence of the Madre de Dios (about 11° S.), and with more difficulty, especially during the dry season (Aug. to Nov.) to San Buenaventura, about 14½° S.; alt. 790 ft.—300 ft. above the mouth. Total length, reckoned from the source of its principal headwater, the La Paz (about 16½° S., 68° W.), 850 m., in which there is a fall of 9840 ft.

Beni, or **El Beni,** the northernmost dep. of Bolivia (*q.v.*) traversed by the riv. B.

Beni-Adin, vil., Upper Egypt, prov. Siut, caravan stn., on the Bahr Yusuf.

Beni Amer (or **Hamer**), E. African tribe dwelling on both sides of the Barka, Upper Ethiopia, near the Red Sea, in about 16°–18° N. Mohammedans. One half speak the Tigre dialect of the Abyssinian; the rest a Hamitic dialect (Beja), which they have learnt from the Hadendoa. *Proc. R. G. S.,* 1892, pp. 546, 706.

Beni Arros, an Arab tribe, in the N. of Morocco, in about 35° 20′ N., 5½°–5⅝° W.

Benicarló, tn., Spain, prov. and 42 m. NE. Castellon de la Plana, on the shores of the Mediterranean, at the mouth of the small riv. B. Superior wine. P. 7900.

Beni Chamara, an Arab tribe in the N. of Morocco, in about 35° 20′ N., 5°–5° 20′ W.

Benicia, city, U.S., California, Solano co., 24 m. NE. by N. San Francisco. P. <3000.

Benidorm, tn., Spain, prov. and 25 m. NE. Alicante, on the Mediterranean, with sardine-fisheries. P. <4000.

Benifayo de Espioca (or **de Falcó**), comm., Spain, prov. Valencia, 5 m. SE. San Félipe de Jativa. P. <4000.

Beniganim, tn., Spain, prov. Valencia, near San Félipe de Jativa. P. <4000.

Beni Ghorfad, an Arab tribe in the N. of Morocco, in about 35° 10′ N., 5° 20′–40′ W.

Beni Hamar, an Arab tribe in the N. of Morocco, to the S. of Tetuan.

Beni Hassan, vil., Upper Egypt, on the r. bk. of the Nile, about 75 m. below Siut, with celebrated rock-tombs.

Beni Hassan, an Arab tribe in the W. of Morocco, to the S. of the R. Sebu.

Beni Mansur, vil., Algeria, on the Sahel, 50 m. SW. by W. Bougie, with a fort commanding the roads from Algiers to Constantine and from Aumale to Bougie. P. <2000.

Beni M'sgilda, an Arab tribe, Morocco, on both banks of the Sebu, to the N. of Fez.

Beni Naim, vil., Palestine, *Janum* in the O. T., 31° 31′ N., 35° 9′ E., 3 m. E. by S. El Khulil (anct. Hebron).

Benin, riv., W. Africa, about 70 m. long, flows W. into the Atlantic, in about 5° 46′ N., 5° 3′ E.; bar at mouth 13–14 ft. deep at high tide, in consequence of which large steamers enter the Forcados R., which is connected with the B. by creeks; forms the W. boundary of the Oils River Protectorate. *Geog. Jour.,* 1893, p. 122.

Benin, kgd., W. Africa, of large but undefined extent, lying to the NW. of the Brit. Niger Coast Protectorate, and now itself included under British protection. Surface rises gradually inland to the height of 2500 ft. A mountain range in the W. has peaks estimated at 5000–8000 ft. Principal river the Benin. Produces large quantities of palm-oil, a trade in which is carried on with the Lagos colony and the Niger Coast Protectorate through the Jakris coast tribes, who act as middlemen. The B. people are utterly barbarous. The cap., B. city, is the seat of a powerful theocracy of fetish priests. Human sacrifices are frequent, the victims generally being crucified. *Geog. Jour.,* I. (1893), pp. 122–30. Area, 50,000 sq. m. (?). P. unknown.

Benin, tn., W. Africa, cap. state of B., on the Gwato Creek, a navigable arm of the Benin R., about 25 m. above the mouth of the creek, and about 50 m. from the Atlantic, and 135 m. E. Lagos; a stray collection of houses here and there in a situation naturally defended by forests, but without artificial defences; wood-cutting and brass-work practised. Numbers of mines testify to the city having been much larger, as it was described to be in the 17th and 18th centuries. P. 15,000 (?).

Benin, Bight of, the large open bay, W. Africa, to the W. of the Niger delta.

Benington, par., Eng. See **Bennington.**

Benue (or **Benuwe, Binue, Chadda**), the most important trib. of the Niger. It takes its rise in the mountains N. of Ngaundere (Adamawa), following first northwards to a point a little below Dinghi, and then westwards till it joins the Niger opposite Lokoja in about 7° 50′ N.; navigable by boats of 5 ft. draught at least as high as Garua, about 600 m. up, in about 13° 26′ E. Its mouth first seen in 1830 by Lander, who calls it 'the Benue or Tchadda' (Chadda), though this latter name does not appear to be known on its banks; its upper waters visited by Barth in 1851. Its chief tribs. are the Faro, Tarabba, Katsena, Kebbi (*q.v.*), Gongola, Kaddera, and Okwa. During the rainy season the Binue inundates all the surrounding country. Yola in Adamawa is the most important town on the Benue, it is noted as an ivory centre. Other towns on or near the B. are Muri, Shebu, Wukari, Awoi, and Loko. The B. as far as Yola is now within the British sphere of influence. See *Proc. R. G. S.*, 1891, pp. 448-465, and map, p. 512. [**H. G. S.**]

Berane, vil., Turkey in Europe, on R. Lim, prov. and 39 m. SW. by W. Novibazar. P. <1000.

Berar, or **Haidarábád Assigned Districts,** a terr., India, to the S. and W. of the Central Provs. and to the E. of Bombay, properly belonging to the dominions of the Nizam of Haidarábád (Hyderabad), but placed in 1853 under British administration by a treaty in which the British Government undertook the maintenance of the Haidárábad contingent of troops in return for this cession. The dists., five in number, named in the following table, are under the administration of the resident at Haidarábád, who is chief commissioner for this terr.:—

District.	Area in sq. m.	Pop. 1867.	Pop. 1881.	Pop. 1891.	Increase or Dec., 1881-91.	Pop. per sq. m. 1891.
Amráoti .	2759	501	575	656	14.1	238
Akola . .	2660	481	593	575	−3.0	216
Ellichpur .	2623	279	314	316	.6	120
Buldána .	2809	366	440	481	9.3	171
Wún . .	3911	324	392	472	20.4	120
Básim . .	2956	277	359	398	10.9	135
Total .	17,718	2228	2673	2897	8.4	164

The southern portion of the terr. belongs to the tableland bordered by the Ajanta Hills, but the northern, and by far the richer half, consists mainly of the valley between these hills and the Sátpura range, drained W. by the Purna (trib. of the Tápti). This valley, now traversed by the railway from Bombay to Nágpur, is filled with the rich black cotton soil widely spread over the tableland of India (*q.v.*), and has a regular and ample rainfall [**Akola, Amráoti, Chikalda**], so that famine is here unknown. More than three-fifths of the whole area of B. is under cultivation, the cultivated area being principally in this valley. Great millet (*jodr*) and cotton are by far the most important crops, wheat and oil-seeds ranking next in order. The only mineral of importance is coal in the SE. (Wardhá Valley), but it is as yet little if at all worked. Chief towns, Amráoti, Ellichpur, Akola. See **India,** table.

Berat, called by the Slavs **Bielagorad** ('white town'), by the Turks **Arnaut Beligradi,** tn., Turkey in Europe, cap. prov. B., occupying an important strategic situation on a high and picturesque rock overlooking the R. Osum, 50 m. SE. by S. Durazzo, near the ancient *Elyma*, with a castle; Greek archbishopric. P. 10-12,000.

Beraun, tn., Austria, Bohemia, on riv. B., at the confluence of the Litawa, 18 m. WSW. Prague, with blast-furnaces and rolling-mills, and cotton and other manufactures. In the neighbourhood the castle (formerly the church) and cave of St. John under the Rock, a place of pilgrimage. P. 7300.

Beraunka, or **Beraun,** riv., Bohemia, trib. of the Moldau, rises in the Bohemian Forest, where it is called the Mies, and joins the Moldau at Königssaal. 105 m. long.

Berbenno di Valtellina, comm., Italy, prov. and dist. Sondrio. P. <4000.

Berber, tn., Nubia, on the r. bk. of the Nile, to the N. of the Atbara mouth, in 18° N., the nearest place on the Nile to Suakim. P. 30,000.

Ber'bera, seapt., E. Africa, cap. of Somali-land, under British influence, on a bay of the Gulf of Aden, forming a safe and capacious harbour, 11-13 fathoms deep at the mouth, decreasing to 5 fathoms at 400 yds. from the town. An annual fair is held from October to April, attended by 10,000 to 20,000 persons. See **Harrar.**

Berbers, the name given to the aboriginal inhabitants of the Barbary States, N. Africa, a people belonging to the Hamitic branch of the Caucasic stock; now largely intermixed with Arabs. In Algeria they are called Kabyles.

Berbice, the westernmost dist. of Brit. Guiana [**Guiana**], extending along the coast, and up the Berbice R., and mostly between 6° and 7° N., 57° and 58° W. Principal town New Amsterdam.

Berbice, riv., Brit. Guiana, has at first a N., and afterwards a NE. course, between the Essequibo and the Corentyn Rivs., and joins the Atlantic by an estuary 5 m. wide, 10 m. N. New Amsterdam, and in 6° 21′ N., 57° 30′ W. In 1837 it was ascended as far as 3° 55′ N., where it was 33 yds. wide, with a depth of from 8 to 10 ft. In its upper part it has rapids and cataracts; but it is navigable for 165 m. from the sea, for vessels drawing 7 ft. of water. Among the vegetation on its banks, the magnificent water-lily, the *Victoria regia*, was discovered in 1837.

Bergen, market-vil., Prussia, prov. Hesse-Nassau, circle and dist. Hanau. P. <4000.

Bergen, a fortified city and seapt. of Norway, cap. of diocese (*stift*) and dist. (*amt*) B. [**Norway**], built round the head of a deep bay, on the Atlantic, 190 m. WNW. Christiania. Lat. of castle 60° 24′ N., long. 5° 18′ E. B. is surrounded by elevated hills on the land side, which renders the climate humid. It has a cathedral, museum, diocesan college, naval academy, &c. Its harbour, which includes those of Nyhavn, Holmen, Skudevigtsbugten, and Puddefjorden, besides Vaagen, which forms the inner harbour, is deep and sheltered, but rocky, and is defended by several forts. Manufactures earthenware, tobacco, and cordage; distilling and shipbuilding are carried on; the fishery is, however, the principal source of employment, and large fleets of small vessels come from the N. provs. in summer, bringing to Bergen cod-fish for salting, fish-roes, fish-oil, blubber, skins, and feathers, and taking back goods in return. The *Stävne,* a kind of fish-fair, attended by fishermen and other seamen of all nations, is held here in May to June and July to August. The foreign trade is mostly with the countries of N. Europe, besides Spain and Portugal, but it has direct steam communication even with N. America. In the Middle Ages the Hanseatic League had an important factory here, and their old quarter still survives under the name of the Bryggen or Tydske Bryggen ('German bridge'). Mean temp., yr. 44.2° F., Feb. 32.3°., July 58.5°.; rainfall (19 yrs.), 67.72 in. P. (1870) 30,300; (1891) 52,800.

Bering Cape, Alaska, in 65° N.

Bering Island, the larger of the two Kommandor Is., 115 m. from the E. ct. of Kamchatka, crossed by 55° 10′ N., with the tomb of Bering, who died here after being shipwrecked in Dec. 1741. Important resort of sea-hunters. Mean temp. (4 years., 1882–86), yr. 35.8° F., Jan. 26.4°, Aug. 51.0°.

Bering Sea is that part of the N. Pacific Ocean between the Aleutian Is., in 55°, and B. Strait, in 66° N., by which latter it communicates with the Arctic Ocean. It has on its W. side Kamchatka and the Chukchi country, with the Gulf of Anadyr, and on its E. the terr. of Alaska, with Norton Sound and Bristol Bay. Contains several islands, and receives the Yukon R. from N. America and the Anadyr R. from Asia. Fogs are almost perpetual in this sea. Ice is formed and melted in the sea every year, the northern part becoming closed to navigation about the beginning of November. Pack-ice gradually extends southwards to a little below the lat. of St. Matthews I. (60½°), beyond which ice is found in floes. The S. limit of the ice usually extends from Bristol Bay, Alaska, to about 35 m. S. of Pribilof I., though in exceptionally severe winters it reaches as far S. as Unimak Pass. It usually leaves Pribilof I. about May 1st, and vessels following in its wake may reach B. Strait between about the 15th and 25th of June. A strong and comparatively warm current sets northwards at about 2 to 3 knots an hour, through B. Strait, and after following the Siberian shore turns N. towards Herald I. A cold current also passes out through the strait. The United States having claimed the exclusive right of seal-fishing in the B. Sea in virtue of the purchase of Alaska from Russia, and this right having been disputed by the British, it was decided in Aug. 1893 by an arbitration tribunal, to which the question was referred, that no such right existed, but at the same time regulations for the protection of the fur-seal were drawn up and agreed to between the two powers, the chief being the prohibition of the seal-fishery within a zone of 60 m. round the Pribilof Is., inclusive of the territorial waters, and the establishment of a close season for the fur-seal from May 1 to July 31 inclusive, applying to the part of the Pacific and B. Sea N. of 35° N. and E. of the 180th meridian from Greenwich.

Bering Strait, the channel which separates Asia and America at their nearest approach to each other, and connects the Arctic with the Pacific Ocean (B. Sea). Between East Cape (Asia), and Cape Prince of Wales (America), it is 36 m. wide, and generally of small depth. Shores rocky, bare, and greatly indented. Discovered by Bering in 1728, and first explored by Cook in 1788. See **Bering Sea.**

S. or Newbury . . .	178,582	54,800
E. or Wokingham . .	107,470	60,207
Parl. bors.[1] . . .	5,932	74,620
Total . .	462,224[2]	238,709[2]

[1] Reading, Windsor, and part of Oxford.

[2] The administrative co., which includes part of the urban sanitary dist. of Abingdon in the co. of Oxford, and excludes part of Oxford co. bor., has 461,742 ac., with 236,163 inhabitants.

Besides the Thames, the chief rivers are the Kennet, Loddon, and Ock. Chalk covers the middle of the county W. of the Thames, and a ridge of chalk-hills running E. and W. divides the valley of the Thames (the Vale of the White Horse) from the valley of the Kennet. Scattered over the chalk in the W. are numerous blocks of hard sandstone, grey wethers, or sarsen stones [**Ashbury**]. Bagshot Heath, an eocene tract in the SE., has from early times been waste land, but a large portion has been lately planted with fir. Excellent crops are raised on the oolitic formation, which is mainly N. of the Ock. For agriculture, see **Appendix,** pp. 7–9. Various manufactures are carried on at Reading; there is a paper-mill at Bisham, and at Kintbury whiting is made from the soft upper chalk. The county formed part of the kingdom of Wessex, but was some time under the Mid-English. B. is in the Oxford circuit, and the assizes are held at Reading. See **England,** table.

Berlin, tn., Canada, Ontario, cap. Waterloo co., 49 m. NE. London. P. 7400.

Berlin, cap. of Ger. and Prussia (origin of name uncertain, meaning either 'uncultivated land,' or 'ford,' 'crossing-place'). After London and Paris B. is the largest town in Europe. B. is situated on the Spree, in the middle of the N. German plain, between the Oder and the Elbe. B. Observatory: lat. 52° 30′ 16.7″ N., long. 13°23′ 43.5″ E. The environs of B. are very unattractive, consisting chiefly of sandy plains, heaths, swamps, small rivers, and lakes. But nevertheless the rapid development of B. is chiefly due to its geographical position, as the diluvial elevations N. and S. of the town (Teltow and Barnim) here closely approach the R. Spree, the site of B. thus being by far the best crossing-place in the whole river system of the

Spree and Havel, forming the commercial centre of the terrs. between the Elbe and the Oder, and connecting the highroads of Brandenburg, Silesia, and Saxony with those of Pomerania, Mecklenburg, and Hanover. The R. Spree, about 300 ft. broad in this part of its course, winds through B. from SE. to NW., and divides it into two nearly equal parts. Most of the principal buildings of B. are built on a very small area in the insular quarter surrounded by the Spree. The chief divs. of B. are: the old town, old and new Kölln, the Königsstadt, Stralauer Viertel (within and without), Spandauer Viertel, Friedrich-Wilhelms Stadt, Friedrichswerder, Dorotheenstadt, Friedrichs-stadt (within and without), Louisenstadt, Vogtland, and the suburb of Oranienburg. Other suburbs are those of Charlotten-burg, Schöneberg, Tempelhof, Rixdorf, Lichtenberg, Weissen-see, Pankow, and Lietzow, which are gradually being absorbed by the town. A little more distant are Spandau, Teltow, Lichterfelde, Potsdam, and Köpenick. B. is the seat of the civil and military government for the whole kingdom of Prussia. The University of B. is the first of the German universities. The city possesses a large state library, botanical and zoological gardens, and an aquarium. The museums contain very valuable collections. The celebrated Brandenburg gate on the W. side of the town is a copy of the Propylæa of the Acropolis of Athens, but on a much larger scale. B. is one of the first manufacturing towns of Prussia; the chief productions are Berlin porcelain, pottery, machinery, telegraph apparatus, and paper. The founding of B. is uncertain. It is first mentioned at the beginning of the 13th century. It was originally a village of Wendish fishermen. During the 13th century there were two separate settlements, Berlin and Kölln, but these were united in 1307. In the middle of the 15th century the town became the residence of the reigning house of Hohenzollern. During the Thirty Years' War it was several times occupied and pillaged by the Imperialist soldiery and by the Swedes. B. owes its importance to Frederic William, the Great Elector. There are at the present time no fortifications there. B. has grown much more rapidly than any of the other great cities of the world, as the following figures show: (1648) 6000; (1688) 18,000; (1788) 150,000; (1850) 440,000; (1870) 825,000; (1880) 1,222,000; (1890) 1,579,000. Mean temp., yr. 48.5° F., Jan. 32.8°, July 66.7°; annual rainfall, 29.98 in. [**H. G. S.**]

Bermuda, Bermudas, or **Somers Islands,** a group of about 300 small islands, of which 15 or 16 are inhabited, belonging to Great Britain, in the Atlantic, 580 m. SE. of Cape Hatteras, in S. Carolina. The group is about 20 m. in length, and is surrounded by sunken coral reefs, through which access is gained only by a few long, narrow, tortuous channels. Surface mostly low, and composed of a shelly, coralline rock. Climate mild and delightful, and highly salubrious, but severe thunderstorms frequently prevail, and the atmosphere is sometimes charged with excessive humidity. The islands were devastated by hurricanes in 1780 and 1813. The soil is poor, three-fourths quite unfit for cultivation; but the fruits of both tropical and temperate regions are raised; early potatoes, tomatoes, beetroot, and arrowroot are sent in great quantities to New York. Govt. vested in a governor, a council of eight members, and an assembly of thirty-six members, four being returned by each parish. Annual revenue about £30,000; value of exports £60,000–£130,000. The principal islands are Bermuda, or Main I., about 14 m. long, by 1 m. broad (with Hamilton the cap., situated at the head of a deep inlet, two or three miles long, which forms a safe and convenient harbour); St. George, Somerset, St. David, Boaz, and Ireland. St. George I. (in the NE.) and Ireland I. (in the NW.) are strongly fortified. Ireland I. is entirely occupied by its fortress, arsenal, and dock-yards. There is a govt. floating-dock, 381 ft. by 124 ft., 53 ft. deep, and large enough to lift an ironclad of 10,400 tons. The principal islands form an almost continuous chain, and all those from St. George to Ireland are connected by roads, bridges, and causeways, with only one break between Somerset and Watford Is. This group of islands was discovered in 1515 by Bermudez, a Spaniard, from whom it derives its name, spelt in former times **Bermoothes,** in accordance with Spanish pronunciation of the letter *d*. They remained uninhabited until Sir G. Somers was wrecked here in 1609, soon after which date they were colonised from Virginia and England. Shortest track to England 2858 nautical m. Mean temp., yr. 70.4° F., Feb. 62.6°, Aug. 80.4°. Never below 40°. Annual rainfall about 60 in. Area, 19 sq. m. P. 15,013 (whites, 5690).

Bermudez, state, Venezuela, on the N. ct., crossed by 63°, 64°, and 65° W.; cap. Barcelona.

Bern, tn., Switzd., cap. cant. B., and, since 1848, of the Swiss Confederation, situated on a high platform washed at its base on three sides by the R. Aar, in the middle of the Swiss plateau, 80 m. NE. Geneva. Commands a magnificent view of the Alps of the Bernese Oberland; contains an old cathedral (founded 144), and among its chief modern structures the Federal Palace (building of the Swiss legislature). Principal streets bordered by covered foot pavements, the houses resting on arcades. The crest of the city is a bear, in allusion to the popular though erroneous derivation of the name (Ger. *Bären*, 'bears'), and a bear-pit, maintained at the cost of the city, is one of the chief objects of interest. Seat of a university, with a natural history museum, and of an observatory (46° 57′ 8″ N., 7° 26′ 25″ E.). Birthplace of Haller the physiologist. Alt. (riv.) 1635 ft., (meteorological stn.) 1880 ft. Mean temp., yr. 46.8° F., Jan. 29.4°, July 64.8°; rainfall (20 yrs.), 39.61 in. P. (1870) 36,000; (1880) 44,000; (1888) 47,150.

Bern (French **Berne**), cant., Switzd., stretching from the centre NW. to the French and German frontiers. The country is mountainous, comprising, in the S., many of the highest points of the Alps, as the Finster-Aarhorn, the Jungfrau, Schreckhorn, and Mönch, belonging to the *Bernese Oberland*, celebrated for the beauty of its valleys, the chief of which are the Simmenthal, Lauterbrunnen, Grindelwald, and Hasle. The NW. part of the canton is covered by the Jura Mts., the two regions being separated by the valley of the Aar. Nearly the whole terr. is drained by the Aar and its tribs.; the Birs flows to the Rhine, and the Doubs is partly within, and partly forms the NW. boundary of this canton. The Lake of Bienne is formed by the Thiele, and those of Brienz and Thun by the Aar. Climate healthy; excessively cold in the region of the Alps, where perennial snow forms some of the largest glaciers in Switzerland, but mild at the foot of the Jura and in Interlaken. Forests (chiefly pine and beech) cover one-sixth of the country; pastures one-sixth; the vine, about 2500 ac. Emmenthal is noted for its horses and cattle. Principal mineral products, iron (in the Jura), coal (Simmenthal), marble, granite. Among numerous mineral springs are those of Leissingen and Blumenstein. Chief objects of industry are the manufactures of linens and woollens, lace, watchmaking, the wooden wares of the Oberland, and cheese. The canton is traversed by several lines of railway, and has excellent roads; steam-packets ply on the lakes and on the R. Aar. Religion chiefly Protestant. The govt. is democratic. The legislative body is a Great Council elected by the people, and this body chooses from itself an executive council and the Landamann, or president. Language mainly German. Cap. Berne. See **Switzerland,** table.

Berwick Salome, par., Eng. See **Berrick Salome.**

Berwickshire, co., Scot., forming its SE. extremity on the coast of the North Sea. The 500 ft. contour line running from near St. Abb's Head SW. divides the county roughly into two halves, the lower and richer portion, to the SE., called the Merse (formerly March—it gives the title of Earl of March to the Earl of Wemyss), the higher composed mainly of the broad uplands connected with the so-called Lammermuir Hills. In the W., opening from N. to S., is the valley of Lauderdale, the greater part of which, including the town of Lauder itself, is above 500 ft. in height, but which, nevertheless, is fertile and well cultivated. Towards the E. of the county the higher tracts are divided by the narrow valleys of the Eye and the Pease-burn, and the low water-parting separating the two, and this depression is that followed by the highroad from Edinburgh to the E. of England, now also by the N. B. R. The only other railway in the county is a branch of the same company from Reston Junc. to St. Boswells, by Duns and Greenlaw. Principal rivers, the Tweed, Eye, and the Leader (traversing Lauderdale), Whiteadder, Blackadder, and other affluents of the Tweed. Lower and Upper Silurian rocks and members of the Old Red Sandstone cover the greater part of the county, but a small area in the SE. is occupied by Carboniferous strata (not coal-bearing). There are no minerals of economic importance. As to agriculture, see **Appendix**, pp. 10–12. Chief towns, Greenlaw, Lauder, Duns, Coldstream, and Eyemouth. The county returns one member to the House of Commons. Area, 294,805 ac., P. (1891) 32,400. See **Scotland,** table.

Berwick-upon-Tweed, seapt. tn., mun. bor., and par., Eng., in the N., or B.-upon-T. div. of Northumberland, on the N. bk. of the Tweed, at its mouth, with terminal station of the N. B. R. and NE. R., 57 m. ESE. Edinburgh. The town is connected with its suburbs, Tweedmouth and Spittal, which are within the borough, by a bridge. It has an iron-foundry, at which steam-engines and mill machinery are built; sulphuric acid and manure works are carried on; and near the town are coal-mines. The harbour has a depth at ordinary high tides of 17 ft. 6 in.; highest springs 21 ft. Imports timber, staves, bones, iron, flax, hemp, tallow, and oil. Exports agricultural produce, wool, ale, whisky, coal, and fish, especially salmon—its fisheries once formed the chief industry, though it has now greatly declined. For shipping statistics see **Appendix**, p. 13. The possession of B. was long disputed between England and Scotland, but was finally secured by England in 1482. It had previously been fortified by Henry II., and ruins of the old fortifications still remain, and the walls erected at a later date survive entire. Market-day, S. Fairs for cattle and horses, first Saturday in March, May, and November. Par. 5367 ac., P. 8500; bor. P. (1891) 13,400; parl. div. P. 52,400.

Berwinne, riv., Belgium, enters the Meuse r. bk., in the N. of prov. Liège.

Berwyn, range of hills, N. Wales, on the borders of cos. Merioneth, Montgomery, and Denbigh, to the SE. of the valley of the Upper Dee; highest, Moel-sych, 2716 ft.

Berzava, riv., in the S. of Hungary, l. bk. trib. of the Temes, canalised in its lower part for the drainage of the dist.

Besan, tn., Palestine. See **Beisân.**

Besançon (ancient *Vesontio*), city, France, cap. dep. Doubs, arr. B., 47 m. E. by S. Dijon, on the Doubs, mainly within a loop on the l. bk., and on the canal of the Rhone and Rhine. It has an important strategical situation at the convergence of roads and railways from the opening between the Vosges and the Jura and from Switzerland, and has from early times been a fortified city. It now has a citadel, on an elevated rock, and a number of outlying forts on both banks of the river. It is an archbishop's see, and has a royal college, academy of sciences and arts, school of horology, a large public library, and arsenal and schools of artillery and medicine. It has various manufactures, but its principal industry is the making of watches and clocks, especially the putting together of parts made in the Swiss Jura, with the watch-making districts of which it communicates by two lines of railway, one leading E. to La Chaux de Fonds and Le Locle, the other NE. past Porrentruy. It was twice taken by Louis XIV., and united to France in 1678. The Austrians besieged it without success in 1814. Alt. 845 ft. Mean temp., 51.2° F., Jan. 35.1°, July 68.2°. P. (1872) 49,400; (1881) 54,400; (1891) 56,100.

Bessarabia, prov. of SW. Russia, separated by the Pruth and the Lower Danube from Roumania in the W., and by the Dniester from Podolia and Kherson in N. and E., touching the Black Sea from the Sulina mouth of the Danube to the estuary (*liman*) of Ovidiopol. Hilly in N., flat and low in S. (Budzhak Steppe), the two parts being separated from each other by the Trajan's wall. Climate moderate, the temp. at Kishinev being as follows: yr. 50.4°, Jan. 26.6°, July 71.7°; yearly rainfall 18½ in., summer 11 in. Bessarabia was ceded by Roumania in 1812. Its population is extremely varied: Moldavians make the chief bulk of it; Galicians and Little Russians, Bulgarians, Greeks, Jews, Armenians, Tsigans, &c., grouped into large villages. Soil fertile throughout; forests in middle portions. Agriculture and cattle-breeding, gardening, culture of tobacco, vineyards. Manufactures in infancy; considerable export trade. Area, 17,619 sq. m. P. 1,588,330.

Bethlehem, now **Beit-Lahm** (*q.v.*), tn., Palestine, which will be ever memorable as the birthplace of Christ. It stands on a narrow ridge, 5 m. SW. Jerusalem. It is a large straggling place, with magnificent church, erected A.D. 327, by the Empress Helena, over the site (the 'Grotto of the Nativity') traditionally celebrated for the birth of the Saviour, and to which belong convents, schools, and hospitals of the Roman Catholics, Greeks, and Armenians. P. said to be 3000, all Christians—a bold and hardy race, who have successfully resisted Turkish oppression.

Bhewsa, a Himálayan lake in the SW. of Sikkim. Alt. about 12,000 ft. *Proc. R. G. S.*, 1881, p. 329.

Bhíls, an aboriginal tribe inhabiting principally the rough and jungle country round the Vindhyá, Sátpurá, and Ajanta Hills, in Central India, the Central Provs., and the N. of Bombay Presidency. A few are found in villages in the plains of Khándesh. Their terr. is traversed by the Narbadá, which is regarded by them with veneration and terror. They are in a very low state of civilisation, having been from the earliest

times treated by the Aryan conquerors of India as little better than wild beasts, but under British rule their condition has been much improved, and they are gradually becoming less savage. Their deities are water, fire, and the heavens. They eat the flesh of animals, except the monkey, which is universally worshipped. Like many other mountain tribes they are remarkable for their truthfulness and fidelity.

Bhilsá, fortified tn., India, Central India, 30 m. NE. Bhopal, on R. Betwá, and now also on the Bhopál-Jhánsi Rly.; noted for its tobacco, and for the temples in neighbourhood in the bed of the Betwá, as well as for the Buddhist topes, including the great Sánchi tope, a little to the SW. P. 9700.

Bhután is the Himálayan region to the N. of the Brahmaputra Valley, extending only as far N. as the southern chain of the Himálayas. It is a lofty and rugged region, abounding in picturesque scenery, and very sparsely peopled by a hardy and vigorous but oppressed and very backward people, the Bhutiás. The products of cultivation are similar to those of western Europe. The manufactures are coarse woollens, cottons, buffalo leather, &c. Their houses are chimneyless, but otherwise well built, generally in three or four stories, and remarkable for their neat joinery. The lower ranges of the hills abound in animal life, elephants, leopards, deer, and wild hogs, besides pheasants, jungle fowls, pigeons, &c., being remarkably abundant. A strong and well-made pony, the *tangan,* apparently indigenous in B., and not found in any of the neighbouring countries, is domesticated. The trade is very scanty. The state religion is Buddhism, and B. swarms with priests, the monastic endowments absorbing a large part of the national property. The Buddhism of B., however, is one of the most corrupt forms of the northern type of that religion, and consists chiefly in the mechanical recital of a few sacred sentences, and the propitiation of evil spirits. The custom of polyandry is prevalent, but polygamy is also common. Formerly the country included the hill tract known as the Dwárs (Duars), at the base of the Himálayas, containing the entrances to the passes leading into the Himálayan valleys; but the Bhutiás took advantage of this position to make such frequent descents upon the occupants of the plains, that the British government was obliged to interfere, and, after various disputes, the Dwárs were formally ceded to the British in 1865. They are now annexed partly to Assam, partly to Bengal. The capital of B. is Panakhá or Dosen, a place of great natural strength. Among other towns are Tásichozong and Angdaphorang.

Bhuvaneswar, temple city of Siva, India, Bengal, dist. Purí, for six centuries cap. of the Kesarí dynasty of Orissa.

Biache, tn., France, dep. Pas de Calais, arr. Arras, 8 m. SW. by W. Douai. P. <2000.

Biláspur, tn., India, 34 m. NW. by W. Simla, picturesquely situated on the l. bk. of the Sutlej; cap. of state of B. or Kahlúr. Alt. 1460 ft.

Bilbao, tn. and principal port of the N. of Spain, frequented by a larger tonnage than any other Spanish port, cap. prov. Vizcaya (Biscay), on the Nervion, 6 m. from its mouth at Portugalete, and 31 m. NNW. Vitoria. It is enclosed by lofty mountains. The town owes all its prosperity to the neighbouring deposits of valuable iron ore, which have been known since the time of the Romans, and are exported in immense quantity (between 3,500,000 and 4,500,000 tons annually), principally to Great Britain, but also to Holland (for Germany), France, Belgium, and elsewhere. The Nervion R. has been deepened so as to have a depth of 22 ft. on the bar at ordinary spring tides, and at different parts of the river there are more than twenty shoots for loading the ore. The ore is also smelted in the neighbourhood, and for this purpose large quantities of coal and coke are imported from Great Britain and elsewhere, this forming the principal import, the pig-iron forming a considerable export. Other manufacturing industries, including paper, steel, files, tin-plate, glass, and chemicals, are rising, and there are large shipbuilding works. The port has two graving docks, and a dry dock, the last 430 ft. long and 23 ft. deep on sill. A large breakwater is in progress. A submarine cable connects B. with the Lizard. B. was founded in 1300; at the end of the 15th century it became the seat of the famous consulado, originally established at Burgos, and having the highest authority in Spain as a commercial tribunal. It was the scene of frequent contests in the late Carlist wars. It was bombarded in 1873 and 1874. Mean temp., yr. 58.7°F., Jan. 47.7°, Aug. 71.6°; rainfall (13 yrs.), 48.42 in. P. (1877) 35,200; (1887) 50,800.

Billiton, Bliton, or **Blitong,** isl., Dutch East Indies, lies E. of Banka and W. of Borneo, with the Java Sea to the S. Its extreme points are in 107° 31′ and 108° 18′ E. long., and 2° 31′ and 3° 16′ S. lat.; one-fourth the size of Wales. The surface is undulating, but rises into granite mountains in the interior. The coast-lands are flat, consisting principally of marshes and sand-dunes. The soil is little suited for cultivation; but the island is exceptionally rich in tin, of which 3600 to 5700 tons are extracted every year, chiefly by Chinese. Iron ore and the topaz are also obtained. The climate is not healthy for Europeans; annual rainfall (12 yrs.), 113 inches. Since 1852, when, shortly after the discovery of the tin, the Dutch authorities first gave any attention to the island, B. has formed a separate residency; cap. Tanjung Pandan, on the W. coast. P. 2500. Area, embracing 154 small islands, 1800 sq. m. (officially 2520 sq. m.). P. of island, 38,000, of whom 27,000 are Mohammedan Malays, and 11,000 Chinese. See *Petermann's Mitteilungen*, 1887. Birkenfeld, principality, W. Germany, belonging to the gd.-duchy of Oldenburg, enclosed by Rhenish Prussia. Surface mountainous and well wooded. Chief river the Nahe. Chief industry, the setting and polishing of precious and other stones, the rocks of the principality containing large numbers of agates.

Birkenfeld, tn., Ger., cap. principality B., 25 m. ESE. Treves. P.<3000.

Birkenhain, vil., Prussia, prov. Silesia, circle and dist Beuthen; zinc and lead mining. P.<3000.

Birkenhead ('the head of the birches'), munic., parl., and co. bor., par., market-tn., and seapt., Eng., co. Chester, on the W. side of the estuary of the Mersey, about 3 m. from the sea, opposite Liverpool, and 15 m. NNW. Chester, with terminal stations on the L. & NW. R., the G. W. R., and the Birkenhead and Hoylake Rly. The town originated in the foundation of a Benedictine priory in 1153, but its development dates from the opening of the first wet dock here at Wallasey Pool, a creek of the R. Mersey, in 1824. The town was incorporated in 1877, when the townships of B., Claughton, Tranmere, and Oxton, and part of that of Higher Bebington were united to form the borough. The gas and water supply (the latter derived by pumping from old red sandstone underlying the town) are the property of the ratepayers. The area of the docks and basins is 164½ acres, and there is quay space extending to nearly 9½ miles; and these, along with extensive cattle lairages, are the property of the Mersey Dock and Harbour Board [**Liverpool**]. There are also numerous graving docks and a large shipbuilding yard. The ferries to Liverpool are the property of the corporation, but the number of passengers has been greatly reduced since B. became connected in 1886 by a railway passing by a tunnel under the Mersey. B. has two public parks, the B. Park (114 acres), opened in 1847, and the Mersey Park, on the heights of Tranmere. It also has a valuable free library and public baths. It returns one member to House of Commons. P. mun. bor. (which is conterminous with county, and nearly conterminous with parl. bor.), (1851) 24,300; (1871) 43,000; (1881) 84,000; (1891) 99,900; par. P. 58,300.

Birkenhead, bor., New Zealand, North I., on the N. side of Auckland Harb. P.<1500.

Birkenhead, S. Australia. See **Port Adelaide.**

Birkenshaw with Hunsworth, eccles. par., Eng., Yorkshire, W. Riding, Spen Valley div., 3½ m. SE. Bradford, with a stn. (**B. and Tong**) on the G. N. R., PMT.O. P.<4000; urban sanitary dist. (**Birkenshaw**) P.<3000.

Birkenside, place, Eng., Northumberland, in the SE. of Hexham div., 10 m. SE. Hexham, 4 m. NW. by W. Consett stn.

Birker and Austhwaite, par., Eng., Cumberland, 6½ m. NE. Ravenglass; 8243 ac. P.<250.

Birkesdorf, vil., Prussia, Rhine Prov., circle and dist. Düren. P.<3000.

Birket-el-Hajji ('lake of pilgrims'), small lake, Egypt, 10 m. NE. Cairo.

Birket-el-Kerun (or **Kurun**), lake, Lower Egypt, in the NW. of the Fayum (*q.v.*), from which it receives the whole of the surface irrigation water; in 29° 54′ to 30° 44′ E., crossed by 29½° N., 28 m. long by 5 m. broad. Alt. 141 ft. below sea-level; deepest part probably 200 ft. below sea-level.

Birket-er-Ram, small lake, Palestine, 4 m. ESE. Banias, the *L. Phiala* of Josephus, occupying crater of an extinct volc.

Birk Fell, hill, Eng., Westmorland, on E. side of Ullswater.

Birkhall, royal seat, Scot., W. Aberdeenshire, on the Minch, 2 m. SW. Ballater.

Birma. See **Burma.**

Birmingham (in Domesday Book *Bermingeha*, a name derived from the tribe of the *Beorms*, spelt in 140 different ways, including such forms as *Bromwycham*, which still survives in the popular form of *Brummagem*), a parl. bor., mun. bor. (since 1838), city (since 1880), and co. bor., comprising the parishes of B. and Edgbaston, and parts of that of Aston, one of the principal manufacturing towns of England, in the extreme NW. of Warwick, in the angle between the counties of Stafford and Worcester, almost exactly in the centre of the plain between the rivers Trent, Severn, and Avon; 20 m. NW. Warwick, 112½ m. (by rail) NW. London, 97½ m. SE. Liverpool. The town, about 21 m. in circumference, built on undulating ground, at the confluence of the Rea with the Tame, has numerous educational and charitable institutions (among the former Queen's College, theological, and Mason College, science, arts, and medical). There is a Corporation School of Art, with branch schools, a Gallery of Art, and a Corporation Technical School, besides other handsome buildings. Reference free library, built 1883 to replace one opened in 1861, burned down 1879, when nearly the whole collection was destroyed. The new library has about 120,000 vols., and Shakespeare, Cervantes, Burns, and Milton collections. There are eight public parks, including Aston, which was opened by the Queen in 1858; the borough and two other cemeteries, of which the first covers 105 ac. The old Roman road, 'Icknield Street,' passes through the SW. and NE. of the town. B. has been one of the chief seats of the hardware industry from an early date, the rise of this industry having no doubt been determined by the abundant supplies of iron-stone in the neighbourhood, and by the existence of the great forests which once covered the Midlands, and supplied the charcoal used in smelting the ore before coal came to be used for that purpose about the middle of last century. The S. Staffordshire coalfield, which approaches to within 3 m. of the town, still further stimulated its industries in modern times. The smiths of B. were mentioned by Leland as being numerous as early as 1538. During the civil war it was sacked and partly burned by Prince Rupert in 1643, but it speedily recovered, and acquired commercial importance. Sword-making was introduced in 1651, gun-making in 1687. In 1727, though still a village in govt., B. was estimated to support 50,000 persons by its hardware manufactures. In 1736 Wyatt and Paul here made the earliest attempts at cotton-spinning by rollers. In 1761, its 'ingenious manufactures' supplied not only this country and its colonies, but were known throughout the world. Its leading manufactures at the present day are iron and brass founding, rolling, stamping, plating, and drawing of metals; manufactures of iron-roofs, girders, steam-engines, gasometers, hydraulic and gas engines, railway waggons and carriages, guns and rifles, electric-light apparatus and fittings; machines, tools, and implements of all kinds; bell-founding, and general metal-working of all kinds; electroplating, gold and silver working, watch and clock making, &c. In addition, glass-blowing, brewing, coachmaking, and chemical works are largely carried on. Matthew Boulton's famous Soho steam-engine factory, with which the name of Watt is associated, is still carried on under the name of the James Watt & Company Foundry and Mint. At Smethwick are the only lighthouse works in the kingdom. Two special government offices connected with local industries are the Assay Office (of which the first master was appointed in 1773), for gold and silver ware, and the Gun-proof House, where more than 400,000 gun-barrels are annually proved. Wages are higher than in most of the manufacturing towns in the N. of England. Social features of industry are the great

number of small employers, 'little masters,' and the general employment of female workers in the lighter trades. Birmingham enjoys great facilities for transport and intercommunication. It is a great railway centre, being a principal station on the L. & NW. R., M. R., G. W. R., and S. Staffordshire systems. Additional advantages are afforded by canals, of which the principal are the Birmingham and Worcester, which communicates with the Severn and western towns; the Grand Junction, which unites the Thames and the Mersey; the canal which runs through the Potteries, and that which joins the Trent, and thereby connects with Hull and the German Ocean; and the Warwick and Birmingham. For local conveyance there is an excellent tramway service. Town very healthy; little epidemic disease. The parl. bor. is divided into 7 divs., the N., S., E., W., and Central, and the Bordesley and Edgbaston divs., each returning one member. Highest alt. 640 ft.; alt. meteor. stn. 406 ft. Mean rainfall (1861–90), 00 in. P. (1851) 232,500; (1871) 342,500; (1881) 400,800; (1891) 429,200; parl., co., and mun. bor. (1891) 478,100. See **England**, table II.

Birmingham, city, U.S., Alabama, Jefferson co., 86 m. NNW. Montgomery, 6 m. from Red Mt. Founded in 1871, has rapidly growing iron and steel industry of all kinds [**Alabama**]. Alt. 596 ft. (R.R.). P. (1880) <4000; (1890) 26,200.

Biscay, bay, Newfoundland, on the S. ct., in 53° 15′ W.

Biscay, Bay of (French **Golfe de Gascogne,** anct. *Cantabricum Mare, Aquitanicus Sinus*), a bay or gulf formed by the Atlantic, and extending between Ouessant I., on the W. ct. of France, and Cape Ortegal, on the N. ct. of Spain. Chief islands, Belleisle, Ré, and Oleron, on the coast of France. Its N. and S. coasts are bold and rocky; but on the E., from the mouth of the Gironde to the Adour, the coast is composed of sand downs, and interrupted by numerous lagoons. The depth varies from 20 fathoms on the W. coast of France, to 200 fathoms on the N. of Spain. Navigation is much impeded by the heavy seas produced by NW. winds.

Biscaya, prov., Spain. See **Vizcaya** and **Basque Provinces.**

Biscayne Bay, a bight 40 m. long in the SE. of Florida, U.S. On its shores are thickets of sisal hemp, which was introduced here by Dr. Perrine in 1836 and 1837.

Bismarck, Victoria. See **Callawadda.**

Bismarck Archipelago, the name now given to the group to the N. of the E. end of New Guinea and NW. of the Solomon Is., formerly called the New Britain Is., but named B. A. after the group was assigned to the German sphere of influence by an agreement with Great Britain in 1885; principal islands, Neu-Pommern (New Pomerania), formerly New Britain, in the S., separated from New Guinea by the Dampier Strait; Neu-Mecklenburg, formerly New Ireland, separated from Neu-Pommern by St. George's Channel, which is remarkable for its violent and capricious currents; and Neu-Hannover, to the W. of the NW. end of Neu-Mecklenburg, from which it is separated by an intricate network of reefs. They are all included in the German protectorate of the New Guinea Company. The natives are careful agriculturists, but practise cannibalism. The islands are said to be fairly healthy, and well suited for tropical plantations under white management, and cotton plantations, on which the natives have been induced to work as labourers, have been started by the Germans. The principal German stations are on Blanche Bay in the N. of the Gazelle Penin., the NE. portion of Neu-Pommern, namely, Herbertshöhe, on the S. side of the bay, the seat of government both of the B. A. and the German portion of the Solomon Is., and Matupi, on a small island in the bay. At present the chief articles of trade with the whites are coco-nuts and dried coco-nut kernels (copra), and the principal article of barter is tobacco. The money used by the natives in their dealings with each other is shells threaded on long strips of split cane. The islands were discovered by Dampier in 1699.

Bismarckburg, a stn. in the interior of Togo-land, Ger. W. Africa, in 8° 12′ N., 0° 33′ E., about 130 m. from the coast. Alt. 2330 ft.

Bismarck Range, mts., in the E. of Ger. New Guinea, trending WNW. to ESE.; highest mountain, Otto, said to be snow-capt.

Biss, riv., Eng., Wiltshire, trib. of the Avon, which it enters 1½ m. below Bradford.

Bissagos, Bissao, or **Bijuga Islands,** a group of about thirty isls., on the W. ct. of Africa, opposite the mouths of the Rio Grande and of the Rio de Geba. They are of volcanic origin, and surrounded by many rocks and reefs. The soil is very fertile, chiefly consisting of decomposed lava and vegetable matter. The chief products are cotton, indigo, rice, wax, and hides. They are inhabited by the Bissago or Bijuga, a strong and warlike tribe, who are good sailors. Their chief occupation is cattle-rearing. The most important of the B. Is. are Bolama, Galinhas, and Orango. Most of the islands belong to Portugal. The climate is unhealthy to Europeans; June, July, and August being the worst months of the year. See *Proc. R. G. S.*, 1889, vol. xi. pp. 595–601.

Bissandugu, Bissandu, or **Bissan,** tn., W. Africa, in the Sangara country, in about 9° 55′ N., 9° 20′ W. Nearly 3000 houses. *Proc. R. G. S.*, 1892, p. 450.

Black Bull, stn., Eng., on the N. Staffordshire Rly., between Stoke and Congleton.

Blackburn, parl., mun., and co. bor. (all conterminous), and par., Eng., Lancashire, 5 m. W. Accrington, on the L. & Y. R., connected also with the L. & NW. R. and M. R. It has been a manufacturing town since about the time of the Commonwealth, when it became noted for 'Blackburn checks,' a fabric made with a linen warp and cotton woof; now one of the chief seats of cotton weaving. Hargreaves, the inventor of the 'spinning jenny,' was a resident at Blackburn at the time of the invention (1767). It has a free grammar school, founded in 1567 by Queen Elizabeth, a large technical and trades school, and a 'Corporation Park.' The corporation has adopted the Free Libraries Act. B. was incorporated in 1851, and its boundaries were extended in 1879. Market-days, W. and S. P. (1851) 46,500; (1871) 83,000; (1881) 104,000; (1891) 120,100; par. P. 104,300.

Blackford Hill, stn., Scot., Midlothian, on N. B. R., on the S. border of the parl. burgh of Edinburgh.

Black Forest, German, **Schwarzwald** (name derived from the dark forests of firs and pines), a mt. range in SW. Germany, to the E. of the valley of the Middle Rhine, stretching (from 47½–49° N. lat.) 98 m. from SSW. to NNE. It belongs chiefly to Baden, but some of its eastern parts lie in Würtemberg. The mountains of the B. F. are broad masses with rounded summits, separated from one another by deeply cut valleys, and covered with pines, firs, and other conifers up to 3800 ft. On the W. side the range slopes steeply down to the Rhine valley, whilst the E. parts merge almost imperceptibly into the plains of Swabia. Orographically analogous to the B. F. are the Vosges (*q.v.*). The valley of the Kinzig separates the B. F. into two distinct and well-defined parts, the southern having more prominent mountains, and covering a larger area than the northern, which is lower, and presents at many places a plateau-like appearance. In the southern half the most important mountains are the Feldberg (4900 ft.) and the Belchen (4640 ft.), whilst the highest point of the northern div. is the Hornisgrinde (3820 ft.). Geologically, the B. F. consists of gneiss, granite, and Triassic sandstone ('Buntsandstein'); porphyry is also met with at many places. During the glacial period the B. F. region was covered with enormous glaciers, much larger than the present glaciers of the Alps. Vestiges of this period are to be found in a number of small lakes at high elevations (Feld-, Mammel-, Wild-, Schluch-, Titi-See), the presence of which is due to the action of the glaciers. For rainfall and climate, see **Baden.** Valuable minerals are found in many localities: silver, copper, and lead occur in the Kinzig and Münster valleys; iron is found near Freudenstadt, Kandern, and Neuenbürg; coal near Offenburg; and salt near Dürrheim. Mineral waters occur at various places, the springs of Baden-Baden and Wildbad being specially celebrated. Timber constitutes the chief wealth of the B. F.: saw-mills are very numerous, and large quantities of timber are floated down the Rhine and Neckar. In the southern parts a special industry is flourishing, viz., the manufacture of clocks and musical instruments, of which more than 2,000,000 are annually exported to all parts of the globe. Two railway lines are of great strategical and commercial importance: first, the Black Forest Rly., which follows the valley of the Kinzig, and crosses the whole B. F., connecting Würtemberg with S. Baden; and, secondly, the Höllenthal Rly., more to the S., following the valley of the Dreisam, and connecting Freiburg with Neustadt. These lines are the most picturesque railways of the German Empire, the dists. through which they run being celebrated for their grand scenery. [**H. G. S.**]

Black or **Euxine Sea** (*Pontus Euxinus*), a great inland sea between Europe and Asia, surrounded by Russia, Caucasia, Asiatic and European Turkey, Bulgaria and Roumania, and communicating by the Strait of Yenikale or Kerch (ancient *Cimmerian Bosporus*) with the Sea of Azov on the NE., and by the Bosporus with the Sea of Marmora in the SW. The shores of the Euxine are bold and high on the NE., E., and SW., but flat on the N. and NW. The 100-fathom line generally keeps close to the shore, except in the NW., where the whole of the area between the Crimea and the Roumanian and N. Bulgarian shores is below that depth. The depth then increases somewhat rapidly to 800 fathoms, then slowly to an oval surrounded by the 1200-fathom line, within which 1219 and 1227 fathoms are the greatest depths yet sounded. Owing to the large influx of fresh water from the Danube, Dniester, Bug, Dnieper, Don (through the Sea of Azov), besides smaller European rivers, as well as the additional supplies furnished by the Kur, Kizil-Irmak, Sakaria, and other Asiatic rivers, the surface waters may be described as brackish. The density varies from 1.01206 to 1.01372, gradually increasing to 1.01678 at the depth of 100 fathoms, and 1.01721 at 900 fathoms. The distribution of temperature is very remarkable. The upper layer, about 25 fathoms in thickness, varies in temperature with the seasons. Then next comes a lower of colder water, below which the temperature gradually rises to 48° F. at 100 fathoms, below which that temperature is constant. This seems to prove that the vertical circulation of the water in the sea is confined to the upper 100 fathoms or so, a consequence probably of the nature of the horizontal circulation. A surface current constantly runs out through the Bosporus with a maximum velocity in the middle of about 6½ feet per second, or about 4½ m. an hour and this is balanced by an inflowing current of salt water, the upper part of which at the E. end of the strait is at a depth of about 27 fathoms, at Constantinople only 11 fathoms. The lower layers contain a large amount of dissolved sulphuretted hydrogen, but a great lack of dissolved oxygen, in consequence of which organic life is restricted to the upper 100 fathoms. In the ooze at depths of 100 to 600 fathoms, remains of Caspian brackish-water mussels have been discovered, which, with other circumstances, seems to indicate that at the close of the Pliocene period, the Black Sea was part of a vast inland sea of brackish water. The Black Sea has no perceptible tide; it is liable to frequent storms, such as are generally met with in great lakes and enclosed seas; but its navigation is so far from being very dangerous, as formerly represented, that probably no sea of equal extent is more safe. It has neither islands, rocks, nor reefs in the tracks of navigation, and has excellent anchorage. The freezing of the Black Sea even near its shores is exceptional [**Odessa**], but, according to P. de Tchihatchef, there are seventeen instances recorded in history of its total or partial congelation—total in 762 A.D. (*Bosphore et Constantinople*, pp. 268–318). Greatest length, 715 m.; greatest breadth, 380 m.; area (according to Strelbitsky), 163,700 sq. m. See *Geog. Jour.*, 1893, pp. 49–51; *Scot. Geog. Mag.*, 1887, pp. 77–80; *Petermann's Mitteil.*, 1891, pp. 33–7, and plate 3.

Bogö, German spelling of Danish islands, **Baagö.**

Bogodukhov, dist. tn., Russia, govt. and 40 m. NW. of Kharkov. P. 11,150.

Bogojampi, place, with meteorological stn., E. ct. Java, a few miles S. of Banyuvangi, in 8° 24′ S., 114° 24′ E. Mean temp. (2½ yrs.), yr. 77.5° F.; Jan. 79.2°, July 72.3°.

Bogong, co., Victoria, on the N. frontier, crossed by 147° E.

Bogoroditsk, dist. tn., Russia, govt. and 40 m. SW. Tula. P. 8000.

Bogorodsk, dist. tn., Russia, govt. and 27 m. ENE. Moscow, on railway to Nijniy. P. 2700.

Bogorodskoye, vil., W. Siberia, govt. and 40 m. WNW. Tomsk, on Ob R.

Bogos, a pastoral and agricultural tribe of E. Africa, inhabiting the region to the N. of Abyssinia and W. of Massaua, speaking an Ago or Agao language [**Abyssinia**] called Bilen or Belen, mostly Christians, the remainder Mohammedans.

Their cap. is the fortified town of Keren, which was assigned to Abyssinia in 1884. Total number, at least 18,000.

Bogoslof, volcanic isl., with sea-lion rookeries, W. of Unalaska, Alaska. Rose from the sea in 1796.

Bogoslovsk, iron and copper works and gold-mines, Russia, Urals, govt. and 170 m. NE. of Perm; meteorological observatory, 59° 45′ N., 60° 2′ E. Centre of a large mining dist. Mean rainfall (45 yrs.), yr. 16.2 in., May–Sept. 11 in. P. 4500.

Bogotá, formerly **Santa Fé de B.,** cap. of the United States of Colombia, state of Cundinamarca, situated in 4° 35′ N., 74° 14′ W., on the SE. edge of a mountain-enclosed plain, 20 by 45 m., 8500 ft. high, drained SW. by the Funza or Bogotá R. into the Magdalena at Jirardot, which place (52 m. in a direct line SW. by W. Bogotá; alt. about 800 ft.) is now being connected with B. by rail. The highest point on the road to Jirardot is only about 8660 ft. above the sea, on that to Honda (lower down, on the Magdalena), 9000 ft., on the road leading E. 10,920 ft. It has a cathedral, palace of the president, palaces of the deputies and senate, mint, and a university. The Rio Francisco, which traverses the city, joins the Rio B. in the centre of the plain, and the conjunct waters descend in a SW. direction through a ravine nearly 40 m. long. At the cataract of Tequendama the cleft between the rocks is only 36 ft. wide, and the waters descend in an unbroken mass 600 ft. On the Suma Paz, a feeder of the Rio B., are the natural bridges of Icononzo or Pandi, formed by two rocks that unite the opposite sides of a deep mountain cleft, about 250 or 300 ft. above the surface of the torrent. The plain (Campo) of B. contains coal-fields, and towards the N. border the salt-mines of Zipaquira. Alt. of tn., 8630 ft. (Reiss and Stübel); mean temp. (2 yrs., 1823–4), yr. 57.9° F.; rainfall (10 yrs.), 43.62 in. P. 100,000.

Bográ, tn., Brit. India, Bengal, cap. of dist. B., 83 m. NE. by E. Murshidábád; cholera occasionally breaks out in the dist. with great severity. P. 6600; Moham. 3500; Hindus, 3000.

Bogrie Hill, Scot., Dumfriesshire, 13 m. WNW. Dumfries. Alt. 1416 ft.

Bogsan, Nemet-, vil., Hungary, co. Krasso, circle and 20 m. SSW. Lugos; important iron-mines. P. <3000.

Bogside, stn., Scot., Perthshire, on Bluther Burn, 8 m. W. by N. Dunfermline, on the N. B. R., P.O.

Bogston, stn., Scot., W. Renfrewshire, on the C. R., 2 m. SE. by E. Greenock.

Bogton, Loch, small lake, Scot., S. Ayrshire, a little to the W. of Dalmellington, 10¼ m. E. by S. Maybole, about 1 m. long, drained NW. by the R. Doon.

Boguchar, dist. tn., Russia, govt. and 150 m. SE. of Voronezh, near the Don. P. 4200.

Bogue. See **Canton River.**

Boguslav, tn., Russia, govt. and 69 m. SE. Kiev. P. 9000.

Bogutschütz, vil., Ger., Prussia, prov. Silesia, 38 m. E. by N. Ratibor, and 4½ m. SE. by E. Königshütte. P. 6400.

Boh, riv., Russia. See **Bug.**

Bohadoon, electoral div., Ire., co. Waterford, dist. Seskinan.

Bohain, tn., France, dep. Aisne, arr. and 12 m. NE. by N. St. Quentin. P. 6600.

Boharm, par., Scot., cos. Elgin and Banff, 6 m. W. Keith, near Mulben stn.; 16,741 ac. P. <1500.

Bohemia, Ger. **Böhmen,** part of the Austrian empire. It is surrounded on all sides by mountain ranges: W. and SW. by the Bohemian Forest Mts., NW. by the Erzgebirge, NE. by the Sudetes Mts., and S. and SE. by an elevation called Bohemian-Moravian Mts. Several inferior mountain ranges intersect, the principal ones being the Trapp Mts. and the Mittelgebirge (Midland Mts.). The interior of B. consists chiefly of undulating plains, which have a general slope towards the interior of the country. The most extensive of these plains are in the provinces of Königgrätz and Chrudin. In the NE. rampart of B. rises the largest river of N. Germany, the Elbe. The whole of B. (with the exception of a few border districts) belongs to its river system. The upper Elbe is, however, inferior to its trib., the Moldau, the latter being in reality the great artery of B. The Moldau is connected by a canal with the Danube and the Black Sea. Geologically, the mountains of B. consist principally of palæozoic rocks, gneiss being prevalent. Near Prague are silurian deposits of great geological interest. The carboniferous formation is also met with in various parts of the country. There are also some tertiary basins, viz., near Wittingau, Falkenau, Teplitz, and Zittau. B. is rich in coals and ores. Coal is found near the Upper Elbe, and at Pilsen, Kladno, Teplitz, and Polish Ostrau. Extensive silver mines are worked at Přibram, and lead mines at Stříbro (Mies). Budweis is noted for its graphite works; and nickel, antimony, tin, iron, sulphur, alum, and porcelain clay are found in various parts of the country; the largest iron-works being at Kladno, and those of tin on the southern slopes of the Ore Mts. As regards agriculture B. is one of the most productive countries of the Austrian empire, but is, in this respect, still capable of great development. Many districts are very fertile, *e.g.*, the region adjoining the Upper Elbe, around Königgrätz; the 'Golden Road,' in the valley of the Eger; the 'Paradise,' near Teplitz; and the 'Garden of Bohemia,' in the Midland Mts. Saaz is noted for the culture of hops. Manufactures and industries are of very great importance, the annual value of the articles produced being estimated at about £50,000,000. Bohemian glass is celebrated on account of its good qualities, especially lightness and brilliancy of colour; most of the glass-works are in the neighbourhood of the mountains, where silica and fuel are plentiful. Moreover, there are many textile factories, where cotton, woollen, and linen goods are manufactured, print and dye works, iron-works, machine-shops, chemical-works, breweries, and paper-mills. The principal manufacturing districts are in the northern parts of B., Reichenberg, the second town of B., being specially celebrated for its cloth manufactories, in which it is unsurpassed by any other town of the Austrian empire. The high road connecting Vienna with Berlin goes through this place, and makes it an important commercial centre. Pilsen, Kladno, Leitmeritz are other towns of great industrial importance. Karlsbad, Marienbad, Teplitz, Bilin, Pullna, and Sedlitz are renowned watering-places. As regards **climate,** B. is, on the whole, a healthy country, and has a clear and salubrious atmosphere. In the higher parts of the regions the climate is, however, rough and inclement. The dist. near Gottesgab in the Erzgebirge is considered the coldest of B., it is unfit for the cultivation of grain. The prevalent winds are W. and SW. B. derives its name from the Boii, the ancient inhabitants of the country. These were followed by the Quadi and Marcomanni, who were in possession of the principal parts of B. at the beginning of the Christian era. After them came the Rugii and Langobardi, and later on, in the beginning of the 6th century, the Slavs, who have remained the dominant race in B. up to the present day. As a rule, the Bohemian Slavs are called Chechs or Czechs. But during the Middle Ages the German element spread over the whole of B. Land and privileges were granted to German colonists, and the Germans founded most of the Bohemian towns. At present the Germans preponderate in the mountainous dists., and the Czechs in the lower and level parts of the country. Bitter animosity exists between the Germans and the Slavs in B., the aristocracy and the peasants being for the most part Czech, whilst the inhabitants of the towns are mostly German. The Jewish influence is also considerable. The mean temp. of B. is 46.5° F., whilst in the higher parts of the country is about 41° F. See **Austria-Hungary.** [**H. G. S.**]

Bohemian Forest (**Böhmerwald**), mt. range, running SE. to NW., and forming the boundary, mostly also the water-parting between Bohemia and Bavaria. It consists chiefly of palæozoic rocks (gneiss, granite), and is characterised by its wild features. It slopes abruptly towards Bavaria, and gradually towards Bohemia. The highest points, the Arber (4840 ft.), and Rachel (4780 ft.), rise within the frontier of Bavaria; on the Bohemian side the highest parts are the Heidelberg (4500 ft.), the Kubani or Boubin (4220 ft.), and the Dreisesselberg (3800 ft.). Metals are found in many parts of the range: silver, lead, iron, antimony, zinc, cobalt, cinnabar; coal is met with in a few places [**Bavaria, Bohemia**]. [**H. G. S.**]

Total	567,240[1]	1,190[2]	2		
Uncivilised Indians		245			
		1,435	3		

[1] Uncertain, owing to the uncertainty of the frontiers.
[2] Estimates based on partial enumerations.

Boundaries: W., Peru and Chile; S., Chile, the Argentine Republic, and Paraguay; N. and E., Brazil. B. occupies the mountainous region forming the loftiest and largest plateau in all America [**Andes, B.**], known in B. as the *Altiplanicie central* ('high central plain'), which forms an interior basin (500 m. long, and 80 m. wide), with a mean alt. of 12,500 to 13,000 ft., containing in the N. the fresh-water lake Titicaca (12,640 ft.), and in the S. lands which are alternately submerged swamps or arid saline deserts (*Pampas, Cienagas de Salinas*, or *Desiertos de Lipes*), with somewhat isolated heights (Tahua, 17,393 ft.). The N. portion of the region, described in the article Andes, under the head of Bolivian Andes, belongs politically to Peru; the Bolivian section in a political sense beginning in the W. or coast Cordillera, to the SW. of Lake Titicaca (half of which belongs to Peru), and in the E. chain or Cordillera Real, to the NE. of that lake. The S. portion begins with the *Nudo* ('nucleus,' or 'knot') of Apolobamba (17,614 ft.), and continues by Illampu or Sorata (the highest, about 21,500 ft.), Huaina Potosi, Illimani, to the Nudo of Cochabamba-Tunari (16,170 ft.), which branches out to the E. up to the sierra of Missiones. In the S. the 'high central plain' is closed by the Todos os Santos, or All Saints Mts. (19,375 ft.), connecting the Cordillera Real with the W. mountains. N. and E. B. extends in immense undulating plains (*Llanos*) to the high valleys of the Amazon basin, and to the basin of the Paraguay, with occasional isolated groups of hills, probably separated by erosion from the Andes. The westernmost heights of the Brazilian plateau, forming the water-parting between the basins of the Amazon and Paraguay, form a small mountainous district called 'the Chiquitos.' Southwards the *Llanos* or *Pampas* merge into the Gran Chaco (*q.v.*).

Hydrography.—1. All the waters of the central high plain terminate in Lake Titicaca, the Pampas lakes (Aullagas, &c.), or enter the riv. Desaguadero (200 m. long), which links the two chief lakes. At the foot of Mount Illimani, in the middle of the Cordillera Real, the riv. Beni (Veni or Paro) excavates a deep valley, through which the waters of the N. and NE. slopes of the Cordillera are drained N. to the Amazon. It seems that in ancient times the waters of Lake Titicaca flowed this way into the Amazon valley. The waters of the E. Cochabamba Mts. are drained by riv. Mamoré (Guapay or Rio Grande) to the Madeira. Another region is drained S. by the Pilcomayo-Pilaya and Bermejo to the Paraguay. The Guaporé (or Itenez), affluent of the Mamoré, conveying the waters of the Brazilian plateau, and of the Llanos (with the rivs. S. Miguel, Blanco, Baures), forms the E. boundary of B. Finally, in the extreme N. many rivs. (Purus, Embira, Juruá, Aquiry, Manu or Madre de Dios) pass through B., having their sources in the Peruvian Andes, and, most of them, their outlets in the selvas of Brazil. **Geology.**—The central high plain shows principally Secondary or Mesozoic rocks, with Quaternary deposits along riv. Desaguadero, and Lakes Titicaca and Aullagas, and thence to Potosi. In the E. Cordillera the rocks are largely eruptive (porphyry, trachyte). The bulk of the Cordillera Real is Palæozoic (Silurian, Dèvonian, Carboniferous), with great masses of granitic and schistose rocks, and red and yellow sandstones. Some of the greatest heights, like the Sorata and Illimani, are of schistose, fossiliferous, Silurian rocks. Carboniferous deposits are met with along the E. slopes. The Llanos and Pampas are, from N. to S., Quaternary, with hills of gneiss and granite, which seem to have been separated from the main Cordillera by erosion, and some Carboniferous regions (Chiquitos). Active volcanoes are numerous (see **Andes**). B. has great **mineral wealth,** partially undeveloped for want of means of communication. Still, in 1890 the value of the mineral products amounted to £2,288,000. Metallic ores are principally met with in trachytic porphyries. Gold is usually mixed with antimony, silver, &c. Silver is the traditional and most important object of all mining operations (ores from 75 per cent. to 1, Oruro—and 7 per 1000, Huanchaca). Huanchaca is now the most productive silver-mine in the world (in 1890, £883,470). Next in importance are the once famous Potosi mines (with gold and platinum, discovered in 1545, £600,000,000 in 320 years), Portugalete (Chichas), Oruro (with mercury and tin), Aullagas, Guadelupe, Cochabamba (with lead), Chorolque (with tin), Corocoro (copper). Tipuani (*Lavaderos*) is now the most important gold region (from 1818-68, 340,000 tons of ore, worth £2,000,000). There is gold also in the valleys of rivers flowing to the W. Coal and iron are found at Oruro, Chuquisaca, Beni, also bismuth, cobalt, borax. Diamonds and emeralds in the valley of the Beni; hyacinth and opals at St. Cruz; petroleum (Yungas, Pilcomayo). The **climate** is tropical, modified by the altitude and orientation; trade winds (SE.) blow regularly from July to October. In some parts rains begin in November and last until February or March. There are considerable hailstorms both at the beginning and end of the rainy season. B. is between the 60° and 70° July, and the 70° and 80° January Isothermes. May, June, and July are the coldest months. E. winds blowing along the slopes of the Andes give them their humidity. Dry winds [**Peru**] bring about great evaporation on the mountains. In central B. the snow-line reaches 17,250 ft. The glaciers reach some 1600 or 1700 ft. lower down. The *Punas* are the highest and coldest regions; the *Yungas* the warmest [**Peru**]. The *Puna brava* (wild P.) extends from the snow-line to 12,800 ft. The *Puna* lies above 11,000. Temp., maximum 73° F., minimum 44°, mean 50° (La Paz, 11,942 ft.). Near Lake Titicaca (12,643 ft.) temperatures are less extreme. In the *Cabeceras de Valles* ('heads of valleys'), or *Bolsones* ('purses,' or basin-shaped hollows surrounded by hills), above 9570 ft., the temp. is very mild. In the median *Yunga* (or Valle, 9570–5300 ft.) the temp. is better distributed [**Cochabamba**]. The last two regions have regular rainy and dry seasons. Towns lie principally between 12,400 and 8200 ft. alt. The *Yungas* proper (or 'Yuncas,' hot valleys) are tropical; the name has been given to the valleys which permit the influence of the Atlantic to enter the Andine regions, but it is now used principally to designate the valleys of the Beni basin. The temp. is high and uniform (mean 73° F. at Tipuani, 1903 ft.). Saturated winds travel along the slopes of the mountains from the Amazonian *Selvas*. Rains occur all the year round. The *Llanos* to the E. and N. are hot and damp, in some places very variable (W. Chiquitos). There are two meteorological observatories (1893), Potosi and Santa Cruz. On the mountains the **flora** has the character of that of the Peruvian Andes [see **Peru**], on the *Llanos* that of the upper part of both the Amazon and La Plata basins [**Argentine Republic, Brazil**]; all plants can, however, find suitable climates in B. On the Punas the vegetation is scanty (*Espeletia, Senecio glacialis*, and others at Sorata, 16,400 ft.), *Deyeuxia, Cactus bolivianus, Cereus, Bacharis Tola, Stipa Ichu.* Potatoes, barley, and the Quinoa (*Chenopodium Quinoa*) are cultivated. Forests, however, reach as high as 11,500 ft. On the Sorata, *Alnus, Escallonia.* Some palms (*Euterpe andicola*) ascend to about 10,000 ft. In the *Cabeceras de Valles* cereals (Indian corn) are grown. The Yungas are very fertile, and covered with tropical fruits and plants: coffee, cacao, sugar cane, banana, pine-apple, tobacco. On the upper part of the Andine forest belt (*Ceja*, or 'lid' of the mountain, 4700–7500 ft.) grow the cinchona plants, *Cascarilla* (*Calisaya*, and some ten more species most largely cultivated), and the coca (*Erythroxylon Coca*); the *Syphocampylus* yields caoutchouc, the pacay (*Prosopis dulcis*) yields pods used for food, the copal sumach (*Rhus copalinum*), copaiba, *Pessoe*, Mapajo (vegetable silk), sarsaparilla, goiac, textiles, woods for building (mahogany), dyeing and tanning. On the S. slopes vines are cultivated (Camargo to Conception, Chayanta, Mojotoro). The **fauna** is also very like that of **Peru.** Very rich in birds and insects. Birds of prey (Condor) inhabit the highest regions. Humming-birds are found at 14,460 ft. (Potosi). In the Puna the wild American camelidæ (*Auchenia*), the *Huanaco* and *Vicuña*, and the *Chinchilla* (valuable for its fur) are met with, and domestic *lamas, alpacas* (the domesticated *Auchenias*), as well as sheep, are kept. In the S., the African camel has been introduced. The Cabiai or Capybara is plentiful in the Yungas (where it destroys the plantations), and the tapir, the jaguar, and

almost all Amazonian wild animals [**Brazil**]. Among the **people** the Quichuas and the Aymara, whom they appear to have conquered, are now the representatives of the celebrated Incas [**Peru**]. Tradition says they first came from the Bolivian part of Lake Titicaca (Tiahuanaco and Coati), where ruins of magnificent buildings are still to be seen, and where those tribes still live, as they (Apolistas, Yucaré, Mocetenes, Tacanas, Lecos) also do on the central mountains of B., extending from the *Altiplanicie* to the Beni valley. The *Inca* or Quichua language is even now prevalent in central B. The Chiquitos (hunters, agriculturists) live between the Cordillera and riv. Paraguay on the small detached mountainous region. The Jesuits tried to make their language prevalent on the *Llanos*. S. of the Cordillera, as far as the rivs. Pilcomayo and Paraguay, the existing Indians represent a stream of Guarani, coming from the E. (Chiriguanos, Guarayos, from *Guara-Tu* 'yellow men'). N. of the Chiquitos, and between the Mamoré and Guaporé, the Mojos (Canichanas, Itonamas, Iténes), are the navigators of the Amazonian Rivs. Towards the extreme NW., between the Madre de Dios and Purus, live the Antis (*Chunchos*, 'wild'), robbers and savages. The **means of communication** are still very imperfect. Ultimately there will be two outlets to the Pacific and two to the Atlantic. On the Pacific side: 1. In the N., Puno (on Lake Titicaca) is already the head of the Peruvian railway, Mollendo-Arequipa. From Puno, or Puerto Perez, to Chililaya (Lake Unimarca) there are 116 m. by steamer, and, from this, one road to La Paz and Oruro. A railway is in construction between La Paz and Ayagacha (Lake Titicaca). 2. In the S., the Chilean railway Antofagasta-Mejillones-Calama already reaches Huanchaca and Oruro (574 m.). From these two points there are roads, better or worse, to Cochabamba, Santa Cruz, Villa Bela (Matto Grosso), on the Guaporé, Puerto-Pacheco, on the Paraguay, Sucre, Potosi, Huanchaca, Tarija, Jujuy, and Oran (in the Argentine). Puno and Oruro will shortly be united by a railway along the *Altiplanicie*. On the Atlantic side: 1. Towards the S. (*a*) the Argentine Railway system already reaches Jujuy and Oran; (*b*) two railways are in construction between Sucre and Puerto-Pacheco (Chamacoco), on rivs. Paraguay-Otuquis (755 m.), and between Santa Cruz and Lake Caceres, both ports on the navigable part of Paraguay (587 m.). There is a good road between Sucre and Santa Cruz. 2. On the N., the rivs. Guaporé, Mamoré, and Beni are navigable for more than 3000 m., 2000 of which for steamers drawing 6 ft. of water. But riv. Madeira (*q.v.*), which these rivers form in Brazil, is interrupted by impassable falls (for 230 m.). There are **telegraphs** between Puno (Peru) and La Paz (145 m.), thence to Oruro, Sucre, Potosi, and the Argentine. The Mining Company of Huanchaca has established an extensive telegraphic net open to the public. About one-half of the **imports** are from Great Britain, *viâ* Arica (cotton goods, iron, machinery, carriages, coals). Silver makes up two-thirds of the value of the **exports**, the others including gold, copper, tin, bismuth, cinchona bark, and medicinal plants, indiarubber, gum, coca, coffee, tobacco, cereals, wool, and chinchilla furs. (For statistics, see **Appendix**, p. 5). Metals and wools are generally exported by the Pacific; barks and gums by the Atlantic. The decimal metric system of weights and measures is the legal one, but the old Spanish measures are still in general use. (*Libra* = 1.014th; *Quintal*, 100 *Lib.* or 4 *Arrobas; Arroba*, 25 lb., or 6.74 gall.; *vara*, 0.927 yard). The *Dollar*, *Peso*, or *Boliviano*, in silver, is the unit = 5 Fr. (2 S.). The *quinto* $\frac{1}{5}$, the *real* $\frac{1}{10}$, the *medio* $\frac{1}{20}$. Gold *onza* = 17.5 silver Bolivianos. The **constitution** of B. dates from 1880 (October 28). The President is elected for four years by direct vote. Parliament of two chambers both by popular election (sixteen senators and sixty-four deputies). The right of the suffrage belongs to all who can read and write. Principal revenues: import and export duties, besides a land-tax on Indians. The eight departments of B. are officially divided into thirty-four provinces and about 400 cantons. The capital is now La Paz, but has been Sucre and Oruro. Military service is compulsory (since 1892) from 21 to 40 years of age. Roman Catholic is the established religion, but the exercise of all others is permitted. Primary instruction is free and obligatory by law. There are five universities. There is much Indian blood even among the so-called whites. The population is increasing most rapidly in the mountainous dists. At lower elevations the births are more numerous, but great epidemics are frequent. A special kind of yellow fever is prevalent. B. was conquered by the Incas (13th century). During the Spanish dominion was first under the Viceroyalty of Lima as 'Upper Peru'; then (1776) under the Viceroyalty of Buenos Aires (*Audiencia de Charcas*). From 1809–25 B. fought against the Spanish dominion, and finally secured her independence under Bolivar. Numerous political troubles since. From 1878 allied to Peru against Chile. B. lost (1882) the lands she had on the Pacific, from the riv. Loa to 24° S., a stretch of about 185 m. Total population (1880–88) about 2,300,000 (estimated in 1825 = 979,000 : 1846 = 1,379,000; 1868 = 2,600,000). [**J. B. R.**]

Bologna (ancient *Felsina*, afterwards *Bononia*), city, Italy, Emilia, cap. prov. B., in a plain N. of the Apennines, 23 m. SE. by E. Modena, and 27 m. SW. Ferrara, close to the r. bk. of the Reno, surrounded by forts. Lat. of observatory, 44° 29′ 47″ N., 11° 21′ 14″ E. It is one of the series of towns at the mouths of valleys on the NE. of the Apennines, and the most important of all, as lying on the direct road from the principal plains of Tuscany to the populous region in the NE. of Italy [**Italy** (physical features), **Apennines, B.**]. It is enclosed by a brick wall entered by twelve gates, and is supplied with water by a subterranean aqueduct constructed by Augustus and restored in the present day by Zannoni. B. is one of the great centres of public instruction in Italy, and has a university said to have been founded by the Emperor Theodosius II. early in the 5th century, though its celebrity dates only from the time of its refoundation by Irnerius or Wernerus in the 12th century, an academy of arts, with galleries of painting and sculpture, a school of music, an engineering school, an artillery school, libraries, cabinets, and botanic gardens. Principal churches, San Stefano, the cathedral, with the meridian of Cassini traced on the floor; St. Dominic, and St. Bartholomew. The other principal edifices are the *palazzo pubblico*, podestà palace, the tower of Asinelli, the loftiest in Italy (256 ft.), and the leaning tower of Garisenda. Outside of the city an arcade, nearly 3 m. in length, leads to the church of the Madonna di San Luca. Manufactures of silks, wax candles, musical instruments, paper, cards, artificial flowers, straw hats, leather-work, glass, soap, maccaroni, and sausages, in high repute; and trade in other products. It has been an archbishop's see since the 4th century, is the residence of a cardinal legate, and was the seat of the court of appeal for the four N. legations of the Pontifical States. Birthplace of Galvani, Aldrovandi, Malpighi, Massighi, the Zanotti, the painters Guido, Albano, Domenichino, and the three Caracci, the founders of the far-famed Bolognese school of painting, of Pope Benedict XIV., and several other Popes.

B. fell into the hands of the Lombards in the 8th century; at the end of the 10th century it became a republic. During the wars of Guelfs and Ghibellines [**Italy,** history], it sided with the Guelfs, and after various changes it was annexed to the Pontifical States in 1506, with which it remained connected till it was transferred to the kingdom of Italy in 1860. Alt. 150-180 ft.; mean rainfall (1813–91), yr. 25.3 in. P. (1871) 89,100; (1891, estimated) 143,000.

Bombay. The Presidency of Bombay embraces the whole of western India down to about 14° N. (the place where the native state of Mysore advances nearest to the W. coast). It includes also the distant possessions of Aden and the other British possessions in or on the Arabian and Red Seas (Sokotra, Kuria-Muria Is., Perim I., and the Somali-land Protectorate). The terr. belonging to it in India comprises a large area under the direct administration of the governor, the commissionership of Sind, and many native states.

Area in square miles and population in thousands at the censuses of 1872, 1881, *and* 1891, *with increase per cent. between* 1881 *and* 1891, *and population per square mile* 1891 *of the divisions and districts of Bombay:—*

The **physical features** and climate of the terr. are for the most part sufficiently described in the general account of India. It is enough to add here, with reference to Bombay proper, exclusive of Sind (*q.v.*), that the lowland area to the W. of the Ghâts or Sahyádri Mts., begins to widen out a little to the N. of the twentieth parallel. S. of that limit the lowland area is confined to a narrow strip, varying from 1 or 2 m. to about 50 m. in width, the wider portions being river valleys running up eastwards between spurs of the great mountain chain. This narrow strip of lowlands and small valleys is known as the Konkán, and includes the Portuguese terr. of Goa, which is entirely surrounded by the Presidency of Bombay, except on the side of the sea. To the N. of that limit the lowlands, which include the lower course of the Táptí and Narbadá (Nerbudda), the two great rivers of the tableland belonging to the basin of the Arabian Sea, as well as of the Mahí, Sabarmati, Saraswatí, and Western Banas, gradually widen out to upwards of 100 m. in width. These lowlands are known as the plains of Gujarát (Guzerat). In the S. part of these lowland plains the valleys of the Táptí and Narbadá form areas of unbroken cultivation, but in the N. the soil is sandy and the rainfall deficient. As regards **climate**, the Ghâts form the boundary between a narrow strip to the W., with excessive rainfall S. of Bombay city, and the area to the E. with only a moderate rainfall [**India** (climate), **Surat, Bombay** (city), **Matheran, Mahábaleshwar, Kárwár, Málegáon, Poona, Sholápur, Belgáum**]. Everywhere the rainiest months are June to September or October. In all the moister dists. there is a tendency to epidemics of fever, often of a severe type, towards the close of the rains. Except in Sind, the principal **irrigation** works are tanks [**India** (irrigation)]. S. of the Narbadá **famine** has not been experienced W. of the Ghâts since 1802–3, but E. of the Ghâts there was severe famine in 1876–8 S. of the Godávari, and in 1868–9 over portions of the NE. dists. Cutch and Gujarát suffered greatly in 1812. The differences in the **crops** of different parts of the terr. of Bombay correspond to the contrasts of climate. In Bombay proper (exclusive of Sind), millets of one kind or another are the prevailing grains, but W. of the Ghâts, as far N. as the Táptí, rice, the characteristic 'wet' crop, ranks next in importance, but in the northern plains wheat, the most valuable of the 'dry' grains, covers larger areas than rice, and the relative area under wheat is still greater in the northern parts of the tableland. Cotton, another dry crop, accompanies wheat, but is a crop of importance further S. than wheat, both on the plains and on the tableland. One of the chief areas of cotton cultivation indeed is the SE. of the tableland (the dist. of Kaládgi, and part of that of Dhárwár), but the greatest cotton as well as the greatest wheat region of Bombay is the dist. of Khándesh, that is, the middle portion of the basin of the Táptí, a region with an extensivé covering of deep black soil [**India**, geology], forming the western continuation of the valley of Berar. The land revenue system is based on the principle of measuring each field separately, and assessing it at a fixed sum for thirty years. There is special legislation intended to hinder he peasantry from getting hopelessly into the power of moneylenders. The **mineral wealth** of Bombay is comparatively small, apart from building-stone and road-metal; but this is the part of India in which **manufactures** are carried on by modern machinery to the greatest extent. The principal branch of such industries is cotton-spinning, more than half the spindles employed in this branch in India belonging to Bombay I., and more than two-thirds to the Presidency [**India**, manufactures]. The great standard-gauge **railways** of the Presidency (exclusive of Sind) all converge on Bombay—from Calcutta and Nágpur, and from Allahábád in the E. and NE., from Madras and from Bezwáda and Haidarábád in the SE., and from Ahmadábád and Baroda in the N. These great lines are supplemented by metre and smaller gauge railways in the N. and S., the southern railways being in direct communication with the port of Marmagáo in Goa. The twentieth parallel limit between the narrower and broader lowland area W. of the Ghâts nearly coincides on the coast with the limit between two of the chief Aryan **dialects** of India, Gujaráthí and Maráthí. The Dravidian dialect known as Kanarese prevails in the southern part of the Bombay tableland. The Maráthás (*q.v.*) are the most important of the native races of Bombay, and of those classed as 'aboriginals' the principal are the Bhíls (*q.v.*). Four-fifths of the population are Hindús in religion, the remainder chiefly Mohammedans [**India**, table]. The Pársis, descendants of the Zoroastrians or fire-worshippers who emigrated from Persia after the conquest of that country by the Mohammedans in 651, form a small but influential community, including many of the wealthiest merchants. Two-thirds of them belong to Bombay city, and most of the remainder to the dist. of Surat. The principal **towns** are Bombay, the cap., Poona, the seat of government from July to November, Ahmadábád, Baroda (in native state), Surat, Karáchi (Sind), Sholápur, Haidarábád (Sind), Hubli, Dhárwár, Kolhápur, and Belgáum; the principal hill-stations Mahabaleshwar and Matheran. The first British acquisition in the Presidency was Bombay I. (1661). The greater part of the present British terr. was acquired on the overthrow of the Peshwá of the Maráthás in 1818. Sind was added in 1843.

Bombay, city and seapt., Brit. India, the seat of the Presidency of B. during the cooler part of the year, the largest and chief manufacturing town in India, and the rival of Calcutta as a seaport. Lat. of observatory 18° 55′ 5″ N., lon. 72° 48′ 51″ E. It is built on the small island of B., which, along with the smaller island of Kolába to the S. and the larger island of Salsette to the N., is now connected with the mainland by roads and railways. It consists of the Fort or old town, the fortifications of which were razed for ventilation in 1865, occupying a penin. to the SE. of B. island immediately to the N. of Kolába I., 1 m. in length by ¼ m. in breadth, and in which the European inhabitants and most of the Pársí merchants have their offices; and the new town, separated from the old town by a large *maidán* or park, inhabited by the Hindu and Mohammedan native population. The official residence of the governor has long been in the N. suburb of Parell, but the favourite residential quarters for Europeans now are Malabár Hill, on a penin. in the SW. of Bombay I., separated from the Fort by Back Bay and terminating in Malabar Point, Breach Candy on the shore to the N. of this hill, and Kolába. B. was lighted with gas in 1865, and the Fort is now lighted by electricity. Principal edifices in the Fort—the court-house, and other government offices, custom-house, town-hall, castle, mint, cathedral of St. Thomas, and St. Andrew's Scottish Church, European hospital, Sir J. Jejeebhoy's hospital, the Byculla Church, the Sailors' Home, erected at the expense of a Gáekwar of Baroda, the Royal Yacht Club, and the Hindu temple of Momba Devi. On the island of Kolába are the lighthouse, visible 18 m., the observatory, lunatic asylum, and a stone pier. The town is now supplied with water from a reservoir 60 m. NE., formed by constructing a dam 2 m. long (said to be the longest in the world) across the valley of the Tansa R. The islands form one side of a magnificent natural harbour, safe for large ocean-steamers in all weathers, and to this enormous advantage B. owes its present prosperity. The accommodation of the port has been increased by the formation both of wet and dry docks. The wet docks are the Victoria Dock, with a depth of 27.2 ft. at ordinary neap, 30.2 ft. at ordinary spring tides, and the Princes' Dock, 25.2 ft. deep at neap, 28.2 ft. at spring tides, besides the Carnac basin. There are several dry docks, the largest of which, the Merewether Dock, opened in 1891, and adapted for large ships of war, can be used at any state of the tide, and at the highest springs has a depth of 29.7 ft. In 1661 the island of B. was acquired by the British King Charles II. from the Portuguese, and in 1687 the East India Company, to which it had previously been handed over, made it the headquarters of their possessions. The advance of B. was retarded, however, by the fact that the island of Salsette and the other islands in Bombay harbour remained in other than British hands till 1774–82, when they were acquired from the Maráthás. Even afrer that its advance was slow till the establishment of improved communications with the interior raised it to the commanding position which it now holds in the commerce of India. First of all a carriage road, a remarkable engineering achievement, was constructed up the Bhor Ghát (1830). A railway up the Thal Ghát (1912 ft. at the summit), now the means of communication with the whole of the NE. of India, was completed in 1861, and one up the Bhor Ghát (summit 2027 ft.), now the means of

communication with the SE. of India, followed in 1863. The development of commerce after the outbreak of civil war in America in 1861 was sudden and rapid, chiefly in consequence of the large increase in the export of raw cotton, especially after the completion of the two railways to the interior. A temporary collapse took place in 1865, but the development of the port has kept pace with that of the general commerce of India. Its average imports now exceed £20,000,000 in value (one-third treasure); its average exports £30,000,000 (mainly merchandise —raw cotton and cotton yarns, wheat, oil-seeds, &c.). Mean temp., yr. 80° F., Jan. 74°, May 85°; mean rainfall, yr. 74.4 in., June–Sept. 71.4 in. P. (1872) 644,000; (1881) 773,000; (1891) 822,000; Hindus, 543,000; Moham. 155,200. See **Elephanta.**

Bombay, post-tn., New Zealand, North I., Manukau co., 35 m. from Auckland. P. <1500.

Bombay Hook Island, tract, U.S., Delaware, on the Delaware R., bounded on the W. by Old Duck Creek, in 39° 17′–22′ N., with a lighthouse at its N. end, visible 12 m.

Bombay Shoal, group of rocky islets on the W. ct. of Palawan, Philippine Is., in 9° 36′ N., 116° 55′ E.

Bombetoke Bay, Madagascar, in the W., in about 16° S. It receives at its head the united waters of the Ikopa and Betsiboka Rivs.

Bombon, or **Taal,** lake, in the S. of Luzon, Philippine Is., crossed by 14° N., 121° E.; 15 by 12–13 m., with island and volcano of Taal in the middle; drained S. by the Taal into Balayan Bay.

Bom Fim, tn., Brazil, Minas Geraes, 200 m. NW. by N. Rio de Janeiro, 75 m. W. Ouro Preto. P. 6000.

Bom Jardin ('good garden'), vil., Brazil, Bahia, 42 m. N. by W. São Salvador.

Bom Jardin, São Antonio de, tn., Brazil, prov. and 260 m. S. by W. Ceará. P. 6000.

Bom Jesus, vil., Portuguese W. Africa, on the r. bk. of the Kwanza, in 9° 5′ S., 13° 43′ E.

Bomma. See **Boma.**

Bommelerwaard, isl., Netherlands, formed by the Waal and the Meuse, prov. Gelderland, containing the town of Zalt-Bommel, besides many villages; divided into two parts by the Meidijk. It is defended on the E. by the redoubt St. Andries, and on the W. by the castle of Loevestein, in which Grotius, Jacob de Witt, and Abraham de Wicquefort were confined.

Bömmelö, isl., Norway, off the W. ct., on the W. of the entrance to the Hardanger Fiord.

Bommelsvitte, a N. suburb of Memel, E. Prussia. P. < 4000.

Bommern, vil., Ger., Prussia, prov. Westphalia, 8½ m. SW. Dortmund, on the l. bk. of the Ruhr. P. <3000.

Bomoseen, lake, U.S., in the W. of Vermont, crossed by 43° 40′ N., and drained S. into a trib. of Poultney R.

Bomporto, comm., Italy, prov. and 9 m. NE. Modena, at the entrance of the Modena Canal into the Panaro. P. <5000.

Bom Retiro ('good retreat'), vil., Brazil, Santa Catharina, 165 m. NE. Porto Alegre.

Bomst, tn., Ger., Prussia, prov. Posen, 49 m. W. by S. Posen, cap. of B. circle. P. <3000.

Bomvanaland, Kaffir terr., Cape Colony, E. ct., between the Umtata and Bashee rivers, crossed about the middle by 32° S.; annexed to Cape Colony in 1885.

Bona, in French **Bône,** a fortified seaport town of Algeria, dep. and 85 m. NE. Constantine, cap. arr. on the bay of B., 25 m. wide (between Cape Garda on the W. and Cape Rosa on the E.), near the mouth of the Sebus. Lat. of the hospital, 36° 53′ 58″ N., long. 7° 46′ 5″ E. It is nearly 2 m. in circumference, is surrounded by a wall, and has four gates; Fort Cigogne is its chief defence. The iron mines of Mokta-el-Hadid at Ain-Mokra form its chief source of wealth. There are also marble-quarries near. The harbour, which lies between two jetties and has a depth of 24–25 ft., is sheltered from all winds; and is considered to be the safest on the coast of Algeria. Beyond a swamp S. of B. are the ruins of *Hippo-regius,* once the see of St. Augustine, but destroyed by the Caliph Othman. The harbour of the ancient town has been filled up by the deposits brought down by the Sebus, which tend to spread northwards and encroach on that of the modern town. P. (1861) 15,300; (1872) 16,200; (1891) 26,500.

Bonaca, or **Guanaja,** isl. See **Bay Islands.**

Bonahaven Bay, Argyllshire, Islay, on the Sound of Islay, in 55° 53′ N.

Bonái, the most southerly of the trib. states of Chutiá Nágpur, Bengal, composed of a central valley shut in on all sides by the lofty B. Hills. Area, 1349 sq. m.

Bonaire, a name originally French, now adopted by the Dutch and other nations, for the Spanish **Buen Aire** (or **Ayre**) ('good air'), the easternmost of the Dutch West Indies off the N. ct. of Venezuela in 12° 2′ N., 68° 22′ W. P. 5000.

Bonalya. See **Banalya.**

Boningale, or **Boninghall,** par., Eng., Salop, Newport div., 16½ m. N. Kidderminster, 2 m. S. Albrighton stn. P. <250.

Bonin Islands, called by the Japanese **Munin-fo** (or **-shima**), that is, 'uninhabited islands,' or **Ogasawara-shima,** and by the Spaniards, by whom they were discovered in 1543, **Arzobispo Islands,** a group of small volcanic islands in the N. Pacific, belonging since 1876 to Japan, between 26½° and 27¾° N., on or near the meridian of 142° E., divided into four groups, the Coffin Is. in the S., principal Hillsborough; Beechey Is., just N. of 27°, principal Peel I., with Port Lloyd, which affords a good anchorage 18–20 ft. deep on the W. side, and Buckland I.; Kater I., with a few adjacent rocks in 27½°; and Parry Is., in the N. Inhabitants partly composed of European and Polynesian half-breeds, now largely of Japanese colonists; principally engaged in turtle-catching, otter-hunting, shark-fishing (exporting shark-fins and shark-oil).

Bonita, settlement, U.S., Montana, Missoula co., 69 m. NW. Butte City.

Bonita Point, cape, U.S., California, in 37° 49′ N., with lighthouse.

Bonito, comm., Italy, prov. Avellino, 6 m. SW. Ariano. P. <4000.

Bonjem, tn. and val., Tripoli, 210 m. SE. Tripoli, with Roman antiquities.

Bonmahon, PMT.O., Ire., near Carrick-on-Suir (Tipperary).

Bonn (mentioned in the 4th century as *Bonna*), tn., Prussia, prov. Rhine, cap. circle B., on l. bk. of the Rhine, govt. and 14 m. SSE. Cologne. Lat. of observatory, 50° 43′ 45″ N., long. 7° 5′ 49″ E. It has a celebrated university (founded in 1786, suppressed under French rule in 1801; re-founded in 1818), and library of 200,000 vols., a botanic garden, museum of natural history and mineralogy (in Poppelsdorf Castle), and school of agriculture. It is the seat of a superior mining court, and of an old Catholic bishop, and has an active commerce, manufactures of earthenware, chemicals, jute, &c. Beethoven was born here (1770). P. (1816) 9900; (1871) 20,000; (1890) 39,800.

Bonne Bay, inlet, Newfoundland, W. ct., in 49° 30′ N.

Borda, cape, in the NW. of Kangaroo I., S. Australia. Alt. 506 ft.; mean temp., yr. 58.2° F., Jan. 65.0°, July 57.9°; rainfall (14 yrs.), 23.54 in.

Bordeaux (the ancient *Burdigala*), a comm. and city in the SW. of France, cap. dep. Gironde, on the l. bk. of the Garonne, 60 m. from its mouth in the Atlantic, in 44° 50′ 16″ N., 0° 34′ 32″ W. Is an archbishop's see, the seat of a university academy; has a school of medicine, navigation school, mint, public library, and museum of paintings. Situated on a navigable river 2600 ft. broad, communicating on one side with the Atlantic, and on the other with the Mediterranean by the Canal du Midi. It has a floating dock with 23 ft. of water in sill at ordinary neap, 27 ft. at ordinary spring tides, and affording 5709 ft. of quayage, and there is a vertical river quayage (in addition to the inclined quayage for lighters) of 3630 ft., with a depth alongside of 32.8–39.4 ft. at highwater, 19.7 ft. at low water. This vertical quayage is now (1893) being increased. For trans-oceanic passenger traffic and for vessels too large to ascend to B., Pauillac (*q.v.*) serves as an out port. Its commerce extends to all parts of the world. Exports wines, brandy, fish, and fruit. Imports colonial merchandise—cotton goods, iron, coal, and timber. The chief import from Britain is coal. There are large shipbuilding yards, factories of preserved meats, porcelain factories, &c. Under the name of *Burdigala,* this was an important place at the time of the conquest of the country by the Romans. The wines of Bordeaux were celebrated as early as the 4th century. In 1152 it passed, by the marriage of Henry Plantagenet with Eleonora of Guienne, under the dominion of England; since 1453 it has belonged to France. The principal Roman remains are the important ruins of the amphitheatre called *Palais Gallien,* and traces of various aqueducts. B. was burnt by the Saracens in 735. Its cathedral belongs to the 13th to 15th centuries. Annual value of exports £13,000,000–15,000,000, of which wine forms one-third. Mean temp., Jan. 42.4°, July 69.1° F. P. (1861) 162,750; (1872) 194,000; (1891) 252,400; comm., including Bègles and other suburbs, 283,000.

Bordelais, an old sub-div. of France, formed of the coast-line of prov. Guienne, cap. Bourdeaux; it now forms the greater part of the dep. Gironde, and a portion of Landes.

Börnecke, vil., Prussia, prov. Saxony, circle Aschersleben, dist. Egeln; has lignite mine, sugar refineries. P. <4000.

Borneo, properly **Brauni** (native name **Kalamantin, Klemantin, Klemutan**), next after Australia and New Guinea the

largest island in the world, lies between 7° 3′ N. lat. and 4° 10′ S. lat., and 108° 53′ and 119° 22′ E. long., having the China Sea on the N., the Sunda or Java Sea on the S., Celebes on the E., and Sumatra and the Malay Peninsula on the W.

State.	Area in sq. m.	Pop.
I. English Protected States :—		
North Borneo	31,000	150,000
Labuan	30	6,000
Brunei	8,100	50,000
Sarawak	41,000	320,000
II. Dutch Possessions :—		
West Borneo	60,000	418,600
South and East Borneo	144,500	1,000,000
Totals	284,630	1,944,600

Thus in area B. is more than three times as large as Great Britain. The main axis and watershed of the island, a mountain chain varying in height from 3000 to 8000 ft., and consisting chiefly of crystalline slates and Devonian rocks, runs NNE. to SSW., the lowest elevations being towards the latter extremity. From this backbone there radiate, E., S., and SW., a series of short disconnected chains and isolated groups of Eocene and Miocene age, reaching up to 6000 ft.; these are flanked by lower ranges (up to 300 ft.), and penetrated by extensive plains, which in many parts are mere marshes or morasses. Although extinct crater-lakes abound, there are no traces of recent volcanic activity in the island. In several districts there are limestone caves, from which large quantities of edible birds' nests are obtained. The coast regions are mostly diluvial and swampy, and covered with mangroves and nipa palms. The longest rivers rise in the mountain axis, and radiate outwards; at first they descend rapidly, often over rapids and waterfalls, but in passing through the lower hilly regions and the plains, generally overflow their banks and form wide marshes; at their mouths they spread out into broad deltas, the channels through which are frequently obstructed by sandbanks. There are scarcely any large bays, and but few good harbours, except on the N. coasts, in British North Borneo and Brunei. The interior is still to a large extent unexplored, and comparatively little is known about it, except along a few of the principal rivers. Although B. is cut in two by the equator, its climate is neither so hot nor so unhealthy as would be expected. The low coast-lands are at all seasons unhealthy for Europeans. The air is humid all the year round, even during the dry season (May to November); annual rainfall (12 yrs.), 95 to 150 ins. Violent storms occur during the prevalence of the monsoons. The surface is nearly everywhere covered with a dense vegetation. The forests yield some sixty varieties of timber, several of great value for building purposes, as teak, iron-woods, sandalwood, ebony, bamboo, *mohor*; others produce gums and resins, as gutta-percha, indiarubber, dammar; others drugs, spices, foods, &c., notably camphor, pepper, cloves, nutmegs, cinnamon, ginger, gambier, betel nuts, sago, coco-nuts; then there are medicinal roots and barks, oils, fibres, rattans, and magnificent flowers, especially orchids, pitcher-plants, and rhododendrons. The principal animals are apes and lemuroids, the orang-utang, tapir, bantang (wild ox), panther, leopard, elephant and rhinoceros (these two only in the N.), wild boar, Malay bear, deer, porcupine, bats, squirrels, crocodiles, snakes, tortoises, leeches, remarkably large moths, chafers, and butterflies, and many varieties of birds—eagles, vultures, peacock, heron, flamingo, raven, starling, dove, parrots, owls—but more especially the Argus and Bulwer pheasants and the edible-nest swallows. There are only a few horses, introduced by Europeans. The natives, who are generally averse to work, keep buffaloes, sheep, and goats, but do comparatively little by way of cultivating the soil, though under European direction they do produce tobacco (in N. and W. Borneo), sago (in Sarawak), and sugar, coffee, cotton, and rice (all in W. Borneo), besides coco-nuts everywhere. B. is exceptionally rich in minerals, though neither much energy nor much capital is expended in their extraction. Gold, coal, and iron are generally diffused; gold is obtained in Dutch Borneo, coal in Brunei, Sarawak, and Labuan, and iron only by the natives of the S. Besides, a little antimony is obtained in Sarawak and the western parts of S. Borneo, and quicksilver in Sarawak; platinum, copper, silver, zinc, and lead exist, but are not mined. Diamonds are found in W. and S. Borneo, and are cut by native workmen at Pontianak (W. Borneo) and Martapura (S. Borneo). Warm springs are very common throughout the S. The principal means of internal communication are the rivers, traversed by native boats, occasionally by small steam vessels; but navigation is much impeded by overflows and rapids, and by the sand-banks of the estuaries. Fish are abundant in all the rivers and on all the coasts, where, too, trepang (bêche-de-mer), pearls, and tortoise-shell are collected. The inhabitants belong for the most part to three classes—Dayaks, Mohammedan Malays, Javanese, and Buginese, and Chinese. The Europeans (Dutch and English) and the Arabs, the principal merchants, are comparatively few in number. The Dayaks, the aboriginal inhabitants, dwell in the interior, and live by hunting and collecting the native wild products; they number considerably more than one million. They are mostly heathens, and are addicted to the practice of 'head-hunting,' which, however, is being gradually put down by the Europeans. The Malays and other native Mohammedans are mostly sailors or traders; they dwell round the coasts, and were the dominant races before the Europeans became supreme. The Malays, who through their piracy were long the terror of the adjacent seas, founded several powerful states, of which Brunei, Banjermasin, Martapura, and Kutei are the best known. The Chinese, who have visited Borneo for more than ten centuries, are miners, farmers, and traders. The native women weave cotton, make mats, baskets, and earthenware, and cultivate the soil. The men in Banjermasin forge good knives and sharp-edged weapons of steel. B. was discovered by the Portuguese in 1518 or 1526. In the beginning of the seventeenth century the Portuguese, Spaniards, English, and Dutch all planted trading-stations on the island, but none of them established themselves permanently. The beginnings of permanent settlement were made by the Dutch in Banjermasin in 1733. Since 1814 they have gradually made themselves masters of the greater part of the island. James Brooke in 1838–41 put down the Malay pirates and created an independent state in Sarawak, which in 1888 was placed under British protection. Brunei, the last of the free sovereign states, was declared a British protectorate in 1888. The extreme N. of the island was obtained by the British North Borneo Company in 1881; in 1888 their territories were raised to the status of a protected state under the sovereignty of England. In 1889 the administration of the island of Labuan was transferred to the British North Borneo Company. **Dutch Borneo** embraces the greater portion (nearly 72 per cent.) of the entire area of the island, and lies to the S. of Sarawak, Brunei, and (British) North Borneo. The boundary line between British North Borneo and the Dutch possessions begins at 4° 10′ N. lat. on the E. coast, proceeds westwards to the intersection of 4° 20′ N. lat. with 117° E. long., follows 4° 20′ N. lat. as far as the crest of the watershed separating the rivers that flow to the NW. coast from those that flow to the E. coast, and then coincides with the crest of the watershed that divides the rivers flowing W. and NW. from those that flow S. or SW., and finally terminates in Tanjong Datu. The surface is undulating, with several short mountain ranges and vast alluvial plains and swamps. The more important rivers are the Sibavang, Bulungan, Segah, and Mohakkam (navigable 250 m.) on the E. coast, the Barito (570 m. long), Great and Little Dayak, Katingan (400 m.), and Pembuan (350 m.) on the S. coast, and the Kapuas (navigable 400 m.) on the W. coast. The chief cultivated products of W. Borneo are rice, sugar, earth-nuts, cotton, indigo, and coffee; of S. Borneo, rice, sugar, and earth-nuts. The exports consist of gold, diamonds, coal, rattan, guttapercha, indiarubber, birds' nests, cotton, bees'-wax, timber, baskets, mats, gums, and other natural wild products. The imports comprise earthenware, haberdashery, hardware, linens, woollens, silks, paper, medicines, provisions, wine, rice, sugar, tobacco, tea, trepang, gambier, oils. The busiest ports are Banjermasin, cap. of the S. and E. div., Pontianak, cap. of the W. div., and Sambas in the same div. Trade is carried on chiefly with Batavia, Singapore, and Hong-kong. The S. and E. div. is subdivided into eight dists.: Banjermasin, Amuntai, Martapura, the Duson (Dusun) Lands, the Dayak Lands, Sampit, Kutei, and the North-East Coast, Pasir and the Tanah Bumbu Lands—and includes the tributary native states of Pasir, Kutei, and Beru (with subtributary states Sambiliung, Gunong Tebur, and Bulungan). The W. div. consists of eighteen dists.: Sambas, Mampava, Pontianak, Kubu, Simpang, Sukadana, Matan, Landak, Tayan and Meliow, Sanggan, Sekedow, Sintang, Silat, Suhaid, Salimbow, Piassa, Jonking, Bunut. See other particulars under **Borneo** above. See Th. Posewitz, *Borneo*, Eng. trans. 1892. **British North Borneo** extends from 7° 25′ to 3° 52′ N. lat., and from 119° 16′ to 115° 20′ E. long., and has a coast-line of nearly 1000 m. It contains the highest mountain in all B., namely, Kinabalu, 13,680 ft.; the interior consists, so far as is known, in great part of mountains ranging from 1500 to 6000 ft., and densely covered with jungle. Sandstone is the prevailing rock. Fertile soil exists alongside the rivers. This part of B. is well provided with bays and harbours: Sibuco or St. Lucia, Darvel, Sandakan, Labuk, Marudu, Abai, Ambong, Gaya, Kimanis, and Brunei Bays follow along the coast from E. to W. The principal rivers, going in the same direction, are the Sebuco, Segama, Kinabatangan, Labuk, Sugut, Bongon, Marudu, Tampasuk, Papar, Padas. The climate is tropical, but not unhealthy. Mean annual temperature, 74° to 86° F.; rainfall (11 yrs.), 102 inches. The natural products embrace all those mentioned above as common to B., with sago, sugar-

cane, rice, Indian corn, ground and betel nuts, tobacco, cotton, tapioca, and sweet potatoes, cultivated by the natives. Tobacco of excellent quality is grown in large quantities by Europeans, and experiments are being made to cultivate coffee, hemp, gambier, pepper, and sago. Coal and gold both exist in paying quantities, though but little is extracted. The principal exports are tobacco, rattan, guttapercha, birds' nests (from the limestone caves of Gomantin, Madai, Segalong, Batu Timbang, and other localities), timber, sago, pearls, and indiarubber; their value increased sixfold between 1883 and 1890 (£180,000). The imports embrace rice, provisions, cloth, spirits, machinery, opium, tobacco, and iron-ware, and nearly quintupled between 1883 and 1890 (£400,000). The bulk of the commerce is with Singapore and Hong-kong. The currency is the same as in the Straits Settlements—dollars and cents. Weights and measures —picul (133⅓ lbs.) and catty (100 = 1 picul). British North Borneo, more correctly the independent state of North Borneo, under the protectorate of England, is administered by the British N. Borneo Company, the directors of which, sitting in London, appoint the governor. The territories are divided amongst nine provs. : Alcock, Dewhurst, Dent, Cunliffe, Martin, Myburgh, Mayne, Elphinstone, and Keppel. A census taken in 1890 made the population number 67,000; but large tracts of country were not included in the returns. The total population may be set down as about 150,000, and consists of the same classes as are found in B. generally. Cap. Sandakan (*q.v.*); other towns, Kudat, Gaya, Silam, Mempakul. For historical notices, see **Borneo** above. See *Handbook of British North Borneo* (annual), where there is a map, 1 : 640,000.

Bornesga, riv., Spain, an affluence of the Esla, rises in the Cantabrian Mts., and flows S. past the city of Leon.

Bornos, comm., Spain, prov. Cádiz, dist. Arcos de la Frontera. P. 5200.

Bornu, central African sultanate, W. and S. of Lake Chad. It is a flat country, there being very few elevations. The soil is for the most part sterile, consisting of ferruginous clay and sand, but the regions adjoining the rivers are formed by alluvial deposits, and are of great fertility. The principal rivers are the Komadugu (Waube) and the Shari, both flowing into Lake Chad. Lake Chad, which belongs for the most part to B., is known to be an enormous swamp rather than a lake. The climate of B. is hot and unhealthy. During the rainy season (between March and June) the temperature, even during the nights, is seldom lower than 100° F., whilst during the rest of the year the mean temperature is about 70° F.; the lowest temperatures being about 55° F. During the wet season rain falls in torrents, and the hot air, saturated with moisture, is very oppressive and unhealthy, producing malignant fevers. The fauna and flora of B. are those common to the central Sudan regions. The most important products are indigo, cotton, and ground-nuts (*Arachis hypogæa*). The pop. consists of various tribes, the most important being the Kanûri, Kanembu, Tibbu, Musgo, Manga, Haussa and Fulbe, Mandara, Marghi, Tuareg, and Arabs. The sultan of B. maintains an army of about 30,000 soldiers, mostly cavalry. Import articles are calico, burnuses, sugar, and salt; exports are at present of no importance: formerly slaves were exported in considerable numbers. The cap. of B. is Kuka or Kukaua (P. about 60,000). Other important towns are Ngornu (on the shores of Lake Chad), Dikoa, Birni, Mashena, Doloo, and Logone. Area, 57,000 sq. m. P. estimated at about 5,000,000. [**H. G. S.**]

Borny, vil., Ger., govt. of Alsace-Lorraine, 2½ m. E. by S. Metz. P. <2000.

Bosna Serai. See **Sarajevo.**

Bosnia (including Herzegovina and Novibazar, all three having a joint administration) was formerly the most NW. prov. of Turkey in Europe, but is under Austrian administration since the Berlin Conference in 1878. The divisions are shown in the following table:—

Bosnia and Herzegovina—Provinces.	Area in sq. m.	Pop. in Thousands, 1885.	Pop. per sq. m., 1885.
BOSNIA:—			
Bihač . . .	2,133	158	75
Banjaluka . .	3,285	265	80
Dolnja-Tuzla . .	3,471	314	91
Sarajevo . . .	3,232	193	60
Travnik . . .	4,084	218	54
HERZEGOVINA:—			
Mostar . . .	3,529	188	54
Totals . .	19,735	1,336	67

The Dinaric Alps or Prolog Planina extend in the W., forming the watershed between the Adriatic and the Save, the country sloping from this mountain range to the NE. and SW. B. is a mountainous country, and a considerable number of offshoots of the Dinaric Alps divide it into a great number of secondary valleys and basins. The principal rivers are the Narenta, which flows into the Adriatic, and the Drina, Bosna, Vrbas, and Unna, which are tribs. of the Save. B. has no lakes of importance. Its climate is on the whole temperate, and the country healthy, except in the lowlands of the Save, Bosna, and Narenta. The mountains and highlands are covered with magnificent forests, the principal trees being oak, fir, lime, beech, pine, and larch, but up to the present time the forests of B. are still an unproductive source of revenue, although the felling of trees of all kinds is continuously increasing. The soil in many parts of the country is stony and rocky, and more suitable for cattle-rearing than for agriculture, but there are many very productive plains and valleys; wheat, barley, maize, millet, rye, and oats being the chief cereals. Various kinds of fruit grow in abundance. The rearing of swine is of considerable importance in the N.; horned cattle, horses, sheep, and goats are also reared in large numbers. The rivers abound in fish, and game is plentiful. B. is a wine-growing country, but the production of wine was of very little importance while the country was under Turkish rule, and made but very little progress until 1882. The best wines are produced near Mostar, Stolac, and Jeni-Bazar. Many minerals are found in various parts of the country; gold (in the mountains near Serajevo), silver (near Sreberniza, Kruppa, and Kamengrad), iron (in the neighbourhood of Kreševo Borovica, Fojnica, Vareš, Foča, and Shari Majdam), lead (near Zvornik and Sreberniza), coal (in the dist. of Zenica, near Travnik), and salt (near Tuzla). Besides these, manganese, chromium, and antimony mines are worked. B. is especially a country of raw products, and industries and manufactures are of very little importance. Quite recently efforts have been made by the government to promote glass, cloth, and carpet manufactures, and to introduce silk culture. The principal towns of B. are Sarajevo (cap.), Mostar, Banjaluka, Bjelina, Travnik, Livno, Berbir, and Visoka. Most of the towns have a thoroughly oriental character; only Sarajevo and Banjaluka show signs of western European influence. Most of the roads of B. are in a bad condition, but since the Austrian occupation some

new ones have been made connecting B. with the valley of the Save, and the Bosnian valleys with each other. Two railway lines are of special importance, viz., Brod-Sarajevo, and Jasenovak-Novi-Banjaluka. The Brod-Sarajevo line is now being connected with Spalato by Travnik and Livno. B. formed a part of ancient Pannonia. Since the 7th century it has been chiefly inhabited by the Servian Slavs. In the middle of the 15th century the country was conquered by the Turks, and the nobility of B. soon became Mohammedans, whilst the majority of the population are Greek and Roman Catholics. Area about 24,000 sq. m. P. (1885) 1,300,000. [**H. G. S.**]

Bosnian Gradiska. See **Gradiska.**

Bošnjaci, tn., Croatia-Slavonia, co. Sriem, dist. Županje. P. <5000.

Bosporus (sometimes spelt in English *Bosphorus*), or the **Straits of Constantinople,** called by the Turks **Boghaz** ('mouth'), the ancient *Bosporus Thracius*, a strait of Turkey which separates Europe and Asia, and connects the Black Sea with the Sea of Marmora. Length NE. to SW. 20 m., breadth 1 m. to 2 m. At its S. and N. entrances are lighthouses. Shores elevated and picturesque, with wooded cliffs studded with ruins and splendid oriental mansions; on them are the town of Scutari, the castles of Europe and Asia, Böyukdere, Therapia, Pera, and the city of Constantinople (*q.v.*). See **Black Sea.**

Bosporus, Cimmerian, the ancient name of the Strait of Kerch or Yenikale.

Boston (corrupted from *Botolphstown*, and named from a hermit Botulph or Botulf, who settled on the site of the town in the 7th century), parl. and mun. bor., seapt., market-tn., and par., Eng., co. and 28 m. SE. Lincoln, in the parts of Holland, 5 m. from the mouth of the Witham, on both banks of the river, 26 m. E. by N. Grantham, with junc. stn. on branch lines of the G. N. R. It has manufactures of sail-cloth, canvas, and sacking; iron-foundries, agricultural implement factories, and shipbuilding yards. B. harbour has a depth of 23 ft. in river after passing the dock at high water or ordinary springs, and in the dock there is 25 ft. of water over the sill at ordinary spring tides. There is good anchorage in roadstead 6 m. below the harbour, in 4½ fathoms low water ordinary springs. Imports Baltic produce, coal, and manufactured goods coastwise. Exports oats, wool, and machinery. Birthplace of Fox, author of the 'Book of Martyrs.' B. sends one member to the House of Commons. Market-days, W. and S. Parl. bor. P. (1891) 18,700; mun. bor. and par. P. (1801) 5900; (1851) 14,700; (1891) 14,600.

Boston, place, Ire., NE., co. Clare, bar. Inchiquin, 19 m. SW. Loughrea, P.O.

Boston, vil., Jamaica, Surrey co., on the NE. ct., 33 m. ENE. Kingston, in 76° 21′ W.

Boston, city, U.S., cap. of Massachusetts, in Suffolk co., 207 m. ENE. New York, on B. harbour, an indentation of Massachusetts Bay, from which it is separated by some 50 isls., and having, with its several arms, an area of 75 sq. m. The surrounding country is pleasantly undulating, and varied by woodlands and lakelets. E. Boston is situated on the W. of Noddle's or Maverick's I., and here the ocean steamers chiefly lie. S. Boston is mostly reclaimed from the harbour by which it is divided from B. proper. The depth of the harbour at mean low water is over 18 ft., and the principal wharves are dredged to a depth of 23 ft. at ordinary low water. The depth at the entrance to the harbour at ordinary springs is 33½ ft. high water, 21⅞ ft. low water. The total length of water frontage of the wharves and docks (exclusive of the length of side docks) is about 12 m. There are several dry docks, including one belonging to the government. The older part of the town stands in very uneven ground, and is notorious in America for the narrowness and irregularity of its streets, although improvements were made after the great fire of November 9–10, 1872. The newer parts have all the regularity and spaciousness usual in American cities. The old State House, Faneuil (pronounced fün'l) Hall, the 'cradle of liberty,' in which the revolutionary patriots met, and the public library, next to that of Congress the largest in America, are the most noted buildings. The Bunker Hill Monument, a granite obelisk 221 ft. high, on a low hill in the former city of Charlestown (now a N. suburb of B.), marks the scene of the first conflict between the British and American forces in the war of independence, June 17, 1775. The earlier settlers called the place Trimountain or Tremont. In 1630 a company of English Puritans settled on the site of the present city, and in the same year a general court of the governing body of that community ordered that the place should be called B. after the town in England, from the neighbourhood of which many of the prominent men of the colony had come. The park known as B. Common was reserved for the perpetual use of the community in 1634. Trade with the E. (China) began in 1787, and in the period 1856–59 B. was the undisputed centre for E. Indian goods, though it has since been outstript as regards this trade by New York. In more recent years the import of fruit from the Mediterranean has been an important feature of the trade of the port, together with an export trade of fish to Spain which dates from 1642. B. is the great wool-market of the U.S., its trade having of late years been stimulated by the growth of the carpet industry (at Lowell, Palmer, Clinton, &c.). The trade of B. with Australia is consequently growing very rapidly. B. itself is the seat of various and extensive manufactures, but has no leading speciality. The annual value of the exports is between £12,000,000 and £15,000,000, that of the imports generally somewhat less. Nearly all the great literary men of America —Longfellow, Lowell, Whittier, Emerson, Hawthorne, Holmes, Thoreau, Motley, and Prescott, have dwelt in or near B., most of these having been connected at some time with Harvard University, in the adjoining city of Cambridge. B. contains the medical branch of this University, has rich art collections, and is the seat of the Massachusetts Historical Society, founded in 1791. Birthplace of Dr. Benjamin Franklin. Shortest track to Liverpool, 2800 nautical miles. Mean temp., yr. 48.4° F., Jan. 27.4°, July 71.3°; mean rainfall (38 yrs.), 40.61 in. P. (1790) 18,038; (1820) 43,298; (1850) 136,881; (1870) 250,526; (1880) 362,839; (1890) 448,477.

Bouches-du-Rhône, maritime dep. in the S. of France, formerly part of Provence; bounded on the N. by the Durance (l. bk. trib. of the Rhone), and on the W. partly by the Rhone, partly by the westernmost branch of its delta; divided into three arrs., Marseilles, Aix, and Arles; cap. Marseilles. The surface is alluvial in the W., the region of the Rhone delta, mountainous in the E., where are many distinct groups and chains of mountains all belonging to the limestone zone of the Alps. The dist. enclosed by the delta of the Rhone is called La Camargue, and is low-lying, fenny, and intersected by numerous lagoons (*étangs*). Between the foot-hills of the Alps, the Étang de Berre, and the Canal d'Arles, extends the vast stony plain of La Crau, very uneven and covered with rounded pebbles identical with those drifted down by the Rhone and Durance. The outer border of this plain has been reclaimed, and is now either under culture or planted with wood, and for six (winter) months of the year the interior yields herbs which furnish good grazing for sheep, rendering their fleece of finer staple. The coast is low-lying and marshy in the W., in the E. very irregular and broken by several great gulfs. The otherwise fine climate is subject to frequent and sudden changes, and to visitations of a violent wind (*mistral*) from the NW. Of the surface one-eighth is wooded. A greater area is devoted to fruit-culture than to corn, and foremost among the products of the dep. are its olives, mulberries, almonds, and figs. The dists. producing the finest grain crops are the inland island formed by the lower Durance, the Rhone, and the Craponne canal, the upper portions of La Camargue, the Plan du Bourg (between La Camargue and La Crau), and the valley of the Huveaune. Metals are absent, but there are rich mines of lignite (principally between the Arc and the Huveaune). Salt-pans yield large quantities of salt, and there are hot springs at Aix. Area, 2026 sq. m. P. 630,600. See **France,** table, and **Marseilles.**

Boulge with Debach, eccles. par., Eng., Suffolk, near Woodbridge. P. <250.

Boulia, post-tn., Queensland, Burke co., 355 m. S. by W. Normanton. P. <1500.

Boulogne, tn., France, on the W. border of dep. Haute Garonne, 30 m. NE. by E. Bagnères de Bigorre. P. <2000.

Boulogne-sur-Mer (the ancient *Gesoriacum*, afterwards, from the 4th century, *Bononia*), a prosperous seapt. and watering-place, France, cap. arr., dep. Pas-de-Calais, on the English Channel, at the mouth of the Liane, with a station on the railway from Paris to Calais, 139 m. NNW. Paris, and 19 m. SW. Calais; 28 m. from Dover, 29 m. from Folkestone (passage 1½ hours). Lat. (of the column) 50° 44′ 32″ N., long. 1° 36′ 15″ E. It is divided into upper and lower towns; the first on a hill, with old ramparts commanding fine view. The lower, or new town, stretches from the upper town to the sea. B. has a pro-cathedral, a rich museum of antiquities, ethnography, and natural history, an industrial museum, and important cement, pen, and shoe factories. The port, which has recently undergone considerable improvement, and is now protected by the Carnot breakwater, 1½ m. long, admits the largest merchantmen. Good anchorage within the deep-sea harbour and extending to Cape Grisnez. There is a floating dock. B. is the chief French fishing-port, and is now an important emigrant port. Weekly mail-service to New York. Total value of exports about £12,000,000. The modern defences are forts outside the town. P. (1872) 39,700; (1891) 45,200.

Boulogne-sur-Seine, tn., France, a suburb of Paris, between the SW. angle of the city wall and the Seine. The **Bois de B.,** a beautiful park, laid out principally between 1853 and 1860, extends for 2½ m. N. from this town as far as Neuilly. P. (1891) 32,200.

Boulonais, a former div. of France, prov. Picardy, of which Boulogne was the cap., forming, until 1789, a general military government; now comprised in the dep. Pas-de-Calais.

Boulston, par., Wales, Pembrokeshire, 3 m. SE. Haverfordwest on an arm of Milford Haven. P. <250.

Bradford ('broad ford'), parl., mun., and co. bor., market-tn., and par., Eng., co. York, W. Riding, on affluent of the Aire, and branch of the Leeds and Liverpool canal, 8 m. W. Leeds, with stations on branch lines of the G. N. R., M. R., and L. & Y. R. It is situated at the junction of four valleys, all at one time well watered, and one drained by a stream, the B. Beck, which was probably at one time broad enough to justify the name of the town, though at present the water in the neighbouring hills is collected in reservoirs and transmitted to the town in pipes, so that there is no longer any stream of any consequence nearer than the Aire at Shipley. It has magnificent corporation buildings, an exchange, a fine public hall (St. George's), a large covered market, literary and scientific institutes, a technical college, an Independent College, and a large grammar school. B. is now the principal seat of the worsted yarn and stuff manufacture (for which it has been noted from a very early period) in England, and the great mart for the wool used in these fabrics; and has also silk velvet and plush works, and several large iron foundries. It has coal and iron in its vicinity, and blast-furnaces. B. has adopted nearly every public Act under which it is possible to effect local improvements; the corporation own five parks: Peel Park (56 ac.), Lister Park (56 ac.), Horton Park (39 ac.), Bowling Park (53 ac.), and Bradford Moor Park (15 ac.). Among other municipal establishments is a conditioning house (opened in 1891), for testing and giving certificates as to the weight, condition, and description of raw wool and woollen yarns and piece-goods. The manor belonged originally to John of Gaunt. During the parliamentary war the town underwent a siege. The bors. are coextensive, and comprise the townships Bradford, Manningham, Bowling, Horton, Bolton, Allerton, and Heaton. For parliamentary purposes the bor. is divided into a Central, an E., and a W. div., each returning one member. Market-days, M. and Th. Alt. 360 ft. Mean rainfall (1866–80), 42.8 in. P. (1851) 104,000; (1871) 146,000; (1891) 216,400. P. Par. 72,700.

Brahmani, riv., India, in the Chutiá Nágpur and Orissa divs. of Bengal formed by the union of the Koel and Sánkh, flows E. and unites with the Baitarani (*q.v.*).

Brahmaputra, or **Brahmapootra,** a large riv. of Asia, believed to have its source in about 31° N., 81½° E., in a lake at the E. base of the Kailas Hill, a ridge connecting the Gangri Mts. of Tibet with the N. range of the Himálayas, and separating the source of the B. from that of the Sutlej. All its upper course is on the whole from W. to E. in Tibet, where it is known as the Sanpo, Sangpo, Sanpu, Tsampu, or Tsanpu. At Tamjan, in 30° 21′ N., 82° 51′ E., the great road from the Manasarowar Lake to Lhasa, strikes the Brahmaputra, the Tibetan name of which, in this region, is Tamjan Khamba (Horse's Mouth); 40 m. E. of Tamjan, the river receives its first great affluent, the Chunago; it then flows SE. for 50 m., when it receives a still larger trib. in the Cachu Sanpo, 200 paces wide, and not much inferior in volume to the great river itself; 60 m. lower it receives the Charta Sanpo, 250 paces wide; still flowing eastward, it is joined at the distance of about 200 m. by the Raka Sanpo, estimated to be 200 paces wide at the point of junction. From this point it flows almost due E. for many miles. Passing Shigatze, 60 m. below its junction with the Raka Sanpo, it receives at Chusuljong, about long. 90° 40′ E., the Kichu Sanpo, the stream upon which Lhasa is built, the height above sea-level at the confluence being about 11,300 ft. Joined by many large affluents, it continues its eastward course until it arrives at about 94° E., where, near the fort of Gyala-Sindong (about 8000 ft.), it turns somewhat abruptly to

the SE., and in the course of about 170 m. in a direct line traverses the whole width of the Himalayas, emerging on the plains at the alt. of less than 400 ft. In this part of its course the river has not yet been fully explored, but it has been followed downwards as far as Onlet in about 28° 15′ N., 94° 55′ E., or to about 35 m. from the Assam frontier, up to which the Dihang or Dihong has been ascended, so that there is no longer any doubt left as to the identity of these two streams, though it was long contended by some that the Sanpo was probably the headstream of the Iráwadi. In the plains of Assam the B. sweeps round to the SW., receiving as it does so the Dibang or Dibong from the NE. and the Lohit from the E. A SW. or WSW. course is continued to the meridian of 90°, where it turns S. past the end of the Gáro Hills, and taking the name of the Jamuná, joins the Ganges. The total length of this river is estimated at about 1800 m., the area of its basin at about 360,000 sq. m. The discharge of the river at Dibrugarh in the upper part of the plains of Assam, about 800 m. from the sea, was found by Harman in March 1878, when the water was about its lowest, to be 116,115 cubic ft. per second. The river is too large and rapid to be fordable 140 m. from its source, or at any point farther down. On this river navigation is carried on at a higher level (13,500 ft. above the sea) than on any other stream in the Old or New World. In its lower course steamers can ascend as high as Dibrugarh, to which point a regular service is maintained from Calcutta, and a more frequent one from Goálandá (*q.v.*). Gauhátí is the limit of navigation for boats of large burden.

Brande, vil., Prussia, prov. Silesia, govt. Oppeln, dist. Falkenberg, with iron-mines. P.<2000.

Brandeis, or **Brandýs Nad Labem,** tn., Austria, Bohemia, on the l. bk. of the Elbe, 12 m. NE. by E. Prague. P.<4000.

Brandenburg, prov., Prussia, representing the ancestral dominions of the present reigning family. B. is situated in the N. German plain, the only small elevations being the Fläming in the SW. near Jüterbogk, and some isolated hills, viz., the Hagelsberg, Golmberg, Rückenberg, Mühlen, and Dubrow. The Oder (B. tribs., Warthe, Netze, Neisse, and Bober) and the Elbe (B. tribs., Havel, Spree, and Black Elster) are the principal rivers of this prov. B. has many small lakes, the most important being the Ruppin-, Müggel-, and Blankensee. It has also a number of canals connecting the river systems of Elbe and Oder, the principal ones being the Friedrich-Wilhelm, Ruppin, Finow, and Plauen canals. The cap. of B. is Berlin. Other important towns are Frankfort on the Oder, Potsdam, Kottbus, Spandau, Brandenburg, and Luckenwalde, and Frankfort on the Oder. The principal productions are agricultural products [**Germany**]; timber, game, fish, honey and wax, coals, lime, salt, gypsum, and potters' clay. Great attention is paid in various parts of the prov. to sheep-breeding, and the wool produced in the New-Mark is the finest in the Prussian dominions. Principal manufactures (outside of Berlin), war materials, iron and steel ware, spirits. The majority of the inhabitants are Germans, but some are of Wendish and some of French extraction. The considerable number of navigable rivers and canals greatly facilitate the trade of B. Next Berlin, Frankfurt on the Oder is the chief centre of commercial enterprise. The Mark ('Nordsachsen') was founded in 931 for protection against the Wends. Albrecht the Bear assumed the title of Margrave of Brandenburg in 1134. Frederick of Nuremberg became Margrave of B. in 1415; he was the first margrave of the House of Hohenzollern. See **Prussia,** table. [**H. G. S.**]

Brandenburg (originally **Brennaburg,** 'wooded mountain'), the old cap. of the Mark B., a town situated upon the Havel, about half way between Berlin and Magdeburg. There is an active transit trade; the chief manufactures comprise cloth, linen, hosiery, paper, and leather. P. (1871) 25,800; (1891) tn. P. 37,400; comm. P. 37,800. [**H. G. S.**]

Brazil (United States of), called at first 'Vera Cruz' and 'Santa Cruz,' then B., from a wood for dyeing. A republic in S. America, the fifth nation in the world for territorial extent, about thirty-six times the area of Great Britain, nearly one-half of S. America, extending from 5° 9′ 50″ N. (riv. Cotingo) to 33° 46′ 10″ S. (riv. Chuy, 2644 m.), and from 65° 1′ (riv. Javary) to 34° 44′ 56″ W. (riv. Goiama, 2707 m.), the easternmost point of America. It is divided into states, as shown in the table below (based on Reclus):—

States.	Area in sq. m.	Pop. (in Thousands) at Various Dates.	Pop. per sq. m.	Capitals.
Alagôas	22,584	459[1]	20	Maceió
Amazonas	664,210	81[1]	.12	Manaos
Bahia	164,650	1,870[2]	11.	Bahia
Ceará	40,251	953[1]	23.	Fortaleza
Espirito Santo	17,313	122[1]	7	Victoria
Federal dist.	538	516[2]	959	Rio de Janeiro
Goyaz	288,549	212[1]	.7	Goyaz
Maranhão	177,569	488[1]	2.7	São Luiz
Matto Grosso	536,700	80[1]	.15	Cuyabá
Minas Geraes	221,961	3,019[1]	14	Ouro Preto
Parahiba	28,855	497[1]	17	Parahiba
Paraná	85,455	301[2]	3.5	Curitibá
Pernambuco	49,575	1,111[1]	22	Pernambuco
Piauhy	116,529	267[1]	2.3	Therezina
Rio de Janeiro	26,614	1,054[3]	40	Nictheroy
Rio Grande do Norte	22,196	309[1]	14	Natal
Rio Grande do Sul	91,337	964[1]	11	Porto Alegre
Santa Catharina	28,633	236[1]	8	Desterro
São Paulo	112,312	1,306[1]	12.	São Paulo
Sergipe	15,093	233[1]	15	Aracajú
Pará	413,144	407[1]	1.	Pará
Total (in round numbers)	3,124,000	14 483	4.6	

[1] 1888. [2] 1890. [3] 1892.

Of the states named in this table, Pará, Maranhão, Piauhy, Ceará, Rio Grande do Norte are on the NE. coast, in that order from NW. to SE. (Piauhy, with only a short coast-line); Rio Grande do Norte has also a coast-line facing E., and S. of it in order are Parahiba, Pernambuco, Alagôas, Sergipe, Bahia, Espirito Santo, Rio de Janeiro, São Paulo, Paraná, Santa Catharina, and Rio Grande do Sul (the last three stretching to the W. frontier). The remaining states—Minas Geraes, Goyaz, Matto Grosso, and Amazonas—are entirely inland.

B. forms a triangle, having its base W. against Bolivia, Paraguay, Argentina, and Uruguay; a N. side against Peru, Ecuador, Colombia, Venezuela, the Guianas, and the Atlantic; a SE. side along the Atlantic, with a total seaboard of about 4000 m. The **political limits** of B. are not yet definitely settled. More than 100,000 sq. m. between rivs. Amazon and Oyapok are claimed by France. England claims some terrs. on rivs. Cotingo and Tacutu (Guiana). Colombia claims the country from Serra Aracacoara and riv. Tarahira to a line from S. Imeri to rivs. Japurá and Javary. **Orography.**—B. may be regarded as composed of an elevated region forming a sort of island, surrounded NE. and SE. by the Atlantic, NW. and W. by the valleys of the Amazon ('Amazonia') and the Paraguay-Parana, these rivers traversing what was probably an old Mediterranean Sea, which a 650 ft. rise of the Atlantic would again restore, and which is in part reproduced every year by floods. Brazilian Amazonia is nearly sixteen times as large as Great Britain. The valley in its lower part is bounded by the spurs of the Guiana Cordillera and the Brazilian Central Plateau, which in the centre of the basin are about 500 m. apart. The Amazonian slopes of Tumak-Humak, Cairrit (Guiana), Pacaraima, Parima, Imeri (Venezuela), and Aracoara (Colombia) belong to B. The S. foot-hills of these chains form the cataracts which intercept the navigation of the great affluents of riv. Amazon. The Brazilian 'island' is formed (1) by a large plateau above 1500 ft., probably connected in ancient times with the Guiana highlands through the site now occupied by the mouth of the Amazon, but now divided in deep valleys by the denuding waters of the Tapajoz, Xingu,

Tocantins, Parnahiba, São Francisco, flowing to the N., and the Paraguay-Paraná flowing to the S.; (2) by a mountainous region, the central knot of which stands around Rio de Janeiro under the names of Mantiqueira (general alt. 7000 ft., Itatiaia 10,340 ft.), Ibitipoca, Taipas, Tingua, Estrella, Orgãos (Pedra Assu, 7320 ft.), Bocaina, Canudos, Goitacazes. From this centre the following lines of highlands radiate: (*a*) SW. along the coast the 'Sea ranges,' Serras do Mar (Paranapiacaba, Ubatuba, Cubatão, 3300 ft. mean alt., Itatins, 4360 ft., Graciosa, 4900 ft.), Serra Geral, Tubarão, Herval, Tapes (in São Paulo, Paraná, Santa Catharina, Rio Grande do Sul); (*b*) NE. along the coast, Espigão, Aimorés (Capazão, 7200 ft.), Terra Dura (Espirito Santo, Bahia); (*c*) N. to the interior (Minas Geraes), Serra do Frio ('of the cold'), or Espinhaço ('backbone,' Caraça, 6400 ft., Piedade, 5800 ft., Itacolumí, 5700 ft., Itahira do Campo, 5000 ft.), Tacuaril, Itatiaiassu, Paraima, Diamantina (Itambé, 5981 ft.), Curumatahy, Bicudo, Matta da Corda, forming a highland mass whence waters flow in all directions to the Paraná, São Francisco, Jequitinhonha, Doce; and Serras de Grão Mogol, Branca, Boqueirão, Itiuba, Icatambira, Sincora, Chapada Diamantina, Tombador, Jacobina, between riv. São Francisco and the coast rivers; (*d*) NW. to the interior, Vertentes (Divisões), Canastra (4200 ft.), Tiririca, Pyreneos (Veadeiros, 5500 ft.), Paranan, Chapadão de Santa Maria, Tabatinga, Dois Irmãos, Borborema, Araripe, Ibiapaba, Mangabeira, between the basins of rivs. São Francisco, Paraná, Tocantins, Parnahiba, Jaguaribe, and Parahiba do Norte; Serras de Cayapo, Estrondo, between rivs. Tocantins and Araguaya; Serras, or rather *Campos*, *Taboleiros* of Santa Rita, Santa Martha, Cuyabá, Parexis (Araxá), between the central affluents of the Paraguay and Amazon, although all these last interior highlands, as well as the coast prolongations of the central knot, should more properly be considered as spurs produced by denudation on the edges of plateaux, with a mean alt. of 3000 ft. (*Chapadões*), between horizontal, elevated terraces (*Campos*, *Taboleiros*, 'trays,' *Geraes*). Almost all mountainous elevations in B. run NE. to SW., as if to meet the Andes in the extreme S. of the continent. **Hydrography.**—Four great basins receive almost all the interior waters of the Brazilian plateau and mountains: the Amazon and Parnahiba, in the N.; the São Francisco to the E.; the Paraguay-Paraná in the S. Almost all the important affluents of the Amazon rún through Brazilian terrs. from the Rio Napo to Jary, and from riv. Javary to the Tocantins. The Amazon runs through Brazilian terr. for more than 2000 m. (Tabatinga to Macapá). See **Amazon.** The Paraguay, with affluents Seputuba, São Lourenço, Jacuary, Aquidanana, belongs to B. from its source to the confluence of riv. Apa, and drains the S. slopes of Matto Grosso. From the highlands between Pyreneos de Goyaz and Mantiqueira-Espinhaço radiate all the most important rivers of E. B.: (1) N. Tocantins-Araguaya, draining Goyaz, Matto Grosso (E.), Maranhão (W.), and Pará; São Francisco, draining Minas Geraes, Bahia, Piauhy, Pernambuco, Alagôas, Sergipe; (2) S. Paraná-Paranahiba, draining Matto Grosso (S.), Goyaz (S.), Minas Geraes, São Paulo, Paraná, Santa Catharina. An isolated region in the extreme NE., and principally composed of Maranhão, Piauhy, Ceará, Rio Grande do Norte, Parahiba, and Alagôas, is drained by the Parnahiba (and rivs. Gurupy, Mearim, Itapicuru, Jaguaribe, Apody, Açu). The Uruguay, dividing Santa Catharina from Rio Grande do Sul, runs through Brazilian terr. to the Missiones country. Many rivers run more or less directly from the mountains to the Atlantic: Oyapok, Cassiporé, Cunaní, Amapu, Tartarugal, Aragurary (N. of Amazon), and Vasabarris (Sergipe), Itapicuru, Paraguassu, Contas (Bahia), Pardo Jequitinhonha, Mucury (Bahia and Minas Geraes), São Matheus, Doce (Espirito Santo), Parahiba (Rio de Janeiro), Iguapé (São Paulo and Paraná), Itajahy (Santa Catharina), Jacuhy-Vacacahy, Camaquam, emptying themselves in Lagoa dos Patos; and Jaguarão, Jacuary, Cebollati in Lagoa Mirim (Rio Grande do Sul). At many points in the plateau the great basins of the Amazon and La Plata are almost in actual communication by the Guaporé, Tapajoz, Xingu, Araguaya, with the Paraguay; the Paraná with the São Francisco, Tocantins. In the extreme NE. the middle Tocantins and São Francisco are actually united (about 10° S.) by the riv. Somno-Sapão. Lakes are numerous along the coast, some of them in direct communication with the sea (Rio de Janeiro Bay, and others), often in lines running more or less parallel to the sea-shore. Others are merely the enlargement of rivers. S. of Rio de Janeiro there are Lagoas do Tubarão (Santa Catharina), dos Patos (23–300 sq. m.), along with Lagoas de Peixe, Bujuru, Lavar, Junco, Verde, Pontal; Lago Mirim ('small'), along with Lagoas Itahim, Mangueira (Rio Grande do Sul), Mar Pequeno, 'little sea' (Trapandi Bay), at the mouth of riv. Iguapé (São Paulo), Rodrigues de Freitas, Camorim, Maricá; Saudade, Campello, Tay Grande, de Cima, Bananeiras, Saquarema, Feia, Carapebus, Jagruaroaba, Jutunahyba, Araruama (Rio de Janeiro); do Norte, Mauguaba, Pacas, Doce, Comprida (Alagôas). Villa Franca (35 m. by 4–6 m., Amazonia); Santa, Septe Lagoas, Sumidouro (riv. São Francisco); Uberába, Gaiba, Mandioré, Caceres (Xarayes, riv. Paraguay). **Geology.**—B. seems to have acquired its present general form after the end of Palæozoic times, and to be composed of the remaining elevations of a former very lofty system of mountains, the accumulation of the products of their disintegration covering the interior plateaux and the surrounding valleys, where an inland sea probably extended from the Orinoco to the estuary of La Plata. All the coast of B. is in process of upheaval. All the mountainous lands of B. are Archæan (laurentian gneiss from Rio de Janeiro to the extreme S., N., and W.; huronian schists, Itacolumites, in Minas Geraes, Espinhaço, with gold and diamonds *in situ*). All the Archæan zones are connected by Palæozoic rocks—between the Guianas and the Amazon, from Ceará to the Madeira (Devonian, Carboniferous), thence to S. Matto Grosso (Silurian, Devonian, Carboniferous), Goyaz, and the São Francisco; along the Serras do Mar (limestones and sandstones, coal-measures in Rio Grande do Sul). Mesozoic formations occupy all the central portion of B. surrounded by the older rocks, and some parts of the sea-coast from Bahia to Parahiba (Cretaceous, Triassic sandstone). Tertiary rocks appear from Ceará to the central parts of the Amazon valley (sandstones, clays, lignites on an inland sea) on the coast to Espirito Santo, in Minas Geraes, São Francisco valley, in Rio Grande do Sul. Quaternary rocks are principally represented by clays, gravels, sandstones, conglomerates, and granitic boulders, covering large tracts, with a false appearance of glaciation, but produced by the denudation that is still in progress; also the alluvial deposits where gold and diamonds are found; peat in Amazon and old lacustrine regions; cave deposits (tufa, lehm), with fossils representing the direct ascent of the existing characteristic Brazilian fauna (the Edentata: *Megatherium*, *Megalonix*, *Mylodon*, *Glyptodon*, *Chlamydotherium*, *Glossotherium*; and *Mastodon*, *Machairodus*, *Hydrochœrus*, *Loncheres*, *Hapalidæ*, *Rhea*). The decomposition of Archæan and volcanic rocks makes a red clay, *Terra roxa*, *Massapé*, of great fertility. Sandstones (*Tabayacú*, *Serpente de pedra*, 'stony serpent') and coral reefs are in process of formation along the coast (*pareceis*, *abrolhos*, *chapeirões*). **Mineral production.**—Gold was found (*Rios de Ouro*, 'gold rivers), in the 16th century, from Bahia, Rio de Janeiro, São Paulo, to the Andes. Many mining centres are now of small importance (Maranhão, Piauhy, Goyaz, Matto Grosso, Bahia, Santa Catharina, Paraná, Rio Grande do Sul). The great mines date from the 18th century (1719), and are to-day almost all in Minas Geraes (Serra do Espinhaço and from rivs. das Velhas and das Mortes to the Rio Doce). They produced, from the discovery to 1820, nearly one ton (£120,000,000); from 1850–70, £280,000; 1881-85, £120,000. Some of the principal mines in Minas Geraes—Matto Grosso, Paraná, Rio Grande do Sul—belong to English companies (the oldest, Congo Secco). All other metals, although plentiful, are almost entirely unexplored. Silver is found in Minas Geraes (Paracatú), iron in Minas Geraes (Itabira, Presidio, Gandarela, Areado, Corcunda, Ouro Preto), São Paulo (Ipanema: Araçoiába, Jucupiranguinha), Espirito Santo (Itapemerim), Paraná (Antonina), Santa Catharina (isl. of São Francisco), Rio de Janeiro, Rio Grande do Sul, Goyaz, Matto Grosso. Lead in Minas Geraes (Abaeté, Septe Lagoas), São Paulo (Iporanga); copper in Rio Grande do Sul (Caçapava, Lavras), and from riv. Tocantins (Pará) to riv. Jaguaribe (Ceará); Mercury in Paraná (Palmeira). There is a belt of coal running parallel to the coast from Tubarão (Santa Catharina) to São Jeronymo (2000 tons per year) and Jaguarão (Rio Grande do Sul). Lignite is met with in São Paulo, Santa Catharina, Minas Geraes; bituminous schists in São Paulo (Taubaté); peat in the bed of old lakes (São Paulo). In 1727–28 important diamond mines were discovered (total production, 12 million carats, £20,000,000; in 1867, £280,000; 1892, £40,000), which yielded some of the most celebrated in the world (the *Cruzeiro do Sul*, 254 carats). The most important are at Minas Geraes (Diamantina, Jequitinhonha valley). They were also found at Bahia (Chapada Diamantina, Lençoes, Sincorá, Cannavieiras), São Paulo (Rio Grande), Matto Grosso (high Paraguay). Garnets, topazes (Ouro Preto), corundums, beryls, amethysts, agates (Rio Grande do Sul). Very good kaolin in Minas Geraes (Marianna, São Caetano); saltpetre in Minas Geraes; rock-salt in Matto Grosso, Goyaz, and on the banks of the São Francisco; bitumen and mineral oil in São Paulo (Botucatu Taubaté) and Pernambuco (Petrolina); asbestos (Caéthé). Medicinal mineral waters in Minas Geraes (Alambary, Poços de Caldas, Caxambu, São Domingos de Araxá), Bahia (Itapicurú), Santa Catharina (Caldas de Béthancourt), in Goyaz (Santa Cruz). **Climate.**—Almost all B. is within the S. half of the Torrid Zone, between the isotherms of 79° and 67° F., only the 13th part (S.) in temperate regions (Santa Catharina, Rio Grande do Sul, parts of Paraná and São Paulo). Winds are: trade winds, winds produced by the interior-heated *Campos*, coast breezes, the *Pampeiro* from SW. Whenever the E. winds meet highlands, rains are abundant (the upper valley of the Amazon, the coast S. of Pernambuco, with more than 70 in.

of rain yearly). The interior plateau has a long dry season. At the mouth of the Amazon (as on all the coast), although rain may fall all the year, there is a special rainy season (Jan.–July; Belem, 68 in., 4 years; São Luiz, 96 in., 2 years); and a dry season (Aug.–Dec.). In the centre of Amazonas, the principal rainy months are April–June (Manaos, yearly rfall. 53 in.); dryest, Feb.–March, after the strong winds (Aug.–Feb.). In the far interior, rains are constant (principally in Feb.–July, and Oct.–Jan.). Humidity (Hygrom. 80–100) and heat, increasing from the sea to the Andes. Great inundations from Feb.–June, lesser ones from Oct.–Jan. In the valleys of the W. (Guaporé–Madeira and Paraguay) maximum temp. 105° F., mean temp. 78°. On the interior plateau the winds are NW. (warm), SE. (cold), or SW. (*Pampeiro*). One rainy and one dry season; great variation of temperature (Cuyabá, mean temp. 79°, minimum 44°, maximum 105°). The countries around Goyaz have 80½° highest mean temp., and 69½° lowest mean temp., the extremes in one day ranging sometimes from 40°–89°. The mountainous region (parts of Minas Geraes, Rio de Janeiro, and São Paulo) has different mean temps., according to altitude, from 60½°–68½°, with minimum 21½°. Snow sometimes falls on the higher lands. In the maritime tropical belt mean temp. decreases regularly from the Equator to the Tropic of Capricorn (81° F. Maranhão, 2 years; 74° Rio de Janeiro, 35 years); but the variation and extremes are greater in the latter (Maranhão, maximum 92°, minimum 69°; Rio de Janeiro, maximum 99°, minimum 50½°), with sometimes a difference of 20° between morning and noon (July 50°–73°, Jan. 69°–87°). The rainy season is Dec.–June in Maranhão, March–Aug. in Pernambuco, Oct.–April in Rio de Janeiro. There are periodical seasons of extreme dryness with no rain the whole year in the N. (Maranhão, Ceará, where the E. winds run parallel to the coast). In the extreme S. of B., parts of São Paulo, Paraná, Santa Catharina, and Rio Grande do Sul, the temperate climate approaches more nearly that of the Mediterranean (Europe). Mean temp. ranges from 62½°–70° F., with 25° minimum, and 100° maximum (Rio Grande do Sul, 66°). The **flora** may be broadly divided into three regions: (1) Equatorial (to 12°–15° lat., with predominating Palms, Anonaceæ, Sapotaceæ, Aristolochiaceæ, Guttiferæ, Meliaceæ, Cacteæ, Mimoseæ); (2) Tropical (to 25°–30° lat., with Melastomaceæ, Laurineæ, Piperaceæ, Proteaceæ, arborescent Ferns); and (3) Temperate. Equatorial forests have an enormous development in Amazonia (*Selva*, Hylœa), with the greatest known variety of palm-trees (*Mauricia, Copernicia, Attalea*), also *piassaba, Hancornia, Manihot, Hevea* (caoutchouc), *Theobroma cacao, Lecythis, Bertholletia* (Brazil nut), Cinchoneæ. From the sea to the Rio Negro and Madeira forests are intercepted by savannas. Thence the former prevail, almost without interruption, from N. to S. through 15°. In some parts (the *Caa-Igapó*) the forests are for months under water (sometimes 53 ft. deep), and there the trees have no epiphytes, and convolvulaceæ take the place of ligniferous creepers. In the unflooded parts (*Caa-Ete* or *Caa-Guaçu*) most trees are of the laurel type, more than 200 ft. high. Palms (*Attalea*) reach 56 ft.; some take climbing forms (*Euterpe gracilis, Desmoncus*). On the islands, willows predominate (*Salix Humboldtiana*), *Cecropia*, and *Arundo*. In the waters grow the *Victoria regia*. Tropical evergreen forests cover all lands exposed to the E. in the mountainous regions with an extraordinary variety of species: Ipecacuanha, *Pilocarpus, Dalbergia, Jacarandá* ('Rose Wood'), *Cæsalpinia* (Ibirapitanga, 'Páo Brazil'), *Copernicia, Araucaria* (Pinheiro), this last forming distinct forests. Trees are covered with epiphytes and creepers. The Alpine flora (4000–6000 ft.) is composed of *Velloxia, Amaryllis, Fuchsia*, Ericaceæ, Gerneraceæ, Orchideæ, *Erythroxylum*, Melastomaceæ, Acacieæ, Asclepiadeæ, Bromeliaceæ. The interior plateaux are covered with *Campos* never completely denuded of trees and forests, these sometimes very dense along the rivers. From 3°–15° lat. (20° on riv. São Francisco), *Campos* of Gramineæ and arborescent Cacteæ (*Cereus*, 23 ft. high, *Opuntia*) to 23°; great variety of forms (Melastomaceæ, Gentianeæ, arborescent Liliaceæ), to 30°; campos with forests of conifers (*Araucaria brasiliana; Ilex*, 'Mate-Thea,' on Serra da Mantequeira). In the *Campos abertos* there is little but grass (Gramineæ, *Heliotropium*) and ferns (*Pteris caudata*); *Caa-Tingas* are formed by shrubs and dwarf trees; *Caa-poeiras*, (*Capões, Caá-puans*) are tracts in which new forests have grown up in old clearings. Some are exclusively shrubby (*Carrascos, Carrasqueiros*, Melastomaceæ, Myrtaceæ, Malpighiaceæ, Bromeliaceæ); some others have only scattered groups of trees (*Taboleiros cobertos* or *Mattas abertas*), or masses of very dense bushes (*Campos serrados*), occasionally marshy with *Acacia* and *Copernicia* (*Alagadiços*). In the extreme S. (Rio Grande do Sul) forests are more uniform, without epiphytes or creepers, with ferns as undergrowth, and they acquire the appearance of European temperate forests. **Fauna.**—All B. forms a natural department in the neotropical zoogeographical province, the richest of all regions in generic types and families. Where plants become creepers and epiphytes, animals have to be climbers, or else they are adapted to live with little or no light under ground. Quadrumana with prehensile hind limbs or tails (Platyrhinc: *Mico, Saguim, Sapaju, Seimiri, Saitaia*) predominate, (Hapalidæ: 'Marmosets,' *Aletes*, 'Spider Monkeys,' *Mycetes*, 'Howling M.' Cebidae: *Cebus, Callitrix*, 'Squirrel M.,' *Eriodes, Lagothrix, Pithecia*). Edentates: Sloths (*Bradypus*), Armadilhos (*Dasypus*), Tatus (*Priodonta, Tatusia*), Tamanduá (*Myrmecophaga*). Rodentia: Capivara (*Hydochœrus*); Agoutis (*Dasyprocta*); Paca (*Cœlogenys*). Carnivora: Jaguar (*Felis onça*); Puna, Sucuarana (*F. concolor*), Maracaja (*F. pardalis*), Coati (*Nasua*); Kinkaju ('Arboreal Bear,' *Cercoleptes*). Entire families of birds, with about 200 genus, are confined to B. Many genus of humming-birds—(Trochilidæ) Tanagridæ, Tyrannidæ, Pipridæ, Turdidæ (*Sabid*). Many climbing-birds (Scansores), Psittacidæ (Parrots), Arainæ (Macaws), Toucans (Rhamphastidæ). The ostrich (Nhandu, *Rhea Americana*) does not go further now than S. Goyaz. Reptilia: principally Pythoninæ (Boa, Giboia; *Eunectes*, Sucuriú); Alligatoridæ, Crocodilidæ, and gigantic tortoises (*Podochemys*). B. is very rich in fishes (Clupeidæ: Pirarucú; Salmonidæ) and in insects. **Ethnography.**—The principal native races of B. may be reduced to the following groups, according to their languages and the districts where they dwell: (1) Gés, having migrated from E. to W., occupy the S. half of B. between Maranhão, riv. Xingu, and Rio Grande do Sul (Camacém, Aimorés, part of Botocudos, Pataxos, Sokleng, Bugres, Acroás, Caiapós, Acués); (2) Tupis (Guaranys) having migrated from Paraguay, by the coastlands, to the Amazon valley and Guiana, through the centre to the rivs. Xingu, Tapajoz; (3) Caribs (Carahibs), from the headwaters of rivs. Xingu and Tapajoz to the Guianas, and along the Amazon to the Japurá; (4) Nu-Aruaks or Maipures (Ipurina), from the E. Indies to the SW. (rivs. Japurá, Jurua, Purus, and S. to riv. Paraguay; (5) Goitaca (Vaitaca), from riv. Parahiba to the Rio Doce and Minas Geraes (part of Botocudos, Puris, or Coroados, Coropós), on the Parahiba (Ararís, Yomettos, Pittas); (6) Miranhas, between the Amazon and the Içá and Rio Negro; (7) Panos, on rivs. Ucayale and Madeira; (8) Caraya (Carajás, Carajahis), on the rivs. Xingu, Araguaya; (9) Guaicuru (Vaicuru), on the upper Paraguay. **Agriculture.**—Amazonas yields principally the products of its forests. Along the sea, from Ceará to São Paulo, are cultivated, according to altitude, sugar-cane, cassava (*mandioca*), (*milho, angú, cangica*), cotton, coffee, tobacco, cacao, cinchona. Sugar-cane and cotton predominate in the N. In the temperate zone of the S. all European plants, besides Paraguay 'tea' (*mate*), are cultivated. The vine is cultivated in Pernambuco, Minas Geraes, Goyaz, São Paulo, and Rio Grande do Sul. Cattle are reared principally in Goyaz, Matto Grosso, and Minas Geraes. **Manufacturing industries** are slowly progressing in comparison with the vast necessities they have to satisfy. The cost price is still excessive. Tariffs against foreign importation are very high (the mean 45 per cent. *ad val.*). Many manufactures have been established under their protection: cotton and silk in Pernambuco, Bahia, Minas Geraes, Rio de Janeiro, São Paulo; wool in Rio Grande do Sul, Paraná; iron in Minas Geraes, São Paulo, &c.; sugar and brandy (*cachaça*) in Pernambuco, Bahia, Minas Geraes, Rio de Janeiro, São Paulo, besides other preparations of agricultural produce. Some decorative artistic products are made with coloured feathers and insects. **Means of communication.**—The rivs. Amazon (6210 m.), São Francisco, Paraná, Paraguay, and those between the plateau and the Atlantic, are navigable for about 34,000 m. By the Amazon, Peru is reached (Iquitos); by the Madeira, Bolivia, and the NW. of Matto Grosso; by the Paraguay, the S. of Matto Grosso. The central part of B. will be made accessible by the railways, which are gradually extending from the E. coast. All the affluents of the Amazon are navigable for long stretches below and above the first cataracts. Regular steamers (English company with government subsidy) ply between Belem (Pará) and Tabatinga in 10 days (10 months by sail). Others in connection with those on the Jutahy, Jurua, Purus-Aquiri, Rio Negro, Madeira, Tapajoz, Xingu, Tocantins. Steamers on the navigable parts of almost all the important rivers, and on Lakes Mangaba, Patos, Mirim. In São Paulo the steam navigation of rivers is combined with the railways. Principal ports are Belem (Pará), Recife (Pernambuco, the nearest to Europe), Bahia, Rio de Janeiro, Santos, Porto Alegre, and Corumbá on the Paraguay. From Recife to Lisbon, 11 days; from B. to Africa, 2½ days (one week by sail). There are direct steam communications from Manaos (the capital of Amazonas) to Liverpool (since 1874, in 20 to 30 days), to New York (from 1882), to Rio de Janeiro (from 1884); and between Europe (mostly British lines) and Belem, São Luiz, do Maranham, Fortaleza, Recife, Maceió, Bahia, Victoria, Rio de Janeiro, Santos, Paranagua, Desterro, Porto Alegre. Coasting navigation (from November 1894) only permitted to Brazilian ships with Brazilian crews. Railways started from Rio de Janeiro (1854–56) and São Paulo. The two centres are now united (370 m.). From there they
